On Page 23, the bill directs the FDA to spend its registration fees on food safety activities. The bill explicitly provides that food safety activities include conducting inspections. This money will be diverted from the inspection and the protection of the American people, and it will not be available for the activities of Food and Drug. It might give relief to somebody, and it might even be somebody who needs relief, but there's no standards whatsoever given as to who will get the money, how it will be spent, on what, and for what purposes.

The bill requires the FDA to adhere to a rigorous mandatory inspection schedule based on risk. This bill does nothing to enhance that, but it takes money away from the protection of the American consumer by having proper inspections at points of entry or inspections in other countries. That is a bad situation and one which is going to seriously hurt the safety of the American public.

The bill is carefully crafted to ensure that the American Food and Drug Administration will protect American consumers and American manufacturers, processors, growers, and the farmers of this Nation. It enables them to focus on where there is danger, and it enables them to provide the kind of protection that all of those entities need, especially the farmers, the processors and the producers, because today the broad authority that Food and Drug has is no longer sufficiently focused to enable the correct and direct focus on the dangers to the American public.

The bill gives Food and Drug modern authorities to safeguard the food supply, but it gives them the money to do the things that they have to do to protect the American industry and the American-consuming public.

This legislation diverts 50 percent of the receipts that we would get under the legislation from the protection both of producers and from the protection of the American-consuming public.

The bill has provisions that ensure that FDA cannot use its ability to stop distribution recall or to detain or to prohibit or to restrict the movement of food. The Food and Drug Administration will have to use modern authorities in a very careful way, in a way which has the support of the consuming public and of the people whose names and whose organizational structures I mentioned earlier.

We have found out what an inadequately funded FDA does. This legislation will ensure that those evils will persist. The amendment reduces funds to FDA. It thereby increases the likelihood of outbreaks and of danger to the health of the American people and of hurt to the American producers, growers, and farmers.

This is a bad amendment. It is an amendment which threatens the support of industry for this legislation by diverting the money into unwise, unnecessary and undue expenditures which threaten the basic purposes of the legislation. It is bad legislation, and it will worsen what is a carefully thought-out bipartisan bill, which has been produced in consultation, not just with the industry but with the Agriculture Committee, with the administration and with both the Department of Agriculture and the Food and Drug Administration.

I urge my colleagues to reject this amendment, which wastes money and which jeopardizes the life, safety and the well being of American consumers and the well being of American farmers, agriculture, and producers. It's a bad, bad motion to recommit.

I urge the House to reject it.

The SPEAKER pro tempore. The Chair was mis-advised that the gentleman from Oklahoma had already explained the motion.

The proponent of the motion is entitled to 5 minutes and is recognized.

Mr. LUCAS. Mr. Speaker, once again, let me express my gratitude to the chairman emeritus and to the ranking member of the Energy and Commerce Committee. They have both put a great deal of effort into developing this very important piece of legislation, and they are to be commended for their attempts to accommodate the concerns raised by members of the minority party of the Agriculture Committee.

During the past few days, I have discussed many of the more objectionable provisions of this legislation. Today, I am hopeful and optimistic, in offering this motion to recommit, that we can at the very least address two of the bill's most glaring omissions.

Specifically, I would like to focus on what I believe to be a lack of accountability on the part of the Food and

Drug Administration. The legislation before us provides the agency with numerous punitive authorities as well as a new source of revenue charged to people wishing to be in the food business, but it does not require the FDA to spend one additional penny on the inspection of food.

I am hopeful that my colleagues will agree that this is something that we can and should address in this bill as it leaves the House. Therefore, I propose that FDA spend a portion of the funds collected as registration fees for additional food inspections in the United States of America. Let's face it, if we are going to call this bill the Food Safety Enhancement Act, we should probably have something in here that actually enhances food safety.

Now, another issue that is very troubling and the one we hear repeatedly from farm groups is the issue of indemnification. I would point out that the chairman emeritus and the ranking member explained that concern in a Dear Colleague that was sent out last night. The issue of indemnification can be illustrated with the example of what happened to tomato crops in 2008.

The FDA mistakenly attributed an outbreak of salmonella to tomatoes. It was later discovered that contaminated peppers were the actual source of the illness. However, the discovery came after a large part of the 2008 tomato crop was destroyed, and the industry suffered, perhaps, \$100 million in losses as a result.

I appreciate that Mr. DINGELL and Mr. BARTON feel that the passage of this bill will reduce the number and the severity of these mistakes in the future. I truly hope they are right. We must not kid ourselves into believing that the FDA will not make such mistakes in the future. Wrongly implicating agriculture products to food-borne disease outbreaks can cause severe economic losses to farmers and ranchers, who can ill afford them. Unfortunately, this legislation does not address this real concern.

We attempt to address this omission in our motion to recommit. We propose that some of the money coming from the registration fees be set aside for preemptive purchase products from producers. Remember, these purchases only result from direct government action. These changes will not fix everything that we feel to be wrong with the legislation, but they will address some of the more significant problems.

Nothing in this motion adds to the cost of the bill, but it does strengthen FDA accountability, and it guarantees enhanced food safety inspection.

Once again, let's direct that half the money goes to food inspection. Let's make sure the other half of this registration money is available to correct the mistakes that the FDA may make.

I urge all of my colleagues to support this motion. Let's clean up two of the

biggest problems, and let's move forward. I urge all of my colleagues to support this motion once again.

Mr. Speaker, I yield back the balance of my time.

Mr. DINGELL. Mr. Speaker, I understand that the majority on the committee that handles the bill is entitled to close; is that correct?

The SPEAKER pro tempore. That is ordinarily correct.

Mr. DINGELL. Then I ask unanimous consent that I be permitted to proceed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

Mr. LUCAS. I reserve the right to object, Mr. Speaker.

Mr. Speaker, could I note for the record: Has the gentleman not used his 5 minutes?

The SPEAKER pro tempore. Because recognitions to explain and oppose the motion were conferred out of sequence, if there is no objection, the gentleman from Michigan will be recognized for 1 minute to close the debate.

There was no objection.

Mr. DINGELL. Mr. Speaker, I will simply observe as follows: the motion to recommit asserts that the bill does not require FDA to spend one additional penny on the inspection of food. That is totally false.

On page 23 of the bill, it directs FDA to spend its registration fees on food safety activities. On line 18, the bill explicitly provides that food safety activities include conducting inspections. The bill also requires FDA to adhere to a rigorous mandatory inspection schedule based on risk.

I yield now to the distinguished gentleman from Georgia (Mr. SCOTT).

Mr. SCOTT of Georgia. Mr. Speaker, for the remaining seconds, the bill on two points:

It violates the rule, and it will weaken the FDA program. This bill inspects the food processing plants at an increased rate, far more than it is doing now. Again, it violates the rule, and it weakens the FDA's program. On those grounds, we reject this motion to recommit.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to recommit.

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. LUCAS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

Pursuant to clause 8 and clause 9 of rule XX, this 15-minute vote on the motion to recommit will be followed by

5-minute votes on passage of H.R. 2749, if ordered, and motions to suspend the rules with regard to:

H.R. 1752, if ordered;

H. Res. 535, if ordered;

H. Res. 550, if ordered.

The vote was taken by electronic device, and there were—yeas 186, nays 240, not voting 7, as follows:

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (during the vote). There are 2 minutes remaining on this vote.

□ 1802

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Stated against:

Mr. AKIN. Mr. Speaker, on rollcall No. 680, had I been present, I would have voted “no.”

PERSONAL EXPLANATION

Mr. ADLER of New Jersey. Mr. Speaker, on rollcall Nos. 679 and 680, had I been present, I would have voted “no” on 679 and “yes” on 680.

PERSONAL EXPLANATION

Mr. GRAYSON. Mr. Speaker, on rollcall Nos. 679 and 680, I missed these votes unavoidably because of a meeting with the White House Chief of Staff at the White House, and heavy traffic from the White House to the Capitol. Had I been present, I would have voted "nay" on 679 and "aye" on 680.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Curtis, one of its clerks, announced that the Senate has passed with an amendment a bill of the House of the following title:

H.R. 3183. An act making appropriations for energy and water development and related agencies for the fiscal year ending September 30, 2010, and for other purposes.

The message also announced that the Senate insists upon its amendment to the bill (H.R. 3183) "An act making appropriations for energy and water development and related agencies for the fiscal year ending September 30, 2010, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. DORGAN, Mr. BYRD, Mrs. MURRAY, Mrs. FEINSTEIN, Mr. JOHNSON, Ms. LANDRIEU, Mr. REED, Mr. LAUTENBERG, Mr. HARKIN, Mr. TESTER, Mr. INOUE, Mr. BENNETT, Mr. COCHRAN, Mr. MCCONNELL, Mr. BOND, Mrs. HUTCHISON, Mr. SHELBY, Mr. ALEXANDER, and Mr. VOINOVICH, to be the conferees on the part of the Senate.

The message also announced that the Senate has passed bills of the following titles in which the concurrence of the House is requested:

S. 1391. An act to authorize appropriations for fiscal year 2010 for military activities of the Department of Defense, to prescribe military personnel strengths for such fiscal year, and for other purposes.

S. 1392. An act to authorize appropriations for fiscal year 2010 for military construction, and for other purposes.

S. 1393. An act to authorize appropriations for fiscal year 2010 for defense activities of the Department of Energy, and for other purposes.

PROVIDING FOR HOUSE OF REPRESENTATIVES STAFF PAYDAY CHANGES

The SPEAKER pro tempore. The unfinished business is the question on suspending the rules and passing the bill, H.R. 1752, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from California (Mrs. DAVIS) that the House suspend the rules and pass the bill, H.R. 1752, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. LATHAM. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. This is a 5-minute vote.

The vote was taken by electronic device, and there were—ayes 282, noes 144, not voting 7, as follows:

NOT VOTING—7

Baird	McCarthy (NY)	Sanchez, Loretta
Berman	Murtha	
Linder	Salazar	

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (during the vote). There are 2 minutes remaining in this vote.

□ 1811

Mr. FORTENBERRY changed his vote from "no" to "aye."

So (two-thirds not being in the affirmative) the motion was rejected.

The result of the vote was announced as above recorded.

COMMENDING THE CONGRESS OF LEADERS OF WORLD AND TRADITIONAL RELIGIONS

The SPEAKER pro tempore. The unfinished business is the question on suspending the rules and agreeing to the resolution, H. Res. 535, as amended.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from American Samoa (Mr. FALEOMAVAEGA) that the House suspend the rules and pass the resolution, H. Res. 535, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the resolution, as amended, was agreed to.

A motion to reconsider was laid on the table.

RECOGNIZING DAY OF THE AFRICAN CHILD

The SPEAKER pro tempore. The unfinished business is the question on suspending the rules and agreeing to the resolution, H. Res. 550.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from American Samoa (Mr. FALEOMAVAEGA) that the House suspend the rules and agree to the resolution, H. Res. 550.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the resolution was agreed to.

A motion to reconsider was laid on the table.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 848

Mr. ADLER of New Jersey. Mr. Speaker, I ask unanimous consent to be removed as a cosponsor of H.R. 848, the Performance Rights Act.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

AMERICANS NEED HEALTH CARE FACTS FROM DEMOCRAT-MEDIA ALLIANCE

(Mr. SMITH of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of Texas. Mr. Speaker, poll after poll shows that Americans reject the administration's health care plan, but the national media continue to downplay the results of their own polls.

For example, in its report on the new NBC/Wall Street Journal poll, NBC itself failed to mention that more people disapprove than approve of the way the President is handling health care.

President Obama says his health care plan is deficit neutral, but the non-partisan Congressional Budget Office says the legislation will substantially increase the deficit.

President Obama says Americans' health care plans will cost less, but the CBO Director says the legislation will cost more, much more.

President Obama says "if you like your current health care plan, you can keep it," but an independent study found that most Americans will lose their current health care plan.

Mr. Speaker, Americans need the facts on health care, not the biased news from the Democrat-media alliance.

□ 1815

PAYGO

(Mr. PETERS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PETERS. Mr. Speaker, I rise today as a proud cosponsor of H.R. 2920, the Statutory Pay-As-You-Go Act of 2009. This important legislation will establish mandatory pay-as-you-go budget discipline, rein in deficit spending, and reduce the national debt.

In the 1990s, pay-as-you-go budget discipline was enshrined in law, and it led to record budget surpluses. After PAYGO was originally codified in 1990, total Federal spending as a percentage of GDP decreased each year from 1991 through 2000. After Congress let PAYGO expire in 2002, projected surpluses of \$5.6 trillion were transformed into record deficits. Passing the Statutory Pay-As-You-Go Act of 2009 will require Congress to make the tough choices necessary to get unacceptable high budget deficits under control and avoid passing today's costs onto our children, grandchildren, and future generations.

Families make tough budget decisions to live within their means, and the government should be forced to do the same. I urge passage of the Statutory Pay-As-You-Go Act of 2009.

HEALTH CARE

(Mr. THOMPSON of Pennsylvania asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. THOMPSON of Pennsylvania. Mr. Speaker, I agree with President Obama when he says there's a need for affordable health care.

Mr. Speaker, a trillion-dollar plan is not affordable, particularly when it leaves millions of Americans without insurance.

The Republican health care plan offers a solution for all Americans for health care access, affordability, quality, and choice. Under the GOP plan, medical decisions will be made by patients and their doctors, not a government bureaucrat such as the Democrat-proposed Health Insurance Commissioner.

The GOP plan provides for guaranteed access regardless of preexisting conditions.

The Republican plan lets Americans who like their coverage keep it.

It expands Community Health Centers that are critical points of access that provide health care services based on an affordable sliding scale.

Mr. Speaker, the Republican plan reins in junk lawsuits and will bring down health care costs. We need health care access, affordability, quality, and choice that Americans deserve. Americans deserve the Republican health care plan.

THE FORECLOSURE CRISIS

(Ms. TITUS asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. TITUS. Mr. Speaker, during the upcoming work session, I will return to southern Nevada, which is ground zero for the foreclosure crisis that triggered our current recession. During my time at home, I will be working with constituents who need help with their mortgages, many in homes that are underwater.

Families throughout my district are struggling to make their mortgage payments, and one out of every 16 homeowners in Nevada has faced a foreclosure filing. Folks in District Three clearly need assistance to stay in their homes and avoid foreclosures.

Tonight in kitchens across the country and in every congressional district, families worry about losing the roof over their heads. I'm sure that every one of my colleagues in Congress will hear from such families during the upcoming district work period. I hope they will bring their stories back to Washington. And when Congress reconvenes in September, let us place a renewed focus on helping families stay in their homes and providing them the assistance they need.

There is much more that Congress can and should do, and I commit to working on this issue when we come back after Labor Day. I hope you will all join me in this effort.

IRAN'S MARTYRS OF FREEDOM

(Mr. MCCOTTER asked and was given permission to address the House for 1 minute.)

Mr. MCCOTTER. Mr. Speaker, recently we have seen the end of Islam's 40-day period of mourning for the martyrs of freedom that were killed on June 20, Neda Soltan, Taraneh Mousavi.

And what did the regime do in response? They prevented people from attending their grave sites. They removed people who wanted to lay flowers. And in the end, as reported by msnbc.com, Brigadier General Abdollah Araghi warned against any further gatherings: "We are not joking. We will confront those who will fight against the clerical establishment."

Yes, Mr. Speaker, they will fight against rape and murder, martyrs such

as Neda and Taraneh. But the world will mourn these martyrs, and soon Iran and all the world will rejoice when these murderers are brought to justice and the Iranian people breathe free.

UTMB EMERGENCY ROOM OPENING

(Mr. OLSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. OLSON. Mr. Speaker, I rise to pay tribute to the folks in Galveston, Texas, who have worked to make the reopening of the University of Texas Medical Branch emergency room possible.

Last September, Hurricane Ike hit Galveston, swamping parts of the island and forcing thousands of residents to evacuate. The emergency room's floor is at one of the highest physical elevations on the island, more than 30 feet above sea level. Yet the power of Ike's damage delayed the reopening of the emergency room until last week. Southeast Texas lost one of three level one trauma centers, putting a strain on the whole region.

But thanks to tremendous community support, the emergency room will begin receiving patients and eventually offer the same level of trauma care it did before. Every minute counts in a life-threatening emergency. And the reopening of this facility will help provide timely emergency medical services to the area residents.

As a member of the House Homeland Security Committee, I am committed to continue to do all I can to ensure complete recovery for the impacted areas of Texas by Ike. This is a tremendous step forward for the recovery of Galveston and the neighboring communities devastated by Hurricane Ike.

I wish UTMB, its doctors, its nurses, and its staff a successful future. Welcome back.

THE 75TH ANNIVERSARY OF CONTINENTAL AIRLINES

(Ms. JACKSON-LEE of Texas asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. JACKSON-LEE of Texas. Mr. Speaker, I rise to celebrate the 75th anniversary of my hometown airline, Continental Airlines. I would like to thank all of the employees, past and present and those in the future, who have continued to serve our community and the Nation. We thank them for their original beginnings with great history and great leadership.

I'm reminded of one of their transfer names, Eastern Airlines. I'm reminded, of course, of the uniforms and the admiration that children would give the pilots and flight attendants. We still do that today.

Continental Airlines is in my district, and as well the Bush Interconti-

ental Airport, which is their hub airport.

Let me thank them for the many economic dollars they provide to the fourth largest city in the Nation, Houston, Texas, and as well let me congratulate them as they move forward in a new structure that will allow more diversity, more competition, but stronger airline services and customer relations.

Thank you to the leadership of Continental Airlines and to their CEO, Larry Kellner, and all of the hardworking employees. You've had 75 years. You should be proud.

THE PUBLIC HEALTH INSURANCE OPTION

(Mr. LEVIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEVIN. Mr. Speaker, the voluntary public health insurance option is an important part of health care reform for a number of reasons.

First, the public plan will provide a competitor for private plans that will help make the entire system more efficient and help drive down prices for everyone. Second, it provides assurance to all Americans that there will be an affordable, comprehensive health insurance plan available to them no matter where they live or work. In many places there are currently only one or two insurers people can choose from.

Third and of vital importance, the public plan will have the ability to test and implement innovative methods of payment that have the potential to make the entire health care system more efficient and patient centered.

The current fee-for-service structure is a fragmented system. No provider will be required to participate in the public plan, but for those who do, it's important for the public plan to be able to implement effective payment reforms for all participating providers. Allowing individual providers to negotiate their own rates and their own methods of payment with the plan will slow the vital process of moving us towards a more efficient, integrated health care system that serves both the patients and the taxpayers.

Now is the time to act on health care reform, including a robust public health insurance option.

HONORING J.D. WILLIAMS

(Mr. TOWNS asked and was given permission to address the House for 1 minute.)

Mr. TOWNS. Mr. Speaker, I rise to recognize the loss of J.D. Williams, who expired 3 days ago.

J.D. Williams was a very special person. He worked with the young people, taught so many how to play baseball. And, of course, he was an outstanding athlete himself.

He was always giving of himself to help others. I recall as a youngster how he would organize and go into his pocket and take money out to be able to assist young people in buying uniforms and being able to move from one location to another to be able to play different teams.

He was just so committed to developing young people. He worked to get them into college, and, of course, he had a relationship with many coaches around the country. And they would respect the fact that if J.D. Williams said that you could play, you would be able to play. And that's the kind of relationship that he had.

Of course, let me say to his family in times like these you can be proud of the accomplishments of J.D. Williams, even though he's no longer with us.

THE NEW BLACK PANTHER PARTY CASE

(Mr. WOLF asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WOLF. As a strong supporter of the Voting Rights Act, I've been deeply troubled by this Department of Justice's questionable dismissal of an important voter intimidation case in Philadelphia, where I grew up, and my dad was a policeman. My commitment to voting rights is unquestioned. In 1981 I was the only member, Republican or Democrat, of the Virginia delegation in the House to vote for the Voting Rights Act, and was harshly criticized by the editorial page of the *Richmond Times Dispatch*.

And when I supported its reauthorization in 2006, I was again criticized by editorial pages. I have grave concerns about the Department's dismissal of this case. Congress must use its oversight to maintain the integrity of the voting system. Oversight is needed now more than ever given the disclosure today in the *Washington Times* that the Department's case against the New Black Panther Party was dismissed over the objections of career attorneys on the trial team as well as the chief of the Department's Appellate Division.

The politicization of the Justice Department by Eric Holder against career employees is absolutely wrong, and the Congress ought to get to the bottom of this.

Mr. Speaker, as a strong supporter of the Voting Rights Act, I have been deeply troubled by this Department of Justice's questionable dismissal of an important voter intimidation case in Philadelphia—where I grew up and my father was a policeman.

My commitment to voting rights is unquestioned. In 1981, I was the only member—Republican or Democrat—of the Virginia delegation in the House to vote for the Voting Rights Act and was harshly criticized by the editorial page of the *Richmond Times Dispatch*, and when I supported its reauthorization in 2006, I was criticized again by editorial pages.

I have grave concerns about the department's dismissal of this serious case. Above all, Congress must use its oversight to maintain the integrity of our voting system.

All the documents surrounding this case need to be made public and all the questions asked in my July 22 letter to Attorney General Holder should be answered. The American people deserve nothing less than full transparency.

Oversight is needed now more than ever given the disclosures in today's Washington Times that the department's voter intimidation case against the New Black Panther Party was dismissed over the objections of career attorneys on the trial team—as well as the chief of the department's Appellate Division.

The politicization of the Justice Department by Eric Holder against career employees is absolutely wrong and the Congress ought to get to the bottom of this.

Sources within the department stated that Associate Attorney General Thomas Perrelli, a political appointee, overruled career attorneys in dismissing the case.

According to the Appellate Division memos first disclosed in the Times article, Appellate Chief Diana K. Flynn said that "the appropriate action was to pursue the default judgment" and that Justice had made a "reasonable argument in favor of default relief against all defendants."

Flynn's opinion was shared by a second Appellate Division official, Marie K. McDerry, who stated, "The government's predominant interest is preventing intimidation, threats and coercion against voters or persons urging or aiding persons to vote or attempt to vote."

Given these troubling disclosures, I call on the attorney general to re-file this civil suit and allow a ruling from the judge based on the merits of the case—not political expediency.

It is imperative that we protect all Americans' right to vote, which I consider a sacrosanct and inalienable right of any democracy. The career attorneys and Appellate Division within the department sought to demonstrate the federal government's commitment to protecting this right by vigorously prosecuting any individual or group that seeks to undermine this right. I hope that the political leadership will follow their example and allow this case to go forward again.

[From the Richmond Times Dispatch—Editorial, October 15, 1981]

A MORE OFFENSIVE LAW

A recent news story from Washington reported that Tenth District Republican Rep. Frank Wolf "didn't want to talk about" his vote in favor of extending the odious federal Voting Rights Act. No wonder. There is absolutely no way that he can justify his endorsement of a measure that officially brands Virginia a second-class state and denies Virginians some of their most precious political rights. Mr. Wolf was the only Virginia congressman to support the bill when it moved through the House of Representatives last week.

Grossly unfair in its present form, the Voting Rights Act would be made even more offensive by changes the House approved. The despicable pre-clearance provision, which now is subject to periodic reconsideration, would become a permanent feature of the law. Under this provision, covered states and localities must obtain federal approval of

any law, action or decision that might affect the voting rights or strength of minorities, especially blacks. The House's new version outlines a procedure by which a state might, theoretically, purify itself and gain exemption from the act, but the process is so cumbersome and vague that it is likely to prove to be worthless. One important aspect of the act that would remain unchanged in the House version is its inequitable selectivity. The law's harsh impact would continue to fall mainly on the South. Efforts to persuade the House to apply the act uniformly throughout the nation were unsuccessful.

Indeed, the House was unwilling to make even the slightest gesture toward fairness. As the bill had emerged from the House Judiciary Committee, it provided that any state or locality seeking to obtain exemption from its coverage would have to get the approval of the United States District Court in Washington. Sixth District Republican Rep. M. Caldwell Butler, one of the principal leaders of the valiant but vain fight against the act offered an eminently sensible amendment that would have permitted states and localities to sue for relief in a local federal district court. The necessity to go to Washington, he argued, would be so costly and cumbersome that many communities would be discouraged from even attempting to qualify for exemption. But the House, unmoved, rejected his proposal.

Not in many years has Virginia followed the kinds of restrictive voting practices that originally inspired the Voting Rights Act. Not in many years has Virginia attempted to abridge the right of its black citizens to vote. Yet if the House bill prevails Virginia, and most of the South, will continue to be treated as wards of the federal government and denied political rights that the rest of the nation freely exercises, and Mr. Wolf will be partly to blame. Fortunately, the House bill faces considerable opposition in the Senate. And Virginia's two representatives in that body—Senators Harry F. Byrd Jr. and John Warner—can be counted on to support, enthusiastically and aggressively, efforts to transform the Voting Rights Act from a selectively punitive measure into a fair and reasonable law.

[From the Washington Times, July 30, 2009]
JUSTICE APPOINTEE OK'D PANTHER REVER-
SAL—CAREER LAWYERS PUSHED FOR SANCTIONS IN CASE

(By Jerry Seper)

Associate Attorney General Thomas J. Perrelli, the No. 3 official in the Obama Justice Department, was consulted and ultimately approved a decision in May to reverse course and drop a civil complaint accusing three members of the New Black Panther Party of intimidating voters in Philadelphia during November's election, according to interviews.

The department's career lawyers in the Voting Section of the Civil Rights Division who pursued the complaint for five months had recommended that Justice seek sanctions against the party and three of its members after the government had already won a default judgment in federal court against the men.

Front-line lawyers were in the final stages of completing that work when they were unexpectedly told by their superiors in late April to seek a delay after a meeting between political appointees and career supervisors, according to federal records and interviews.

The delay was ordered by then-acting Assistant Attorney General Loretta King after

she discussed with Mr. Perrelli concerns about the case during one of their regular review meetings, according to the interviews.

Ms. King, a career senior executive service official, had been named by President Obama in January to temporarily fill the vacant political position of assistant attorney general for civil rights while a permanent choice could be made.

She and other career supervisors ultimately recommended dropping the case against two of the men and the party and seeking a restraining order against the one man who wielded a nightstick at the Philadelphia polling place. Mr. Perrelli approved that plan, officials said.

Questions about how high inside the department the decision to drop the case went have persisted in Congress and in the media for weeks.

Justice Department spokeswoman Tracy Schmaler told The Washington Times that the department has an "ongoing obligation" to be sure the claims it makes are supported by the facts and the law. She said that after a "thorough review" of the complaint, top career attorneys in the Civil Rights Division determined the "facts and the law did not support pursuing the claims against three of the defendants."

"As a result, the department dismissed those claims," she said. "We are committed, to vigorous enforcement of the laws protecting anyone exercising his or her right to vote."

While the Obama administration has vowed a new era of openness, department officials have refused to answer questions from Republican members of Congress on why the case was dismissed, claiming the information was "privileged," according to congressional correspondence with the department.

Rep. Frank R. Wolf, Virginia Republican and a senior member of the House Appropriations Committee who has raised questions about the case, said he also was prevented from interviewing the front-line lawyers who brought the charges.

"Why am I being prevented from meeting with the trial team on this case?" Mr. Wolf asked. "There are many questions that need to be answered. This whole thing just stinks to high heaven."

Ms. Schmaler said the department has tried to cooperate with Congress. "The Department responded to an earlier letter from Congressman Wolf in an effort to address his questions. Following that letter, the Department agreed to a meeting with Congressman Wolf and career attorneys, in which they made a good-faith effort to respond to his inquiries about this case. We will continue to try to clear up any confusion Congressman Wolf has about this case."

Ms. King and a deputy are expected to travel to Capitol Hill on Thursday to meet behind closed doors with House Judiciary Committee Chairman John Conyers Jr., Michigan Democrat, and Rep. Lamar Smith of Texas, the top Republican on the panel, to discuss continuing concerns about the case.

The department also has yet to provide any records sought by The Times under a Freedom of Information Act request filed in May seeking documents detailing the decision process. Department officials also declined to answer whether any outside groups had raised concerns about the case or pressured the department to drop it.

Kristen Clarke, director of political participation at the NAACP Legal Defense Fund in Washington, however, confirmed to The Times that she talked about the case with lawyers at the Justice Department and

shared copies of the complaint with several persons. She said, however, her organization was "not involved in the decision to dismiss the civil complaint."

She said the National Association for the Advancement of Colored People has consistently argued that the department should bring more voter intimidation cases, adding that it was "disconcerting" that it did not do so.

Mr. Perrelli, a prominent private practice attorney, served previously as a counsel to Attorney General Janet Reno in the Clinton administration and was an Obama supporter who raised more than \$500,000 for the Democrat candidate in the 2008 elections. He authorized a delay to give department officials more time to decide what to do, said officials familiar with the case but not authorized to discuss it publicly. He eventually approved the decision to drop charges against three of the four defendants, they said.

At issue was what, if any, punishment to seek against the New Black Panther Party for Self-Defense (NBPP) and three of its members accused in a Jan. 7 civil complaint filed in U.S. District Court in Philadelphia.

Two NBPP members, wearing black berets, black combat boots, black dress shirts and black jackets with military-style markings, were charged in a civil complaint with intimidating voters at a Philadelphia polling place, including brandishing a 2-foot-long nightstick and issuing racial threats and racial insults. Authorities said a third NBPP member "managed, directed and endorsed the behavior."

None of the NBPP members responded to the charges or made any appearance in court.

"Intimidation outside of a polling place is contrary to the democratic process," said Grace Chung Becker, a Bush administration political appointee who was the acting assistant attorney general for civil rights at the time the case was filed. "The Voting Rights Act of 1965 was passed to protect the fundamental right to vote and the department takes allegations of voter intimidation seriously."

Mrs. Becker, now on a leave of absence from government work, said she personally reviewed the NBPP complaint and approved its filing in federal court. She said the complaint had been the subject of numerous reviews and discussions with the career lawyers, and she agreed with their assessment to file the case.

Mrs. Becker said Ms. King was overseeing other cases at the time and was not involved in the decision to file the original complaint.

A Justice Department memo shows that career lawyers in the case decided as early as Dec. 22 to seek a complaint against the NBPP; its chairman, Malik Zulu Shabazz, a lawyer and D.C. resident; Minister King Samir Shabazz, a resident of Philadelphia and head of the Philadelphia NBPP chapter who was accused of wielding the nightstick; and Jerry Jackson, a resident of Philadelphia and a NBPP member.

"We believe the deployment of uniformed members of a well known group with an extremely hostile racial agenda, combined with the brandishing of a weapon at the entrance to a polling place, constitutes a violation of Section 11(b) of the Voting Rights Act which prohibits types of intimidation, threats and coercion," the memo said.

The memo, sent to Mrs. Becker, was signed by Christopher Coates, chief of the Voting Section Robert Popper, deputy chief of the section; J. Christian Adams, trial attorney and lead lawyer in the case; and Spencer, R

Fisher, law clerk. None of the four has made themselves available for comment.

Members of Congress continue to ask questions about the case.

"If showing a weapon, making threatening statements and wearing paramilitary uniforms in front of polling station doors does not constitute voter intimidation, at what threshold of activity would these laws be enforceable?" Mr. Wolf asked.

Mr. Smith also complained that a July 13 response by Assistant Attorney General Ronald Welch to concerns the congressman had about the Philadelphia incident did not alleviate his concerns.

"The administration still has failed to explain why it did not pursue an obvious case of voter intimidation. Refusal to address these concerns only confirms politicization of the issue and does not reflect well on the Justice Department," Mr. Smith said.

Mr. Smith asked the department's Office on Inspector General to investigate the matter, and the request was referred to the department's Office of Professional Responsibility.

Lawmakers aren't alone in the concerns.

The U.S. Commission on Civil Rights said in a June 16 letter to Justice that the decision to drop the case caused it "great confusion," since the NBPP members were "caught on video blocking access to the polls, and physically threatening and verbally harassing voters during the Nov. 4, 2008, general election."

"Though it had basically won the case, the [Civil Rights Division] took the unusual move of voluntarily dismissing the charges . . .," the letter said. "The division's public rationale would send the wrong message entirely—that attempts at voter suppression will be tolerated and will not be vigorously prosecuted so long as the groups or individuals who engage in them fail to respond to the charges leveled against them."

The dispute over the case and the reversal of career line attorneys highlights sensitivities that have remained inside the department since Bush administration political appointees ignored or reversed their career counterparts on some issues and some U.S. attorneys were fired for what Congress concluded were political reasons.

Mr. Weich, in his letter to the congressman, sought to dispel any notion that politics was involved. He argued that the department dropped charges against three of the four defendants "because the facts and the law did not support pursuing" them. He said the decision was made after a "careful and thorough review of the matter" by Ms. King.

U.S. District Judge Stewart Dalzell in Philadelphia entered default judgments against the NBPP members April 2 after ordering them to plead or otherwise defend themselves. They refused to appear in court or file motions in answer to the government's complaint. Two weeks later, the judge ordered the Justice Department to file its motions for default judgments by May 1—a ruling that showed the government had won its case.

The men also have not returned calls from The Times seeking comment.

On May 1, Justice sought an extension of time and during the tumultuous two weeks that followed the career front-line lawyers tried to persuade their bosses to proceed with the case.

The matter was even referred to the Appellate Division for a second opinion, an unusual event for a case that hadn't even reached the appeals process.

Appellate Chief Diana K. Flynn said in a May 13 memo obtained by The Times that

the appropriate action was to pursue the default judgment unless the department had evidence the court ruling was based on unethical conduct by the government.

She said the complaint was, aimed at preventing the "para-military style intimidation of voters" at polling places elsewhere and Justice could make a "reasonable argument in favor of default relief against all defendants and probably should." She noted that the complaint's purpose was to "prevent the paramilitary style intimidation of voters" while leaving open "ample opportunity for political expression."

An accompanying memo by Appellate Section lawyer Marie K. McElderry said the charges not only included bringing the weapon to the polling place, but creating an intimidating atmosphere by the uniforms, the military-type stance and the threatening language used. She said the complaint appeared to be "sufficient to support" the injunctions sought by the career lawyers.

"The government's predominant interest . . . is preventing intimidation, threats and coercion against voters or persons urging or aiding persons to vote or attempt to vote," she said.

The front-line lawyers, however, lost the argument and were ordered to drop the case.

Bartle Bull, a civil rights activist who also was a poll watcher in Philadelphia, said after the complaint was dropped, he called Mr. Adams to find out why. He said he was told the decision "came as a surprise to all of us" and that the career lawyers working on the case feared that the failure to enforce the Voting Rights Act "would embolden other abuses in the future."

SPECIAL ORDERS

The SPEAKER pro tempore (Mr. KISSELL). Under the Speaker's announced policy of January 6, 2009, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

HONORING BOB DEININGER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. SESTAK) is recognized for 5 minutes.

Mr. SESTAK. Mr. Speaker, I rise to honor a public servant, leader, son, husband and father of the first order, Mr. Robert Deininger, who on August 1, 2009, will complete 40 years of faithful and dedicated service to the U.S. Food and Drug Administration, the FDA.

Following his 1965 graduation from Upper Darby High School, Bob excelled at Grove City College, Grove City, Pennsylvania, graduating in 1969 with a bachelor of science degree in biology. He was quickly hired by the FDA as an investigator in the Philadelphia district office.

In 1977 Bob was selected to be a supervisor of the New Jersey District in Trenton, New Jersey. He later moved to Camden, New Jersey, where he supervised 10 investigators and covered southern New Jersey.

□ 1830

During 13 years in this position, he and his team were involved in many

unique and interesting cases, including those involving food tampering, recalls and compliance actions.

In 1989, Bob was accepted into a government Executive Potential Program. In 1990, he was selected as Director of the Investigations Branch for the Dallas district and moved to Dallas, Texas. In this position, with nearly 100 employees and 13 satellite offices, he was responsible for domestic import inspection activities in Texas, Oklahoma and Arkansas.

Bob's last position was that of District Director, Southwest Import District, SWID, in the FDA Office of Regulatory Affairs, FDA's regulatory field force. As District Director, Bob was responsible for all import operations in the 11-State Southwest Region and along the entire United States-Mexican border, from Brownsville, Texas, to San Diego, California.

Bob's contributions are too numerous to mention, but principal among them are his efforts to improve import coverage uniformity in applying FDA policies and procedures and his work to increase cooperative activities with Customs and Border Protection.

As the Nation has faced serious threats to the safety of its food supply, Bob significantly increased the number of import samples and product exams performed each year and contributed to updating the FDA import training program. Most importantly, Bob focused FDA/SWID outreach and education efforts to work with the Federal and State agencies on border health to improve the health of the population living along the United States and Mexican border.

For all of his accomplishments in life, Bob Deininger's greatest achievement will always be his family. His mother Evelyn and brother Gary are very proud of him, as is his wonderful wife Rosemary. Together, she and Bob have raised two impressive sons, Kristopher and Brian. They are blessed with a lovely daughter-in-law, Katherine, who has given them their pride and joy, grandson Jack.

Mr. Speaker, let us pause and give thanks to Bob Deininger for four decades of tireless, selfless service to the Food and Drug Administration and the American public.

Today, I join the good people of the Seventh Congressional District of Pennsylvania and the thousands of FDA employees Bob has led, mentored and cared for over the course of his brilliant career, and Bob's many friends and colleagues, to wish Rosemary and Bob "fair winds and following seas" as they embark on the next, and no doubt even more remarkable, chapter of their lives.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was commu-

nicated to the House by Ms. Wanda Evans, one of his secretaries.

NUMBER OF MARINE SUICIDES INCREASING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. JONES) is recognized for 5 minutes.

Mr. JONES. Mr. Speaker, earlier this week I was saddened to read an article in the Marine Corps Times with the heading "7 July suicides push Corps to record pace." I will submit that article for the record.

The article states, "At least seven Marines are believed to have killed themselves so far in July, putting the Corps on a record pace despite broad-based efforts introduced to reduce suicides."

The Corps is on a pace for about 56 suicides in 2009, which would shatter a record set last year when the Corps lost 42 Marines to confirmed or suspected suicide. The article further states, "Marine suicides have increased annually since 2006."

[From the Marine Corps Times, July 30, 2009]

JULY SUICIDES PUSH CORPS TO RECORD PACE

(By Dan Lamothe, staff writer)

At least seven Marines are believed to have killed themselves so far in July, officials said, putting the Corps on a record pace despite broad-based efforts introduced to reduce suicides.

The deaths come as the service rolls out a new suicide-prevention program this week focused on getting sergeants and corporals to take a more active role in watching for signs that a Marine may be in danger of killing himself. Nine Marines killed themselves in June, and 33 have done so this year, said Maj. Carl Redding, a spokesman at Marine Corps headquarters.

The statistics were discussed Monday at the Sergeants Major Symposium, an annual meeting of the Corps' top enlisted leaders in Washington. The 33 dead Marines put the Corps on pace for about 56 suicides in 2009, shattering a record set last year, when the Corps lost 42 Marines to confirmed or suspect suicides.

"We're looking at all options to get a handle on this," said Sgt. Maj. Carlton Kent, the Corps' top enlisted adviser. "We're trying to pinpoint what we can do, and we're going to stay engaged until we find a fix for it."

Marine suicides have increased annually since 2006, when 25 Marines killed themselves. Thirty-three Marines are believed to have committed suicide in 2007, Marine officials said.

The recent numbers have alarmed Marine leadership, prompting additional "all-hands" prevention training in March that included videos made by commanders, a slideshow outlining recent statistics and an overview of warning signs shown by Marines at risk of killing themselves.

On Monday, senior enlisted leaders discussed a next wave of suicide-prevention training that has been in the works for months. Noncommissioned officers throughout the Corps will be trained to watch for suicide signs more carefully, with "master trainer" sergeants who went through 3½ days of training in July at Marine Corps Base Quantico, Va., now fanning out across

the service to teach NCOs how they can be a better help to at-risk Marines.

The new training package will include a 30-minute video featuring professional actors portraying Marines, and 11 documentary film clips featuring Marines who considered killing themselves and survivors of Marines who did, the Corps' senior enlisted leaders were told Monday. It will focus in part on eliminating the stigma of reporting a Marine who is considering suicide, officials said.

"Peer groups have to recognize the signs at ankle level, not chest level," said Sgt. Maj. Michael Timmerman, the senior enlisted adviser with the Personal and Family Readiness Division at Marine Corps headquarters.

Kent said he wants NCOs to feel empowered to report that a Marine in turmoil may be considering suicide, but he believes senior enlisted leadership and officers also need to be actively involved.

"We still have to provide the guidance, oversight and support," he said of senior enlisted leadership. "We have to give [NCOs] the tools they need" to prevent suicides.

Unfortunately, the Army has reported a similar increase in suicides. The suicide rate among Army soldiers hit its highest level in three decades in 2008 when there were 128 confirmed suicides.

Yesterday, at a hearing of the Armed Services Subcommittee on Military Personnel, I was impressed with the comments by military leaders from each of the four services who described the steps they are taking to combat psychological stress among servicemembers. I was also pleased to read in the Marine Corps Times that the Corps has taken increased suicide rates seriously by rolling out a new suicide prevention program and implementing additional all-hands prevention training. However, I also believe that the policymakers in Washington have a role to play.

With Marine Corps Base Camp Lejeune and Marine Corps Air Station Cherry Point in my district, I am well aware of the strain that the wars in Iraq and Afghanistan have placed on our Nation's marines and their families. Military officials have speculated that repeat combat deployments and the toll these deployments have taken on servicemembers' marriages and families have contributed to increased suicide rates.

Mr. Speaker, I also believe that continuous war without a clearly defined goal is contributing to anxiety and depression among some of the members of our military.

In recent days, I have come to the House floor to talk about our Nation's military involvement in Afghanistan and the importance of knowing the end point to our war strategy. After nearly 8 years in Afghanistan, President Obama's order for a surge of additional troops will certainly lead to more killed and wounded, more frequent deployments and more stress on our military and their families. That is the price of war.

While American military personnel faithfully conduct their missions

abroad, elected officials here in Washington also need to take seriously their responsibility to develop a viable, long-term strategy for these operations.

I have spoken to many in the Army and Marine Corps who say our Nation needs an end point to its war strategy. Many servicemembers have gone to Iraq and Afghanistan more than once, and their desire to serve this Nation is greater than ever, but the stress placed on our all-volunteer forces cannot continue forever.

That is why I will continue to urge the President to work with his military commanders and the Congress to articulate to our men and women in uniform what is to be achieved and to develop the best possible strategy for achieving our goals and wrapping up our military commitment in Afghanistan. I will also continue to work with my colleagues in Congress to ensure adequate funding for mental health programs for servicemembers and veterans.

Before closing, Mr. Speaker, I would like to thank the Department of Defense and our military leaders who are doing everything possible to help servicemembers who suffer from anxiety and depression.

Mr. Speaker, as I do just about every night that I come to the floor of the House, I have to close this way, because I regret that I voted to send our troops to Iraq. I have signed over 8,000 letters to the families and extended families so that I could say to God, forgive me for making that decision.

So my close will be this. God, please bless our men and women in uniform. God, please bless the families of our men and women in uniform. God, in Your loving arms, hold the families who have given a child dying for freedom in Afghanistan and Iraq.

And, dear God, because America is in so much trouble, I will close three times by asking, God please, God please, God please continue to bless America.

THE COST OF AFGHANISTAN AND IRAQ SOON TO BE \$1 TRILLION

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from California (Ms. WOOLSEY) is recognized for 5 minutes.

Ms. WOOLSEY. Mr. Speaker, I would like to thank Congressman WALTER JONES for his 5-minute speech. That was a perfect lead-in to my remarks tonight.

Mr. Speaker, last week I stood in the House to mark two tragic milestones. I said that July had become the deadliest month for our soldiers in Afghanistan since the conflict began, and I reported that the number of American troops who have died in Afghanistan and Iraq had gone over the 5,000 mark.

Today, I rise to warn the House that a third tragic milestone is coming up.

According to a report by the Congressional Research Service, Congress has approved \$941 billion in war-related spending since 9/11. If Congress approves the administration's request for the next fiscal year, funding for Afghanistan and Iraq will go over the \$1 trillion mark. And that is just for direct military operations, Mr. Speaker. The \$1 trillion figure doesn't include the indirect costs, such as health care for our wounded veterans. Many of our veterans will need care for the rest of their lives. Joseph Stiglitz, the Nobel-winning economist, has estimated that when you add it all up, the occupation of Iraq alone will cost us over \$3 trillion.

Tragically, all that spending has not made us any safer. Violent extremists have launched more attacks around the world since 9/11 than before 9/11. The war spending hasn't made us any richer either. It has contributed to our economic crisis, exploded the lid off our national debt, and diverted funds from desperately needed domestic priorities.

Besides Iraq and Afghanistan, Congress has also approved spending for a third war called the global war on terror. That war has been a big mistake, too. As the Rand Corporation has pointed out, when you use the word "terrorist," you elevate them. You elevate them to the status of holy warriors and it encourages them to conduct holy war against the United States.

We need to call terrorists what they really are, criminals and violent extremists. To stop them, we need good intelligence and good police work in the communities where they hide, not massive military occupations that don't get the job done and bleed our Treasury dry.

I am glad that President Obama and Secretary of State Clinton have stopped using the phrase "war on terror." That is a good first step. But now we need to take several more steps. We must speed up the withdrawal of our troops and military contractors from Iraq. We must change our mission in Afghanistan to emphasize economic development, humanitarian aid, education, jobs, and better government.

This is the kind of help that the people of Afghanistan want and need from the United States. This is the kind of help that will give the Afghan people real hope for the future and a reason to reject extremism.

And throughout the world, we must replace military power with the tools of smart power, such as diplomacy, multilateral action, and nuclear non-proliferation. I have offered a "SMART Security Platform for the 21st Century" which could put these tools to work and make the world a safer place.

Mr. Speaker, America cannot afford to keep using military power as our only option. It is dumb foreign policy, dumb military policy, and dumb fiscal

policy. Smart power will save lives and money and build a more peaceful world for our children and their children.

RECOGNIZING THE OUTSTANDING WORK OF TAKE STOCK IN CHILDREN

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Florida (Ms. ROS-LEHTINEN) is recognized for 5 minutes.

Ms. ROS-LEHTINEN. Mr. Speaker, I rise tonight to recognize the outstanding work of Take Stock in Children, an amazing program throughout my home State of Florida which provides low-income and at-risk children the scholarships and the guidance that they need to obtain a quality college education.

As a former educator and a former Florida certified teacher, I am personally aware of the importance in providing our children a solid education so that they may be successful, productive, and active members of society in the future.

When students receive the support, the mentoring, and the financial assistance necessary to pursue a college degree, they begin to realize that they can achieve their goals, they are capable of reaching their dreams, and there are people ready to say, "We are here to help you."

This is what Take Stock in Children offers to all of these children. It is an opportunity for the kids in our community to take advantage of the education they might not have otherwise been offered.

Take Stock in Children created an ingenious model of operation which provides the structure and the stability that at-risk and low-income students need in order to be guided to be most productive into college and beyond.

With its innovative mentorship, scholarship, case management, and accountability systems, it is no wonder why Take Stock in Children has flourished. The passion and commitment evident in all aspects of the organization is indeed inspiring. Over 94 percent of all funds that they gather go directly to scholarships and services to students. As more funds are made available to Take Stock in Children, they are quickly made available to the students.

Take Stock in Children has been able to expand into a public-private partnership, so that for every \$2 raised for scholarship and student services, they receive a \$1 match from the Florida Prepaid College Foundation, creating millions of dollars worth of resources for our kids.

As all of our Florida families know, the Florida Prepaid program allows them to invest early for their children's college education. Parents lock in the cost of college when they begin paying into the program, saving them

years of college rate increases and allowing them several years to save for their children's educational needs.

One in ten Florida children has a Florida Prepaid plan, and over 206,000 prepaid students have already graduated from college. I am proud to say that I was one of the cocreators of this program when I served in the Florida Senate.

Take Stock in Children is actually the largest single purchaser of Florida Prepaid scholarships, and it is a great coordinated victory in the fight to help children achieve their dreams of success. It has been over 21 years since I helped create the Florida Prepaid program, and I am continually proud of its successes.

With Florida Prepaid and Take Stock in Children working together, an educational powerhouse has been created for Florida students, combining financial aid as well as guidance and counseling for enrolled and eligible children.

Over 520 students in my district today are recipients of scholarships from Take Stock in Children, and without the support, finding college tuition for these students would not have been likely.

□ 1845

Today, almost \$109 million have been awarded in scholarships and over 1 million hours logged, with over 11,000 volunteers dedicated to helping these students. It is because of the commitment of dedicated individuals that Take Stock in Children has come to be such a tremendous success. As a Member of Congress and an ardent supporter of giving the best education possible to our youth, it pleases me greatly that organizations like Take Stock in Children exists today. I look forward to hearing about all of the future successes of Take Stock in Children, and I again applaud them for their everyday victories for all of our children.

HONORING THE LIFE OF VERMEL COOK

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Texas (Ms. JACKSON-LEE) is recognized for 5 minutes.

Ms. JACKSON-LEE of Texas. Mr. Speaker, I rise to salute a woman of success and pay tribute to Vermel Cook, 95 years old, who passed just this last week, born on November 24, 1913, a woman that has a very special place in my heart, and that of the city of Houston. Mr. Speaker, can you imagine a woman born before the conclusion of World War I, in the midst of a segregated South, who became an important surgical nurse who attended to the surgeries of the famed surgeon, Dr. Michael DeBakey, and Dr. Denton Cooley, at the Methodist Hospital.

What an achievement. And she did that for 30 years. In her 30 years I

would imagine she saw some of the first heart transplants. She saw the first opportunities to give new life to patients through the genius of Dr. Michael DeBakey, already passed, and Dr. Denton Cooley, who still lives in our community. I'm very proud that this woman raised beautiful children, 6 children. She has 8 grandchildren, 4 great grandchildren.

And one of her wonderful children was a dear friend of mine, the Mitchell family. Her granddaughter, Pam Mitchell, who is saddened by her death, is one of the 8 grandchildren. And her wonderful daughter, surviving daughter, JoAnn Griggs, as well, had the opportunity to live with a great mother and a great father. Her husband, deceased, Leroy Cook, they were married for 50 years and produced great talent for the Mitchell family. Mr. and Mrs. Mitchell and granddaughter Pam and grandson, her young grandson, traveled around the community and provided great music.

She was a woman of religion as well, a member of the Progressive New Hope Church under the Reverend Ennis Brown, and she served at that church for many, many years, a great historic church in the city of Houston. But then as Pastor Brown passed away, she moved to one of the up-and-coming starring churches under the leadership of my dear friend, Pastor Samuel Ratliff, Brentwood Baptist Church. And I am reminded of my visits to that church when Pastor Ratliff and all of the leadership of that church always rallied around Sister Cook. They always were so grateful of her presence there, and, as well, the spark and the laughter and the smile that she brought to the congregation.

I will always remember her, generous in spirit and heart, a nurturer. And now I know why. A surgical nurse in the midst of a segregated America, living through World War I and World War II, standing at the side of the founder of the veterans hospital system of America, Dr. Michael DeBakey. And then his tutee, Dr. Denton Cooley, two giants in the field of medicine. Now their fallen hero goes alongside of Dr. DeBakey, my very dear friend, Sister Vermel Cook.

As she is buried this coming weekend I would ask that we remember her challenges, but also her spirit. I will always be proud to have known her and to have recognized the greatness of her service and how she pioneered for nurses who now have come behind her. She'll be funeralized on Saturday, this coming Saturday, August 1, 2009, at the Brentwood Baptist Church. Though we are saddened by her passing, we know that this will be a commemoration, a celebration of the pioneering spirit and the successes that she had. We pay tribute to Vermel Cook; yes, fallen, but yet successful, a woman that we can be very proud of in this great Nation that

gives us opportunity. God bless you, Vermel Cook, and God bless America.

THE BIG GUNS HAVE LINED UP AGAINST H.R. 1207

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. PAUL) is recognized for 5 minutes.

Mr. PAUL. Mr. Speaker, the big guns have lined up against H.R. 1207, the bill to audit the Federal Reserve. What is it that they are so concerned about? What information are they hiding from the American people? The screed is: "Transparency is okay—except for those things they don't want to be transparent."

Federal Reserve Chairman Ben Bernanke argues that H.R. 1207, the legislation to audit the Federal Reserve, would politicize monetary policy. He claims that monetary policy must remain "independent," that is, secret. He ignores history, because chairmen of the Federal Reserve in the past, especially when up for reappointment, do their best to accommodate the President with politically driven low interest rates and a bubble economy.

Former Federal Reserve Board Chairman Arthur Burns, when asked about all the inflation he brought about in 1971, before Nixon's re-election, said that the Fed has to do what the President wants it to do, or it would "lose its independence." That about tells you everything. Not by accident, Chairman Burns strongly supported Nixon's program of wage and price controls, the same year; but I guess that's not political. Is not making secret deals with the likes of Goldman Sachs, international financial institutions, foreign governments and foreign central banks, politicizing monetary policy? Bernanke argues that the knowledge that their discussions and decisions will one day be scrutinized will compromise the freedom of the Open Market Committee to pursue sound policy. If it is sound and honest, and serves no special interest, what's the problem?

He claims that H.R. 1207 would give power to Congress to affect monetary policy. He dreamt this up to instill fear, an old statist trick to justify government power. H.R. 1207 does nothing of the sort. He suggested that the day after an FOMC meeting, Congress could send in the GAO to demand an audit of everything said and done. This is hardly the case. The FOMC function, under 1207, would not change. The detailed transcripts of the FOMC meetings are released every 5 years, so why would this be so different, and what is it that they don't want the American people to know? Is there something about the transcripts that need to be kept secret, or are the transcripts actually not verbatim?

Fed sychophants argue that an audit would destroy the financial market's

faith in the Fed. They say this in the midst of the greatest financial crisis in history, brought on by none other than the Federal Reserve. In fact, Chairman Bernanke stated on November 14, 2007, that “a considerable amount of evidence indicates that central bank transparency increases the effectiveness of monetary policy and enhances economic and financial performance.”

They also argue that an audit would hurt the value of the U.S. dollar. In fact, the Fed, in less than 100 years of its existence, has reduced the value of the 1914 dollar by 96 percent. They claim H.R. 1207 would raise interest rates. How could it? The Fed sets interest rates and the bill doesn't interfere with monetary policy. Congress would have no say in the matter; and besides, Congress likes low interest rates. It is argued that the Fed wouldn't be free to raise interest rates if they thought it necessary. But Bernanke has already assured the Congress that rates are going to stay low for the foreseeable future, and, again, this bill does nothing to allow Congress to interfere with interest rate setting.

Fed supporters claim that they want to protect the public's interest with their secrecy. But the banks and Wall Street are the opponents of 1207, and the people are for it. Just who best represents the “public's” interest? The real question is, why are Wall Street and the Feds so hysterically opposed to 1207? Just what information are they so anxious to keep secret? Only an audit of the Federal Reserve will answer these questions.

AMERICANS NEED HEALTH CARE NOW

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia (Mr. LEWIS) is recognized for 5 minutes.

Mr. LEWIS of Georgia. Mr. Speaker, I rise today because America needs health care, and they need it now. The American people cannot wait. Every day that we wait 14,000 Americans lose their health insurance. 46 years ago, at the March on Washington, I said, “They tell us to wait. They tell us to be patient.” We cannot wait, we cannot be patient. People are losing their health, their homes or their very lives because our health system does not work for them. This is not right. It is not just. And we can do better, much better.

It is our moral obligation to lead. The insurance companies do not need our leadership. The drug companies do not need our leadership. They do not need our help. Real, hardworking people need us to lead. We must make sure that in our rush to appease the few, that we do not harm the many. We must adopt a bill that has a strong public health insurance option. We must adopt a bill that makes health

premiums affordable to low and middle-income workers. We must not negotiate away our commitment to the working poor and to middle class Americans. This is the kind of leadership Americans need.

Dr. Martin Luther King, Jr. once said, “Of all the forms of inequality, injustice in health care is the most shocking and inhumane.” If we do not protect our most vulnerable hard-working Americans and their families, we will perpetuate this injustice. The time is always right to do what is right. We should not be afraid to do what is right. We must answer the call of history and pass health reform that works for all Americans.

□ 1900

HEALTH CARE AND JOSHUA LOYA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. OLSON) is recognized for 5 minutes.

Mr. OLSON. Mr. Speaker, I am convinced that sharing real stories from people in our communities is the best opportunity to put a human face on the task before us with respect to reforming health care.

We have spoken about costs, tax increases and job losses. We've spoken about access to care and about government-run options. These are all deeply important factors in this equation, and we have a duty to the American people to debate them fully, but there is also a human element that cuts through the debate and the rhetoric and that perfectly crystallizes what is at stake here.

My Republican colleagues and I have tried to impress on the other side the importance of maintaining the doctor-patient decision-making process. I think that Joshua Loya's story says it all.

Brittany Kraft is a constituent of mine from Pearland, Texas. She was 24 weeks pregnant in March of 2002 when her unborn son was diagnosed with hypoplastic left heart syndrome. She was told that he would not be born alive. Her cardiologist consulted with groups of surgeons around the country, but none could offer the help that she needed. Brittany was advised that her child could be put to sleep in utero, and she could go directly to the hospital for a stillbirth. She was unwilling to accept this as her only option, and she decided to fight for her unborn baby.

Brittany made copies of the fetal echocardiograms and sent them to the top five pediatric cardiothoracic surgeons she could find. Only one, Dr. Ed Bove at the University of Michigan's Mott Children's Hospital, said if Brittany came to Michigan, they would do everything they could to save her unborn child.

On June 26, 2002, Joshua Ruben Loya was born. He was immediately

intubated and wired. He was in critical condition, and doctors felt that he was not a good candidate for the corrective surgeries available. He was listed for a heart transplant the day after he was born, and after 16 life-threatening days, at 3 in the morning, Brittany got the call that there was a heart for Joshua.

Almost 7 years later, you would never know what Brittany and Joshua went through. He is a happy, growing boy, with medical needs but with no limitations on a good day. He can run, play, sing, laugh, and dance. Unfortunately, he is immune-suppressed, and will be for the rest of his life. He takes eight medications twice daily, and must adhere to a very strict schedule to control the levels of medication in his system. Too little and he is at risk of rejecting his heart. Too much and the medications trigger kidney failure and disable his immune system, making him even more vulnerable to every germ around.

I tell Joshua's story because, quite frankly, if the health care plans being promoted by the administration and by my Democratic colleagues were to become law, I'm not confident that Josh would be here today. I know that his mother is deeply concerned that, with government-run health care, she might not have had the choice to deliver her baby or to have access to the life-saving medical procedures needed to keep him healthy and alive.

In a massive government-run bureaucracy, Americans may not have the freedom to make the individual decisions that Brittany Kraft made to bring little Joshua into this world. She was in a position to not accept the word of a doctor and was able to search across the Nation for a better chance at life for her unborn son.

While some maintain that Americans like Brittany can stay on their private plans to keep government out of Joshua's health care, they are not considering the far-reaching implications of the government plan. A government-run plan means bureaucrats make the decisions and that private insurers will be forced to follow suit to remain competitive.

There is valid concern that otherwise healthy people will flock to the cheaper government plan and that sick people will try to stay on private plans, putting private insurers out of business.

Joshua's story puts all of this in a crystal-clear context for me, and I urge all of my colleagues to remember Josh Loya as we go back home for the August recess and talk to our constituents about health care reform. Any reform must include freedom for individuals and for their doctors to make their own personal health decisions.

HEALTH CARE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. PASCRELL) is recognized for 5 minutes.

Mr. PASCRELL. This is a golden opportunity right after we've heard what we've just heard. We are empathetic, but we want to dispel the misinformation. As to the gentleman who just spoke before me, I don't know what plan he is referring to. So this is what has been propagated from the other side about the health care system envisioned in America's Affordable Health Choices Act. I'm going to address that tonight.

I've heard many of my colleagues across the aisle claim that the Democrats' health care proposal will result in rationing and in the loss of choice. Tonight, let me address that, because, if it did, I would not support it nor would my fellow Democrats. I've heard anecdote after anecdote from the other side about a man here or about a woman there who had to wait for care in Canada or in England, and I do empathize with their stories.

Let's be clear. Our health care plan absolutely does not envision a Canadian-style system. We're Americans. We propose an American system with choice and competition. We are not socializing medicine, and we're not rationing care. This is rhetoric designed to stir fear and to slow down efforts to bring real reform to our system. With that said, I want to share with you a story, not from Canada, not from England, not from Mars, but from right here in the United States—from Montclair, New Jersey, my district.

Jodi, one of my constituents, has been self-employed for 20 years as a dietitian. When she got divorced, she had to pay nearly \$500 a month for COBRA coverage. After a year and a half of timely payments, her plan notified her that her insurance was canceled because the automatic withdrawal from her bank account was processed a day late.

I want to be on the side of those who are going to support folks like this. I do not want to be on the side of those who will perpetuate the support of insurance companies, and that's what we're talking about here. Over the next several months, that's what we will continue to talk about.

There was no appeal available, and Jodi was not notified until 6 weeks after she lost coverage, so it was too late for her to be eligible for HIPAA, protections related to preexisting conditions. When she finally found insurance on the individual market, all of her preexisting conditions were excluded for a year.

Read the bill. When she needed blood work because she was having unexplainable weight gain, the insurance company denied coverage for her tests because of a preexisting thyroid

condition even though she had never experienced these symptoms before.

Read our bill. When she had pain in her foot, the insurance company denied coverage for a doctor visit because she had been to a dermatologist 9 months prior for a wart.

What is different about this story from the stories brought to us from the other side of the aisle is that we have the numbers that prove that Jodi was not alone when she was denied the care that she needed.

If you want to talk about rationing, then let's talk about these numbers: 53 percent of Americans cut back on their health care in the last year because of costs. Between January of 2000 and this year, 5 million families filed for bankruptcy because of medical bills. About one-third of the uninsured have a chronic disease. They are six times less likely to receive care for a health problem than are the insured.

Read the bill. There are 25 million Americans who are underinsured, which means that at least 25 million Americans face premiums, copays and deductibles that they can hardly afford. For these people, people who have insurance, price stands between them and the care they need and the treatments their doctors prescribe. Another 46 million are uninsured with no protection whatsoever from these costs. As many as 22,000 Americans die each year because they don't have health insurance. Read the bill.

That's rationing my friends. That's rationing.

As costs continue to rise, these numbers will grow and grow, so please don't preach to us about rationing. Plans offered by the other side fail to reduce the number of uninsured; they fail to rein in health care costs; and they erode the employer-provided coverage, the one mode of insurance that has kept us from slipping over the precipice.

Our bill, America's Affordable Health Choices Act, will expand access to health care; it will rein in health care costs; and it will end needless rationing in this country.

HEALTH CARE REFORM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kentucky (Mr. YARMUTH) is recognized for 5 minutes.

Mr. YARMUTH. Mr. Speaker, we are on the verge of something very significant in this body and in this Congress. I am proud to join my colleagues from the Ways and Means Committee here tonight to talk about the prospects of health care reform in this country.

I heard the other day that it was in 1912 that President Teddy Roosevelt first talked about proposing a national health care system for the United States. Today, we're still the only industrialized nation that doesn't have

health care for all of its citizens. We believe it's time, almost 100 years later, to try and get this accomplished for the American people.

Now, a little earlier, my colleague from Texas—my colleague, friend and classmate from college—talked about polls that are out this week that indicate that the American people have somehow turned against the President in his quest to provide health care reform in this country. But what he didn't mention was the other part of that poll, which said, once people understand what H.R. 3200 does, they overwhelmingly support it.

There have been a lot of efforts to mischaracterize what this bill does, what our proposal does. Quite frankly, we're in that sausage-making process now. We have three committees in the House that are working on health care reform. We have two committees in the Senate that are trying to accomplish the same thing, and we have a 1,000-page bill. There are thousands and thousands of pages of legislation that are designed to finally build a kind of health care system that is responsive to the needs of the American citizens and, more importantly, that is responsive to the Nation, its future and its economy.

So I'm not surprised that Americans are a little bit uncertain about what we're doing here, because, again, we're still in that process; but I can assure the people watching tonight, the American public, that the battle lines are about to be drawn. This bill is going to come into focus as the final committee of three in our House reports the legislation out. Over the next month, we will take the argument to the American people. We're very confident that, once the American people understand what we're doing and how we're going to improve their situations, they will overwhelmingly support our proposal.

What the American people want—and what my constituents in Louisville, Kentucky want, what the constituents in New Jersey, in Washington, in New York, and in California all want—is basically the same thing: they want security for life in health care for themselves and for their families. If they're going to lose their jobs, if they're going to lose their coverage, if they want to change jobs, if they want to go back to school or if they want to make those important life decisions, they want the stability of insurance so they don't have to worry about whether a pre-existing condition or something in their health histories will prevent them from being covered. They won't have to worry about getting sick and about having their policies rescinded, as we've heard much evidence about. Most importantly, they will be able to go to sleep every night knowing that a disease or an illness will not bankrupt them and will not change their standard of living.

These are the things we're about to do for the American people, for ourselves as well, because we know, as the Republicans know, if we accomplish this major, major goal, we will have the everlasting appreciation of the American public. We know that because the Republicans have said it.

We heard a Senator the other day say, Well, if we can defeat health care reform, it will be President Obama's Waterloo. He will be finished.

We know from a Republican consultant, Frank Luntz, of his memo 3 months ago, which states, We cannot afford to let the Democrats succeed on getting health care reform. We have no answer to that, but we've got to stop it at all costs.

That's what they've been trying to do. They've been talking about things that are nowhere in the bill. They've been talking about comparisons with Canada, which, by the way, is the only country in the world that does health care the way they do it. As I asked a witness at one of our hearings in Ways and Means: Other than hockey, what have we ever copied from Canada?

□ 1915

We can do something very special in this country. We can create a unique American solution that will bring choice and competition—the two things that have characterized American society throughout its history—to our health care environment by using choice and competition, by creating a public option for American citizens to participate in that will compete with private insurance companies. We can make private insurance companies better, and we can make health insurance more affordable for every American.

This is our goal. This is what we know that H.R. 3200 will do, and we look forward, over the next month, in taking this argument to the American people, because the case we have is a winning case. The hand we have is a winning hand, and we know that the American people will embrace what we are attempting to do.

WAYS AND MEANS HEALTH REFORM BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Washington (Mr. McDERMOTT) is recognized for 5 minutes.

Mr. McDERMOTT. Mr. Speaker, health care reform may be the single most important issue Members will vote on during their entire legislative career. The issue affects every American. Health care affects our economy at home and our ability to compete internationally.

For the first time in almost 20 years, we have a real opportunity to solve America's health care crisis, and the American people have spoken clearly

and overwhelmingly that they want Congress to produce a solution that puts the American people's interests ahead of special interests.

To say there is urgency in what we need to do is an understatement, and for the last several months, the three committees in the House have been working separately and collaboratively on health care legislation. Two of the committees, including the Ways and Means Committee where I serve, reported bills out of committee to the floor. And I want to explain why the Ways and Means Committee's bill is the best bill and is vital to the success of health care reform.

Let's start with Medicare.

For senior citizens, Medicare is health security. The program is so effectively managed that 97 cents of every dollar goes for patient care, and that means it's 97 percent efficient. In many private insurance company programs, 40 cents of every dollar simply goes for overhead, advertising, paper, not delivering health care. So the smart choice is to develop health care legislation based on a proven model, and that's what we did in the Ways and Means Committee.

A new model with a strong public option based on the Medicare model, which has delivered quality health care to seniors and a very comfortable living to doctors and other medical professionals across this country, that's what we need today.

Without a strong public option, health care reform is just a slogan. And without real cost control, health care reform is just another press release. America spends twice as much on health care as any other industrialized nation in the world, and runaway costs are bankrupting average Americans and consuming an even greater part of our gross domestic product than before. The situation is unsustainable.

Now, we talk about the need to address preexisting conditions when it comes to health care, and we should. But runaway costs are a preexisting economic condition we must fix in the new legislation or we're setting ourselves up for failure.

Recent changes to the legislation have scrapped the proven legislative effective and fair model we have in Medicare and substituted negotiated rates making the government negotiate with doctors. On the surface, it may look fair, but looks can be deceiving. The private sector has had decades of opportunities to make health care work, and the economic wreckage of that is everywhere to be seen. Now they want more.

The legislation now would call for negotiations. Let me tell you what that means. So-called negotiated rates do not limit what can be charged or the rate of increase each year. A public option tied to Medicare is the only way to control the costs; otherwise, health

care costs will keep going up and Americans will keep getting left out.

While the rich can always take care of themselves—health care at any price—the middle class and the disadvantaged will remain one accident or illness away from financial ruin in the richest country in the world. That sounds like the status quo, right? We don't need any more of that.

Under the chairmanship of CHARLIE RANGEL, the Ways and Means Committee tackled these tough issues and produced health care reform legislation that's fair for providers and affordable for the American people.

You have seen what happens when the private marketplace decides what's best for the American people: Wall Street, housing market. Remember, when they say the market will take care of itself, they mean just exactly that. And we need someone to take care of the American people. That's what the Ways and Means bill is all about.

It comes down to this: Who do you trust? The private health insurance industry companies have had 18 years since Mrs. Clinton and the President tried to change it in 1993 and 1994, and there's nothing that's happened except raising the rates and more people losing their insurance. Or you can trust the people who design Medicare, which has given every citizen in this country, every senior citizen, real health security.

The choice will be made in September. The American people will have a month to think about this, listen to their legislators, ask questions, read the bill. It's online. You can find it. There are plenty of ways to find out what's happening. But you have to tell your legislators, We want this bill from the Ways and Means Committee.

HONORING PHILIP MARING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. SCHAUER) is recognized for 5 minutes.

Mr. SCHAUER. Mr. Speaker, I rise today to honor Philip Maring of Grass Lake, Michigan, for his service in the United States Army. His courage and commitment while serving as an infantryman in Vietnam is truly deserving of our respect and admiration.

Mr. Maring enlisted in the U.S. Army at the age of 17 upon finishing high school. He volunteered to serve in Vietnam and was deployed with the 196th Infantry Brigade in 1972. In July of that year, Mr. Maring was severely wounded by skilled enemy explosives. He remained in the Army despite his injuries and returned home for duty with the 4th Mechanized Infantry Division. Because of his outstanding service in Vietnam, he earned both the Air Medal and the Army Commendation Medal.

Later, Philip Maring was honorably discharged, and he moved to Michigan. He is now retired and enjoys time with his six grandchildren.

Mr. Speaker, hundreds of thousands of Americans still carry the wounds of Vietnam with them. They are deserving of our constant recognition and support, and I am pleased to be able to have shared just one of their stories today.

May the United States Congress and all Americans thank and recognize my constituent, Philip Maring of Grass Lake, Michigan, for his service to our great Nation and for the injuries he sustained while serving as a U.S. Army infantryman in Vietnam.

May God bless Philip Maring and his family.

REVISIONS TO THE 302(a) ALLOCATIONS AND BUDGETARY AGGREGATES ESTABLISHED BY THE CONCURRENT RESOLUTION ON THE BUDGET FOR FISCAL YEAR 2010

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from South Carolina (Mr. SPRATT) is recognized for 5 minutes.

Mr. SPRATT. Mr. Speaker, under section 423(a)(1) of S. Con. Res. 13, the concurrent resolution on the budget for fiscal year 2010, I hereby submit an adjustment to the budget aggregates and the 302(a) allocation for the Committee on Appropriations for fiscal year 2010. Section 423(a)(1) of S. Con. Res. 13 permits the chairman of the Committee on the Budget to adjust discretionary spending limits for overseas deployments and other activities when these activities are so designated. Such a designation was included in the bill H.R. 3326 (Making appropriations for the Department of Defense for the fiscal year ending September 30, 2010, and for other purposes), as passed by the House. Corresponding tables are attached.

This adjustment is filed for the purposes of sections 302 and 311 of the Congressional Budget Act of 1974, as amended. For the purposes of the Congressional Budget Act of 1974, as amended, this adjusted allocation is to be considered as an allocation included in the budget resolution, pursuant to section 427(b) of S. Con. Res. 13.

BUDGET AGGREGATES

(On-budget amounts, in millions of dollars)

	Fiscal Year 2009	Fiscal Year 2010	Fiscal Years 2010–2014
Current Aggregates: ¹			
Budget Authority	3,668,788	2,882,117	n.a.
Outlays	3,357,366	3,002,563	n.a.
Revenues	1,532,579	1,653,728	10,500,149
Change for Appropriations adjustment:			
Budget Authority	0	0	n.a.
Outlays	0	7	n.a.
Revenues	0	0	0
Revised Aggregates:			
Budget Authority	3,668,788	2,882,117	n.a.
Outlays	3,357,366	3,002,570	n.a.
Revenues	1,532,579	1,653,728	10,500,149

¹ Current aggregates do not include the disaster allowance assumed in the budget resolution, which if needed will be excluded from current level with an emergency designation (section 423(b)).

n.a. = Not applicable because annual appropriations Acts for fiscal years 2011 through 2014 will not be considered until future sessions of Congress.

DISCRETIONARY APPROPRIATIONS—APPROPRIATIONS COMMITTEE 302(a) ALLOCATION

(In millions of dollars)

	BA	OT
Current allocation:		
Fiscal Year 2009	1,482,201	1,247,872
Fiscal Year 2010	1,219,652	1,377,611
Changes for overseas deployment and other activities designations: H.R. 3326 (Department of Defense Appropriations) floor amendment:		
Fiscal Year 2009	0	0
Fiscal Year 2010	0	7
Revised allocation:		
Fiscal Year 2009	1,482,201	1,247,872
Fiscal Year 2010	1,219,652	1,377,618

HEALTH INSURANCE FOR AMERICANS

The SPEAKER pro tempore. Under the Speaker's announced policy of January 6, 2009, the gentleman from New York (Mr. RANGEL) is recognized for 30 minutes as the designee of the majority leader.

Mr. RANGEL. First, let me thank Congresswoman WOOLSEY and Congressman ELLISON for sharing their hour with us on Ways and Means. We have been blessed in having such dedicated members of our committee coming down here in support of H.R. 3200.

You heard from BILL PASCRELL, JOHN YARMUTH, the dynamic JOHN LEWIS. We had Dr. McDERMOTT. He spends so much of his life on this very sensitive subject. Soon we will be hearing from Congresswoman SCHWARTZ, and you may have noticed that our discussion has been on a subject that the whole world has wrestled with in the United States, and that is health insurance for Americans.

Tomorrow night, we hope to be able to go back to our congressional districts to discuss this very serious and complex subject, a subject that many Presidents have looked at and hoped that we could provide some decent way to take care of American citizens. But we do believe that this courageous President has not only talked about the problem but brought together the stakeholders—the doctors, the insurers, the nurses, the hospitals, the unions, the private sector, the businesspeople—all coming together to see how they collectively would be in the position to tackle this problem once and for all. They even went as far as to suggest that we could, over 10 years, save \$2 trillion and stop the hemorrhaging of the cost of health insurance by working together, Republicans and Democrats. I say that, notwithstanding the fact that it appears as though the public debate has the Republicans fighting against the Democrats.

The fact is, you can't fight against anybody's ideas if you don't have any of your own. And it's tragic and unfortunate that during the next month, it will appear as though the Republicans are just attacking us because they don't have any way to resolve this serious problem on their own.

Having said that, we intend to move on. The Ways and Means Committee, as you have heard, has passed on a bill that we are so proud to present them. We have two other committees that have jurisdiction: the Education and Labor Committee—they have passed out their bill—and we do hope that tomorrow, we have every reason to believe, that the Energy and Commerce Committee will be passing out their bill.

That means that the House would have completed its work, the three committees would have one bill, and that in September when we come back and blend these bills and merge these bills, we will be able to have a bill that we believe we can go into conference with the Senate as they wrestle with two pieces of legislation over there. And then we hope in September, or certainly soon thereafter, we will be able to present to the President of the United States a bill that tackles this very, very serious problem.

This problem really—everybody listening and everybody in this House of Representatives has had some horror story, some story about what has happened with the insurance that they thought they had, the insurance that they lost, the insurance costs that have just soared, or even people who can't even think about leaving their jobs for fear that they would lose their insurance.

It shouldn't be, in this great country of ours, that people have to worry about education and health care as we try to compete with people throughout the world. It should be in this country that the least thing that you have to worry about if you are sick is how you're going to pay for it. And in a country as industrialized and as wealthy as we are, we shouldn't be included among a handful of countries that don't take care of its people's health.

□ 1930

So in this bill we provide health care for some 50 million people. And believe me, we're providing the insurance that they're getting one way or the other. They're getting health care. It's not the best health care. Sometimes they're afraid to go into the emergency rooms. Sometimes they can't afford to talk to doctors. Sometimes they end up worse off in terms of illness than they would have been if they did have some insurance. But nevertheless, the State governments, city governments and the Federal Government pay for it; and you pay for it too. That's part of the reason why your insurance premiums are going up, because the hospitals are going to charge those that have insurance for it; the insurance companies that are not getting paid, they're going to charge you for it; and ultimately, you're going to find out that this fiscal crisis that our Nation has is just going

to be hemorrhaged more by sharp increases in health care. So it's not just a moral problem. It's not just a health problem. It's a national interest problem in terms of the direction in which this great country of ours is going. But just imagine the relief that all of us will have to know that if we do get sick, the insurance company would not be able to come and tell you that you're not covered. Just imagine, if you want to get insurance, no pre-existing illness would prevent you from getting insurance. Just imagine, if you want to leave your job, you won't have to look at your insurance policy to see whether or not you are going to lose that and not be able to get another one. So this is really just the beginning.

The month of August is going to be America's month, a month to analyze what these bills mean, what it means to you, how it can save you money, protect your health, and protect our country against illnesses that we hope we never have; but sometimes when we are hit, people have lost their homes, lost their bank accounts and ended up in dire financial need because they couldn't afford it. Tonight we hope to share with you some of our thoughts.

I would like at this moment to yield to one of the dynamic Members from Pennsylvania, a member of our committee, Ms. SCHWARTZ. She has worked so hard in this area before she got to Congress, while she has been in Congress and has made an outstanding contribution to the Ways and Means Committee. At this time I yield her such time as she may consume.

Ms. SCHWARTZ. Well, thank you, Mr. Chairman. I have to say, it has been an honor and a privilege to serve on the Ways and Means Committee. I knew when I sought a position on the Ways and Means Committee that it would be always interesting, and we would always be doing important work, always sort of being in the mix of really the principal work that we do in Congress. I'm not sure I could ever have anticipated the opportunity that we've had over the last 7 months to work on the major issues facing this country. Really, there are few issues as important as the health care of Americans. I think we have seen in the Ways and Means Committee, under your guidance and your leadership, the fact that people bring their own experiences with health care. I think what is unique about talking about health care is that each and every one of us have our own experiences, both good and bad. We bring certainly the experiences of our constituents, the concerns of our constituents, and I think our hopes and our dreams for this country of how great it could be, if under your leadership and under our watch, to participate in finding that uniquely American solution to health care, affordable, meaningful health care for all Ameri-

cans. It's really both I think an attainable goal and a big goal. It is one that the President has set out when he ran for the presidency. He sent us out, both on the committee and to Congress, to say, Now is the time to do this.

I think each and every one of us can share stories that we hear from our constituents. I will tell just one, if I may. I have some statistics about the number of Pennsylvanians who don't have health insurance, but I think sometimes it's helpful to bring it down to a personal story. I was asked to visit one of the colleges in my district, Penn State, which is obviously well known. Its center campus is not in my district, but we do have a satellite campus in Abington, a wonderful commuter campus. I met with a group of students who wanted to talk about health care. There was a young woman who talked about the fact that she was raised by a single mother, and she was on CHIP. I think all of us are very proud of the Children's Health Insurance Program. She said her mother made \$20,000, \$25,000 a year. She didn't get health insurance through her work, and there was no way that she was able to afford it on her own. She got CHIP, and she was always grateful that her kids had health insurance.

Well, this young woman was over 21. She no longer had access to CHIP. But she was working full time, was a full-time student; and because of the commuter campus, doesn't either require or offer a way for students to buy health insurance, she looked for it, but it was unaffordable for her. There was no way. She actually tried to find an affordable health policy but couldn't find one. So she took a chance. She had said just a short while before she had gotten sick; and friends of hers felt that she was sick enough that she ought to go to the emergency room; and she went to the emergency room and ended up with a \$7,000 bill. I don't know if she was held overnight. We didn't get into the details of what care she received. But she was healthy. She was doing fine. But suddenly she is faced with \$7,000 in a bill. She had no idea how she was ever going to pay that \$7,000, stay in school and continue on her path. She had a promising future ahead of her. It was going to ruin her credit rating. All of these things. There were consequences; and yet she still said to me, Well, how can we be in this great country and not be able to help her out? I think that's why we're here.

It is for the 50 million Americans without health coverage, certainly for the many, many more millions of Americans who have health coverage who find that if they go to the hospital, something's not covered, that they have a pre-existing condition and are not able to find the coverage, even though they have health insurance. This is why we're here. I had one small

business owner tell me, "I want to be able to provide health insurance, but I can't afford it," or "I provide it, but one of our small group of employees got a serious illness, and we saw a rate increase of 40 percent from one year to the next."

We talk about double-digit inflation. We know that in the last 8 years, we've seen health premiums double in price; and of course we are concerned about the Federal Government as well. We have a deep concern about absolutely maintaining our commitment to seniors in this country under Medicare. They rely on it. Imagine our seniors not having access to health care. This is something that we did 35 years ago—not you and I, but any of you who were here—to get Medicare coverage for all seniors. But again, we see the unsustainable growth in costs. So what are we going to do about it? We actually have a bill before us. We passed it out of the Ways and Means Committee, it was voted on by the Education and Labor Committee; and of course, as we speak, the Energy and Commerce Committee is going through the bill.

What it does is it addresses just the issues, the concerns and the realities of the families that I talked about. It finds a way to bring down the costs under Medicare by really instilling in our system a goal of quality and the value of our dollars, encouraging primary care.

Part of the bill that I want to, again, thank the chairman, his staff and other Members for including in this bill is for the increased opportunity for loan forgiveness and debt repayment so physicians and nurse practitioners can go into primary care. Increased reimbursements in primary care. A new category of medical homes so that if a primary care physician, nurse practitioner or physician's assistant wants to be able to provide ongoing care between visits, make that phone call to see how somebody, like an early diabetic, is doing, make sure they get the kind of care that they need, make sure that they followed up on their prescriptions and that they're following the instructions, that they understand the diet and the exercise that they have to engage in so that they don't end up on renal dialysis years later, lose sight or any of the number of things that can happen with untreated diabetes, is just one example. We actually encourage payments that are bundled—that is our term—but it really basically says, We're going to look out for what happens to you in the hospital and when you go home. New possibilities of encouraging physicians to get together and provide both primary care and specialty care and to keep people out of the hospital. These are life saving and cost saving for the government.

We have got almost \$500 billion in savings that have been already included in the bill that we have before

us. And of course we have found ways to help small businesses with tax credits, to be able to provide health coverage for their employees and encourage all employers to cover health care. Then for the group that is already insured, to say, You're never again going to have preexisting condition exclusions; you are never again going to have to worry about the insurance companies finding a reason to deny coverage because of a health condition; that you won't again have to worry about going bankrupt because we will say, You don't have to pay any more than 10 percent or 12 percent of your annual salary. You will never again have to lose your home or go bankrupt over health costs. These are just some of the consumer protections that we are going to build for people who already have insurance. And of course if you lose your job or you are between jobs—and many Americans change jobs every 3 or 4 or 5 years—that you will have that continuity of coverage. And last, but by no means unimportant, we are going to find a way to help all those 50 million Americans who don't have access to affordable coverage through a new marketplace called an exchange; and we're going set them in a benefits package; and we are going to provide some subsidies for lower income, working folks. At the end of the day, we're going to do what the President told us he wanted to do, and that is to contain costs for government, for businesses and for families. We're going to make sure that insurance is meaningful, and we're going to make sure that every American has access to health coverage. At the end of the day, it's going to be a great day.

Mr. RANGEL. I would like to recognize Dr. McDERMOTT because when people have nothing to compete with, I think it's natural just for them to be critical. I hear talk, Dr. McDERMOTT, that this plan that we're creating for all of America is actually a takeover of all insurance plans by the Federal Government. They say that the Congress and the Federal Government want to get in between a patient and their doctor and to watch out because the government is coming. It bothers me that they would say that because it would appear as though we're only talking about Democrats who are sick and have doctors. We're trying to help all Americans. Could you share with us the public option, what this does for America and what opportunity it gives to people who don't have insurance?

Mr. McDERMOTT. Well, Mr. Chairman, you raise the issue I think that is probably our biggest and most tough issue to deal with, and that's the question of fear. People continue trying to convince people that they have to be afraid. We had a speaker here just a moment ago who had a beautiful picture of a little child, and the fear was that the government is going to come

and take over their health care. Now nothing could be further from the truth in what we've put together.

If you look at America, you have 150 million people in private insurance. Then you've got 50 million people in Medicare; you've got 50 million in Medicaid; and then you've got 50 million who don't have anything. Now these people who have insurance today in their employment, each month when 300,000, 400,000, or 500,000 people lose their jobs, they suddenly are over in the basket with the people who don't have health insurance. So we're not talking about people who aren't trying or people who haven't been paying their taxes or haven't been working. We're talking about us, the middle class, who are in danger in this present system because if your employer stops paying your insurance, you don't have anything, and you're suddenly over here trying to buy it for yourself. It wouldn't matter if you are older, you've got a problem, you've got a problem kid or whatever. You are going to have a very tough time. Now the answer to that is for the government to say, Here is a public option that you can buy into at an affordable price.

The problem with individual insurance, most people by the time they're 30 or 40, you know, something's starting to go wrong, whatever; and the premium for those kinds of insurance programs is \$1,000 a month. Many people are paying \$12,000 out of pocket trying to buy an individual program. That is unreachable for most of the working class in this country. They can't come up with that kind of money. The only solution is to have a government-subsidized program that they can buy into.

Now people say, Ah, there it is. The government's going to make all the decisions. No. You're going to buy an insurance program that will be paid for by a government mechanism, but the delivery of the health care is going to be by private physicians, private hospitals, private nurses. The whole thing is private.

Mr. RANGEL. How could the government get in between the doctor, the hospital and the patient? What are they talking about?

Mr. McDERMOTT. It's part of the scare tactics. If you watch television tonight when you go home, you will see commercials on there saying that the government is somehow going to get between—they did it in '93, '94. It was Harry and Louise. Harry and Louise were sitting at the kitchen table, and Harry says to Louise, You know that Mrs. Clinton, she is going to take away our health care. They're doing that same thing again now, making it appear that that's what's going to happen when no such thing is being planned.

□ 1945

There is no question that the government is not going to be between you

and your doctor and making a decision what needs to be done.

Mr. RANGEL. Well, why would the private insurance companies be against the public option? I mean, if the Congress is saying—and the President wants—that we have 50 million people out there with no health insurance, another 25 million with low health insurance, and we are now going to give them a subsidy, we are going to give them enough money so that they can walk in and get the type of health plan they want, why would the health insurance companies out there fight against, campaign against, put ads against the public option? Why would they do this?

Mr. McDERMOTT. Well, because our bill, CHARLIE, has one thing in it; it says to insurance companies you can't cherry-pick the healthy patients you want to take care of and leave the sick ones to somebody else.

What we say is if you're an insurance company, you've got to cover everybody; you've got to open the doors wide and let anybody come in. Insurance companies don't want that. What they want are healthy patients who pay a premium, for whom they have to pay out very little money, then they can give the rest to the stockholders. Now, there's nothing wrong with that, that's the free enterprise system. But they're afraid that if we have a government system that is there for the people's benefit and has a 3 percent overhead, whereas an average insurance company overhead is 14 percent—and they know the people are going to take the lower premium in the government plan, or they're afraid of that—so they say, you've got to put us on a level playing field.

Well, you can't make profit off people's sickness and have a level playing field with a government plan.

Mr. RANGEL. Well, let me ask Congresswoman SCHWARTZ. If, indeed, the private insurance companies are fighting against the public option, does our legislation demand that a person has to join the public option? How does that work in our legislation?

Ms. SCHWARTZ. Right. It's a really good question. Of course not. We are not in any way telling people where they have to get their coverage or where they have to buy their insurance. If in fact people get a subsidy—and, really, understand that everyone is going to have to pay something. We're not giving away too much free here, everyone is going to pay their share. We're going to help people.

But we're saying to the insurance companies, fine, come in and compete. That's great. We're going to create a marketplace where you can offer new products to another 30 million, almost 40 million people, and then each of those individuals or families or very small businesses will be able to choose between private insurance companies and a public option.

I see that the public option is an opportunity to ensure that there really is competition, because I think in many of the markets across the country we have one major insurance provider, that's it; so not a lot of competition. If you believe in the free market system, you need a little competition there. If you only have one product to buy, and it's very expensive, you don't have a lot of choices.

The insurance companies—I'm not here to beat up on insurance companies, but I will say, they have said if everyone's in, they want to be able to have the opportunity to sell a good product to people. That's fine; we're fine with that. We want them to step up to the plate and offer new insurance products to individuals and small groups. And again, as Mr. McDERMOTT said, make sure it covers certain benefits, it doesn't exclude people, it doesn't cherry-pick, as you say.

There are going to be rules. And we are going to make sure that consumers are protected under these rules. That is very important. But no one is going to be told to go into the public option, no one. They can choose the insurance.

Mr. RANGEL. Well, Dr. McDERMOTT, I've heard Republicans say on this floor, in this House of Representatives, and others on television, that this public option that's being offered to people to take if they want it is really a Democratic socialistic, communist attempt to knock out the private sector. Where do they get this idea, and what do they mean?

Mr. McDERMOTT. It's very strange. And people who talk about believing in competition and believe in the marketplace, as Representative SCHWARTZ says, there are places in this country where there is only one option; and if you have nobody to compete with, they control the prices. And for them to get the idea that it's socialistic to put somebody in there to compete is really saying they're afraid to compete.

They know they can't win. They have failed over the last 18 years. They knocked out Mrs. Clinton's efforts in '93. They had an open field. The entire country was open to the private sector, and they cannot figure out how to cover 50 million people. So we come stepping in and say, we have a way. And they say, oh, no, no. If the people ever get wind of what you're doing, they will leave us. They're afraid that people will leave them because they have been in it for the profit and not in it for the benefit of the patients. And that's really why I think they're afraid.

Mr. RANGEL. Well, some of the private insurance companies say we just don't have enough resources to take care of all these poor folks that you're giving subsidies to. Let me ask you, Congresswoman: Is there anything that we're doing to provide the workforce and to provide the environment so that

sick people can feel secure in getting health care once they have the subsidy?

Ms. SCHWARTZ. Right. And understand that subsidies are provided. Poor people in this country do get Medicaid, and we're expanding that. These are really people who work—and many poor people do as well—every day and simply don't make enough money to be able to afford the high rates of insurance. That's part of it. We want to bring down the cost of the insurance. Again, we hope that the private insurers step up to the plate and help us do that, but they haven't done a great job of containing costs over the last number of years which is why we're in this situation.

But once people have insurance, we are really working hard to make sure that the delivery system, all those doctors and nurses and—well, you can name all the other health providers—are both available and that we're training enough. We anticipate that if we don't do something about the lack of primary care physicians, in 2025 there will be 46,000 too few primary care doctors. That is pretty astounding. A lot of us are getting older—all of us are getting older, I guess—neither of you are, of course—but we also want to make sure that we have the kind of care for every age.

And we're not getting the quality out of the system that we know we should, and that also is an issue that we have taken up in this legislation. We want to encourage our hospitals and our doctors, through financial carrots—there might be some sticks, but mostly we are really creating incentives for our doctors and our hospitals to improve quality.

One of the examples that many of us are becoming aware of is infections that you get in a hospital, or when you leave the hospital after surgery, that you don't have the right kind of followup once you get home and you end up back in the hospital. That's not only really hurtful for the person who is affected, who's sick, but it's also very expensive for all of us. So if we can, and our hospitals can, if we can encourage our hospitals—and in fact insist upon our hospitals really making sure that they reduce the number of infections and readmissions, we would all be better off. And that's what we're trying to do.

There are many pages of what we call delivery system reforms, ways in which we are encouraging everything from home visits after a baby is born to a family, to, as I talked about, primary care, medical homes, and ways that doctors will be able to organize themselves in a way that is much more efficient in quality.

And we're setting out a real goal of changing some of the ways we pay doctors and hospitals, to encourage them to really look at quality and to save

dollars and improve health outcomes. That is one of the most discouraging things; for all the dollars we spend, \$2.5 trillion—not all government, half of it's in the private sector—we don't have the kind of healthy Americans that we should. And that is part of our goal, here, to extend coverage, for the government to be smarter in the way we finance it, and for people to take more personal responsibility in their own health care as well.

Mr. RANGEL. Dr. McDERMOTT, before you came here you've practiced, you've been out here, you've worked with patients and doctors and hospitals. One of the most frightening thoughts that we have is that you get sick and you don't have enough coverage—or you don't have any coverage—you face bankruptcy, you lose your home, you lose your dignity, and sometimes even lose your family merely because you didn't have the resources to deal with a catastrophic illness. What provisions are in this legislation to protect Americans against that?

Mr. McDERMOTT. Well, the plan that would be provided for every American who was in a health insurance plan, whether the private one they were in before or the one that they're in in the government option, would give them the protection for the basic things that everybody needs in a health care system.

I have a story you reminded me of. One night I was going out of a hospital in Seattle and a telephone operator stopped me and said they want you up on the coronary care unit. So I went up there, and there was a guy putting on his clothes and said, I'm leaving the hospital. He had had a heart attack the day before. They wanted him to stay in the hospital. He said, Look, I have no health insurance. If I lie in this bed, it costs me \$1,000 a day, and I can't afford it. And what if I die? I then leave my family with a big bill. So either way I'm caught. And when we put this program together, we give people the assurance that if you have a heart attack, or whatever, and you need hospitalization, you will be taken care of.

Mr. RANGEL. Well, let me thank the speaker and Mr. ELLISON and Ms. WOOLSEY for giving us an opportunity to share what's in our bill. We will be back tomorrow. And we hope during August all Americans can look forward to the President of the United States signing a bill that will give them confidence that wellness is the top priority for this Congress.

Mr. Speaker, I yield back the balance of my time.

THE PROGRESSIVE CAUCUS ON HEALTH CARE

The SPEAKER pro tempore. Under the Speaker's announced policy of January 6, 2009, the gentleman from Minnesota (Mr. ELLISON) is recognized for 30 minutes as the designee of the majority leader.

Mr. ELLISON. Mr. Speaker, this is the Special Order hour of the Congressional Progressive Caucus. We come every week to talk with each other and to talk on the House floor about a progressive vision for America, a progressive vision that embraces everybody, where we all do better when we all do better, a progressive vision that says that the greatest moments of American history were when we passed the civil rights bill, when we invested in our infrastructure during the Roosevelt era. The greatest moments in American history were when we passed the 19th Amendment recognizing the right of women to vote. These are the great moments of American history. And this great tradition of a progressive vision for America is what we carry on week in and week out. I want to say that if you want to communicate with us, our Web site is here at the bottom of the page, cpc.grijalva.house.gov.

What I would like to do, Mr. Speaker, is right away turn the microphone over and yield to our caucus cochair, one of the stalwart, big-time fighters who never backs down and always is for the people, who has lived it, who knows it, and who is now representing the people of California in a great struggle to promote a progressive vision, none other than Congresswoman LYNN WOOLSEY—who, by the way, has more 5 minutes against the Iraq war than anybody else in history. I yield to the gentlelady from California.

Ms. WOOLSEY. Thank you very much. And thank you so much, Congressman ELLISON, for doing this every single week for the Progressive Caucus because we do have a progressive message, and by the end of the day, we sometimes think that we are too tired to come down here and talk about our message.

We are in the middle of a health care debate right here in the House of Representatives. And as Congressman RANGEL told us, two of the committees have marked up, written, and are ready to present their health care bills. One of the committees is Ways and Means, the other one is Education and Labor. The Energy and Commerce Committee is working on it right now. And we're going to leave before the end of the week, and we're going to go off while our leadership and the heads of those three committees put the bill together out of these three committees.

One of the committees, what's happening in Energy and Commerce, the progressives disagree with very, very severely. So we have written a letter to

our leadership, to the Speaker and the three chairmen of these committees who will be writing this, pulling these bills together, laying out what the progressives in this Congress stand for, once again, regarding health care.

I'm going to read this letter because I think it's very important. We have 57 Members of the House of Representatives who have signed this letter just today.

□ 2000

I'm reading it to make sure it is in the RECORD.

It says: "Dear Madam Speaker, Chairman Waxman, Chairman Rangel, and Chairman Miller, we write to voice our opposition to the negotiated health care reform agreement under consideration in the Energy and Commerce Committee.

"We regard the agreement reached by Chairman Waxman with several Blue Dog members of the committee as fundamentally unacceptable. This agreement is not a step forward toward a good health care bill but a large step backwards.

"Any bill that does not provide, at a minimum, for a public option with reimbursement rates based on Medicare rates, not negotiated rates, is unacceptable. It would ensure higher costs for the public plan and would do nothing to achieve the goal of keeping insurance companies honest and their rates down.

"To offset the increased costs incurred by adopting the provisions advocated by the Blue Dog members of the committee, the agreement would reduce subsidies to low- and middle-income families, requiring them to pay a larger portion of their income for insurance premiums, and would impose an unfunded mandate on the States to pay for what were to have been Federal costs.

"In short, this agreement will result in the public, both as insurance purchasers and as taxpayers, paying even higher rates to insurance companies. We simply cannot vote for such a proposal."

Mr. ELLISON. So as the Chair of the Progressive Caucus, along with Congressman GRIJALVA, are the Progressives and others hanging tough and sticking up for a robust public option?

Ms. WOOLSEY. That is what this letter is all about. We just want the Chairs of all three committees, when they moosh the three bills together, to know that the Ways and Means Committee and the Education and Labor Committee have bills that we can support. Do not weaken those bills with what is being proposed in the Energy and Commerce Committee this week. That is our goal. And it was not only Progressive Caucus members. It was also the TriCaucus that signed onto this, which is the Congressional Black Caucus, the Congressional Hispanic

Caucus, and the Asian American Caucus.

So this is our letter. This is what we stand for, and this is what we're hoping we will have when we are voting for real health care reform later this fall.

Mr. ELLISON. We thank the gentlewoman for reading that letter into the RECORD.

I want to say that we are joined by Congresswoman EDWARDS of Maryland, who has been a courageous fighter for many issues but has not shrunk from the battle in this fight for real health care reform.

Let me ask the gentlewoman, I think Congressman McDERMOTT has a quick thing he wants to say. So, if the gentlewoman will allow me to yield to him first, then I will yield to her.

Mr. McDERMOTT. I appreciate your giving me a chance to say something. I spoke a little earlier. But one thing I wanted to say. In Seattle they announced that on August 1 the premiums on insurance policies are going up 17 percent.

Now, when people talk about fear and they have to fear the government and fear the government option, this is a real fear. This 17 percent increase in Seattle is going to hurt people badly. Some people are not going to be able to afford continuing their insurance, and that's why it's so important that the Progressive Caucus, led by you and by Ms. WOOLSEY, are out here making sure that people understand there is an option to these absolutely unacceptable increases in premiums.

Nothing else has gone up 17 percent. Housing prices have dropped. Gasoline prices have dropped. But health insurance? Up 17 percent. The only way we are going to stop that is with a government option that makes competition.

Thank you for the work that you are doing. And I again say thank you to the gentlewoman for letting me speak.

Mr. ELLISON. Thank you, Dr. McDERMOTT, for your passionate advocacy.

Now I yield to one of my favorite Members. I love to hear her talk about these issues because she is so articulate. I yield to Congresswoman EDWARDS.

Ms. EDWARDS of Maryland. I thank the gentleman from Minnesota for yielding.

We have been here talking about health care reform, and sometimes out in America when they watch Congress, they might think that this is about Blue Dogs and Progressives and liberals and conservatives and Republicans and Democrats, but health care reform is actually about people.

It's about, for example, a young woman in my congressional district from Hyattsville, Maryland, Ariella, who writes to me that she was 13 years old when her father developed cancer and they were struggling without insurance. And she said no one should be

13 years old and wondering if the insurance company would pay for her father's treatment so that he could see his daughter's next birthday. "Your support and determination to improve this system means the world to so many of us. On behalf of my family and the American Cancer Society, thank you."

It's about Ariella, and it's about the millions of people across the country who don't have health care. It's about millions more who are underinsured, and it's about millions who are insured and are paying skyrocketing costs just discussed by our colleague from Washington, skyrocketing costs of premiums and deductibles and copays that are rising three times the rate of wages.

A good friend of mine from New Hampshire, one of our colleagues, put together this chart, and it shows what the alternatives are. And we can either really work for reform together or not.

Some people know that if you don't have any money and you don't have any insurance, you get sick and it's a disaster. If you have a preexisting condition and you don't have health insurance, you get sick and it's a disaster. If you're laid off and you don't have insurance, you get sick and it's a disaster. If your employer drops your coverage, you don't have any insurance, you get sick, it's a disaster. And so, really, the Republican plan for health care reform is just don't get sick. Well, that's not an option for most Americans.

I know that we have a process here, and I think Americans across the country, Mr. Speaker, are really trying to understand that process, but that's kind of internal. It's not about Ariella who doesn't have health insurance. I know that probably so many of our offices here in the Congress have received letters just as I have from people throughout my congressional district who are begging us to reform this health care system.

They are begging us for their 77-year-old mother who has a gap in her health insurance. They're begging us for their cousin who has breast cancer, who's not getting paid to work, is too sick to go to work, but can't afford even to stay home and to get treatment. They're begging us for their children who have preexisting conditions and can't get insured at all. The American public is begging us to do something about health care reform. We can't just have a plan that says just please don't get sick.

I tried that plan. This Member of Congress tried that plan. Seventeen years ago I didn't have health insurance, and I just crossed my fingers every night not to get sick. I ended up getting sick. I was sick in the produce section of the grocery store. I passed out. I was rushed to the hospital emergency room. And I ended up with thou-

sands of dollars in health care costs. It took me years and years to pay it off. I almost lost my home as a result of that. No American should have to make that kind of decision. And you know what it would have been? It would have been a couple of hundred dollars to go visit the doctor and get some antibiotics, and instead it was thousands of dollars, a financial disaster, and almost losing my home in the process. That's what Americans are suffering from right now, and that's why we have to fix this system.

Now, I know, Mr. ELLISON and Mr. Speaker, we have a process, but that process has to involve, I believe, a public health insurance option that says no matter if you get sick, if you don't have insurance now, you're going to be covered, and we are going to bring down the cost for everyone. That's what Americans want. And it doesn't matter whether you're a middle-income family, a working family, a poor family. You shouldn't have to make a life decision about whether you and your children and your family get health care because you can't afford it.

So I'm excited about the prospect for reform. But I know that there are some bad guys in this fight and the bad guys are out there. I want to share with you who some of those bad guys are because the challenge for us is helping the American people understand that in this country there are people who share interests who don't want to reform the system. The big winners in this broken health care system, let's look at who they are:

The CEO of United Health Group, Stephen Hemsley, his annual financial report, United Health made \$81.2 billion. Their net income, \$2.9 billion. His salary, \$3.2 million.

Mr. Speaker, this is what's at stake. The CEO of WellPoint, Angela Braly, \$61.3 billion they made. Their income, \$2.5 billion. I mean, Americans can't even count these zeros because we don't understand them. What was her salary? It was \$9.8 million.

I mean, this is outrageous. This is the money that that's at stake.

The CEO of CIGNA, Ed Hanway, the annual revenue, \$19.1 billion, \$292 million in net income. His salary, \$12.2 million.

Let's call out these names because I think it's important for Americans to put the names on the faces of those who are reaping billions of dollars of profit, netting millions of dollars in salary, and then taking the American public to the bank without health care reform.

The CEO, Ronald Williams, of Aetna, \$30.9 billion in revenue for Aetna; \$2.8 billion in net income; and his salary, \$24.3 million.

This is outrageous. There's a lot at stake. I understand why these folks are fighting health care reform. I understand, because they stand a lot to lose.

And our job here in the United States Congress is to make sure that it's the American public that wins, that it's the taxpayer that wins, that it's the patient that wins, that it's the doctor who has a relationship with their patient, and not these insurance companies standing between you and your health care, between you and your doctor.

Mr. ELLISON. I actually have a few questions, but I am going to yield to the gentleman from Illinois.

Before I do that, I just want to say that if we just took some of these salaries that are out there and put them into providing care for people, maybe we wouldn't have nearly 50 million people without health care and another 25 million without adequate insurance. It's really outrageous. And they're spending about \$1.4 million a day to lobby against health care, and that's nothing but pocket change for some of those folks, and I can see why they would do that.

With that, I will yield to the gentleman from Illinois, Congressman DAVIS.

Mr. DAVIS of Illinois. Thank you very much, Representative ELLISON.

Let me, first of all, commend you for the leadership that you continue to display as the message leader for the Progressive Caucus. I see you here every week and oftentimes Representative EDWARDS is here with you. So I'm pleased to join you and her and Representative MCDERMOTT, with whom I serve on the Ways and Means Committee, and I know that Chairman RANGEL was here a few minutes ago and others.

□ 2015

You know, as I listened to Representative EDWARDS and as she talked about the winners and the losers, it is amazing that individuals in the health care arena are earning these kind of salaries, and that people are able to somehow or another not want to pay, and people somehow or another don't want to add a few extra dollars.

I come from a county with over 5 million people, and unfortunately, many of them are low income. They are poor. Many of them don't have any insurance at all. They don't have any way to access care, any way to be taken care of. Some of them go to emergency rooms of hospitals that are as many as 8 and 10 miles away in an urban area, and they can't get there.

To think that we now have an opportunity to reform, in a real way, health care delivery and to create the kind of health care delivery system that says that all of our citizens have worth, I don't know how those who are opposing a public option, I don't even know how you could begin to talk seriously about reforming our health care delivery system without a public option.

I have sat through the many hearings that we have had in Ways and Means. I

have sat through countless hours of discussions with staff and experts. No matter what we come up with, we know that we need a robust, not a minuscule, not a weak, not an anemic public option, but we need a real public option, one that can help build upon the network of community health centers that we have spread across the country, which have proven to be worth their weight in gold, which have proven that they can deliver first-rate health and medical care in a cost-efficient way with individuals who understand the language, the culture, and the lifestyles of the people who come.

I agree with the Progressive Caucus members, as well as others, that there just ought not to be a plan without a serious public option.

Again, I want to commend both of you for the tremendous leadership that you continue to display. I know with the kind of attention and care that you give to these issues, that our Congress and our people are going to be in good shape for many years to come.

So, it has been a pleasure for me to stop by and to join with you and have a few words to say. Of course, you know, I remember a term we used to use a lot back in the sixties and seventies. We used to say "a luta continua," meaning that the struggle must continue and we will conquer, without a doubt. If we dare to struggle, we dare to win.

Thank you so much. It is a pleasure to be here.

Mr. ELLISON. Let me thank you again, Congressman DAVIS. You have been putting it out there for so long. There are 57 Members who insist upon a robust public option. It is wonderful to count you among one of those. I think the American people can rest assured there are people in this Congress who are sticking up for their interests and fighting for them, and your leadership in that regard is inspirational. Thank you, sir.

Mr. DAVIS of Illinois. Thank you very much.

Mr. ELLISON. Let me then yield back to the gentlelady from Maryland, Congresswoman EDWARDS. You have got some pretty good stuff over there. What else do you have?

Ms. EDWARDS of Maryland. I have thought about this a lot, as many of us have, and I know that our leadership, the Democratic leadership in this Congress, is moving toward reform at a pace and for a reason that we know is really important. We also know that our President wants real reform. So I think the importance of the discussion that we are having this evening is about how we define reform, particularly how we define a public option and why it is needed.

I think Congressman DAVIS said it, that the system won't really work without a public option. We won't be able to bring down costs without a pub-

lic option. We want people to have choice, the choice of their doctor, choice of their providers. We want people to have the choice to look at the various plans stacked up against each other and say, I want this one over that one. We can do that with a robust public option, one that is tied to the Medicare network.

Today is the 44th anniversary of the enactment of Medicare, and it is instructive that we are here on this day, because there are those who like to say government can't do anything, government doesn't know how to do health care. Well, government sure knew how to do Medicare, and for 44 years people in this country have had the benefit of Medicare, have had the benefit of a Medicare provider network.

That is the kind of network we want for a public option, one that has doctors. We need more doctors, and this legislation that we are looking at will provide more doctors and more nurses. It will ensure that people can get primary care and preventive care. It will ensure that people aren't excluded because of preexisting conditions, and we know that is a problem.

So there are a lot of good things that we have to celebrate about where we are today. But we also have to be vigilant, as Congressman DAVIS said. We have to be vigilant to ensure that we have a robust public option tied to the Medicare provider network and that relies on a payment structure that is stable so that we can inject real competition into the system. Not competition upward for premiums and deductibles and copays, but competition downward, so that we can lower costs, provide quality care, and have a choice of doctors.

I have been thinking, Congressman ELLISON and Mr. Speaker, I have been thinking that there are a lot of enemies to reform and there is a lot at stake out there. There is money flowing all over the system. Not just the CEO salaries and the bonuses and the profits. That is bad enough. So the insurance companies have a lot to lose. And, do you know what? We found out that that is why they have decided that they are going to put skin in this game, and the skin that they put in the game to oppose reform is in the form of their money.

All you have to do is follow the money to know why the enemies of reform are galvanizing. We have to be strong and courageous in our fight against them and for the American people for health care reform.

If you follow the money, let's look at CEO compensation, \$85.4 million. Lobbying expenditures, what they have been spending to fight reform, \$62.5 million. PhRMA alone in the pharmaceutical industry has spent \$233.7 million. And look at their profits, \$8.4 billion. This is a lot of money that is at stake.

So if you follow that money and then follow it right to campaign contributions, they have been throwing campaign contributions all over the map; \$28 million, or \$220 million for the 10-year period from 1998 to 2008. And do you know why? Because they don't want reform.

That is why it is up to those of us in the Congress who are looking out for regular people, looking out for people throughout our congressional districts who really are struggling to pay their premiums and their deductibles and who are struggling to pay their copays that are going up.

I look at my own district. We have a lot of people actually who have health insurance, and the reason is because they have it through their employers. But even their employers are really struggling now. It is getting in the way of our competitiveness. It is getting in the way, because people know that they can't afford, anymore, these premiums. The premiums are going up three times the rate of our wages.

But do you know what? The wages of those CEOs have been going up. Some of their wages have gone up 26 percent in just this last year. But have any of us seen our wages go up like that? The American public hasn't, and it means that those deductibles and those premiums and those copays are no longer affordable.

Mr. ELLISON. Reclaiming my time, the reform that we are talking about includes employer-based health care, where there couldn't be an exclusion for preexisting conditions. There are the existing government programs, Medicare, Medicaid. Part of the money, if we get the version we are looking for, would be to help States cover everybody for Medicaid.

Then the third thing, this would be new and would include a robust public option. The public option would be a program run by an agency in the government that would be not looking to generate a profit. In that case, would the public option that we have been talking about, would they be reaping a portion of those, what is that, \$84 billion in profit? Would that be a cost measure within the public option, if we were able to achieve that?

Ms. EDWARDS of Maryland. Well, I think that what would happen is that the public option would be so competitive. Keep in mind that the CEO of the public option, the Secretary of Health and Human Services, doesn't make \$9.8 million a year. It is a basic government salary, I don't know, about \$175,000 or \$185,000 a year to run all of Medicare. Our CEO is a government employee who doesn't make a ton of money, who is not reaping millions and millions of dollars in compensation.

This is only compensation. Maybe next time I will bring the bonus chart. That would require a lot more zeros.

But I think really there is so much overhead in the private insurance, and

it is really sending costs up. All we want is a public option, and what the American people want is a public option, because something like 70-some percent of the American public actually support a public option, and what they want is something that competes with the private insurers.

After all, Mr. ELLISON, I am not really sure what the private insurers are afraid of, because if they believe in the free marketplace, put the public option in there, let it compete in the free marketplace, and I will tell you what, the competition will be on and costs will be down.

Mr. ELLISON. That is right. And lobbying expenditures, CEO compensation and profits will not be there.

We will have to yield back and be back the next time. This has been the Progressive Hour.

NOTICE OF CONTINUING EMERGENCY WITH RESPECT TO SOVEREIGNTY OF LEBANON—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 111-59)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Foreign Affairs and ordered to be printed:

To the Congress of the United States:

Section 202(d) of the National Emergencies Act (50 U.S.C. 1622(d)) provides for the automatic termination of a national emergency unless, prior to the anniversary date of its declaration, the President publishes in the *Federal Register* and transmits to the Congress a notice stating that the emergency is to continue in effect beyond the anniversary date. In accordance with this provision, I have sent to the *Federal Register* for publication the enclosed notice stating that the national emergency declared with respect to the actions of certain persons to undermine the sovereignty of Lebanon or its democratic processes and institutions is to continue in effect beyond August 1, 2009.

In the past 6 months, the United States has used dialogue with the Syrian government to address concerns and identify areas of mutual interest, including support for Lebanese sovereignty. Despite some positive developments in the past year, including the establishment of diplomatic relations and an exchange of ambassadors between Lebanon and Syria, the actions of certain persons continue to contribute to political and economic instability in Lebanon and the region and constitute a continuing unusual and extraordinary threat to the national security and foreign policy of the United States. For these reasons, I have determined that it is necessary to continue the national emergency de-

clared on August 1, 2007, to deal with that threat and the related measures adopted on that date to respond to the emergency.

BARACK OBAMA.
THE WHITE HOUSE, July 30, 2009.

DOCTORS HOUR

The SPEAKER pro tempore (Mr. KRATOVL). Under the Speaker's announced policy of January 6, 2009, the gentleman from Louisiana (Mr. CASSIDY) is recognized for 60 minutes as the designee of the minority leader.

Mr. CASSIDY. Mr. Speaker, we are pleased to be here. We call this the Doctors Hour because there is a fair number of us on the Republican side who are physicians or in some way health care providers, optometrists, a practicing psychologist, or in some other way connected with the health care field. So we give our own perspective.

Now, my own bio, if you will, aside from being a physician, I have worked with the uninsured in my State of Louisiana for the last 20 years.

□ 2030

That's almost 90 percent of my practice, working with the uninsured in a public hospital. And so, when I speak of what we need to do to help the uninsured, it is purely flowing out of my life experience. I think that as the others come up I'll give them a chance to speak as to it what they're about. I'll start off with a couple of comments. I've learned in my 20 years of, whether private practice or public practice, that the only thing that lowers costs is if you make things patient-centric. If the government is in charge, or the insurance company or a bureaucracy run by anybody is in charge, it becomes something that doesn't work for the patient. The patient's separated from costs. They have a harder time accessing benefits. It just doesn't work.

On the other hand, if you put the patient in the middle, if you tell that woman, listen, you can go see the physician you wish to see and when you go in there there's minimal administrative hassle. And if you don't like that physician, you can go see another physician. It really works. The patient's satisfied, and typically, the patient/physician relationship is stronger. And key to getting good health care is having a strong patient/physician relationship.

Now, frankly, I think the only thing innovative that we've heard from the other side, although their plan kind of is changing on a day-by-day basis, is in one sense, the only thing about that plan which is radical is that it nationalizes health insurance. I was a little amused by my Democratic colleagues earlier who were saying, Oh, my gosh, Republicans are defending insurance companies. No, actually I think they're

defending insurance companies. They like insurance companies so much they want to nationalize it and have a national insurance company.

Now I'm thinking, now we have an insurance company run by the private sector that, if it doesn't work, constituents call Congresswomen, Congressmen, we pass a law that changes that, changes that so that the private insurance company plays by better rules. Now, though, it's going to be both the referee and the player. Now the government will make the rules, but also compete. And as it does that, in some way, we're supposed to expect that the government-run insurance company is going to be kinder and gentler, more cost-effective, higher value product than is the private insurance company.

I think it's the triumph of hope over experience. We hope it will be better. We know Medicaid and Medicare don't work as we wish; in fact, they're going bankrupt, and their bankruptcy is what's driving this plan. And so we're going to believe that the third try is going to be the charm and that this time we get it right. Well, without going further, I'll yield to my fellow physician from Louisiana, JOHN FLEMING.

Mr. FLEMING. Well, I thank my friend and fellow colleague, both a physician and fellow Member of Congress, BILL CASSIDY, and also fellow Louisianan. And of course tonight we're going to be talking about a lot of different things relative to what is really the hottest topic maybe in a decade, health care reform, which both sides of the House are very interested in.

You know, you hear often from this side of the aisle that well, for heavens sakes, we want health care reform. But you guys, on the other hand, Republicans, you want the status quo. Well, I can tell you personally, that I ran for Congress with the overarching intent of getting up here and participating in reform. What I want to bring forth first, before we get into some more details is, I think there's a litmus test as to how good a government-run system is, that proposed by the President and the Democrats. And so, the question is, a rhetorical question is, if it's so good, then shouldn't Congress be the first ones to sign up for it individually, for them and their families?

And, in fact, to see to that, I set forth House Resolution 615, which is supported by 66 Republicans, including our leadership on down, and all it says is that if a Member of Congress votes for a government-run health plan, a public option, if you will, then he or she is willing to forego the waiver, the carve out, the exception, if you will, that's built into their version, and join it immediately for themselves.

Mr. CASSIDY. Now, Congressman FLEMING, how many Democratic co-sponsors do you have?

Mr. FLEMING. I'm sad to say to my friend, and I thank you for yielding back, that so far we have no Democrats, goose egg, zero Democrats.

Mr. CASSIDY. Now, reclaiming my time, because we heard a presentation prior to this that, by golly, this is the best thing since sliced bread; this is the plan that's going to fix everything, and why wouldn't you be on it. So I'm kind of asking you, Dr. FLEMING, why wouldn't they want to be on it.

Mr. FLEMING. Well, I think that is the \$100,000, or shall I say, \$1.6 trillion question, because apparently they're not so enthralled with it that they would like to be in it themselves. And in fact, I put it to the test by actually putting it on my Web site and asking people if they would like their congressman to support it, that they would actually reach out. We have 150,000 Americans who signed the petitions, and the number is growing drastically every day.

And so I would say that, as we go through this debate, that we simply ask our constituents out there to hold us in Congress accountable by contacting your Congressperson or Senator or even the President and say, Mr. President, Mr. or Ms. Congressperson, Mr. or Ms. Senator, will you go to fleming.house.gov and sign up, cosponsor or whatever, House Resolution 615, that simply says that if you're willing to vote for it you're willing to join it.

Mr. CASSIDY. Now, reclaiming my time, and I appreciate that because, again, what we've heard before is that this plan does not put government between the patient and their physician. And yet, I would have to think, if that weren't the case, why wouldn't anyone agree to your bill? I think your amendment was proposed in our committee, and it was defeated on party line votes. So I think Dr. ROE, from Tennessee, may have some thoughts as to what would come between the patient and the physician. I keep emphasizing that because if something's patient-centered, we know the closer it is to the patient, the more likely it works. So let's ask Dr. ROE, a physician from Tennessee, what might come between the patient and the physician. Dr. ROE.

Mr. ROE of Tennessee. Thank you, Dr. CASSIDY. This evening members of the GOP Doctors Caucus want to talk to you about health care solutions. All of us are physicians who ran for Congress, in part, because we saw challenges in our health care system and wanted to be part of a debate on how to improve it. This is my first term. And when I first arrived I was energized by the opportunity to reform how the health insurance industry works and help make health care more affordable, which are probably the two biggest complaints about today's system.

I quickly realized, however, that the House Democratic majority had a radically different vision of how health

care should be delivered. Rather than allowing patients and doctors to make health care decisions, House Democrats' plan is to have Washington bureaucrats decide what is and is not allowed based on its cost effectiveness.

Mr. CASSIDY. Dr. ROE, can I reclaim my time?

Mr. ROE of Tennessee. Yes.

Mr. CASSIDY. Can you show me up there where there is a Washington bureaucrat on that chart? Where might there be a bureaucrat on that chart? Show me where the patient is and show me where a bureaucrat is.

Mr. ROE of Tennessee. Well, the patient, Dr. CASSIDY, is here and here. These are the patients over here. And this person right here, whoever this may be, will be one of the most powerful people in the U.S. This will be a health care commissioner who will decide what is adequate and not adequate insurance coverage. This bureaucrat right here will be very much in those health care decisions.

Mr. CASSIDY. So unlike the Republican plans, which are patient-centric, what you're telling me is this is kind of a top-down, let's figure it out from Washington and lay it on the rest of the country.

Mr. ROE of Tennessee. That's correct. And the solution should come the other way, from the grassroots up. Absolutely. In addition, they, the bureaucrats would create a system so complex that today's system would look like a walk in the park. And then to put the framework in place for government-run health care, the plan called for creation of a government-run insurance company, the so-called public option, which would, over time, bleed out the private insurance industry, because it would be mandated to pay rates less than the cost of care.

In my district, the First District of Tennessee, they call this socialized medicine, and they've sent me here with a very clear message to deliver. Please defeat this bill. People in my district want health care reform. They really, really do. I talk with people all the time who hate insurance companies, and in my time as a doctor, as you all have, I've often spent more time on the phone getting an insurance company to approve a procedure than I did actually doing the procedure. I also talk with people all the time who believe that reform is possible and that results in them getting the same care for less money. And I tell them it's possible, if we focus on rooting out waste in the system.

But even with this desire for reform, people in my district are clear that increasing Washington bureaucrats' roles in health care is not the direction they want our health care system moving in.

Mr. CASSIDY. Dr. ROE, can I reclaim my time?

Mr. ROE of Tennessee. Yes.

Mr. CASSIDY. Of course we don't want this to be a partisan issue. Now frankly, as far as I know, Republicans have not been invited into the discussion. And there are actually some things in that Democratic plan, those thousand pages, that I think are very good. But there's other things, and I think they kind of general concept top-down. But it's not just us.

David Brooks is a columnist for The New York Times. You see him on TV, a very thoughtful man. I have a quote here. The health care system is as big as the entire British economy. There's no way something that big and complex and dynamic can be run out of Washington. We have to set up a dynamic system, not trying to establish a set of rules to be imposed by fiat. Now, I think what you're telling me is that this is a big, complex plan run out of Washington, and not the dynamic system, but rather a set of rules, and whoever that really powerful person is in that purple box, that person will be establishing the rules by fiat. Is that a fair statement?

Mr. ROE of Tennessee. That is correct. And one of the things, Dr. CASSIDY, I think that's very important, that I've heard, and I've got some other comments in a minute. But I think it's very important when you hear about the cost of this health care plan. This plan's somewhere around \$1 trillion over 10 years, which doesn't start paying any money out in the plan till 2013. So really, it's \$1 trillion over 5½ years. Now, let me just explain why that is an extremely low number.

Mr. CASSIDY. Hang on. Hold that thought. Let me give one more David Brooks quote and call on our colleague, Dr. FLEMING okay? Another David Brooks quote talking about the CBO report, speaking about how much it would cost. This is devastating. The plan was sold as a way to bend the cost curve to reduce the rate of health care cost growth. Instead, the cost of the plan to the Federal budget would rise by 8 percent a year, and there wouldn't be anything close to offsetting revenues to pay for it.

Now, Dr. FLEMING, can you sustain a health care system which has out of control inflation, if you will?

Mr. FLEMING. Well, my answer to the gentleman is that I would look to the experience of other health care systems in other countries. If you look at Medicare and Medicaid, we've not been able to do that. Medicare is running out of money. We don't have a solution to that. The States all across the country are having tremendous difficulty figuring out how they're going to pay for Medicaid budgets, their part of it. And then if you look at the U.K., you look at Canada, countries around the world who have these systems, none of them have been able to claim that they can control costs. Their inflation rates are 10 percent or more.

Mr. CASSIDY. Reclaiming my time, part of this plan is to increase Medicaid eligibility, i.e., put more people on to Medicaid. Yet what we've just heard is that Medicaid is bankrupting States, or causing them to raise taxes.

Mr. FLEMING. Absolutely.

Mr. CASSIDY. So going back to my question, if you cannot control costs, can you sustain a health care system?

Mr. FLEMING. In my opinion, no, because, again, if you can't do it for a smaller system, how can you enlarge the system and somehow make it mysteriously work, particularly when there are no models? Massachusetts, Tennessee, TennCare, and so on and so forth, no one has an example of a government-run system that works.

Mr. ROE of Tennessee. Will the gentleman yield?

Mr. CASSIDY. I will yield.

Mr. ROE of Tennessee. Let me just tell you the folks out there, and we're going spend about the last half of this hour talking about the positive solutions and what we do agree on. But when I first came to D.C. and I heard of this public option I said, I've heard this before. And in Tennessee, in the early nineties we had managed care that was going to control the cost. We got a waiver from HHS and formed a program called TennCare, where we had about 8 different managed care organizations competing for your business. Now we have one.

In the 1993-1994 year, the State of Tennessee spent combined Federal, State revenue, \$2.5 billion. Eleven years later, 10 to 11 years later, that had gone to over \$8.5 billion. It had tripled and took up almost a third of the State's entire budget. We were complaining about 17 percent now. This took up almost a third and almost every new dollar that the State took in.

Mr. CASSIDY. Reclaiming my time, let me just praise the motivations of the people in Tennessee. They clearly cared about the uninsured, as our Democratic colleagues, are. But it was a flawed model and couldn't be sustained, and we know that those patients were now uninsured again, probably worse off than before the experiment.

Mr. ROE of Tennessee. Well, actually, what happened, just to go over that a little bit, over that period of time, in Tennessee, it was a noble goal to cover as many of our people in our State as we could. But over a short period of time, 45 percent of the people who got on TennCare had private health insurance.

□ 2045

Our Governor is a Democrat, Governor Bredesen. As you all know and as everyone in this Hall knows, in a single-payer system, the way costs are controlled is by rationing care. Well, what we did in Tennessee was, about

200,000 people were removed from the rolls, and what did a significant number of those people do? They went back on their private health insurance.

There is another thing that, I think, you have to ask yourself. By tripling the amount of money you spend on health care, what kind of outcomes will there be? Ultimately, that is what you're really interested in.

What we ended up with in Tennessee was the highest per capita prescription drug use in the Nation, and number two, we were 47th in health outcomes.

I yield back.

Mr. CASSIDY. Dr. BOOZMAN, I would like your opinions on this. You're an optometrist from Arkansas.

Mr. BOOZMAN. Well, thank you very much.

You know, it's interesting. I think we bring up a good subject. When I'm home, one of the things that I hear very, very much from the seniors is, we have a Medicare system that's functioning pretty well. Yet, when you look at it in 2017, it has all kinds of fiscal problems. Their question to me is: Why aren't you fixing the government program you have now before you expand it greatly to millions of people? You guys can correct me or can add to this: I've heard anywhere from 10 percent of the Medicare bill that we pay is just waste and fraud. Why aren't we addressing that?

Mr. CASSIDY. Reclaiming my time, 10 percent in Medicare, a generally accepted figure, is in waste and fraud. So we hear from our colleagues across the aisle that Medicare has lower overhead costs. If you include in that the 10 percent, which is a common way to define "overhead," actually, that 3 percent becomes at least 13 percent. A fair statement. I think an economist would say, if your overhead is so meager that you can't watch out for fraud and abuse, then you need to lump the cost of the fraud and abuse into your overhead.

Mr. BOOZMAN. I agree. As a guy from Arkansas, I just know that there's a heck of a lot of fraud and waste in the system. Rather than expand it like we're talking about doing now, why not fix that first? We hear about the pizza parlors that are charging for dialysis and, you know, things like that.

So, again, I would say that we need to get our act together there and reform the Medicare system that we've got.

I know I'm in a situation now. It's not uncommon at all for me to have people my age call and say, My mom has moved to town, and I can't find a Medicare provider because the fees are so low for physicians that people have started either limiting the slots that they use for the Medicare practice or they've simply discontinued the practice in their clinics.

Mr. CASSIDY. Thank you.

Dr. BROWN, you've joined us. May we have your thoughts on this, please?

Mr. BROWN of Georgia. Well, I thank y'all. I appreciate y'all doing this tonight, and I appreciate your yielding me some time. I think the American people need to know several things about this, and y'all have brought up some very good points.

The CBO says that this ObamaCare plan is not going to save money. It says that, in 10 years, we're still going to have almost 20 million people in this country who won't have health insurance. They need to understand that illegal aliens are going to be given free health insurance by the Federal Government.

Now, last night I was watching C-SPAN, and one of our Democratic colleagues was just railing on about how illegal aliens will not get ObamaCare.

The reality is, in the Energy and Commerce Committee, just today, this morning, one of my Georgian colleagues introduced an amendment to the bill that basically said that you have to look at people's citizenships and confirm whether they're U.S. citizens or not. That was defeated almost on a party-line vote. All of the Republicans voted for the amendment. Most all of the Democrats did not. I think there were one or two who voted with my Republican colleague from Georgia. The amendment was to just affirm that somebody was here legally to get free health insurance. We saw that with SCHIP.

When I first came up here during the last Congress, we had numerous debates about SCHIP, and we had fights over giving State Child Health Insurance Programs to illegal aliens. Our Democratic colleagues absolutely fought and won the fight on this issue. People who come are going to be asked a question, Are you an illegal alien? When they say, No, I am not an illegal alien, then they're not going to do anything to check the legality or the truth of that statement. So it's a self-determination by the applicants as to whether they're legal or not. If they say they're not illegal, then they're going to be given free health insurance under this government plan.

The other thing that, I think, is extremely important for the American people to understand is that this plan is going to cost American workers a tremendous salary decrease. Plus, it is going to put a lot of American workers out of work. In fact, it has been projected that over 100 million people are going to be forced off of their private insurance. Also, as Dr. ROE was just talking about, it happened in the TennCare.

So I've heard a figure of 114 million people who have private insurance today who are going to be forced off their private insurance plans onto this so-called "public option." Well, how does that work?

Well, I have businesses in my own district in northeast Georgia that have told me, businessmen and -women, that they'd rather pay the 8 percent tax, the pay-or-play tax. It would cost them less to pay the extra tax and then put their folks, whose insurance they're paying for today, over on the government plan, the socialized medicine/government plan.

I saw a video today of BARNEY FRANK, who was questioned about the government option. He said in this video, in his own words, that this is the way to get everybody in this country on a single-payer system. So, as to the claim that our Democratic colleagues put forth, which is, if you have private insurance you can keep it but if you don't then we'll give you a public option, is not factual.

They're setting up the game such, as BARNEY FRANK just very blatantly said in this video today—and I think it's on YouTube, and you can go look at it—that this government option is the means to get everybody on one single-payer system provided by the Federal Government, socialized medicine.

Mr. CASSIDY. If I can reclaim my time, let's give credit where credit is due, because the advocates for a public option plan—I'm not an advocate of one, though—will point out that there's a decrease in administrative costs.

So, Dr. ROE, will you look up at that chart once more—or maybe you will, Dr. BOOZMAN—and give us a sense of what will be the administrative costs, do you imagine, with this publicly run health insurance plan.

Mr. ROE of Tennessee. Well, here, Dr. CASSIDY—and then I'll turn it over to JOHN—if you'll look at this—and it's so complicated that it's almost comical—the problem with it is that this is how your health care is going to be administered.

I do want to say for every physician in this room and in this Congress, both Democrat and Republican, and this is truly from the bottom of my heart, it has been a privilege to be a physician and to be able to provide care for people and to administer to them. I believe, and I think every Republican and Democrat believes, that health care decisions should be made between a family, a patient and the doctor.

Now, having said that, if you take a look at having to go through this, you're going to have a Benefits Advisory Committee—and I don't mean this funny, but when the Lord got tired, a committee built a moose, anything that ugly. Basically, this here is going to be deciding what's adequate here as administered by this down here. You'll have the Bureau of Health Information. We'll have comparative effectiveness outcomes.

I want to tell you the other thing. The people who really need to be fearful are senior citizens when you start

looking at getting rid of Medicare Advantage and when you start talking about carving as much as \$500 billion out. I don't think our seniors right now feel like too much is being spent if you'd talk to them and see what their supplementals cost. Well, do you know what that means when you spend less money? You're going to provide less care, and there's no plan in the world that can provide more and more care for a lot less money.

Mr. BROUN of Georgia. Dr. ROE, would you yield for 1 minute?

While you're talking about the seniors, I think the seniors need to understand, too, about this ObamaCare plan and understand that it mandates that those seniors have counseling, I think it is, every 5 years. They have to go get counseling every 5 years about dying. This is a government bureaucracy. I'm not sure where it is in your chart there because it's so hard to figure out what all this bureaucracy is that's being placed between the patient and the doctor.

Yet one of those bureaucracies is going to every 5 years tell people over 65 years of age, basically, that they have a responsibility to look at how they're going to die and how they're not going to cost the American taxpayer money, is basically what they're going to tell them.

Mr. CASSIDY. I thank you for offering that.

Reclaiming my time, Dr. BOOZMAN, JOHN, when you look at that, some patients aren't as sophisticated as others. Let's face it, some folks don't have the same education. Maybe they've had to struggle a little bit to get through life. Imagine if a patient had a problem with that and didn't have a counselor coming to them, as Dr. BROUN mentions, but, by golly, they just have a doctor they don't like, don't get along with, and they want to complain to someone. Where would they complain?

Mr. BOOZMAN. I think that's a real problem.

As was mentioned, one of the things that we see in this type of plan is rationing for seniors. Are they going to be able to get the knees? the hips? In my case, being very familiar with cataract surgery, is somebody going to allow them to have that as they get older and allow them to ease their pain and lead a quality of life?

You know, we're talking about getting preventative care and all this. Well, you do a great job, and you live, and you get up in years, and then we're going to take away the ability for you to go ahead and continue that quality of life.

Mr. FLEMING. Will the gentleman yield?

May I add that the bill, itself, is scored at over \$400 billion to be taken out of the current Medicare program. That's over \$400 billion to be taken out of the current Medicare program. So

that's actually in their bill itself. So I don't see how they can claim that the elderly will get more care. They're only going to get less care.

Mr. BOOZMAN. I agree with the gentleman. If he would yield?

Mr. FLEMING. Yes.

Mr. BOOZMAN. There are so many questions that are unanswered when you look at this chart. If you get denied, you know, who do you appeal to? Is there any appeal?

Mr. CASSIDY. Reclaiming my time, I know there's supposed to be an ombudsman. In the 1,000-page bill, I've found one page that spoke of an ombudsman whom you would call up if you had a complaint.

I guess the point I'm making about administration—I read an article in the McKinsey Quarterly. They said there are three things you absolutely have to do if you're going to control costs. You've got to decrease administrative costs. I look at that and it just gives me a migraine.

Mr. BOOZMAN. If the gentleman will yield, the first thing you've got to do is have some tort reform, and you guys can, you know, very well spell out how you practice defensive medicine when people come in with headaches and things like that, and there's one thing that's not on that chart. There's nothing about nuisance lawsuits, which are driving up the costs of medicine and which make it such that we have counties in Arkansas, where I'm from, that don't have any OB because the guys can't afford the malpractice insurance.

Mr. CASSIDY. If I can reclaim my time, Dr. BROUN, as far as you know with the bill, how does the bill address tort reform?

Mr. BROUN of Georgia. It does not.

Mr. CASSIDY. I'm sorry?

Mr. BROUN of Georgia. It does not address tort reform.

Mr. CASSIDY. We just heard from our colleague from Arkansas that that's a critical thing to do.

Mr. BROUN of Georgia. Well, I was just fixing to ask Dr. BOOZMAN to yield so I could tell him a story.

Two days ago, I talked to the administrator of one of the major hospitals; it's a regional hospital within my congressional district in northeast Georgia. He was telling me just that day that one of the CAT scan techs, a lady, was up in his office, asking for more help in their CAT scan unit at night.

He asked her, Why do you need so much in the way of help there? She said, Because of all the massive amounts of CAT scans that we're running up here through the night which are ordered through the emergency room.

They did 10 CAT scans in one night on patients who'd come in. The administrator's question was, How many of those CAT scans were positive? Zero. Not the first one.

I've worked full time for part of my career as a director of emergency medicine at Baptist Hospital in Georgia.

I've been involved in emergency medicine throughout my medical career, sometimes part time, sometimes no time, when I was just doing family medicine, and other times full time.

Particularly doctors in the emergency room are having to do CAT scans on people who come in with all sorts of aches and pains when they really don't need to do those, but they're having to do those CAT scans and MRIs just because somebody might come back later on and sue them for missing a diagnosis.

Mr. CASSIDY. Now, Dr. BROWN, if I could reclaim my time, earlier, Dr. ROE had suggested—we spent the first half in kind of a critique of what our folks, our colleagues across the aisle, have put forward; but we've set aside our second half to kind of talk about what works. This is kind of a nice segue because I think, one, we know that lowering administrative costs will help, and we know that malpractice reform can also address some of these issues.

I'll go back to the central theme, which has to be that any effective reform has to put the patient in the middle; and when you put the patient in the middle, you've got to give them transparent costs so they know what they're buying before they go in there, and you need to encourage them to make the lifestyle changes because, ultimately, a patient, she or he, is ultimately responsible for his own health.

□ 2100

I know that, Dr. FLEMING, in your business—because you're not only a physician, a congressman, husband, and a father, but you're also a small business man—could you relate your experience with health savings accounts? Perhaps define them for us and say how it worked in your small business.

Mr. FLEMING. Absolutely. I will tell you, approximately 5 years ago, and this is when health savings accounts really—

Mr. CASSIDY. Will you define what that is, please?

Mr. FLEMING. Yes. A health savings account is really very simple, where either the subscriber—the employee—or the employer, as in our case, puts part of the subscription costs into a savings account.

Mr. CASSIDY. Reclaiming my time, you put a portion of that health premium into a bank account of sorts that the patient/employee then controls?

Mr. FLEMING. Not only does he control, but it is nontaxed, and he can use it to buy prescription drugs, to pay the deductible or whatever.

And we were up against a situation where, like many small businesses, our premiums were going up 9, 10 percent, sometimes 15 percent per year, and we were pulling our hair out trying to figure out what else we could do. And this idea of health savings accounts came

out, and we said, Well, let's try this. I had some reluctance from my employees, but we increased the deductible, and the extra amount that we would have paid for the increase in subscription costs, we put it into a health savings account for each and every one of them.

The results were dramatic. The costs flatlined. They did not go up. And since then, they've never gone up more than 3 percent a year. It's empowered the employee, the patient, the family, to buy medications at will.

And it was very interesting. I had one employee who was complaining as we implemented. She said, Well, gee, I spend \$200 a month for inhalers, and how is this going to help me out because I'm going to be spending a lot of time. I said, Well, let me suggest that you stop smoking, and with the money that you save by not having to use inhalers, you will have plenty of money left over. She took me up on it, and now she doesn't need them.

Mr. CASSIDY. Reclaiming my time, could she have used her HSA to buy the medication to help her get off of cigarettes?

Mr. FLEMING. Absolutely.

Mr. CASSIDY. Now, I like that because it puts the patient, the empowered patient in the middle so that she's making the best decisions not only for her wallet, but also for her health and, by the way, for her job because you are able to keep your costs down and keep her employed.

Fair statement?

Mr. FLEMING. Absolutely.

Mr. CASSIDY. Dr. Roe, I think also you've had experience with putting patients in the middle with these health insurance plans. Can you relate that, please.

Mr. ROE of Tennessee. In our own practice, we had traditional health insurance, as most people did, 80/20 cost. As Dr. FLEMING was saying, costs were continuing to go up, and about 3 years ago we introduced this plan for the physicians. There are 11 of us in the group, and all of us decided to go on this plan. And 2 years ago, we have a group that has 294 employees that elected to get their health insurance through our plan at the office: 294, 70 providers, doctors, and extenders. Eighty-four percent of those, of our people, our employees in our office, chose this plan because it put them in control of the dollars.

Let me explain to you how that is. If you believe in wellness and prevention—and the way our plan worked was you had a \$5,000 deductible. That scares everybody to death. But our group put \$4,200 per person in there.

Mr. CASSIDY. Reclaiming my time, you had a savings account for the patient, \$4,200, that you put in there to help pay that high deductible?

Mr. ROE of Tennessee. Yes.

Mr. CASSIDY. But now it's coming out of their pocket if they buy the ex-

pensive medicine as opposed to the insurance company.

Mr. ROE of Tennessee. And guess what the empowered person does? At the end of the year, they've been healthy, they've taken care of themselves, they keep that money. But let's say they have an illness or a wreck or something happens to them. Anything above that deductible is paid 100 percent. So you have catastrophic coverage, but you're in control of the first dollars. And by doing that, again, I think as you pointed out in our Education and Labor meeting, that particular type of insurance protection is 30 percent lower than standard.

Mr. CASSIDY. Reclaiming my time, for a similar-size family, similar benefits, with a health savings account costs are 30 percent lower relative to traditional insurance.

Now, we've talked about and quoted David Brooks talking about the Congressional Budget Office comment that the plans being presented to us do not bend the curve; they elevate the cost curve. And yet here is something which has been proven—it's not a hope, but it's experience—to lower costs by 30 percent.

Mr. ROE of Tennessee. That is correct. And when you empower consumers, as I've said, how many of us have driven across four lanes of interstate to buy gas 3 cents a gallon cheaper? Americans are great shoppers, and they will look after it, as opposed to—when they're spending their own money, they are very careful with it, as opposed to the government up here which is not careful with their money.

Mr. CASSIDY. Reclaiming my time, John, if I can ask you, those patients we talked about earlier, and maybe they haven't had the same educational opportunity, the same economic opportunity, but nonetheless, if gas were cheaper 3 cents a gallon on the other side of the interstate, do you think they would go over four lanes to get it?

Mr. BOOZMAN. Very much so. I was looking on the chart, and it's not up there. But other things, the associated health plans, where if you're a florist, a small business man and you've got your little store and you go in and try to negotiate with the insurance company, you don't have a very strong negotiating position. But if we would allow them to go in with others, thousands of florists, then they could negotiate as a group and get a much better rate like a major corporation.

Mr. CASSIDY. May I add, that is part of some of the Republican alternatives that are being proposed. Allow those small business women and men to band together perhaps to purchase one of these empowering HSAs.

Mr. FLEMING. Why is it that they can't do that now?

Mr. BOOZMAN. In doing that, then you have to go across State lines. Also,

different States have different mandates as far as what they—you have to offer in particular States.

So we could do that at the Federal level and get rid of all of that stuff and not go across the State line.

Mr. BROWN of Georgia. If you would yield just a moment, I would like to point out something. The commerce clause of the Constitution—I'm an original constitutionist, as many people in this House know. In fact, I carry a copy in my pocket. I carry it all the time, even when I'm home doing all sorts of things. I don't take it with me when I go in the shower, but almost.

But the commerce clause under its original intent was supposed to do just exactly what you're talking about, Dr. Boozman, is allow interstate commerce across State lines. And what we've done is we've perverted the Constitution in many ways. And this is one way that commerce clause has been perverted tremendously.

The commerce clause was supposed to make sure that there would not be a lockbox of goods and services at the State line. It was supposed to facilitate interstate commerce, not to control interstate commerce but to facilitate it.

And so we have perverted the Constitution markedly. And this is one good point that the Republicans are pointing out today about trying to give patients the ability to buy the insurance directly from an insurance company across State lines or have these pools with their alumni association. I went to the University of Georgia. We could have a University of Georgia Alumni Association pool. I went to the Medical College at Georgia for medical school. We could have an MCG pool. I'm a Rotarian. We could have a Rotary pool. We could have these huge pools that would help stop some of these problems with portability. It would help solve some of the problems that we have.

Mr. CASSIDY. Reclaiming my time, you always give me these nice bridges to segue into. Some of the Republican alternatives—and you're actually addressing all of those very nicely. And if you're a member of Rotary, you can do that. Now, I like that.

So can I call on my good friend, Dr. FLEMING, if he can initiate some of the discussion of just what the Republican Study Commission is putting forth, not necessarily what Mr. RYAN has put forth or others, but even this step plan.

Mr. FLEMING. You often hear rhetoric from the Democrat side of the aisle that we are the party of the status quo, the party of no, we don't want reform. That is the main thing I ran on to come to Congress. I want health care reform. But I want commonsense reform, not nonsense reform, and that's what the Democrats are offering us.

The first completed bill—there are different versions of bills on the Repub-

lican side, but the first completed bill that's actually been dropped because we've been working behind the scenes for weeks and months to get it perfect, is the Empowering Patients First Act, which I am a proud original cosponsor, and here are some basic parts of it.

No. 1, access to coverage for all Americans. It covers preexisting conditions, and that is the big problem that everybody is talking about here tonight, risk pools.

Mr. CASSIDY. Reclaiming my time, so if you will, what's being said by our colleagues across the aisle to misrepresent our positions, we absolutely favor insurance reform to allow folks with preexisting conditions to get coverage, correct? That's what you just said, correct?

Mr. FLEMING. Yes.

Mr. CASSIDY. So next time someone gets up to the podium and says we don't believe that, that is incorrect; am I correct?

Mr. FLEMING. You are correct.

Mr. CASSIDY. The fact is that is misleading. And that is one thing I like in their plan and I like in our plan.

I yield back.

Mr. FLEMING. It also protects employer-sponsored insurance. But on the other hand, it actually gives ownership of the plans to the individual, and also the individual can buy it outside of their employer.

Mr. CASSIDY. Reclaiming my time, the anecdotes that you gave and Dr. ROE gave regarding the empowered patients by giving them these health savings accounts or something such as that, we empower patients. That's in our plan. It's not the government bureaucracy between our friends up there; rather, it is empowering patients.

Mr. FLEMING. This does not exist. This matrix that you see there with Dr. BOOZMAN, that does not exist in this plan.

Mr. BROWN of Georgia. Dr. CASSIDY if you will yield for a second, to draw a contrast here, too, is this the plan that you were just talking about, Mr. FLEMING. A patient or an employee can choose whether they want to purchase their plan through their employer or not; is that correct?

Mr. FLEMING. That is correct.

Mr. BROWN of Georgia. Well, in the Democratic plan, they're going to be forced to buy the employer-provided health care insurance or they're going to be taxed at a 2 percent increased tax rate over what they're being taxed today. So their taxes are going to go up by 2 percent. They're going to be forced into that employer-provided health care plan that's going to be dictated—if you'll hold just a second, I want to make one very strong point here that people need to understand.

That employer-provided health care plan is going to be dictated by the health care czar panel. It is established

on this menagerie of colors and blocks and things.

Mr. FLEMING. Yes.

Mr. BROWN of Georgia. So the employers won't have a choice anymore about the plan that they offer their employees, and the employee won't have a choice either. And both of them are going to pay a penalty if they don't do what the Federal Government mandates or dictates to them; is that correct?

Mr. FLEMING. That is correct. And also, the government will have to actually certify all health plans. It will be a one-size-fits-all.

Mr. ROE of Tennessee. Would you yield?

Mr. FLEMING. Yes.

Mr. ROE of Tennessee. The Empowering Patients First Act that you just talked about does not contain, as Dr. BROWN just described, these mandates, these taxes.

Mr. CASSIDY. So, Dr. ROE, may I interrupt for a second?

A clear contrast between our plan, if you will, or one of our plans and their plan, aside from their increased administrative costs, aside from their top heavy, aside from ours being lower administrative costs and patient-centered, you're saying that one of the plans being presented to us has the mandates but the Republican plan does not.

Mr. ROE of Tennessee. That's correct.

Mr. BROWN of Georgia. That's the point I was trying to bring up, too, doctors, if I could speak directly to the American citizens, as I cannot due to the rules here.

But if the American citizens understand, the Democratic plan is going to dictate their plan to them. It's all going to be run by government dictation or dictum from Washington, D.C., and this health care czar; whereas, the Republican plan gives the patient and the employer the choice of what they want to do. And that's why I wanted to try to draw that contrast as you were talking.

I yield back.

□ 2115

Mr. FLEMING. Let me finish up because there are only a couple more points left. It also reins in out-of-control costs. This goes back to malpractice reform. This has malpractice reform. The government-run plan has not a word about malpractice reform. And finally, this is budget-neutral. That plan over on this side of the aisle is \$1 trillion to \$1.6 trillion, depending on which year span you are talking about, of course, with the CBO telling us that the costs curve up, not curve down, over time, despite what our President has told us. This one starts out with no cost, no net cost. There are savings built into it.

Mr. CASSIDY. If I may reclaim my time, it's important that the people

watching realize that that is not just Republicans saying this. Again, I'm going to quote. The Congressional Budget Office, as we know, has spoken about how costly this bill would be.

From nytimes.com, I, again, quote David Brooks:

"The theory of the Democratic bills seems to be that 98 percent of Americans can party on, with the latest and costliest health care imaginable, no matter how ineffective, and the top 2 percent will pay for it all." He goes on to say, "If you don't control the rate of health care inflation, even the rich won't be able to pay for the cost increases."

So it's others, not in this Chamber, commenting on the cost of that program and, indeed, commenting on the Congressional Budget Office comments.

Mr. FLEMING. And really, just to get down to the basics, if the patients, if the public, the consumer doesn't have skin in the game, there's no money to be saved in this. If it's all on the providers and all on the government, you will never see costs controlled.

Let me add one other thing before I yield. We were talking a moment ago about the fact that illegal immigrants will be covered under this plan, 10 million or more.

Mr. BROUN of Georgia. Not our plan but the Democratic plan.

Mr. FLEMING. I'm sorry. The Democratic plan provides coverage for illegal immigrants. The Republican plan does not. The Republican plan presumes that we will deal with immigration problems through an immigration reform process. But getting to my final point here is, the other thing that the government-run plan, the Democrat plan, provides for is taxpayer-funded abortions. Not only taxpayer-funded abortions, but an actual mandate, the requirement for convenience. There will have to be convenience centers throughout the country so that young women will not only have access but will have easy access, all at the taxpayers' expense. None of that, of course, is provided for in the Republican plan.

Mr. ROE of Tennessee. If the gentleman will yield, I have a letter that I received from a constituent which was given to me this past week; and I think it's worth passing on. It says:

"Dear Dr. Roe,

"My wife Missy and I are aware of the struggle you face on Capitol Hill over government-run health care. We wish to offer you our personal story of how the current system saved our son, Robby, to use as you see fit to put a human face on our side of this issue. Robby suffers from unbearable pain that began when he had a severe infection he contracted September 2007. It began one Saturday. He went to bed feeling a little off and woke up the next morning with a severe ear ache. Within

5 hours, his eardrum ruptured. In spite of several courses of antibiotics, this infection continued to spread into every cavity of Robby's head, and it began to attack his nervous system and his brain. The pain was torturous. Robby was admitted to the Knoxville Children's Hospital for over a week. The infection finally stopped with I.V. antibiotics, but the damage had been done. Robby lost the ability to walk. He also developed a motor vocal tick associated with constant shooting pain in his head. We researched Robby's symptoms and found doctors at Vanderbilt Children's Hospital in Nashville and Children's Hospital of Philadelphia where Robby was treated by the head of pediatric neurology. We were able to visit these doctors and receive treatment for our son only because our private health insurance gives us the flexibility to do so. In the last 18 months, Robby's been hospitalized six times, including most of this March. Pain medicine, including morphine, PCA, hydrocodone and Demerol gave no relief. He had to be sedated for over a week until the pain subsided. There is still no definitive diagnosis. In spite of this, Robby has had multiple exploratory procedures, MRI, CT, et cetera, and tried nearly 20 medications. We finally found the medicine that helped 4 months ago. This has eased his symptoms significantly. He is doing much better but is still not able to return to school. Throughout this ordeal, the medical system has been helpful, responsive, timely and accessible at all levels. We were always around to be a part of the decision-making process in our son's care from medicines and procedures to which doctors and hospitals treated him. We recently learned of another boy in our area who was about Robby's age that suffered from similar symptoms. He died. We believe competent, fast, flexible care that would be impossible under a government-controlled system saved Robby from this fate. Missy and I lived under a government health care system in the Army. I grew up in an Army family. I remember sitting for hours in the military emergency room with a broken arm."

He goes on, "and we had no recourse. You can't sue the government. We are not wealthy people. We make well below the median income and have had to pay thousands of dollars out of our own pocket to get Robby where he is now. It has been a struggle, but we would gladly pay any amount to ensure the timely care and freedom of choice needed to treat our son. It is true that under a government-controlled system we wouldn't have had these medical expenses. We believe they would have been funeral expenses. Please feel free to use our story. We would be glad to testify or do anything else you feel would be beneficial."

This is Rob and Missy Mathis from Newport, Tennessee.

Mr. CASSIDY. If I may reclaim my time, one, it's a tremendous testament to the faith of that family, their love for their son and to those fine physicians at Vanderbilt. I think all of us share the hope to have high-quality health care affordable, accessible to all Americans. Our concern is that the solutions being brought upon us are going to not only not achieve that but interfere with that relationship, and it's not just folks who are conservatives.

I have an editorial in my local paper by Susan Estrich. You will recall that Susan Estrich was chief of staff for Walter Mondale—I think I have this right—when he ran for President. I don't agree with her, but I respect her thoughts. She's a bright woman. She wrote *Don't Risk Your Health Care*.

She begins:

"The President is 'not familiar' with the bill. No one can explain how it will work yet, as Senator BEN CARDIN told a contentious town meeting. There are various plans, and negotiations are still in the early stages. But whatever it is, we should be for it.

She goes on to say, "Am I missing something?"

Then she describes the relationship that she and her family have with their physician. They are not sure. She wants to be reassured and has seen nothing that reassures her yet that that relationship will be preserved. So it isn't just folks in this arena. It's folks across the country.

Dr. BOOZMAN, what are your thoughts?

Mr. BOOZMAN. Well, I would just say that all of us—and in hearing the letter, all of us have seen patients in our practices that we knew as we prescribed the treatment that they couldn't afford, hardworking people that just didn't have the ability to afford that. So we definitely need reform, and we've talked about that. We need portability. We need more competition, things like that. What we don't need, though, is to try to get this thing done in 2 or 3 weeks.

I was on this school board for 7 years. If we were trying to change the curriculum of the high school class, we'd spend more than 2 or 3 weeks doing due diligence. But to try to do that in a period of 2 or 3 weeks makes no sense at all.

The other thing I would say is that we don't need government-run health care. We don't need to go down the path towards Great Britain and Canada. And something I'd like for you guys to comment on—because you have treated them and things—tell us about the results of cancer and things like that in the Canadian and Great Britain systems compared to the United States. I guess my concern is, in an effort to fix our pretty good system—you know, it's working pretty good—that we actually destroy the system to fix the part that's broken.

Mr. CASSIDY. Reclaiming my time, I would say that it works for 85 percent of the people; but we would favor the reforms that would ease the insecurity that if you get sick, you lose your insurance or it's priced out. So we favor the reform that deals with preexisting conditions. At the same time, we don't want to ruin it for the 85 percent.

I yield to my friend.

Mr. BROUN of Georgia. I thank you, Dr. CASSIDY, for yielding. I just wanted to give you a couple of quick stories, one that goes along with Dr. ROE's story. I have a surgical colleague that I was talking to who told me about getting a phone call from a government bureaucrat about a Medicare patient that he had in the hospital. The doctor got the call from the Medicare bureaucrat in Atlanta who said, Doctor, we have reviewed such-and-such a patient that I understand you have in the hospital. Yes. We have reviewed it. She does not meet criteria to be hospitalized, and we want you to discharge her today.

The doctor said, Well, have you seen my patient?

No.

Are you a doctor?

No.

Are you a nurse?

No.

So you're just a government bureaucrat, is that correct?

Well, I work for CMS.

He said, You've not seen my patient at all?

No.

But you have determined that this patient should not be in the hospital, and you want me to discharge her?

That's correct.

He said, This patient is extremely ill; and if I discharge her, she is very likely to die. I'm not going to discharge her.

The government bureaucrat said, Doctor, you don't understand. We've determined that if you don't discharge this patient today, we're going to fine you \$2,000 a day.

So the doctor went and talked to the patient's family and the patient. What were they to do? Well, he discharged her. She died that night at home.

Mr. CASSIDY. Reclaiming my time just for a second, CMS is the agency that governs Medicaid and Medicare, the Federal program.

Mr. BROUN of Georgia. This was a Medicare bureaucrat.

That's the kind of care that the Democratic plan is going to not only give us more of, but it's going to take it down to lower age groups besides those 65 years of age and older. It's government intrusion into the health care system that has run up the cost tremendously. CBO has already said that the Democratic plan is going to cost more money. It's not going to bring the costs down.

Y'all were talking about the cost curve going up. What that means to

the people who don't understand, that means it's going to be more costly for the health care system under the Democratic plan than what we have today.

Mr. CASSIDY. If I may reclaim my time, we're almost out. I just want to wrap that in with a comment that Dr. FLEMING said about how the best system is one in which the patient is involved. I think you said "skin in the game." The McKinsey Quarterly talks about transparent pricing for value-conscious people. Again, quoting from David Brooks, the New York Times columnist, a very thoughtful man: "I'd say that there have to be cost-conscious consumers within a closely regulated market. Unless you get proper incentives for both providers and consumers, I doubt you're going to go very far. In the current plans," meaning those across the aisle, "all the emphasis is on the providers."

Mr. BROUN of Georgia. Dr. CASSIDY, if you don't mind yielding for another moment, let me tell you about something that happened in my medical practice down in rural southwest Georgia. Congress passed CLIA, the Clinical Laboratory Improvement Amendments. I had a fully automated lab in my office where I would do blood sugars, blood counts and things like that. If a patient came in to see me with a red sore throat, running a fever, white patches on the throat, coughing, runny nose, I would do a complete blood count to see if they had a bacterial infection and thus needed antibiotics to treat it. Or if they had a viral infection, they could have the same clinical picture but didn't need the cost or the exposure to the antibiotics. CLIA shut my lab down and every doctor's lab in this country down. Prior to CLIA, I charged \$12 for that CBC. It took 5 minutes to do with quality control. After CLIA, I had to send patients across the way to the hospital, it took 2 to 3 hours to get the test and cost \$75 for one test. It goes from \$12 to \$75, and 5 minutes to 3 hours. Now this is how government intrusion into health care markedly drives up the cost.

Mr. CASSIDY. If I may reclaim my time, I think you are involved in what is called as a concierge practice or a patient-centered practice where the patient will prepay you, say, \$50 a month; and if you don't satisfy that patient, she goes to see another doctor.

Do I recall that correctly?

Mr. BROUN of Georgia. Well, not exactly. In fact, I have discharged patients at the time I see them. I don't have that concierge practice where I am prepaid. But actually, I charge less. My practice was a full-time house call practice. I was not working in an office.

Mr. CASSIDY. If you would yield back, because I just want to mention that one thing. There are some physicians, a lot of them on the west coast,

that have a practice that is so patient-centered, it works beautifully. In that practice, the patient pays \$50 to \$100 a month and gets all the primary and preventive services cared for. If the patient doesn't like it, they find another doctor the next month. It's like Target or Wal-Mart. If my wife doesn't like the sale at Target, she goes over to Wal-Mart; and if she doesn't like the service at Wal-Mart, she will go back to Target. The fact is, is that the physician, knowing that those folks can go, is going to be more patient-sensitive.

Mr. BROUN of Georgia. And the Republican plan allows patients to do that, where the Democratic plan does not.

Mr. CASSIDY. Thank you all very much.

□ 2130

ENERGY IN AMERICA

The SPEAKER pro tempore. Under the Speaker's announced policy of January 6, 2009, the gentleman from Ohio (Mr. BOCCIERI) is recognized for 60 minutes.

Mr. BOCCIERI. Mr. Speaker, this snuck up on me with respect to the timing. My colleagues on the other side of the aisle finished much earlier; they didn't have as much to say as we are tonight about clean energy.

I am joined by my colleague from New York, Congressman McMAHON, who I will recognize here very shortly to talk about one of the pillar issues, one of the seminal issues that we're going to address in this Congress, in this body.

We've already taken action with respect to moving an energy policy forward that puts our country first. And truly, this is about making America stronger, making our country stronger by investing in America.

Now, I know some may think that that's a novel idea, but this is not about Democrats or Republicans. This is not about their ideas versus our ideas. This is about Americans and American innovation, and it's something that I feel so passionately about.

Today we're going to talk about this energy bill that passed through the Congress here, through the House of Representatives. We're going to talk about what has made this such an important issue in the coming weeks that we hope that the Senate will take action as soon as possible.

Before I get too deep into my long speech here, I would like to recognize the gentleman from New York to say a few opening remarks with respect to energy and what we have to offer here in the House of Representatives.

Mr. McMAHON.

Mr. McMAHON. Thank you, Congressman BOCCIERI. And thank you for your leadership on this issue.

Mr. Chairman and Mr. BOCCIERI, it is a privilege and an honor to stand here in the House of Representatives tonight and talk about this important issue. And I bring to it a perspective I think that is very important in this debate. You see, I come from New York City. I grew up in Staten Island, New York, and I now have the privilege and honor of representing Staten Island and Brooklyn, New York, here in the House of Representatives.

For the last few weeks and months, I've been very disappointed at the rhetoric that I've heard in this Chamber, and beyond, from those on the Republican side of the aisle. They, quite frankly, have had their heads in the sand. They, quite frankly, have been tied up in the rhetoric of partisan politics. And I say that as a New Yorker, as someone who suffered and saw firsthand what happens when this country doesn't deal methodically and honestly with energy policy.

You see, September 11, a date that we all know too, too well, in my opinion—and in the opinion of the people of New York and people around the world—occurred because our country has not dealt honestly and fairly with energy policy. Oh, I know it was the act of terrorists, there's no question; men bent on hate, men bent on Islamic fundamentalism to bring down this Nation. But our country has been caught up too long with an addiction to oil from the countries from which these men came.

Every time an American goes to the gas pump and puts gas into his or her car, they are sending money back to a Saudi Government that has sent and continues to send money to al Qaeda. And every time you go to the pump and put gas in your car, you're sending money to Iran so Ahmadinejad can send that money to Hezbollah and roundabout to Hamas. We are paying for terrorists to arm and be energized in a war against America and all the things we stand for.

So I know there can be honest debate on things that we disagree about. I know that we can stand on this side of the aisle and that side of the aisle and have a fair and honest debate about those things. But the things that I've heard over these last few weeks, the lies, the mistruths, the prevarications, are all too much for us to take.

Just think about the way that the Republicans have tried to scare the American people by saying that if we pass an energy security bill here in Washington it will mean an increase in home heating and energy prices of \$3,100 a year. And when they did that, they cited a study from an MIT professor. Upon hearing that, immediately that professor said, That is not true, you are misquoting my study. I did not say that. That's not what the study says.

Weeks and months after that professor issued that disclaimer, we con-

tinue to hear from the other side of the aisle these very same pronouncements. They are untruths, they are misstatements, and they are prevarications, and it's time for it to end. The American people deserve more. The security of our Nation deserves more. The people who lost their lives on 9/11, the families who suffered, the emergency workers who suffered, all those people deserve more. And the men and women who right this moment are in places like Iraq and Afghanistan, they deserve better. They deserve an honest and upfront discussion about energy policy, what it means to our security, and that if we don't get it right now, then more lives could be lost in the future.

Mr. BOCCIERI, I am so glad to be here with you to talk about these important issues. And I know that the people from Ohio to New York out to California will be united in knowing that America is a country—we sent a man to the Moon; we can deal with energy policy as well. And it's something that I look forward to working with you on.

Mr. BOCCIERI. Well, I thank the gentleman from New York. And he is absolutely correct in his assessment of this. This is a matter of our national security.

The American Clean Energy and Security Act that was passed out of this Chamber is about our Nation's national security, moving away from our dependence on foreign oil and, more importantly, creating jobs right here in our country that can't be outsourced.

When we build a brand new nuclear reactor, it cannot be outsourced. When we lay the foundation for new solar panels on tops of buildings or on tops of our homes—or even some day perhaps on tops of our cars, recharging our batteries—those are jobs that can't be outsourced. The maintenance, the delivery, the processing that will go into these jobs are going to create jobs right here in America. And I am so proud that we are leading the edge.

My predecessor, Congressman Regula, started investment in these technologies in our district. And I am glad and proud to be following in his footsteps to make certain that these types of energy investments are and will be making our country stronger in the long run.

Let's revisit some of the things that we've talked about here, Congressman MCMAHON and, Mr. Speaker, the fact that this is about our national security.

First and foremost, this chart right here really is a tell-all with respect to our national energy crisis that we face. 66.4 percent of our oil comes from foreign countries. 66.4 percent of our oil comes from overseas. That means \$475 billion has been sent overseas. We are distributing our wealth. We are sending our resources, our hard-earned dollars overseas to buy a commodity that we

can produce here, we can refine here, that we can explore here.

In fact, the Senate version of the bill adds exploration and drilling right here in the Gulf of Mexico that will add 3.8 billion barrels of oil, but we know that that's not enough because we don't have enough oil here in America to fill the demand that we have. In fact, it's been reported that we have nearly 3 percent of the world's reserves here in America, in the Northern Hemisphere, but we consume about 24 percent of the world's oil. So you do the math. At 22 million barrels a day, 3 percent of the world's oil here in the Northern Hemisphere, we would exhaust that resource very, very quickly.

The number one user in the United States of oil, the number one consumer of oil in the United States, is the Department of Defense. In fact, we consume so much oil in the Department of Defense that we have grown very, very concerned here on Capitol Hill about our dependence on foreign oil because our Nation's military is so dependent on foreign sources of oil, oil that we import, and the fact that we have so many of our military operations going on overseas, so many of our troops, our men and women, are spread across the world that we have a national security crisis right here on our hands. And that's why, Mr. MCMAHON, that's why, Congressman, we have begun testing synthetic fuels. That's why we have been testing blended fuels in the Department of Defense.

At Wright Patterson Air Force Base, they just started testing these blended fuels, synthetic fuels in our aircraft, because we know that of the Department of Defense, the largest consumer of oil in the Department of Defense is our aviation assets. Seventy percent of it is used with respect to our oil needs, and we have got to find an alternative source. That is why this energy legislation is so important to investing in alternative energies and understanding that our Nation's military is so dependent on this fossil fuel.

Now, in 1944, when the United States bombed the Ploesti Romanian oil fields, we effectively cut off the supply of oil to the Germans, but they quickly transitioned to use synthetic fuel, which is a derivative of coal. Now, we know that we have quite a bit of coal here in the United States; it's abundant, it's a natural resource that is very cheap to us, and we are going to continue using it.

In fact, the EPA has said, with the passage of this bill, coal use in America and the United States is actually going to increase. And with it being so abundant, boy, I would love to see, with the investment that we have charged in this legislation to invest in carbon capture, to invest in coal and synthetic fuel and coal-to-gas liquefaction, these new types of technology that can make our country less dependent on foreign

oil, is going to make us stronger in the long run. And if we can put that synthetic fuel, that clean-burning fuel, that clean coal technology in our airplanes some day, we are going to be less dependent on our foreign sources of energy.

Now, one last point before I turn it over to my colleague for some remarks. 66.4 percent of the oil comes from overseas. Do you know how much comes from the Middle East, Congressman? Forty percent of our Nation's demand is filled by the Middle East, by OPEC-producing nations. That is way too much. We have two wars going on in the Middle East, we have countless numbers of our troops over there. And it is argued—and has been argued so many times on this floor—that our Nation's interaction overseas and in the Middle East is about our dependence on that natural resource. And it's time we put America first, we put American troops first, and invest in our country and our people. I would much rather rely on the innovation in the Midwest than the oil in the Middle East.

I yield to my friend.

Mr. McMAHON. Thank you, Congressman.

Congressman BOCCIERI, I think you have really established and hit home about how this is about national security.

You know, there was a time in our Nation's great history—in fact, throughout most of its history—when we would talk about national security, both sides, Republicans and Democrats, would put down the partisan rhetoric, they would put away the myths and half truths and the prevarications and they would just talk to the facts, because what was at stake was not the gain of one side or the other, it was about the very essence of our country, our security, and the safety of our young men and women in uniform, whether it is the uniform of our armed services or the uniform of our first responders back here at home.

Unfortunately, what we've seen throughout this debate from the Republican side is an onslaught, a deluge of untruths, of myths. I want to talk about a couple of those myths before I turn it back over to you. One is about the notion of the household energy audits.

I have stood on this floor and sat in this Chamber and heard our colleagues from the Republican side of the aisle say, If you pass this bill and if America deals honestly and forthrightly with its national security and energy policy, every homeowner in America is going to have to do an energy audit before they can sell their home. Well, you know, Congressman BOCCIERI, and I know that that's not anywhere in the bill. That language does not exist; it's not in the bill, it was not in the bill that we passed. The Energy Security bill contains no provision requiring

that buildings or homes undergo energy retrofits or audits of an existing home's energy efficiency.

The bill does create incentives for builders and homeowners to take steps to reduce the waste in their homes and in their new buildings, and that's to everyone's benefit. The homeowner would save money on their energy bills, and we, as a Nation, would use less energy and, therefore, put ourselves less at risk. And yet we hear over and over again about these imposed requirements on America's homeowners. There is no Federal energy audit requirement. And it leaves the decision to the homeowners and the local governments to deal with that. The bill actually prohibits the EPA from regulating residential and commercial buildings as per the Clean Air Act, and yet we hear the rhetoric over and over again.

But, you know, Congressman, in the debate there clearly have been, I believe, people from the other side of the aisle, Republicans, who have talked fairly and honestly about this issue, and I bet you would be able to tell us about some of them tonight.

Mr. BOCCIERI. Yes, I would, Congressman McMAHON. And I thank you for those remarks.

This is about our national security. This is not something that Congressman BOCCIERI is saying, it's not something the speaker is saying—because he's been on this floor right with us before talking about our national security needs—it's not something that Congressman McMAHON is saying. This is something that the Department of Defense is saying and the CIA is saying.

The U.S. Department of Defense, in 2003, concluded that the risk of abrupt climate change should be elevated beyond a scientific debate to a U.S. national security concern. The economic disruptions associated with global climate change are projected by the CIA and other intelligence experts in the United States to place increased pressure on weak nations that may be unable to provide the basic needs and maintain order for their citizens.

□ 2145

So, you see, a component of this energy legislation is about moving away from our dependence on foreign oil, investing in clean energy and technology right here in our country, jobs that can't be outsourced, producing jobs that can put America back to work. And another component of that is addressing the issue of climate change.

Now, cap-and-trade has gotten all the attention in this energy debate, and it shouldn't get all the attention because it's one segment of this bill that we're working on. But even that, which I know that we focus more on the national security part of it, but even our security experts and our Nation's mili-

tary are saying it's a matter of our national security. Let me give you some statistics here:

Today over 80 percent of the world's oil reserves are in the hands of governments and their respective national oil companies. Sixteen of the world's largest 20 oil companies are state owned, are owned by some state. And as you know, we import 66 percent of our oil. This is a matter of our national security, and we have got to take action now, and we must move away from our dependence on foreign oil. Cap-and-trade and the climate change legislation and the energy security that we can derive from a substantive and robust energy policy in this country is a matter of our national security.

Now, that's not something that Congressman McMAHON is saying. That's not something that the Speaker is saying or Congressman BOCCIERI is saying. That's something JOHN MCCAIN is saying, a proud American who put his life on the line for our country, who ran for President. He said that in cap-and-trade there will be incentives for people to reduce greenhouse gas emissions. It's a free-market approach. Let me repeat that again, Congressman McMAHON: it's a free-market approach. The Europeans are doing it. We did it in the case of addressing acid rain.

In fact, we have 20 years of cap-and-trade policy that's been enacted in the policy of the United States that we have found very big successes from. Look, if we do it, we'll stimulate green technologies. This will be a profit-making business. And it won't cost the American taxpayer. Let me repeat that again: it won't cost the American taxpayer. This is something that we have got to enact now, Mr. Speaker. This is about our national security.

In fact, every Presidential candidate that ran for office last year, Democrats and Republicans alike, said it's a matter of national security. Let me revisit a couple of what our friends have said.

Mr. Romney, an astute businessman, said that there are multiple reasons for us to say we want to be less dependent on foreign oil and develop our own sources. That's the key, of course, additional sources of energy here as well as being a more efficient use of energy that will allow the world to have less oil being drawn down from the various sources it comes from without dropping prices too high a level, and it will keep people, some of whom are unsavory characters, from having an influence on our foreign policy. That was Mr. Romney.

Mr. Huckabee, he has another quote in addition to this one on our chart here. He said, A nation that can't feed itself, a nation that can't fuel itself, a nation that can't produce the weapons to fight for itself is a nation forever enslaved. And with respect to a national energy policy, he said, It's so critical that for our own interest economically and from a point of national

security that we commit to becoming energy independent and we commit to doing that within a decade. We have to take responsibility in our own house before we can expect others to do the same in theirs.

It goes back to my basic concept of leadership. Leaders don't ask others to do what they are unwilling to do themselves. Well, we are a leader here in the United States. We're a leader. We sent a man to the Moon in just 10 years, and I vow to you that we can become energy independent. We can have an energy policy that invests in our people, creates jobs here, and moves away from our dependence on foreign oil because we believe in the innovation of America and we don't believe that we need to be dependent on Mid East oil.

I yield to my gentleman friend.

Mr. McMAHON. You're so right, Congressman BOCCIERI.

Mr. Speaker, again, it's just somehow so infuriating. It really is beyond words to think that the Republicans try to take an issue that is so important, not just to our economy, not just to our environment, not just to the future of the generations of people who want to live in America and share in the American Dream, but to national security, the lives of our children, the young people in uniform right now, those who have been lost and those who will continue to be at risk.

And what do they do? They take an important issue like this, and they come up with some quick catch phrases, you know, like the one that they like to use. You talked about cap-and-trade. They like to call it "cap-and-tax." Why do they do that? There is no tax anywhere involved in this bill. The word "tax" is not involved. In fact, in order to tax someone from the national government perspective, you have to invoke the Internal Revenue Code. The Internal Revenue Code is never mentioned in this bill. Instead, this is a proven system, as you said, to bring free-market principles to the system of manufacturing that will allow for not only a cleaner environment but for a new birth, a new generation, of manufacturing jobs in this country.

We have lost our manufacturing base for a whole host of reasons. But here we are. As you said, when you build a nuclear power plant, you can't do that somewhere and import it. It's got to be done here. When you build a windmill farm, that has to be done here. And instead of addressing this very important issue, the other side comes up with catchy phrases, and certainly the one that they have done to cap-and-trade across America I think is very shameful.

Let's talk about cap-and-trade for a minute because some people will say, well, this is a new concept, Congressman BOCCIERI. And how can it be that we know whether or not this will work? Well, there are a couple of ways to

know that. We have already done that in this country.

Many Americans, certainly in the Northeast, where I come from, remember the concept of acid rain caused by sulfur dioxide. And in the 1980s we realized that lakes and rivers were dying across this country because of sulfur dioxide. And we implemented in 1990 a cap-and-trade system when it comes to sulfur dioxide. And what does "cap-and-trade" mean? It simply means that you set a standard of how much pollution can be emitted in the country in a given year and that becomes your cap.

And for what we have done now for the greenhouse gases is the year 2005, and the same was done for sulfur dioxide. And then that allowance to be able to pollute is something that has value to it. You create value. And in the first go-around in the system that we're implementing, or that we want to implement now, 75 percent of those allowances will be free. So there will be no immediate cost to anyone, no increase in prices.

But over time, by 2020, hopefully we will get to a point where we reduce our reliance on foreign oil, we cut down our emissions by 17 percent, and we move forward with a good national security energy policy. We did that with sulfur dioxide, and everyone thought it would take 20 years, but it took 6 years. In 6 years' time, without any impact to our economy, we put an end to the over-pollution of sulfur dioxide.

Many plants put scrubbers on themselves, on their smokestacks. And guess what? In the year 2009 those lakes in my home State of New York are alive again. The fish are no longer swimming on top of the water, dead from pollution. They're alive again. And they are alive with wildlife and they are alive with a future that our country needs. It's about our water resources. It's about our environment. It's about our jobs. It's about our national security.

So you're right, Congressman BOCCIERI, when you say it's about national security. And you've got examples of people who put partisan politics aside. They did it when they were running for President. I only wish the Republicans in the House of Representatives and in the Senate will put politics aside and put the interests of the American people first and get serious about an energy policy that deals with national security.

Mr. BOCCIERI. I couldn't agree with the gentleman more that we have to get serious about our Nation's energy supply.

And this is not about Democrats or Republicans; this is about making America stronger. And Democrats and Republicans alike in the last Presidential election said we need to create jobs here in America. We need to create jobs here. You know, 8,000 manufactured parts go into making one of

those wind turbines. Can you imagine some day that Timken Roller Bearing in my district would be making the roller bearings that go into these wind turbines or SARE Plastics could make the moldings for these respective wind turbines and to make the fiberglass components that go into this? These are jobs that can be made and profit right here in America, that can't be outsourced. And we will be killing two birds with one stone: creating jobs here in America and making us less dependent on energy from abroad.

We have to go back to just a few more of these gentlemen who ran for President last year. I just want to finish up with these two:

Rudy Giuliani, a good Italian, said, We need to expand the use of hybrid vehicles. We need to expand the use of hybrid vehicles, clean coal, carbon sequestration. We have more coal reserves in the United States than they have oil reserves in Saudi Arabia. This should be a major national project. This is a matter of our national security.

Rudy Giuliani got it right because you know what? If we put 27 percent of the vehicles on our roads in America, if just 27 percent of the vehicles on our roads in America were gas-electric hybrids, we could end our dependence on oil from the Middle East. We get 40 percent of our Nation's demand for oil from the Middle East, from OPEC-producing nations, and if just 27 percent of the vehicles on the roads of America were gas and electric hybrids, we could end our dependence on oil from the Middle East. That is a vision that we should all strive for.

Let me talk to you about one of our colleagues here, Mr. PAUL. I spoke with him about 2 weeks ago. He's one of our colleagues here in the House. He said, True conservatives and libertarians have no right to pollute their neighbor's property. You have no right to pollute your neighbor's air, water, or anything. And this would all contribute to the protection of all air and water.

Mr. PAUL is somewhat of a visionary because he believes that in America if we make the right investments, we cannot only protect our country, move away from our dependence on foreign oil, but invest in our people, our way of life, and, more importantly, create jobs here in our country.

I want to yield to my good friend from Virginia (Mr. PERRIELLO). Congressman PERRIELLO is joining us.

Welcome.

Mr. PERRIELLO. I thank Mr. BOCCIERI for yielding.

As I said before, the people who have been against this bill, there are two things that bother me about them that I want to mention.

One is these people aren't just climate skeptics; they're America skeptics. I am sick and tired of hearing the

word “can’t.” They are the same ones who said we couldn’t possibly take the lead out of gasoline. We couldn’t possibly solve the sulfur dioxide problem or clean up our water and streams. We couldn’t integrate our troops or go to the Moon. Can’t, can’t, can’t. Well, when I was growing up I had coach after coach in sports say get the word “can’t” out of your dictionary. That is not an American word. America is all about how are we going to solve the problem.

We know there is nothing we can’t do if we put our minds to it, put our innovative spirit to it. And we see that here. People keep saying on the other side of this debate, well, let’s just let China do it. That’s basically what they’re saying. We don’t want to go ahead of China. We would rather have China invent all the technologies so we buy it from them? I’m sick and tired of buying everything from China. I want us to be making it right here in America and exporting that technology back to them.

So these people aren’t climate skeptics; they are America skeptics. They have given up on the idea that America can do it better than other countries, but I don’t believe that. We are still more innovative than any other country. We are better capitalists than any other country. We are going to be the first to crack carbon capture sequestration technology. We are going to be at the cutting edge again of wind and solar and biomass.

The farmers in my district want to be freedom fighters on the front lines in the struggle for energy independence that makes this country safe and makes it competitive again. That’s because we are better at this than anyone else. That word “can’t” that seems to echo across the other side of the aisle does not have any place in this Hall because America is better than that.

And there is a second thing that bothers me about those who seem so angry about this bill in this body of ours, which is the intense partisanship of it. The worst kind of partisanship is when you think an idea is a good idea until the other side agrees with you and then all of a sudden it becomes the worst idea ever.

Cap-and-trade, to their credit, is a Republican idea. The first President Bush was a visionary and a leader on this in solving the acid rain crisis because it was a Republican notion that we can use the power of the free market to solve these environmental threats.

□ 2200

We saw it again when Senator McCain and then Governor Palin both agreed that some form of cap-and-trade was a good idea. Former Senator from my State, John Warner, a great war hero, a great American, also saw the power of a tradable permit. This was

fundamentally a Republican idea. And in our spirit of bipartisanship we say, we think this problem is so big, of energy dependence, it is threatening our security so much we will look anywhere. We don’t care if that idea comes from one side of the aisle or the other. We just want to solve the problem.

And as soon as we agreed and said, these are good ideas coming from the Republican side, all of a sudden, the only play they had in the playbook was to suddenly say Oh, it must be a bad idea because you agree with us. We can’t even do bipartisanship when you agree with one of our ideas. This is something that is upsetting the American people when the problems run this deep. That’s not what this country’s about. It’s about putting problem-solving ahead of partisanship.

So Mr. BOCCIERI, thank you for doing this hour. It’s so important for our national security, for our national competitiveness, but also for the very culture, the very soul of this country. It is all about that infinite horizon of possibility that says there is nothing we cannot do as a Nation, particularly when we unleash the power of the free market and that call to serve the common good that has led generation after generation to leave this country stronger than they found it.

Mr. BOCCIERI. I find you very inspirational, Congressman PERRIELLO. You’re exactly right. And it’s often been said that fear is not a tool of leadership; fear is a tool of the status quo. And that’s exactly what we see from the other side right now; injecting fear, talking about taxes. Listen folks, there are no taxes in this bill. Don’t believe me. Believe Senator McCain, who ran for President last year. Senator McCain said this is a free market approach and it won’t cost the American taxpayers. We know here in this body that the jobs of tomorrow won’t come on their own. We must incubate them and grow them domestically so they can not be outsourced. That’s what this bill is about.

We’re joined by two of our other colleagues, distinguished colleagues, bright minds here, young bright minds I should say here in the House of Representatives, Congressman KRATOVIL from Maryland, and our good friend from New York, Congressman TONKO. Why don’t we start with Congressman TONKO. Welcome.

Mr. TONKO. Thank you, Representative BOCCIERI. I listened intently to our colleague from Virginia, and when Representative PERRIELLO talked about the lack of response from the other side, the anger, perhaps, that is expressed, the politics of fear that are engaged, that those in and of themselves would be enough measure of concern. But the fact that that’s coupled with an agenda that back-burnered over the last administration so much of the progress, we’re reminded of a huge fail-

ure of the delivery system, the energy delivery system, in August of 2003. Here, 6 years later, we’re not responding as well as we should. This measure allows us to, with a smart-metering investment, with an upgrading of the grid.

You know, it was brought to our attention in very painful and dark terms, where blackouts gripped not only the Northeast and the Midwest of the U.S., but Southeast Canada, where two nations suffered from failure in the grid system. We have opportunities to embrace technology, technological improvements, advancements in smart metering and investments in the grid, to respond to that sort of failure. That was back-burnered. So were the investments in updating our renewable opportunities, investing in renewables.

This measure will allow us to look seriously at renewable investments across the country. I’m also coupling that exercise with a bill that deals with wind turbine efficiency, where we’ll look at materials that will allow for greater response from Mother Nature, where we’re able to take the elements of nature and make them work to our energy needs, all through American jobs, to produce America’s energy needs. That will enable us to take the advancements that we know are possible.

We look at situations like super-conductive cable, where, in my district, they are now breaking their own records, super power is, by developing even stronger opportunities for us to reinvest and invest in innovative ways in the delivery system, in a way that, again, takes advantage of the intellectual capacity of this Nation.

So this is about entering into a mix that already finds global competitors, but it advances an American agenda in a way that will place us in the role of leader. We cannot continue to sit by idly along the sidelines of this global green energy race and advance the notion that China will build all the solar systems, that Germany will embrace the same sort of renewable or advance manufacturing processes.

We have opportunities here in this Nation to develop battery response through the stimulus package. I’ve seen what GE is working on, as it enters into this fray, to provide for an array of battery opportunities where it’s not just Lithium ion that we develop but perhaps look at sodium chloride mixed with nickel, where we can address not only energy generation needs for batteries, but also the energy storage for intermittent situations, intermittent-type power, and where we can also use it for heavy fleets and lighter fleets for transportation-sector purposes.

So there are tons of applications here. Just that GE battery application would find 300 to 400 jobs in my district that will enable us to provide the

linchpin, to open the doors to limitless possibilities. You know, it's that sort of fervor that we saw in the sixties, in the late fifties and sixties where, as a Nation, we went forward with the boldness of definition and the expression of vision where we could be better, where we could move into a space race. And we know that we invested, and we won for that investment. We need to do that here. And clean energy jobs for every State in this Nation is a great theme.

And politics of fear that respond to the efforts of progress that we have embraced just don't have a place in this mix. It is unfair to the American public, as it looks not only for job creation, but for the establishment, for the igniting of an innovation economy. And Representative BOCCIERI, thank you for bringing us together so that people can share thoughts of what's happening today and where we can expand and extrapolate upon that progress in untold terms.

Mr. BOCCIERI. Well, Congressman TONKO, you're so right. And I know you and Congressman KRATOVIL believe like I do and like Teddy Roosevelt said, that the worst that you can do in a moment of decision is nothing. The energy policy that we have right now in the United States is failing us miserably because we have troops overseas right now that are putting their life on the line for a natural resource that we could become independent from if we just invest in our country and our people.

Mr. TONKO. One of the main reasons I ran for this role in Congress was to establish a comprehensive energy policy, where we have a plan, where we act accordingly, where we update and implement that plan, and where it's all-inclusive. We haven't had that. And this is one solid way to grow jobs that are meaningful, where we are going to express and exercise our right to energy security, energy independence, and therefore, national security, which is critically important with the outcome here.

Mr. BOCCIERI. Congressman KRATOVIL, welcome.

Mr. KRATOVIL. Thank you all for being here. And it's so nice hearing my very articulate colleagues talk about this. Mr. BOCCIERI, thank you for bringing us together once again to talk about this. You know, you have mentioned a number of Presidential candidates in the last election that talked about the significance of cap-and-trade and talked about the significance of reducing our dependence on foreign oil. But I think, you know, it's important that we give some additional historical perspective to this debate.

You mentioned that what we are doing now is failing us. But it's been failing us for 40 years. We have been talking about reducing our dependence on foreign oil for the last 40 years.

We've been talking about the significant impact this has on us in terms of our national security. We've been talking about the need to move towards renewable energy and renewable fuel and reducing our dependence on foreign oil, and yet, we haven't done anything really substantial until now.

Every President since Richard Nixon has advocated the need for our energy independence. In 1974, Nixon promised we could achieve it within 6 years. Gerald Ford said we can do it in 10 years. And Jimmy Carter pledged to wage the moral equivalent of war to achieve it.

And yet, once again, as years have gone by, we haven't had the political will to do what needed to be done to reduce our dependence on foreign oil. And getting back to some of the comments that Mr. PERRIELLO made about the political part of it, you know, the bottom line is, at some point we do have to put politics aside and recognize that we are here for a reason. We are here to represent the best interests of the people of this country and not to represent necessarily simply our political parties. And you are right to say that these initiatives came, many of these ideas, cap-and-trade, came from the other side of the aisle. And yet, when we pushed that forward, we got very little support from the other side of the aisle.

□ 2210

Now, we did have some courageous Republicans in the House who voted with us. I think there were probably seven or eight who voted with us, but the bottom line is that we have been talking about this for years, and it was time that we did something about it, and I'm happy to be here with those of you who were willing to do what needed to be done to move us towards a better future for this country.

With that, I'll yield back.

Mr. BOCCIERI. Well, Congressman KRATOVIL, I know you believe in America, that you believe in American innovation and that you believe an energy policy that creates jobs here in America, that moves us away from our dependence on foreign oil and that makes us energy independent within a number of years is the right energy policy and the right economic policy for our country, which is about investing in our people, investing in our ingenuity and in our innovation.

You know, the most that we have at stake in this is the fact that Congressman PERRIELLO, Congressman KRATOVIL, Congressman TONKO, and Congressman MCMAHON—we all have families, and you think about where our moms and dads have come from in terms of what they have seen and the changes they've seen. They've seen us put a man on the Moon. We can do the same in 10 years. Our families have seen a lot, and we can produce the type of innovation with the right policy in

this country that will move our Nation forward.

I know, Congressman MCMAHON, you believe in our Nation's national security. I'll yield to you.

Mr. MCMAHON. Thank you, Congressman BOCCIERI.

I know we all do. We all, I think, take serious umbrage at the fact that the Republicans throw out these myths, these lies and these prevarications when it's about national security. Let's look at one.

I mentioned how they talked about what it would cost every homeowner, and they said it would be \$3,100 a year. This was a study that was disproved. We mentioned that earlier. Yet the Congressional Budget Office, the independent authority that they rely on so often for their facts, at least whenever it favors their position, has said that, under our clean energy and national security bill, every homeowner in this country on average, between now and 2020, will pay \$175 extra because of this bill, not per year but over the whole course of the next 11 years.

In many places, like the Northeast, because of how we get our energy already and because of the infrastructure we have in place, our costs will actually go down \$5 a month by 2018. Think about that. Some of us will save money, at most \$175. Those rates would go up anyway.

On the other side, when it's about national security, when it's about young men and women who are risking their lives in the uniforms of our country, they're throwing out lies. You know, I just want to tell you one quick story about what happened to me today, and it really struck home. It's about a visit I had in my office.

You know, for 50 years, Staten Island was the site of the municipal garbage dump for the City of New York. Congressman TONKO knows the story well because he was very involved in environmental politics up in Albany when he was an assemblyman. It took us 50 years to get it closed, and it was 2,200 acres of the largest landfill in the history of the world. Today, because of this law that we passed in the House—and hopefully it will get passed in the Senate—a company came to see me because they want to put solar panels on that landfill.

Wouldn't that be a great American story? It would be a great success story for Staten Island, for the people I represent on Staten Island, for the City of New York, and for our country that, in a short period of time, within 10 years, you could go from a disgusting landfill and environmental nightmare to a place that is producing energy through solar panels or windmills as our borough president has suggested. What a great thing. That's America. That's the America we grew up in. That's the America we believe in.

That's the America you've spoken about, Congressman BOCCIERI, Congressman PERRIELLO, Congressman KRATOVIL, and Congressman TONKO. That's the America that we came to Washington to fight for. That's the America that the Republicans have turned their backs on, and that's the America that's worth fighting for.

Mr. BOCCIERI. Well, you're so right, Congressman MCMAHON. We all believe in the hope and promise of America, that with the right investment and with the right guidance with respect to public policy in this country, we can become energy independent and can create jobs here in America.

You know, we hear the raw fear that the other side spews out to try to scare people away from supporting the public policy that, in its essence, was truly a Republican idea in the very beginning. We hear the facts about rates, and we talk about how this is going to, you know, charge up rates and about how these government inspectors are going to show up and check on your light bulbs in your hot tub. I mean, this is utterly ridiculous.

First and foremost, in the State of Ohio, we have a Public Utilities Commission. The electric industry and other industries in the State of Ohio are regulated industries. They can't just arbitrarily walk in and raise rates. There has to be a justification. Our Public Utilities Commission, PUCO, is a function of State government, and we have empowered State governments in this legislation to make sure that these big utility companies are not going to run away as they transition to alternative forms of energy. So rates will be held in line. Despite what our colleagues on the other side will say, there are no taxes in this bill.

JOHN MCCAIN said it's a free-market approach, and it won't cost the American taxpayers. I believe JOHN MCCAIN was right. He introduced a cap-and-trade bill three times with Senator JOE LIEBERMAN. So this is about putting America first.

Congressman PERRIELLO, I know you have a few words.

Mr. PERRIELLO. Well, I just wanted to pick up on what Mr. MCMAHON was talking about as far as turning trash into energy. We're trying to do that in my district in southern Virginia. We're even trying to turn waste into energy. And by that, I mean manure. We've got poultry waste. We've got cattle farmers ready to turn this into power. Talk about a country that was built on the idea of making lemonade out of lemons. With what some of our forefathers were handed, this is it. We're literally making energy out of that.

The U.S. Department of Agriculture has estimated that by 2015 this will deliver over \$1 billion to our farmers; and in the decades ahead, it could be up to \$15 billion a year extra to our farmers. That's because our farmers are the

hardest working people in this country. They're ready to be those freedom fighters.

There's one other thing I wanted to mention. You talked about rates. Not only are there lies out there about what it's going to do to rates and taxes, but the most important thing, I think, in this bill and the one thing I hear so much about, whether it's from farmers or from business owners or just from people who are trying to keep the lights on in their own homes, is the crazy fluctuation in prices. You know, all of a sudden, you're at \$4.60 a gallon last summer. Then you're down to \$2. Then you're heading back up to \$3 a gallon.

That fluctuation is driven, in part, by these speculators out there who are just gambling on the kitchen table budgets of the American people. For years and years, both parties have known that this huge Enron loophole was out there which was driving the speculation. For once, we finally went after it, and we actually protected consumers in this bill.

The CBO figures, which Mr. MCMAHON mentioned, about there being a \$12-a-month increase is the maximum it would be. That's assuming we do nothing to reduce our energy consumption, and it doesn't take into account that we're going after these speculators who have been driving up the price. These people are making billions of dollars at the expense of the average American home. That's part of what we've done here, too, which is to go out and to protect consumers. So it's a smart bill.

You know, one quick thing before I yield back: people sometimes say, Have you read the 1,200 pages in this bill? Then I say, Have you? There's a lot of good stuff in there. There's a lot of good stuff that's going after these speculators and that's protecting consumers. Some of the best things for our farmers are in those 1,200 pages.

There are a lot of serious people here who were looking out for consumers, for farmers and for small business owners. Mr. BOCCIERI fought hard to get more money in this bill for manufacturing areas that have been hit hard with jobs going overseas. There's a lot of good stuff in here.

As Americans, we know that freedom isn't free. Part of that means you step up to the duties of citizenship, that you go out there and that you read the bill. Look at it as an opportunity, as an invitation to be part of this great freedom struggle for our country. We can do this, and this is a great step in that direction.

With that, I yield back.

Mr. BOCCIERI. Well, I thank the Congressman for his passion.

Before we wrap this up this evening, we've got to hear from a young, bright mind from Ohio.

Congressman RYAN, thank you for joining us tonight. Give us some of your words.

Mr. RYAN of Ohio. Thank you, Mr. BOCCIERI.

I was reading an article—and I was telling the Congressman from Virginia this. There was an article in *The New York Times* today, because a lot of people in our districts are like, Well, you know, China is not going to abide by this, and India is not going to have to deal with this, and we're out on our own here, and we've got to compete against these people.

There are actually provisions in the bill on steel and paper and some other things that do control imports coming from these other countries; but today in *The New York Times*, there was an article about this town in China where there was a big factory that was poisoning the people who lived within the area of this factory, and these people were going to the hospital. They were sick. They were nauseous. It was a bad scene. It was because of the pollution that was coming out of this factory; 400,000 people a year die in China because of air pollution.

□ 2220

And at some point, based on China's long history, they have these uprisings among the people, the government squelches it and tries to fix the problem. So if you have 400,000 people a year dying in China, at some point those people are going to want clean air. At some point.

I say this. Let China sleep for a couple of years. Let us get ahead of the curve. Let us make these investments and then produce these products, and finally we can export products to China that they're going to want because their people are demanding it.

So I wanted to come down and join this chorus because I think this is an opportunity for places like Youngstown, Ohio; Akron, Ohio; Canton, Ohio; northeast Ohio, where we have a manufacturing base in Virginia or New York or wherever the case may be to finally export things. Eight thousand component parts to a windmill, four hundred tons of steel. Solar panels have all of these complex components. We can do this. This is opportunity. Let's see it like it is.

And I tell folks back in our district, we have a Lordstown plant, a Lordstown General Motors plant, that is going to make this new car, Chevy Cruze. Why are they putting it at Lordstown? Why are they building the Chevy Cruze? Forty miles to the gallon. That's why. It's a green car.

Let's read the tea leaves here. This is where the country is going. This is where we need to be. We can finally be at a point, Mr. BOCCIERI, where we export products to China and we make money and create jobs here. That's what this is about. And we can talk about clean air and climate change, and I believe in all of that and I think it's great, but the bottom line is this means jobs for northeast Ohio.

And I think the more we talk about that, the more we recognize that, the more we plug our businesses in. Mr. BOCCIERI got a \$30 billion amendment in to help the auto industry convert over to alternative energy. Those are the things we need to do, and those are the things that are in this bill.

So I yield back, but I think this is opportunity, and if we see it as opportunity, it will work for us.

Mr. BOCCIERI. Thank you, Congressman RYAN. You're exactly right that the pillars of this legislation are about creating jobs in America, moving away from our dependence on foreign oil, and making our Nation more secure. National security is a big issue.

Congressman KRATOVIL.

Mr. KRATOVIL. You're absolutely right. There was a lot of talk in the bill about climate change, and that was certainly a significant part of it. But the bottom line is, what was more important to me in terms of voting for this is exactly what you said, national security and creating American jobs. And the energy bill clearly presents an incredible opportunity to spur innovation and create new jobs in this country, and that was one of the big reasons that I supported it.

Also, I want to go back to something Mr. PERRIELLO said about the fluctuation in prices. Again, the irony in this country is that oftentimes we are faced with a crisis and we deal with whatever that crisis is but we never deal with the underlying issue that causes the crisis.

And you were talking about the gas prices. A year ago, when the gas prices were \$4 a gallon, the entire population in America was saying, My gosh. What is going on? What are we going to do about this? It's outrageous that we're paying \$4 a gallon. It's outrageous that we're sending money overseas to the people that seek to destroy us. What are we going to do about it?

And then a year later, people in this Chamber have apparently—on the other side of the aisle, apparently forgotten.

Well, my answer to that is we should never forget that if we were paying \$4 a gallon for gas last year, we could be paying \$4 a gallon tomorrow. That has not changed unless we take responsibility and do what we should have done 40 years ago and started making an effort to have energy independence and reducing our dependence on foreign oil.

We shouldn't get angry. We should get even and do what we need to do as Americans to reduce our dependence on foreign oil.

Mr. RYAN of Ohio. That's exactly the point, that if we do nothing—which is what our friends on the other side of the aisle want us to do is nothing. We know that over the last 8 years, \$1,100 increase in energy costs. So keep doing that, you know what you're going to get.

What we're saying is we can't afford to keep doing nothing. We have to do something. And what we're doing is reducing our dependency. Give us control over what we're doing. We have no control in many ways when we're depending on sheiks in the Middle East. So, to your point, we've got to take control of this issue.

We're Americans, for God's sake. And you know what? When have we started in this country to be afraid of doing big things? Let's wrap our arms around this energy issue and take control of it and take it under the umbrella of the United States of America and stop all of these problems. You're exactly right. If gas is \$4 a gallon this summer, we would be getting calls from our constituents, What are you doing? And you know what? If it wasn't for the recession, it probably would be. So next year, there will be \$4-a-gallon gas, and hopefully we're moving along to fix this problem.

Mr. BOCCIERI. Mr. TONKO, why don't you take a minute and wrap it up.

Mr. TONKO. Thank you for bringing us together, and it's great to develop this colloquy with our colleagues here in the House, but I can't help but wonder which of us would have the opportunity to serve in this House if we pledged at election time to make certain that we develop jobs in competing nations for developing green energy innovation? Which of us would serve here? Which of us would serve here if we pledged to send dollars to some of the most troubled spots in the world that find us defending freedom-loving nations against some of these forces around the globe? We would be rejected resoundingly by that electorate.

Well, that's what's happening here. The agents of status quo are content to continue this effort to have other nations build the renewable resources out there. They would be content to have the American public send tons of their hard-earned dollars into the economies of the Mideast on which we rely for well over 60 percent of our oil supply. That is unacceptable.

And we can do it cleaner, we can do it greener, we can do it through American resources that develop American jobs to respond to the energy crises around the world. We can become that go-to Nation that will be the exporter of energy intellect, energy innovation, energy ideas. Just like we won the race in the 1960s for the space race.

We need to win this race. We don't have a choice to enter in. I think that choice has been made because there is a competitive edge already that's being developed with other nations out there. We need to go forward with an aggressive investment.

The investment here is to combat a huge deficit that was inherited by this administration, by the Obama administration. It was driven high and it started with a surplus. They spent away

that surplus. They drove us into a deficit situation, and now it is necessary for us to invest in an innovation economy that creates jobs.

Mr. BOCCIERI. I thank the gentlemen for joining us tonight. This has been a very intriguing dialogue, and I hope we garner a deeper appreciation for what it means to become energy independent. You all have the right vision. Now we have to find the courage in the Senate. We have to find 60 patriots in the Senate who will stand up and put America first and suggest that this is about producing and creating jobs here in our country, protecting our national security, and moving away from our dependence on foreign oil.

So with that, I will yield to my good friend from New York as we wrap it up.

Mr. McMAHON. Thank you for convening the Freshmen Power Hour, and thank you also for having such a special guest in Congressman RYAN gracing us with his eloquence here, with his maturity and wisdom from so many years here in Congress.

You guys have said it all here tonight. This is, quite frankly, a no-brainer. Cap-and-trade was a Republican idea. It makes sense. It's market principles. It's about national security. It's about jobs, manufacturing good jobs for electricians and carpenters and plumbers and steamfitters and engineers and scientists. It is about our environment, too.

You know, Congressman RYAN, when you were talking about the people in China saying, Hey, we want clean air, in Staten Island in New York, we have the highest lung cancer rates in America. The people of Staten Island and Brooklyn and New York City, we want clean air, too. So it's about the environment as well.

But this is a bill that allows us to do all of those things in a uniquely American way, the right way. I'm glad we voted for it in the House. I'm disappointed at the Republicans that they keep lying about it, but I hope, as you said, 60 patriots in the Senate will find a way to get this done and we'll send this bill to the President's desk and get it signed.

Mr. BOCCIERI. Mr. Speaker, let's get this done for America.

We yield back.

□ 2230

CULTIVATING AMERICAN ENERGY RESOURCES

The SPEAKER pro tempore (Mr. MINNICK). Under the Speaker's announced policy of January 6, 2009, the gentleman from Texas (Mr. GOHMERT) is recognized for 60 minutes.

Mr. GOHMERT. Thank you, Mr. Speaker. I do appreciate the time.

As frustrating as these times are, and as difficult as these times are for America, it never ceases to be an honor

to serve in this body and to be serving, in my case, the constituents of east Texas. It does mean so much, and the more that you know about history and where we've come from—

Ms. FOXX. Would my colleague from Texas yield for a moment?

Mr. GOHMERT. Yes, I will yield.

PARLIAMENTARY INQUIRY

Ms. FOXX. Mr. Speaker, I would like to make a parliamentary inquiry.

The SPEAKER pro tempore. The gentlewoman will state her parliamentary inquiry.

Ms. FOXX. One of the gentlemen just speaking in the Special Order said, "Republicans keep lying about it." I thought there might be some concern about the use of that phrase, and I would like to ask the Speaker if that is an acceptable phrase to be used on the floor when speaking about other Members.

The SPEAKER pro tempore. Members are reminded not to engage in personalities.

Ms. FOXX. Thank you, Mr. Speaker. Unfortunately, the folks who said it are not here to hear you say that. But thank you very much.

Mr. GOHMERT. I appreciate the gentlewoman from North Carolina pointing that out. I was in the back, jotting down a few notes. But I have had some concerns about some of the things that I had heard. For example, it is inappropriate under the House rules for someone in this body to call another person in this body a liar. That violates the House rules clearly. It's inappropriate to call names in here and engage in personality destruction. That's not appropriate. I've had constituents wonder why those of us on the floor don't call each other names, like Gordon Brown was called in Parliament in England. I have explained to them, Well, we have rules in the House. We don't do that kind of thing here. It's entirely inappropriate, and you can be called down. You can be censured for inappropriate conduct here on the floor and name calling, engaging, as the Speaker said, in attacks on personality.

But there was a comment I did hear in the discussion amongst my colleagues across the aisle about energy; and what I noted when I wrote down the comment was, "If we do nothing like those on the other side say," and I attribute no ill motive or intent to that comment. But the trouble is, that is not accurate; and obviously, it indicates just an ignorance with regard to what has been proposed on this side.

For example, in the area of energy, we have proposed bill after bill that would provide this country more energy. For example, 80 percent or so of our coast is off-limits to drilling off that coast. You can drill off the coast of Texas, Louisiana, Mississippi. There are some areas where drilling is going on. But we have found in Texas that despite all the naysayers who have said

it would kill off fishing, when I was growing up in Texas, they allowed platforms off the coast. We ended up having platforms off the coast of Texas, drilling for oil and gas. Lo and behold, guess what happened—fish proliferated out there. They used the platforms as an artificial reef. So if you go out fishing in the Gulf with a guide, they're likely to take you to an oil and gas platform because the fishing abounds around there. Lo and behold, man and environment can work together for the good of both. Not only would we produce great amounts of energy and avoid this country going back to \$4 a gallon gasoline, which we are going to go to because of the policies of the current administration and the current Speaker who want to put more and more—not just want to—they are constantly putting more and more of our natural energy resources off-limits, just constantly.

Some of us have had bills, supported bills that have used the information available to say, If we allow drilling off the Outer Continental Shelf, it will do a number of things. For one thing, it will provide tremendous amounts of money for the Federal Treasury because of the royalties coming from that. Not only that, there are estimates that if we allow Outer Continental Shelf drilling, that it would produce at least 1.1 to 1.3 million jobs. Well, the President originally promised that he would create 3 million jobs, and he backed off of that and said, well, he may save that many, or 4 million, may save them. And obviously you can never document that you saved a job, only if you created them or didn't. So that's why it was important to inject the word "save" in there.

But with regard to drilling in the Outer Continental Shelf, there would actually be real jobs created, not just on the platforms—there, of course—but it would create jobs in every single State. Then also if we allowed drilling up in ANWR—and it's not this beautiful mountaineous area up there. It's not. You go up there, and there's nothing there. Nothing lives there. The caribou may go through once a year, but they can't live there. There's nothing to live on. Birds may fly through every now and then, but there's nothing there for them to live on. That's the area that Jimmy Carter designated for drilling because it was an ideal place, and there was plenty of oil there. But if we allowed the oil to be pursued there, it would create a tiny footprint; and compared to the massive size—and it gets smaller constantly with technology—there would be another 1 million jobs created around the country, the United States, more Federal money, more jobs, which actually would create more Federal money. Then also there are some slopes in Alaska where drilling for natural gas has not been allowed, and that's esti-

mated to create another 1.1 to 1.3 million jobs. We could have between 3 million and 4 million jobs without taxing an extra quarter of a penny. It would cost nothing extra if we just used the resources we've got.

Ms. FOXX. Would the gentleman yield?

Mr. GOHMERT. Yes. I yield to my friend from North Carolina.

Ms. FOXX. I appreciate your helping to correct some of the things that they said. But I was very concerned with the fact that they said, We, on this side, want to do nothing. You know, I can challenge the veracity of their comments, particularly on that one. The gentleman, I know, is aware of the fact that Republicans have been trying for 2½ years to do something about the situation with energy. I know that you shared with 130 of us, I think, who came down last summer and spoke all during the month of August. But just for my sake and for anybody who's watching tonight, would you please verify that Republicans have offered several bills to do the very kinds of things that these gentlemen were talking about tonight? The unfortunate thing is that we're in the minority. They're in the majority. So they can talk a lot about it, and they could do something about it when we could not at the time, except bring it to the attention of the American people. But please make a comment about the American Energy Act.

Mr. GOHMERT. Well, sure. We had the American Energy Act. There are so many Republican bills that have been filed, and they encompass virtually everything. We want more solar. We want more wind. All these different sources. Nuclear power. I never thought I would end up indicating we ought to emulate France about anything, but they've done a terrific job in producing nuclear energy.

□ 2240

And so that is another area that we can utilize.

Natural gas from the horizontal drilling, the hydraulic fracking, when it's properly done, it has produced now, in recent years we find out, much more natural gas than we thought. And we have plans that encompass all of these things, every single source of energy.

What also our friends across the aisle have not realized, they made a comment about how their energy, their "crap and trade" bill would actually create jobs. And that does indicate to me that they didn't read their own bill. And that's rather unfortunate because there are things that contradict what they said.

But we've had many bills, and we call them "all of the above." And as my friend, Dr. Foxx, recalls, we were pushing an all of the above. We want to utilize all of the gifts with which this country has been blessed. We have

more coal—now, coal burned improperly pollutes the atmosphere. We can demand better; coal-to-liquid that doesn't produce all the pollution that just burning coal does. We can require scrubbers, as we have over the years, to help clean up the environment.

We have more coal than any nation in the world. We have vast supplies of natural gas, now over 100 years worth. We've got vast amounts of oil. We had estimates in our Natural Resources Committee—and we've talked about so many of these issues there—in a 500-square-mile area that includes Utah, Wyoming, and part of Colorado, there is a very thick shale there that we would like to see oil produced. And some estimates are 1 trillion to 3 trillion barrels of oil could be produced. Well, we were told that there's only about 1 trillion barrels of oil left in the entire Middle East, and we may have one to three times that much in one 500-square-mile area if we allow the people to go after it. And our plans all include those things.

But one other thing about pursuing that energy ourselves would be, we have a plan. We have bills that would actually take the money from the Outer Continental Shelf revenue, it would take money from ANWR production, it would take money from the gas production in Alaska and would actually use that to do research and find these other sources of energy.

I have a bill myself that they won't let come to the floor, and it's far-reaching. And some might say, well, it's kind of like the Star Wars idea that Reagan pushed—which ended up bringing down the Soviet Union and providing cover for so much of the world these days. But I really believe that someday solar energy will be our best source of energy and we'll be able to utilize it more so than ever. But we don't have a good way to store electricity. We can store energy. Energy can be stored, as it is in a place or two around the country, where during low-usage times they will maximize production of electricity to use it to pump water up into high reservoirs so that in peak times the water can flow down, turn turbines, and produce additional amounts of electricity. Now, that's storing energy, but it's not storing electricity.

So I had a bill that would say, for anyone who comes up with a way to store electricity in megawatt amounts for 30 days without losing more than 10 percent of the power, you get a \$300 million cash prize. Now, obviously if somebody comes up with a way to do that, they're going to make a lot of money off the process. Some say there is no way that could ever happen. Some scientists I've talked to said, Man, if we could do that, find a way to hold that electricity, we would never need any other source again. It would revolutionize everything. We might even be

able to harness electricity. I mean, the lightning from electricity that would come down, we could just store that.

And so those things, I think they are out there. I don't know of a Democrat bill that addresses that; that's a Republican bill, that's my bill. That's far-reaching; it's not going to happen in the next 2 years. But we believe if you use the energy resources we've got, the carbon-based resources we've got, demand clean air, clean water, and be good stewards of the environment, but then use the proceeds to develop the next generation of energy, then we don't have to have people lose jobs.

Now, our friends across the aisle were talking about they were concerned about jobs going to China and places like that. The fact is, that crap-and-trade bill is going to run jobs to China, India, Brazil. And I don't see how anybody can say they're going to help the environment by closing down manufacturers in this country and driving them to countries who produce four to 10 times more pollution to do the same job that goes into the same atmosphere. That is ridiculous. That doesn't preserve our environment; it makes it worse.

And another thing, too, it's historical fact that when a country's economy is struggling, the country quits worrying about the environment. They quit being good stewards of the environment. We don't have to do that. We can be good stewards, but you've got to have a vibrant economy to do that.

So why in the world would you want to put extra requirements on your industry in order to drive them to countries that would pollute 4 to 10 times as much? It makes no sense at all.

I yield to my friend, Dr. FOXX.

Ms. FOXX. Well, I think that this is a great segue to talk about the other subject that we wanted to talk about tonight, which is health care, and what is happening with the health care debate.

Mr. GOHMERT. Let me reclaim my time just briefly because that's where we want to get, but I do want to point out one other thing.

When I hear the talk about what this body is doing to create jobs, let me mention this. They didn't read the crap-and-trade bill because it says—and I pulled it out here on the floor, but I didn't have the full bill because there was only one bill in which both the 300-page amendment filed at 3:09 a.m. was being interfaced with the other bill, and that was right up there on the second level. And I finally got up there and found out where the one—and the Speaker ruled, consulting with the Parliamentarian, that even though there was no final bill that was put together with the amendments in the final bill, that that two stacks of documents that was not collated, didn't have all the lines deleted that it was supposed to, that that bill constituted

the official copy that was supposed to be here on the floor.

But in that bill there was a climate—I believe it was called a Climate Adjustment Fund, something like that, and it created a fund. And in the face of people saying across the aisle that nobody's going to lose their jobs, we're going to create jobs—and I heard it again tonight—if you just read the bill—obviously these weren't the people that wrote it, but whichever staffers wrote it, they knew that somebody was going to lose their job. Maybe Members didn't know because they hadn't read it, but the staffers that put that bill together knew people were going to lose their jobs because the fund said it was to compensate people who lost their jobs because of the crap-and-trade bill.

And not only that, it created money in there to help people with relocation. But the problem is, it wasn't going to help them relocate to China, India, Brazil and these different places where those jobs were going to actually go. That was in the bill. So the people, whatever staffers drafted that bill, they knew people would lose their jobs, but unfortunately the Members that didn't read the bill didn't know that that was in there.

And not only that, as my friend, Dr. FOXX, knows, in the last month, what have we been doing? According to my friends, some of them across the aisle, Oh, we've been concentrating on jobs, jobs, jobs. Last week, we passed a bill for \$770 million for wild horses and burros. I love horses, I grew up riding them, I love them. But the problem created after our friends across the aisle took the majority, they outlawed controlling the herds of these wild horses—even though they have an area bigger than New York State to run wild in.

Well, they have proliferated like crazy. And now, since we couldn't do anything for herd control, now they want to spend \$770 million, a big hunk of that, to buy a place bigger than West Virginia for the horses to continue to run around in. There was some money in there that I'm sure would have created a few jobs, that was going to help the wild stallions with their birth control, their contraception. So that was going to be interesting to see somebody apply for that job and do whatever was required to help the stallion with his contraception needs. But anyway, that was \$770 million.

Not only that, my friend knows that we just passed—and I know neither one of us voted for it—we passed a bill for \$25 million to help the otters. And as I pointed out here, when we passed the bill for \$25 million for the cranes—not the whooping cranes, but cranes, most of which are in other countries—and \$25 million for rare dogs and cats—none of which are in this country.

I was pointing out to my friends across the aisle, you know, you talk

about wanting to save jobs and helping; we've got Americans with habitat problems right here. And you're sending money to China that we have to borrow from China in order to buy land to let these rare dogs and cats live on so somebody can move into that area that's starving and kill those rare dogs and cats. I mean, that's insane when we have Americans having habitat problems.

□ 2250

So when I hear people saying oh, no, we're all about jobs, jobs, jobs, I am very concerned. But I was able to point out to some of my friends that supported the crap-and-trade bill that actually there is good news in there for the people that supported that, like our friends across the aisle that did, that actually when the voters find out what all is in that bill that they didn't read, there's good news for them because they may be eligible for both relocation and that allowance because they'll lose their job as a result of that bill. So they may be able to get proceeds under the fund when they lose their jobs because they voted for that bill. I did want to point those things out.

The sea turtles, don't forget we sent sums because it may be necessary to protect sea turtles, and 80 percent of that is required to go to foreign countries and not stay here. I mean, people here have habitat problems, and we're spending money like it's just growing on trees up here, and we are going to be in trouble.

Now I would like to get into the health care issue because there is money being spent, again, like it's growing on trees. The estimate of the President's plan, \$1 trillion to \$2 trillion. We had just gotten the data back, I think, in May for 2007 that showed all the spending for Medicare and Medicaid. It didn't even include SCHIP. Medicare and Medicaid. And we want to help people. We are a caring Nation, and that's what a caring Nation does. But you've got to spend your money wisely.

So we got the data, and you divide the number of households in America into the amount of money spent by the government on Medicare and Medicaid, and it's \$9,200 per household, for every household in America. The average is every household in America had to come up with \$9,200 in order to fund much less than one-third of the population on Medicare, Medicaid, and SCHIP. Well, that's insane. We can do better than that.

That's why I started putting together my own bill that basically would save tremendous amounts of money. And for the first time ever, senior citizens would have complete coverage. They wouldn't have to buy wraparound, supplemental coverage, anything like that. They would have complete cov-

erage with a high deductible insurance, which is normally so much cheaper because you have the high deductible.

Then to cover that deductible, for any household where people were on Medicare, Medicaid, or SCHIP or any combination, we would give them cash money, \$3,500, in a health savings account that they access with a debit card, and it is theirs to access for health care. And for anybody that might try to spend it on anything else, it wouldn't work because the bill requires it to be coded in such a way that only health care items, whether it's prescription drugs, over-the-counter drugs, treatment at the doctor's office, all those kinds of things would be covered. And when you ran up \$3,500, if you did, then the insurance that we would purchase for you every year would kick in and you'd be covered.

And to provide \$3,500 in a household account of everyone on Medicare, Medicaid, and SCHIP, give them that cash money in the health savings account they completely control with that debit card, no gatekeeper insurance company or government telling them they can't if it's truly for real health care needs, and then above that the private insurance we would purchase with Federal money would cover them so well, they wouldn't need any kind of other supplemental.

Now, that is showing care for senior citizens, for those who are in poverty. For all of those who are in poverty, senior citizens, disabled that needed Medicare, Medicaid, or SCHIP, that is the kind of caring that I know Republicans care about; that you can do it better without some government bureaucrat jumping in between people and their doctor.

Now, I have a health savings account right now and insurance coverage. Some people say Congress has got these gold-plated policies. I've got a \$3,000 deductible. I had better insurance when I was in private business. I had better insurance when I was a judge and chief justice than I do right now. I did. But I've a \$3,000 deductible policy, and I try to accumulate enough money each month into my health savings account, but it's going away at the end of the year.

Well, in the bill that I'm going to file, and I have about got it finished, it actually lets your health savings account amount roll over if you have excess in there each month. But for our seniors, all those on Medicare, Medicaid, and SCHIP, they would get a new \$3,500 in their health savings account every year. They would have new insurance purchased every year. And they couldn't be dropped because of a preexisting condition or anything like that. They'd just be covered and we'd take care of them. That's the kind of thing that shows when you really care about people.

I yield to my friend Dr. Foxx.

Ms. FOXX. I appreciate my friend leading the Special Order here tonight on health care.

I always like to start with setting the stage and getting the facts. I come from a background in education and in business, and I like to put the facts out so that people can see what they are and then make judgments themselves instead of just saying, like some of our colleagues do, what is happening. So I would like to show a chart that I have and I'd like to really talk about what is being talked about and what has driven this emphasis on doing something about health care.

Now, we hear that it's being called "health care reform," although I think some of our colleagues and the President have stopped using that term "health care reform." But I think it's really important that we put into perspective what it is we are talking about.

We hear all the time that there are 47 million Americans who do not have health care. That is not accurate. I have the numbers. I have the sources for them. If anybody wants to get these from me, they're from the Census Bureau. They are from the Congressional Research Service, the National Institutes of Health, the National Institute for Health Care Management, and the National Survey of American Families. So these are not numbers that I have made up or Republicans have made up; these are numbers that come from government sources.

So first of all, we don't have 47 million Americans who do not have health care. I've said it before. I have been criticized for saying it. But it is the truth. All Americans have health care. All they have to do is go to a doctor or go to a hospital. They will get health care. We do not turn people away from health care providers in this country. So they have health care.

But what these people really should be saying is they want to talk about the number of people who do not have insurance. There is a big difference between saying a person doesn't have health care and doesn't have insurance. And even that number needs to be clarified. So the folks who are making a big issue out of 47 million Americans, which is an inaccurate figure, really should be saying there are 45.7 million people in this country who are uninsured. Now, let me break that down.

Of those, 9.5 million are not citizens. So when you hear it's Americans who do not have health insurance, that's not accurate either when you're using the 45.7 million because 9.5 million of them are noncitizens. Many of them are here illegally.

Then we have people who are eligible for public programs: Medicare, Medicaid, SCHIP. That's 12 million people. They have chosen not to participate in those programs.

You know, this is the freest, greatest country in the world. We are allowed in

this country to make decisions, lots and lots of decisions. And I find it really interesting that our friends on the other side want to push choice that destroys unborn babies but when it comes to choice for school, when it comes to choice not to participate in a government program, they are not so keen on that. But we do have 12 million people who have chosen not to go into Medicare, not to go into Medicaid or SCHIP.

□ 2300

That's their choice. Then we have 9.1 million who are only temporarily uninsured. That means for maybe a month out of a year, in between jobs, or for other reasons, they might be uninsured. But they are not uninsured all the time. That is just for a brief period of time. So that's another 9.1 million. Then there are 7.3 million who make over \$84,000 a year. They are perfectly capable of purchasing health insurance. But most of them are young people who don't feel the need to do it.

I talked to a lady on the phone tonight who used to own a small business, and she said that it was all men, and they were between the ages of 20 and 35. And she said, we had the lowest rates for insurance of anybody because those people don't get sick very often and don't need a lot of insurance, and insurance obviously is calibrated on facts related to the age and the usage. And so she said it was very low rates at that time.

So a lot of people who are in that age range don't see the need to get insurance. So there's 7.3 million. That brings us down to 7.8 million who have lower income and long-term uninsured. These are people who probably would like to have insurance, but they feel they can't afford it. That's the number of people that we need to be serving in this country.

We do not need to turn our culture completely upside down, which is what the proposal from the Democrats is, in terms of health care, give government control of our lives, to take care of 7.8 million people. That would be a relatively inexpensive thing to do when you're talking about trillions of dollars.

Now, I believe, as my colleague has mentioned, that we need to reform Medicare and Medicaid. I believe in that. I think we should be doing better in those areas. We could make those programs better. We could have a higher quality of care, I believe, and again, more choices for our seniors and for those who need those programs. But we simply do not need to redo the entire health care system in this country to take care of 7.8 million people.

We know that American people are hurting. Republicans know that we need reform. And I want to go back to what our colleagues on the other side of the aisle keep saying. But saying it isn't going to make it true. They keep

saying, Republicans don't want to do anything. They talk about our being the do-nothing group. That is simply not true. It was Republicans who instituted health savings accounts. And it's one of the things that the Democrats most hate because, again, it gives people choices. It allows people to build wealth. If they put that money into health savings accounts and they don't use it, they keep it. If you put money into insurance and you don't use it, it's gone.

We believe in building wealth and allowing individuals to do that. We believe in continuing the good habits that this country has fostered over the years, again, keeping the government out of our lives, keeping the government from running our lives from cradle to grave, and letting people make their own decisions and continuing to make this country the great country that it is, the only country I know of where people are struggling to get into. And I'd like to yield back to my colleague from Texas, because I know he has some great stories to tell about issues related to health care and some experiences, more experiences to talk about. And so I'd like to yield back.

Mr. GOHMERT. I thank the gentleman for yielding back. But I thank her even more for her insightful comments and explanations about those who are without insurance and what the real number is that we're talking about, and the real number that we really need to do something to assist. That is so immensely helpful.

But I was struck last week too that, during debate over the health care issue, and some on this side of the aisle were giving story after story, true stories, of just terrible things that had happened, and people died, suffered immensely under health care in England or Canada because of the long waiting list that people get put on to get, either diagnostics to find out if there's a problem, or what the problem is, and then whatever the therapeutic need is, whether it's surgery, radiation, whatever, how long they waited, and some died while waiting for that.

And we had a friend across the aisle get up and say that, You know, gee, folks here are talking about Canada and England and their health care. No, no, we're not going to be like them. We're America. We always do things better.

And I was so struck by that comment because, for a couple of decades, we've been hearing people on the other side of the aisle talk about we need health care like England. We need health care like Canada. And that's been going on for a number of years, pointing to Canada. Look, we need to be like Canada. We heard that over and over. And then when we start getting into the nitty-gritty and just exactly how people are getting treated in Canada and England, the great examples we've heard for so

many years, and we start pointing out these are not good systems that you've been telling us we need to imitate and emulate, then we get the response, Well, we're America. We'll certainly do it better than they did.

Well, the trouble is it doesn't matter what your country is. When you pursue socialism, and the United States government or any other government is trying to take over health care, and run health care, you're headed for trouble. It's socialized medicine. I was an exchange student in the Soviet Union back in 1973 for a summer. We went to hospitals, to medical schools. There were 8 of us allowed in on that program in the Soviet Union that year. And anyway, I don't want socialized medicine. I've seen it.

And now we have friends across the aisle who have admitted this week that, really, you know, the public option they've been pushing for, it's just a way to finally get to the single-payer health care where the government runs everything. And my friends, Mr. Speaker, should know that once the government pays for everybody's health care, then they will have every right to tell you how to live, tell you what you can eat, tell you where you can go, if it's too dangerous. Once they pay the health care, then freedom and liberty that has been known in this country will be so dramatically impeded.

We don't have to go there. And when you use common sense, which I'm told in Washington is not so common, you use common sense, you see that we're already, probably by now, spending \$10,000 from every household in America, on average, to just give 90 million people health care. And you realize, good grief, we could do better than that. If we just bought them the best sterling silver, golden health care in the world, gave them that kind of coverage, and there are some things that need to be done so the insurance company doesn't create problems and impede your freedom there, too. And you give them money for their own health savings account that they completely control, and it ends up being cheaper—that's a real solution.

□ 2310

You give senior citizens complete control for the first time since Medicare came into existence, and then you give them complete coverage like they've never had, like they've never had. So that's a rather significant development.

There are a few other things I'd like to point out which are proposed in my bill, because I am sick of people across the aisle saying that we don't want to do anything about health care and that we like the status quo. Folks, we cannot stand to do the status quo. We have got to make some changes or it is going to bankrupt this country. We can do better, and this is one proposal that will.

One of the things we've got to have is complete transparency in health care costs because we sure don't have it now. We're not even close. You know, I've asked myself before: What is this going to cost? Well, it all depends; and it does. Which insurance have you got? If you don't have insurance, then that's another cost; but they may give you a little discount. Even if they give you a little discount, it's not going to be as cheap as you could get if you were an insurance company like Blue Cross.

Well, under my proposal, under this plan, you would have complete transparency because every health care provider would have to disclose to you exactly what the cost is. If they're proposing a cost that's different to you than what they've charged to some insurance company, then they have to tell you that, and they have to tell you how much they charge to these other entities. That's part of the bill. We've got to get away from this insane billing system where a hospital may bill \$1,000 to \$1,500 for a room for a night, hoping they'll get back \$100 to \$150.

I was involved in a situation. It wasn't my personal situation, but I was very familiar with it. There was a car wreck. A man ran a stop sign. The hospitalization was 2 days, the testing, all the doctors, the ambulance—everything—came to around \$10,000. That was the total of all the bills. As an attorney, you gather together all of those bills, and you provide them to the auto insurance company of whoever is at fault, and often they'll work out a settlement with you.

In that case, a settlement was reached. Money was put in escrow as required under State law, and then State law requires, before any of the proceeds of the settlement can be disbursed, that it has to first refund any money that any health care provider or insurance company has provided on behalf of the injured party. So, in accumulating the documentation, again, it was around \$10,000 total.

The documentation came back from all of the providers that everyone had been paid in full by the health insurance company of the injured driver. Everybody has been paid in full under their agreement with the health insurance company, so then you have to get documentation from the health insurance company.

Okay. Show us how much you paid to all of these different health care providers—hospital, ambulance, tests, doctors, all that stuff. Show us how much you paid to satisfy the \$10,000 in health care costs, and you'll be cut a check for that amount, and we'll send it right on out to you. The documentation came as to how much the insurance company paid in full satisfaction of \$10,000 in health care costs, and it was right at \$800 to satisfy \$10,000 in medical claims.

So, if you're the party and if you get these claims, you go, Oh, my word.

This is \$10,000 of health care costs? Thank goodness I have insurance. I sure couldn't afford \$10,000. If you knew the real truth, that it was being paid in full with \$800, you might realize, gee, you don't need as much insurance as you thought you did. You could buy cheaper insurance; you could have a deductible, and your insurance would be cheaper.

With the proposal for everybody, it would cover everybody on Medicare, Medicaid and SCHIP or any combination. We give them cash in their accounts that they control, and then buy insurance on top of that. It will save this government money, the State's money, and it will give dignity back to seniors who've had to beg the government, who've had to beg their supplemental carriers and who've had to get into arguments. That would have to cease. That would cease and it should. As the Federal Government, we should see to that and not create greater slaves to the Federal Government.

Another thing that this bill would do—and again, it's a Republican bill. There are numerous, wonderful plans that are being proposed on the Republican side of the aisle, but we're not in the majority. The majority can control and can keep every one of these great ideas from coming to the floor. In my proposal, it also addresses and provides great incentives for employers to pay money into individuals' health savings accounts, and that would be money that you, the individual, would have, would control, which would be yours. Again, it's a debit card—it's in the bill—that's coded to cover things that are health care related. Then you would have a high deductible insurance to cover things above the health savings account amount.

Yet since young people hardly cost anything, young people in their 20s and 30s, they would be accumulating vast amounts of money in their health savings accounts so that, by the time they would get to be seniors, the government wouldn't need to pay anything because they would already have so much in their health savings accounts that they could buy their own great insurance. They could pay for whatever they'd need, and they'd have a high deductible insurance.

There have been some statistics that have been put together that have shown that young people could pay for the best assisted living that they could ever need. Special needs would be addressed. That would be the way to get off this road to the \$22 trillion that has been estimated we're headed toward with the Medicare system we're on right now.

There are those who have been desensitized by President Bush's requesting \$700 billion last fall, by President Obama's asking for \$700 billion this year and by the \$400 billion land omnibus bill's actually getting, apparently,

over \$400 billion of the original bailout money for Secretary Geithner to throw around at his friends as he sees fit. So people have kind of been desensitized as to how much \$1 trillion is.

So that it can be put in perspective, the total amount estimated to have been received by the U.S. Treasury for tax year 2008 is apparently going to be around \$2.5 trillion.

We have Medicare that is running through the roof, which will break this country. At the same time, seniors, relatives of mine whom I love and care about, are having to buy supplemental insurance because it really doesn't take care of what they need. They're fussing with their insurance companies; they're fussing with Medicare. That is ridiculous. You get toward your last days on Earth, and you've got to fuss over that kind of stuff? That's absurd. We don't have to do that.

Another issue, though, with regard to health care is not only the transparency of costs, but it is an issue with regard to migrants, both illegal and legal, getting free health care. We've seen very clearly health care costs will bankrupt this country if we don't do something to save this Nation, and we can. It's doable, but we have got to get back to reality.

It's estimated that there are over 1.5 billion people in the world who would like to immigrate, who would like to come into the United States. Legally or illegally, they would like to come into this country. Well, we've got over 300 million Americans right now. If 1.5 billion people came into this country, it would overwhelm everything, and we would be bankrupt overnight because we would not be able to absorb that kind of thing.

So, at some point, we have got to go back, as our forefathers did, and say: You know what? The rule of law means something. That's why we have such a top economy in the world, and that's why our friends to the south, Mexico, don't. They've got great workers, hard-working people. They've got incredible national resources, but they're not one of the top 10 economies because they've not been a nation of laws where the rule of law has mattered. They've been a country where graft and corruption all too often have been the rule of the day, not the rule of law. You can bribe your way out of things, and that is why they have not advanced.

Well, we don't need to forsake the rule of law. I am all for having all of the visas we need to supply the workers we need. Right now, we don't need a lot of workers, because there are a lot of out-of-work Americans.

So, as to all this talk about jobs Americans won't do, well, we had a hearing in the crime subcommittee in the last couple of weeks, and we found out that, out of just over 200,000 people incarcerated in Federal prison, 53,000 of them are migrants, immigrants in the

country. We were told that most of them were illegal immigrants. We didn't get the exact number out of the 53,000.

□ 2320

But over 25 percent of the people in Federal prison are not American citizens and most of those 53,000 are illegally here. Well, people who are illegally here and are not paying for health care will bankrupt this country if we allow this to go unabated. And some of us care enough about our contribution as the greatest philanthropic country in the world's history and if we'd like to continue to do that, that we need this economy going and going forward in good measure.

And so part of this proposal and part of this bill is that if you are seeking a visa to come into this country, you will have to show proof that you have a health savings account, health insurance to cover your health needs while you're here. There's a provision where employers can set up migrant worker health care costs, or to cover health care costs while they're here and that will satisfy the requirement. You can show proof that the household you're going to be living in will allow you to be part of their household insurance and health savings account. But you're going to have to provide that or you don't get a visa or you don't get one renewed.

Not only that, the Supreme Court in this caring nation says if you present yourself while you're illegally in this country to a hospital, we'll provide your health care needs. That's the law. The Supreme Court says it is; we'll follow the law. But once we've got you well enough to travel, you will be deported and because a bankrupt nation is a matter of national security to avoid, then if you come back after you've been illegally here and required free treatment, free to you but at a huge cost to the American taxpayer, then that will be a crime, that you came in illegally, got free health care and then after deported you came back again, that will be a crime and you would have to be incarcerated. We have got to stop that, so that we continue to be the kind of nation that 1.5 billion people would like to come to and that people around the world can receive the great charity of this nation. Otherwise, a bankrupt nation can't help anybody around the world.

Mr. Speaker, I would like to inquire, how many minutes do I have left?

The SPEAKER pro tempore. The gentleman has 6 minutes remaining.

Mr. GOHMERT. Thank you, Mr. Speaker.

I would also like to point out that under this health care plan, insurance whether purchased by the employer, purchased by the Federal Government, purchased by the individual, it will be totally owned by the individuals that

have the insurance which means it's fully portable. There will be provisions that you can't be dropped because of preexisting conditions, things like that, because we have got to get things back on keel and that would be very helpful to do that.

I would just like to encourage, Mr. Speaker, those who are beginning to think, and I was on a telephone town hall conference tonight before I came over. We had thousands of people on that call. We asked the question, how many would like for the government to run health care? And we had right at 98 percent say they absolutely did not want the government running health care. They know too much about it themselves. We asked how many people were satisfied with their own health insurance or their health care situation and the vast majority were. We don't have to redo the entire system. We don't. But we can do better than we are, and my Republican friends I've talked to, especially the last couple of weeks, like this idea. We'll be getting that filed and we'll get it scored. There's an opportunity to show the caring heart of Americans. And in a different way from what my colleague across the aisle was intimating when he said, We're Americans, we can do—what he was talking about—socialized medicine better here than they've done it. Not if it's socialized medicine, but I would submit to you as Americans, we can do better.

I never seek to impose my religious beliefs on anyone else but I think it's important to know history and where we are and I'd just like to conclude, because it may be a word of encouragement to people, that when the Washington Monument was dedicated, there's a four-sided pyramid capstone that was put on there, there's writing on all four sides but on the side facing the Capitol, up here this way, are the Latin words, *laus Deo*, praise be to God. That's on the top of the Washington Monument. That is the tallest point in Washington, D.C. Those people back then put *laus Deo*, praise be to God, on the side facing the Capitol for this reason: This is east of the Washington Monument. This is the side from which the sun comes up. They wanted to make sure that when God's first rays of sun hit anything in this Nation's Capitol, it was the words—boom—praise be to God, and that is what I hope Americans will be able to say with our Founders for many centuries to come.

With that, Mr. Speaker, I yield back the balance of my time.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. LEWIS of Georgia) to revise

and extend their remarks and include extraneous material:)

Mr. LEWIS of Georgia, for 5 minutes, today.

Ms. WOOLSEY, for 5 minutes, today.

Ms. TITUS, for 5 minutes, today.

Mr. YARMUTH, for 5 minutes, today.

Mr. DAVIS of Illinois, for 5 minutes, today.

Mr. SCHAUER, for 5 minutes, today.

Mr. SESTAK, for 5 minutes, today.

Ms. KAPTUR, for 5 minutes, today.

Mr. PASCRELL, for 5 minutes, today.

Ms. LINDA T. SANCHEZ of California, for 5 minutes, today.

Mr. BECERRA, for 5 minutes, today.

Mr. MCDERMOTT, for 5 minutes, today.

Mr. SPRATT, for 5 minutes, today.

Ms. JACKSON-LEE of Texas, for 5 minutes, today.

ENROLLED BILL SIGNED

Ms. Lorraine C. Miller, Clerk of the House, reported and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 838. An act to provide for the conveyance of a parcel of land held by the Bureau of Prisons of the Department of Justice in Miami Dade County, Florida, to facilitate the construction of a new educational facility that includes a secure parking area for the Bureau of Prisons, and for other purposes.

SENATE ENROLLED BILL SIGNED

The Speaker announced her signature to an enrolled bill of the Senate of the following title:

S. 1513. An act to provide for an additional temporary extension of programs under the Small Business Act and the Small Business Investment Act of 1958, and for other purposes.

ADJOURNMENT

Mr. GOHMERT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 11 o'clock and 27 minutes p.m.), the House adjourned until tomorrow, Friday, July 31, 2009, at 9 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2937. A letter from the Director, Defense Procurement and Acquisition Policy, Department of Defense, transmitting the Department's final rule — Defense Federal Acquisition Regulation Supplement; Requirements Applicable to Undefined Contract Actions (DFARS Case 2008-D029) (RIN: 0750-AG29) received July 21, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Armed Services.

2938. A letter from the Chief Counsel, FEMA, Department Homeland Security,

transmitting the Department's final rule — Changes in Flood Elevation Determinations [Docket ID FEMA-2008-0020; Internal Agency Docket No. FEMA-B-1055] received July 1, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Financial Services.

2939. A letter from the Assistant Secretary, Office of Legislative Affairs, Department of Homeland Security, transmitting draft legislation entitled, "Defense Production Act Reauthorization of 2009"; to the Committee on Financial Services.

2940. A letter from the Chief Counsel, Department of the Treasury, transmitting the Department's final rule — Suspension of Community Eligibility [Docket ID FEMA-2008-0020; Internal Agency Docket No. FEMA-8081] received July 21, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Financial Services.

2941. A letter from the Secretary, Department of the Treasury, transmitting as required by section 401(c) of the National Emergencies Act, 50 U.S.C. 1641(c), and section 204(c) of the International Emergency Economic Powers Act, 50 U.S.C. 1703(c), a six-month periodic report on the national emergency with respect to terrorists who threaten to disrupt the Middle East peace process that was declared in Executive Order 12947 of July 23, 1995, pursuant to 50 U.S.C. 1641(c); to the Committee on Foreign Affairs.

2942. A letter from the Deputy Director, Defense Security Cooperation Agency, Department of Defense, transmitting Transmittal No. 09-14, proposed Letter(s) of Offer and Acceptance, pursuant to section 36(d)(1) of the Arms Export Control Act, as amended; to the Committee on Foreign Affairs.

2943. A letter from the Assistant Secretary, Legislative Affairs, Department of State, transmitting the Department's letter in accordance with Section 3 of the Arms Export Control Act; to the Committee on Foreign Affairs.

2944. A letter from the Assistant Secretary and the Acting Assistant Secretary for Bureau of Political-Military Affairs, Department of State, transmitting Transmittal No. DDTC 046-09, Transmittal No. DDTC 065-09, Transmittal No. DDTC 005-09, Transmittal No. DDTC 070-09, and Transmittal No. DDTC 052-09, pursuant to Public Law 110-429, section 201; to the Committee on Foreign Affairs.

2945. A letter from the Assistant Secretary, Legislative Affairs, Department of State, transmitting the Department's letter in accordance with Section 3 of the Arms Export Control Act; to the Committee on Foreign Affairs.

2946. A letter from the Assistant Secretary, Legislative Affairs, Department of State, transmitting pursuant to section 36(d) of the Arms Export Control Act, certification regarding the proposed license for the manufacture of military equipment (Transmittal No. DDTC 074-09); to the Committee on Foreign Affairs.

2947. A letter from the Assistant Secretary, Legislative Affairs, Department of State, transmitting pursuant to section 36(c) of the Arms Export Control Act, certification regarding the proposed export defense articles or services (Transmittal No. DDTC 028-09); to the Committee on Foreign Affairs.

2948. A letter from the Assistant Secretary, Legislative Affairs, Department of State, transmitting Transmittal No. DDTC 010-09, certification of a proposed technical assistance agreement for the export of technical data, defense services, and defense articles, pursuant to section 36(c) of the Arms Export Control Act; to the Committee on Foreign Affairs.

2949. A letter from the Assistant Secretary, Legislative Affairs, Department of State, transmitting Transmittal No. DDTC 063-09, certification of a proposed technical assistance agreement for the export of technical data, defense services, and defense articles, pursuant to section 36(c) of the Arms Export Control Act; to the Committee on Foreign Affairs.

2950. A letter from the Assistant Secretary, Legislative Affairs, Department of State, transmitting Transmittal No. DDTC 057-09, certification of a proposed manufacturing license agreement for the manufacture of significant military equipment abroad, pursuant to section 36(c) and 36(d) of the Arms Export Control Act; to the Committee on Foreign Affairs.

2951. A letter from the Assistant Secretary, Legislative Affairs, Department of State, transmitting Transmittal No. DDTC 073-09, certification of a proposed manufacturing license agreement for the manufacture of significant military equipment abroad and the export of defense services and defense articles, pursuant to section 36(c) and 36(d) of the Arms Export Control Act; to the Committee on Foreign Affairs.

2952. A letter from the Assistant Secretary, Legislative Affairs, Department of State, transmitting pursuant to section 36(d) of the Arms Export Control Act, certification regarding the proposed license for the manufacture of military equipment to Germany (Transmittal No. DDTC 051-09); to the Committee on Foreign Affairs.

2953. A letter from the Assistant Secretary, Legislative Affairs, Department of State, transmitting Transmittal No. DDTC 067-09, certification of an application for a license for the export of defense articles of defense services to be sold under contract, pursuant to section 36(c) of the Arms Export Control Act, as amended; to the Committee on Foreign Affairs.

2954. A letter from the Auditor, District of Columbia, transmitting the Office's report entitled "Letter Report: Comparative Analysis of Actual Cash Collections to the Revised Revenue Estimate Through the 4th Quarter of Fiscal Year 2008", pursuant to D.C. Code section 47-117(d); to the Committee on Oversight and Government Reform.

2955. A letter from the Auditor, Office of the District of Columbia Auditor, transmitting a report entitled, "Letter Report: Audit of Advisory Neighborhood Commission 7A for Fiscal Years 2005 through 2008, as of March 31, 2008", pursuant to D.C. Code section 47-117(d); to the Committee on Oversight and Government Reform.

2956. A letter from the Auditor, Office of the District of Columbia Auditor, transmitting a report entitled, "Letter Report: Audit of Advisory Neighborhood Commission 6C for Fiscal Years 2005 through 2008, as of March 31, 2008", pursuant to D.C. Code section 47-117(d); to the Committee on Oversight and Government Reform.

2957. A letter from the Acting Senior Procurement Executive, GSA, Department of Defense, transmitting the Department's final rule — Federal Acquisition Regulation; Federal Acquisition Circular 2005-34; Introduction [Docket FAR: 2009-0001, Sequence 5], pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Oversight and Government Reform.

2958. A letter from the Acting Senior Procurement Executive, GSA, Department of Defense, transmitting the Department's final rule — Federal Acquisition Regulation; FAR Case 2006-022, Contractor Performance Information [FAC 2005-34; FAR Case 2006-022; Item

I; Docket 2008-0002; Sequence 2] (RIN: 9000-AK99) received July 1, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Oversight and Government Reform.

2959. A letter from the Acting Senior Procurement Executive, GSA, Department of Defense, transmitting the Department's final rule — Federal Acquisition Regulation; FAR Case 2008-028, Role of Interagency Committee on Debarment and Suspension [FAC 2005-34; FAR Case 2008-028; Item III; Docket 2009-0021; Sequence 1] (RIN 9000-AL33) received July 1, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Oversight and Government Reform.

2960. A letter from the Acting Procurement Executive, GSA, Department of Defense, transmitting the Department's final rule — Federal Acquisition Regulation; Federal Acquisition Circular 2005-32; Small Entity Compliance Guide [Docket: FAR 2009-0002, Sequence 5] received July 1, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Oversight and Government Reform.

A bill to provide for incentives to encourage health insurance coverage, and for other purposes; to the Committee on Energy and Commerce, and in addition to the Committees on Ways and Means, Education and Labor, Oversight and Government Reform, the Judiciary, Rules, the Budget, and Appropriations, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Ms. WASSERMAN SCHULTZ (for herself and Mr. POE of Texas):

H.R. 3401. A bill to amend the Violence Against Women Act of 1994 and the Omnibus Crime Control and Safe Streets Act of 1968 to improve assistance to domestic and sexual

violence victims and provide for technical corrections; to the Committee on the Judiciary, and in addition to the Committee on Financial Services, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. POE of Texas (for himself and Mr. COSTA):

H.R. 3402. A bill to establish a minimum funding level for programs under the Victims of Crime Act of 1984 for fiscal years 2010 to 2014 that ensures a reasonable growth in victim programs without jeopardizing the long-term sustainability of the Crime Victims Fund; to the Committee on the Judiciary.

By Ms. WOOLSEY (for herself, Mr. ALTMIRE, and Mr. GEORGE MILLER of California):

H.R. 3403. A bill to amend the Family and Medical Leave Act of 1993 and title 5, United States Code, to provide leave for family members of members of regular components of the Armed Forces, and leave to care for covered veterans, and for other purposes; to the Committee on Education and Labor, and in addition to the Committees on Oversight and Government Reform, and House Administration, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. MCDERMOTT (for himself, Mr. RANGEL, Mr. STARK, Mr. LEVIN, Mr. LEWIS of Georgia, Ms. BERKLEY, Mr. CROWLEY, Mr. VAN HOLLEN, Mr. MEEK of Florida, Mr. DAVIS of Illinois, Ms. LINDA T. SANCHEZ of California, Mr. JOHNSON of Georgia, Ms. FUDGE, Ms. HIRONO, Mr. NADLER of New York, Ms. BORDALLO, Mr. FARR, Mr. LATOURETTE, Mrs. MILLER of Michigan, Mr. PETERS, Mr. DINGELL, and Mrs. CAPPS):

H.R. 3404. A bill to amend the Assistance for Unemployed Workers and Struggling Families Act and the Supplemental Appropriations Act, 2008 to provide for the temporary extension of certain unemployment benefits and the temporary availability of further additional emergency unemployment compensation, and for other purposes; to the Committee on Ways and Means, and in addition to the Committee on Transportation and Infrastructure, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. REHBERG (for himself and Mr. CASTLE):

H.R. 3405. A bill to authorize the production of Saint-Gaudens Double Eagle ultrahigh relief bullion coins in palladium to provide affordable opportunities for investments in precious metals, and for other purposes; to the Committee on Financial Services.

By Mr. BLUMENAUER (for himself and Ms. GINNY BROWN-WAITE of Florida):

H.R. 3406. A bill to amend the Internal Revenue Code of 1986 to exclude from gross income amounts reimbursed by an individual's employer for certain dietary supplements and meal replacement products; to the Committee on Ways and Means.

By Mr. BUYER (for himself, Mr. MICHAUD, and Mr. BROWN of South Carolina):

H.R. 3407. A bill to amend title 38, United States Code, to make certain improvements to laws administered by the Secretary of

Veterans Affairs relating to benefits for severely injured veterans, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. McDERMOTT (for himself, Mr. NEAL of Massachusetts, and Mr. TIERNEY):

H.R. 3408. A bill to amend the Internal Revenue Code of 1986 to modify the rules relating to the treatment of individuals as independent contractors or employees, and for other purposes; to the Committee on Ways and Means.

By Ms. BEAN (for herself, Ms. BERKLEY, Mr. SHIMKUS, Mr. COHEN, Mr. SHERMAN, Ms. HERSETH SANDLIN, Mr. OBERSTAR, Mr. CARDOZA, Mr. KIND, Mr. DAVIS of Illinois, Mr. DAVIS of Alabama, Mr. HELLER, and Mr. CROWLEY):

H.R. 3409. A bill to amend the Internal Revenue Code of 1986 to allow an additional credit against income tax for the adoption of an older child; to the Committee on Ways and Means.

By Ms. BEAN (for herself, Mr. OBERSTAR, Mrs. BIGGERT, Mr. ROSKAM, Ms. BERKLEY, Mr. BILBRAY, Mr. BRALEY of Iowa, Ms. DEGETTE, Ms. WASSERMAN SCHULTZ, Mr. FOSTER, Ms. HARMAN, Mr. KIND, Mr. MANZULLO, Mr. THOMPSON of California, Mr. SHIMKUS, Mr. HOLDEN, Mr. VIS-CLOSKY, and Mrs. HALVORSON):

H.R. 3410. A bill to require Surface Transportation Board consideration of the impacts of certain railroad transactions on local communities, and for other purposes; to the Committee on Transportation and Infrastructure.

By Mr. BOYD:

H.R. 3411. A bill to exempt certain coastal barrier areas in Florida from limitations on Federal expenditures and financial assistance under the Coastal Barriers Resources Act, and limitations on flood insurance coverage under the National Flood Insurance Act of 1968; to the Committee on Natural Resources, and in addition to the Committee on Financial Services, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. BURTON of Indiana (for himself and Ms. ROS-LEHTINEN):

H.R. 3412. A bill to recognize Jerusalem as the capital of Israel, to relocate to Jerusalem the United States Embassy in Israel, and for other purposes; to the Committee on Foreign Affairs.

By Mrs. CAPITO (for herself and Mr. SPACE):

H.R. 3413. A bill to authorize the National Telecommunications and Information Administration of the Department of Commerce to make grants for the establishment of information technology centers in rural areas; to the Committee on Energy and Commerce.

By Mr. CARSON of Indiana (for himself, Mr. VIS-CLOSKY, Mr. DONNELLY of Indiana, Mr. SOUDER, Mr. BUYER, Mr. BURTON of Indiana, Mr. PENCE, Mr. ELLSWORTH, and Mr. HILL):

H.R. 3414. A bill to name the Department of Veterans Affairs temporary lodging facility in Indianapolis, Indiana, as the "Otis Bowen Comfort Home"; to the Committee on Veterans' Affairs.

By Mr. COSTELLO:

H.R. 3415. A bill to suspend flood insurance rate map updates in geographic areas in which certain levees are being repaired; to the Committee on Financial Services.

By Mr. DAVIS of Alabama:

H.R. 3416. A bill to extend to individuals evacuated from their residences as a result of a major disaster the right to use the absentee balloting and registration procedures available to military and overseas voters under the Uniformed and Overseas Citizens Absentee Voting Act, to direct the Election Assistance Commission to make grants to States to respond to election administration needs which result from a major disaster, and for other purposes; to the Committee on House Administration, and in addition to the Committee on Transportation and Infrastructure, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Ms. DEGETTE (for herself, Mr. COFFMAN of Colorado, Mr. POLIS, Ms. MARKEY of Colorado, Mr. SALAZAR, and Mr. PERLMUTTER):

H.R. 3417. A bill to establish the Rocky Mountain Science Collections Center to assist in preserving the archeological, anthropological, paleontological, zoological, and geological artifacts and archival documentation from the Rocky Mountain region through the construction of an on-site, secure collections facility for the Denver Museum of Nature & Science in Denver, Colorado; to the Committee on Natural Resources.

By Mr. ELLSWORTH:

H.R. 3418. A bill to amend part D of title XVIII of the Social Security Act to apply the exceptions process for tiered formulary drugs to specialty tier drugs; to the Committee on Energy and Commerce, and in addition to the Committee on Ways and Means, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Ms. EDDIE BERNICE JOHNSON of Texas (for herself, Mr. WEXLER, Mr. COHEN, Mr. KUCINICH, Ms. ROS-LEHTINEN, Ms. NORTON, Mrs. NAPOLITANO, Ms. FUDGE, Mr. MCGOVERN, Ms. ZOE LOFGREN of California, Ms. MOORE of Wisconsin, Mr. HASTINGS of Florida, Mr. DAVIS of Illinois, and Ms. WASSERMAN SCHULTZ):

H.R. 3419. A bill to amend the Hate Crime Statistics Act to include crimes against the homeless; to the Committee on the Judiciary.

By Mr. KENNEDY (for himself, Mr. JONES, Mr. PIERLUISI, Ms. SCHAKOWSKY, Mr. LOEBSACK, Mr. BISHOP of New York, Mr. TONKO, and Mr. GRIJALVA):

H.R. 3420. A bill to improve and enhance substance use disorder programs for members of the Armed Forces, and for other purposes; to the Committee on Armed Services.

By Ms. KILROY (for herself, Mr. GUTIERREZ, Mr. MINNICK, Mr. PERRIELLO, Ms. SCHAKOWSKY, Mr. BACA, Ms. SPEIER, Mr. HINCHEY, Mr. ELLISON, Ms. MOORE of Wisconsin, Ms. FUDGE, Ms. KAPTUR, Mr. HASTINGS of Florida, and Mr. AL GREEN of Texas):

H.R. 3421. A bill to exclude from consumer credit reports medical debt that has been in collection and has been fully paid or settled, and for other purposes; to the Committee on Financial Services.

By Mr. KING of Iowa (for himself and Mr. LATHAM):

H.R. 3422. A bill to amend title XVIII of the Social Security Act to make temporary im-

provements to the Medicare inpatient payment adjustment for low-volume hospitals, and for other purposes; to the Committee on Ways and Means, and in addition to the Committee on Energy and Commerce, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. MCMAHON (for himself and Mr. INGLIS):

H.R. 3423. A bill to impose certain sanctions on North Korea as a result of the detonation by that country of a nuclear explosive device on May 25, 2009, and for other purposes; to the Committee on Foreign Affairs, and in addition to the Committee on Financial Services, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. NEAL of Massachusetts:

By Mr. QUIGLEY:

H.R. 3427. A bill to amend title 23, United States Code, to protect States that have in effect laws or orders with respect to pay to play reform, and for other purposes; to the Committee on Transportation and Infrastructure.

By Mr. REICHERT:

H.R. 3428. A bill to amend the Emergency Economic Stabilization Act of 2008 to require a corresponding reduction in the authorization to purchase each time a repayment is made for assistance received under the Troubled Asset Relief Program; to the Committee on Financial Services.

By Mr. RYAN of Wisconsin (for himself, Mr. DAVIS of Alabama, and Mr. CROWLEY):

H.R. 3429. A bill to amend the Internal Revenue Code of 1986 to allow individuals to defer recognition of reinvested capital gains distributions from regulated investment companies; to the Committee on Ways and Means.

By Ms. LINDA T. SANCHEZ of California (for herself, Mr. LEWIS of Georgia, and Mr. RUSH):

H.R. 3430. A bill to establish a Medicare DSH pilot program under which participants shall establish collaborative care networks to reduce the use of emergency departments, inpatient and other expensive resources of hospitals and other providers and provide more comprehensive and coordinated care to low-income individuals, including those without health insurance coverage, and to

establish a Collaborative Care Network Center; to the Committee on Ways and Means, and in addition to the Committee on Energy and Commerce, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. SHULER (for himself and Mr. BOREN):

H.R. 3431. A bill to amend the Clean Air Act to promote the certification of aftermarket conversion systems and thereby encourage the increased use of alternative fueled vehicles; to the Committee on Energy and Commerce.

By Mr. SPACE (for himself and Mr. PAUL):

H.R. 3432. A bill to amend the Internal Revenue Code of 1986 to allow long-distance rural commuters a deduction during periods when the local price of gasoline exceeds \$3 per gallon; to the Committee on Ways and Means.

By Mr. WITTMAN:

H.R. 3433. A bill to amend the North American Wetlands Conservation Act to establish requirements regarding payment of the non-Federal share of the costs of wetlands conservation projects in Canada that are funded under that Act, and for other purposes; to the Committee on Natural Resources.

By Mr. DONNELLY of Indiana:

H.R. 3434. A bill to amend the Internal Revenue Code of 1986 to modify the credit for expenses for household and dependent care services necessary for gainful employment; to the Committee on Ways and Means.

By Ms. SLAUGHTER:

H. Con. Res. 172. Concurrent resolution providing for an adjournment or recess of the two Houses; considered and agreed to.

By Mr. ALEXANDER:

H. Con. Res. 173. Concurrent resolution expressing the sense of the Congress that the Federal Government should not levy any additional taxes on firearms or firearm ammunition during the current economic hardship; to the Committee on Ways and Means.

By Mrs. LUMMIS:

H. Res. 696. A resolution acknowledging and congratulating Western Wyoming Community College in Southwest Wyoming on the occasion of its 50th anniversary of service to the students and citizens of the State of Wyoming; to the Committee on Education and Labor.

By Mr. JONES:

H. Res. 698. A resolution expressing the sense of the House of Representatives that the fatal crash of an MV-22 aircraft on April 8, 2000, in Marana, Arizona, was not a result of aircrew human factors or pilot error; to the Committee on Armed Services.

By Mr. GRAVES (for himself, Mr. LUETKEMEYER, Mrs. EMERSON, Mr. MOORE of Kansas, Ms. JENKINS, and Mr. CLEAVER):

H. Res. 699. A resolution expressing the appreciation of Congress for the service and sacrifice of the members of the 139th Airlift Wing, Air National Guard; to the Committee on Armed Services.

By Mr. LOEBSACK (for himself and Mr. EHLERS):

H. Res. 700. A resolution expressing support for designation of the week beginning on November 9, 2009, as National School Psychology Week; to the Committee on Education and Labor.

By Mr. MORAN of Virginia:

H. Res. 701. A resolution to recognize the Dyke Marsh Wildlife Preserve as a unique and precious ecosystem; to the Committee on Natural Resources.

By Mr. REICHERT:

H. Res. 702. A resolution directing the Comptroller General of the United States to submit reports ensuring the effectiveness of Federal programs and amending the Rules of the House of Representatives to require that certain standing committees of the House hold at least one hearing on each such report that falls within their jurisdiction; to the Committee on Oversight and Government Reform, and in addition to the Committee on Rules, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

MEMORIALS

Under clause 4 of Rule XXII, memorials were presented and referred as follows:

151. The SPEAKER presented a memorial of the Senate of the State of Tennessee, relative to SENATE RESOLUTION NO. 26 urging the President of the United States and the United States Congress to oppose legislation that is detrimental to the rights of workers and is an offense against democratic principles by opposing the Employee Free Choice Act and any of its components in 2009 and in future years; to the Committee on Education and Labor.

152. Also, a memorial of the Senate of the State of Michigan, relative to Senate Resolution No. 43 expressing opposition to the federal rule change to eliminate a health care professional's right to refrain from performing morally-objectionable procedures; to the Committee on Energy and Commerce.

153. Also, a memorial of the Legislature of the State of Minnesota, relative to CHAPTER No. 171 memorializing the President and Congress to repeal the federal legislation of 1863 ordering the removal of Dakota people from Minnesota; and urging the Congress of the United States to repeal United States Statutes at Large, volume 12, page 819, chapter 119, and pages 803-804, chapter 103; to the Committee on Natural Resources.

154. Also, a memorial of the Senate of the State of West Virginia, relative to SENATE RESOLUTION NO. 34 requesting the United States Congress to enact the Education Begins at Home Act; jointly to the Committees on Education and Labor and Armed Services.

H. Res. 689: Mr. ROONEY.

CONGRESSIONAL EARMARKS, LIMITED TAX BENEFITS, OR LIMITED TARIFF BENEFITS

Under clause 9 of rule XXI, lists or statements on congressional earmarks, limited tax benefits, or limited tariff benefits were submitted as follows:

The amendment to be offered by Representative FRANK of Massachusetts, or a designee, to H.R. 3269, the Corporate and Financial Institution Compensation Fairness

Act of 2009, does not contain any congressional earmarks, limited tax benefits, or limited tariff benefits as defined in clause 9 of Rule XXI.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 7 of rule XII, sponsors were deleted from public bills and resolutions as follows:

H.R. 848: Mr. ADLER of New Jersey.

PETITIONS, ETC.

Under clause 1 of Rule XXII,

63. The SPEAKER presented a petition of Mayor and City Commission of the City of Wilton Manors, Florida, relative to RESOLUTION NO. 3415 URGING THE PRESIDENT AND THE UNITED STATES CONGRESS TO ADOPT THE MILITARY READINESS ENHANCEMENT ACT OF 2009 (H.R. 1283), WHICH ELIMINATES THE “DON’T ASK, DON’T TELL” POLICY AND, AMONG OTHER THINGS, ADOPTS A POLICY OF NON-DISCRIMINATION ON THE BASIS OF SEXUAL ORIENTATION WITHIN THE UNITED STATES ARMED FORCES; which was referred to the Committee on Armed Services.

SENATE—Thursday, July 30, 2009

The Senate met at 9:30 a.m. and was called to order by the Honorable KIRSTEN E. GILLIBRAND, a Senator from the State of New York.

PRAYER

The Chaplain, Dr. Barry C. Black, offered the following prayer:

Let us pray.

O Lord of our pilgrim years, the day returns and brings us the round of its concerns and duties.

As our Senators serve You and country, make them aware that their attitudes, words, and actions influence the structure of events and human relationships around our Nation and world. Help these representatives of freedom to master themselves that they may be the servants of others. In these times of strain, keep them from magnifying the slights and stings that are a part of the legislative process. Give them pure hearts and a passion to serve the American people with integrity and honor.

Lord, today, we commit to You all that we have and are to realize Your best for this Nation and world.

We pray in Your strong Name. Amen.

PLEDGE OF ALLEGIANCE

The Honorable KIRSTEN E. GILLIBRAND led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. BYRD).

The bill clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, July 30, 2009.

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable KIRSTEN E. GILLIBRAND, a Senator from the State of New York, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mrs. GILLIBRAND thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The majority leader is recognized.

SCHEDULE

Mr. REID. Madam President, following leader remarks, there will be a period of morning business for an hour. Senators will be permitted to speak for 10 minutes each. Under an agreement reached last night, we are going to turn to the consideration of H.R. 3357, the highway trust fund legislation, among others things. Rollcall votes are expected to occur throughout the day.

The Senate will recess from 2 p.m. to 3 p.m. to allow for a Members-only briefing with Secretary Clinton and Secretary Gates, who both just returned from overseas—the Secretary of State and the Secretary of Defense.

I have not had an opportunity to speak to the Republican leader today, but we will probably have the four votes after the briefing we will have with the two Secretaries. We will stack them, and we should be able to complete all the debate at that time. The legislation has not yet arrived from the House, but I think it will be here in the next half hour or so.

RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, the leadership time is reserved.

MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, there will now be a period of morning business, with Senators permitted to speak for up to 10 minutes each.

Mr. REID. Madam President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. MCCONNELL. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

HEALTH CARE WEEK VIII, DAY IV

Mr. MCCONNELL. Madam President, the American people are making their voices heard in the debate over health care. One of the things they are demanding is that we do something to lower costs. This is why the proponents of a government takeover never fail to mention lowering costs as one of their primary goals. Yet, more and more, Americans are beginning to ask themselves a very simple question: How can more government lead to lower costs?

They look at Medicare, a government-run health care program that's nearly bankrupt, and they don't understand how an even bigger, more complicated government-run health plan won't end up in the same condition—and they certainly don't understand why the administration would propose cutting hundreds of billions of dollars from Medicare to help pay for this massive new government-run plan.

Yet, this is precisely what some are proposing: that we use Medicare as a piggy bank to pay a significant portion of the administration's plan for health care reform. Well, in my view, it's a terrible idea, and on the 44th anniversary of this vital program that roughly 40 million Americans rely on each day, I think it is important to explain why.

Here is how one of the proposed cuts would work. Right now, if a senior citizen on Medicare needs surgery, his or her hospital stay will likely be covered by Medicare. And because health care costs go up each year, Medicare provides for annual increases that ensure that hospitals and other providers are able to keep pace with inflation.

What the administration and some Democrats in Congress are now proposing is that we reduce or even eliminate this annual increase—thus, cutting the amount of money we spend on Medicare, a drastic measure that could have a serious impact on our hospitals and the communities and patients they serve.

It would be one thing if these cuts were being proposed as a way of strengthening Medicare. The simple fact is that Medicare faces significant challenges that must be addressed. When Medicare Part A—the program that pays for hospital stays—was enacted, 44 years ago today, it was projected that in 1990 this program would spend \$9.1 billion on hospital services and related administration. As it turned out, spending in 1990 totaled almost \$67 billion—or more than seven times the original prediction. These exploding costs have taken a toll on the program's bottom line. Today, Medicare is already spending more than it is taking in, and it is expected to be insolvent in just 8 years. Unfortunately, the administration plans to use Medicare cuts in order to fund yet another new government program.

America's seniors don't want politicians in Washington tampering with Medicare to pay for health care reform. They want us to fix it. I get letters almost every day from some of the nearly 700,000 Kentuckians who have Medicare. They are counting on it in the years ahead, and they are worried

about its future. In my view, we have a serious obligation to make sure it's there for them. Unfortunately, the administration's proposal takes the wrong approach.

Just yesterday, the Joint Economic Committee completed a study on the administration's proposed cuts to Medicare. It found that if these cuts were used to restore Medicare rather than to fund a government takeover of health care, the Medicare trust fund's 75-year unfunded liability would be reduced by 15 percent, or more than \$2 trillion, and that it would delay the trust fund's bankruptcy by 2 years. In short, while any savings from a reformed Medicare would strengthen it for a longer period of time were they put back into the current program, this just highlights how important overall reform is to ensuring that Medicare continues to serve our seniors.

This is why I have argued for weeks that any savings from Medicare should be put back into the program. And this is why I have also repeatedly urged the administration and my colleagues in the Senate to move forward on the bipartisan Conrad-Gregg proposal, which would provide a clear pathway for fixing the problems in Medicare and other important entitlement programs. Conrad-Gregg would force us to get debt and spending under control. It is the best way to reform Medicare. It deserves the support of every Member of Congress.

Doctors and hospitals across the country are worried about what these proposed cuts in Medicare would mean for them and their patients. Earlier this year, the Kentucky Hospital Association warned that the kinds of cuts being considered in Washington would seriously impact the services hospitals currently provide to seniors in my State. I would encourage my colleagues to talk to seniors, doctors, and medical professionals in their own States and see what they're saying. My guess is that it's a lot different than what some of the lobbyists and interest groups here in Washington are saying.

Some in Congress seem to be in such a rush to pass just any reform, rather than the right reform, that they are looking everywhere for the money to pay for it—even if it means sticking it to seniors with cuts to Medicare. If there was ever a program that needed to be put on a sounder financial footing it is Medicare. And yet throughout the debate over health care, we don't seem to be focusing our attention on this vital issue. Instead, the same people who are unwilling to make the hard choices that are needed to fix Medicare now want us to trust them to create a new government program that will inevitably suffer from these same problems. It just doesn't add up, and Americans are beginning to realize it.

So on this anniversary, here is my message: Using massive cuts to Medi-

care as a way to pay for more government-run health care isn't the kind of change Americans are looking for. Americans want savings from Medicare to be used to strengthen Medicare, not to create a system that would increase long-term health care costs, force Americans off the insurance they have and like, and lead to a government takeover of health care that has the same fiscal problems that Medicare has.

Forty-four years ago today, President Johnson signed Medicare into law, saying that our Nation would never "refuse the hand of justice to those who have given a lifetime of service and wisdom and labor" to their Nation. Those of us in Congress have a responsibility to fulfill that vow. And the best way to do so is to work together on reforms that address the real problems in our health care system, problems like the ones we see with Medicare.

I have been encouraged, as lawmakers on both sides, and even the President, have acknowledged that the reform proposals we have seen so far are not where they need to be. Strengthening Medicare to make sure it meets the needs of seniors today and in the years to come would be a very good place to start.

Madam President, I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Tennessee.

SOTOMAYOR NOMINATION

Mr. ALEXANDER. Madam President, I have a statement to make about the President's nomination of Judge Sonia Sotomayor to be Associate Justice of the U.S. Supreme Court.

Even though Judge Sotomayor's political and judicial philosophy may be different from mine, especially regarding second amendment rights, I will vote to confirm her because she is well qualified by experience, temperament, character, and intellect to serve as an Associate Justice of the U.S. Supreme Court.

In 2005, I said on this floor that it was wrong for then-Senator Obama and half the Democratic Senators to vote against John Roberts—a superbly qualified nominee—solely because they disagreed with what Senator Obama described as Roberts' "overarching political philosophy" and "his work in the White House and the Solicitor General's Office" that "consistently sided" with "the strong in opposition to the weak." Today, it would be equally wrong for me to vote against Judge Sotomayor solely because she is not "on my side" on some issues.

Courts were never intended to be political bodies composed of judges "on your side" who would reliably tilt your way in controversial cases. Courts are supposed to do just the opposite: decide difficult cases with impartiality.

The oath Judge Sotomayor has taken twice and will take again when she is sworn in as Associate Justice of the Supreme Court says it best:

... I will administer justice without respect to persons, and do equal right to the poor and to the rich and ... I will faithfully and impartially discharge and perform all the duties incumbent upon me ... under the Constitution and laws of the United States.

During her confirmation hearings, Judge Sotomayor expressly rejected then-Senator Obama's view that in a certain percentage of judicial decisions, "the critical ingredient is supplied by what is in a judge's heart ... and [in] the depth and breadth of one's empathy." In answer to a question from Senator KYL, she said in her confirmation hearing:

I can only explain what I think judges should do, which is judges can't rely on what's in their heart. They don't determine the law. Congress makes the laws. The job of a judge is to apply the law. And so it's not the heart that compels conclusions in cases. It's the law. The judge applies the law to the facts before that judge.

Giving broad Senate approval to obviously well-qualified nominees helps to increase the prestige of the Supreme Court and to confirm its impartiality. For that reason, until the last few years, Republican and Democratic Senators, after rigorous inquiries into the fitness of nominees, usually have given those well-qualified nominees an overwhelming vote of approval. For example, no Justice on the Supreme Court that John Roberts joined in 2005 had received more than nine negative votes. Four were confirmed unanimously. All but three Republican Senators voted for Justice Ginsburg, a former general counsel of the American Civil Liberties Union. Every single Democratic Senator voted to confirm Justice Scalia.

In truly extraordinary cases, Senators, of course, reserve the prerogative, as I do, to vote no or even to vote to deny an up-or-down vote.

During the 8 years I was Governor of Tennessee, I appointed about 50 judges. In doing so, I looked for the same qualities Justice Roberts and Judge Sotomayor have demonstrated: intelligence, good character, restraint, respect for law, and respect for those who came before the court. I did not ask one applicant how he or she would rule on abortion or immigration or taxation. I appointed the first female circuit judge in our State and the first African-American court chancellor and the first African-American State supreme court justice. I appointed both Democrats and Republicans. That process served our State well and helped to build respect for the independence and fairness of our judiciary.

In the same way, it is my hope that my vote now will not only help to confirm a well-qualified nominee but will help to return the Senate to the practice only recently lost of inquiring diligently into qualifications of a nominee

and then accepting that elections have consequences, one of which is to confer upon the President of the United States the constitutional right to nominate Justices of the Supreme Court.

Madam President, I ask unanimous consent to have printed in the RECORD my floor remarks in support of Judge John Roberts on September 27, 2005.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

FLOOR REMARKS OF U.S. SENATOR LAMAR ALEXANDER IN SUPPORT OF JUDGE JOHN ROBERTS, SEPTEMBER 27, 2005

My constituents have been asking me: who will President Bush nominate for the second Supreme Court vacancy? And the question reminds me of the kicker from California who went to Alabama to play for Coach Bear Bryant. Day after day in practice, the kicker kept punting it more than 70 yards. Day after day, Bryant never said a word. Finally, the young man went to Bryant. Coach, I came all the way here from California to be coached by you and you never say a word to me. "Son," Bryant said, "When you start kicking it less than 70 yards, I will remind you of what you were doing when you kicked it 70 yards."

My only respectful suggestion to President Bush is that he try to remember what he was thinking when he appointed John Roberts, and to do it again. For anyone who has been trained in the law, as I have, and who knows something about the profession, it has been a pleasure to watch Judge Roberts' nomination and his confirmation process. It is difficult to overstate how good Judge Roberts seems to be. He has the resume of most talented law students' dreams: editor of the Harvard Law Review and clerk to Judge Henry Friendly. I was a law clerk to Judge John Minor Wisdom in New Orleans who regarded Henry Friendly as one of the two or three best appellate judges of the last century. Judge Roberts learned from Judge Friendly. Then he was law clerk to the last Chief Justice. Add to that his work in the Solicitor General's office where only the best of the best are invited to work. Then add his success as an advocate before the Supreme Court both in private and in public practice. Then still further add his demeanor, his modesty both in philosophy and in person—something that is not always so evident in a person of superior intelligence and great accomplishment. And his kindnesses to individuals with whom he has worked. His performance before the Senate Judiciary Committee demonstrated all of those qualities: restraint, good humor, intelligence, and a command of the body of law that a Supreme Court justice must consider. The televised episodes could be the basis for a law school course or any civics class.

Judge Roberts brings, as he repeatedly said, no agenda to the Supreme Court. He understands that he did not write the Constitution, and it's not his job to rewrite it but to interpret it. That he does not make laws, but is obligated to apply them. He understands the federal system.

For a devotee of the law, watching the John Roberts hearings was like watching Michael Jordan play basketball at the University of North Carolina in the early 1980s or Chet Atkins as a session guitarist in the 1950s in Nashville. One doesn't have to be a great student of the law to recognize there is unusual talent here.

So then if Judge Roberts' professional qualifications and temperament are so universally acclaimed why do we now hear so much talk of changing the rules and voting only for those justices who we can be assured are "on our side." That would be the wrong direction for our country. In the first place, history teaches us that those who try to predict how Supreme Court nominees will decide cases are almost always wrong. Felix Frankfurter surprised Franklin Roosevelt. Hugo Black surprised the South. David Souter surprised almost everybody.

In the second place, courts were never intended to be set up as political bodies that could be relied upon to always tilt one way or another in controversial matters. Courts are supposed to do just the opposite: to hear the facts and impartially apply the law and the Constitution in controversial matters. Who will have confidence in a system of justice that is deliberately rigged to be on one side or the other despite what the facts and the law are?

Finally, failing to give overwhelming approval to an obviously well-qualified nominee like Judge Roberts just because he is "not on your side" reduces the prestige of the Court. It jeopardizes its independence. It makes it less effective as it seeks to perform its indispensable role in our constitutional republic.

For these three reasons Republican and Democratic senators, after rigorous hearings and discussions, have traditionally given well-qualified nominees for Supreme Court justice an overwhelming vote of approval. I'm not talking about the ancient past, I'm speaking of justices who are on the Court today, none of whom are better qualified than Judge Roberts.

Justice Breyer—Confirmed by a vote of 87–9 in a Congress composed of 57 Democrats and 43 Republicans.

Justice Ginsburg—Confirmed by a vote of 96–3 in that same Congress.

Justice Souter—Confirmed by a vote of 90–9 in a Congress composed of 55 Democrats and 45 Republicans.

Justice Kennedy—Confirmed by a vote of 97–0 in a Congress composed of 55 Democrats and 45 Republicans.

Justice Scalia—Confirmed by a vote of 98–0 in a Congress composed of 47 Democrats and 53 Republicans.

Justice O'Connor—Confirmed by a vote of 99–0 in a Congress composed of 46 Democrats and 53 Republicans.

Justice Stevens—Confirmed by a vote of 98–0 in a Congress composed of 61 Democrats and 37 Republicans.

The only close vote on this Court was for the nomination of Justice Thomas following questions of alleged misconduct by the nominee. Thomas was confirmed by a vote of 52–48. However, even in that vote, 11 Democrats crossed the aisle to support the nominee.

If almost all Republican senators can vote for Justice Ginsburg, a former General Counsel for the American Civil Liberties Union, and a nominee who declined to answer numerous questions so as not to jeopardize the independence of the court on cases that might come before her, and if every single Democratic U.S. senator could vote for Justice Scalia—then why can't virtually every senator in this chamber vote to confirm Judge Roberts?

I was governor for eight years in Tennessee. I appointed about fifty judges. I looked for the same qualities Judge Roberts has demonstrated: intelligence, good character, restraint, respect for the law, and respect for those who came before the court. I

did not ask one applicant how he or she would rule on abortion or immigration or taxation. I appointed the first woman circuit judge, as well as men. I appointed Tennessee's first African American chancellor and the first African American state Supreme Court justice. I appointed Republicans and Democrats. That process served our state well and helped build respect for the independence and fairness of our judiciary. I would hope we would try to do the same as we consider this nomination for the United States Supreme Court.

It is unlikely in our lifetimes, that we will see a nominee for the Supreme Court whose professional accomplishments, demeanor and intelligence is superior to that of John Roberts. If that is so, then I would hope that my colleagues on both sides of the aisle will do what they did with all but one member of the current Supreme Court, and with most of the previous justices in our history, and vote to confirm him by an overwhelming majority.

Mr. ALEXANDER. Madam President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Ms. KLOBUCHAR. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Ms. KLOBUCHAR. Madam President, I ask to speak as in morning business.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

HEALTH CARE REFORM

Ms. KLOBUCHAR. Madam President, health care reform is a very personal matter for me and a personal matter for so many people in my State. I first got interested in this issue, as I think many of us did, after something happened to me when my daughter was born. When she was born, she was very sick. She could not swallow. Back then, insurance companies had a rule that new moms and their babies were kicked out after 24 hours. After she had been in intensive care, I was kicked out of the hospital after 24 hours. As my husband wheeled me out in a wheelchair, I remember thinking: This wouldn't have happened to the wife of the head of the insurance company, but it happened to me.

I went to the legislature, along with a lot of other mothers, and said we have to change this to at least guarantee new moms and their babies a 48-hour hospital stay. Minnesota was one of the first States in the country to adopt that rule, which later, under President Bill Clinton, became national policy.

I remember going to the legislature and standing there at the conference committee, and some of the insurance companies were there trying to make sure the implementation of this 48-

hour rule was delayed. I decided to take all the pregnant women I knew to the conference committee. We outnumbered the lobbyists two to one. So when the legislators said, When should this new bill take effect which guarantees new moms and babies 48 hours, all the pregnant moms said, "Now." And that is what happened. That is my experience, and that is how I got involved in this issue.

As I have traveled our State, I have heard from Minnesotans about the importance of doing something about health care. They want cost-effective health care. We have one of the best health care systems in the country. The President has lauded Minnesota. We know it is good. We have something like 93 percent coverage, and it tends to be run a lot more efficiently.

But still there are people in my State, as there are all over the country, who are saying: We can't have the status quo because we know our premiums are going up and up. Maybe we can afford it this year, but we are not going to be able to afford it next year; or, if I lose my job, I am not going to have health care tomorrow.

That is what the people in my State are saying. I heard from Dawn in Staples, MN, who is struggling to afford the prescription drugs necessary to treat her multiple sclerosis, and John in Oakdale, MN, who has insurance for his wife and three sons but ends up paying thousands of dollars in deductibles and coinsurance if one of his boys gets sick.

Meanwhile, a new study by the White House Council of Economic Advisers found that small businesses pay up to more than 18 percent—18 percent more—to provide health insurance for their employees, often forcing these businesses to lay off employees or cut back on their coverage.

I was up in Two Harbors, MN, about a month ago visiting a little backpack company that has done amazing things. They are actually making some of the backpacks now for our troops in Iraq and Afghanistan. They said that their health care premiums now are something like \$20,000 for a family of four—small businesses paying that much, for one family, for health care insurance. It cannot go on.

I was down in southern Minnesota in the southeastern corner of our State and met with one of the clinic heads there, someone who heads up one of the hospitals in Wisconsin and Minnesota. He said they had three emergency appendectomies in just a 2-week time period and they should not have happened at that point, they should have been caught earlier. When they talked with the three people who showed up for the emergency appendectomies, they said: Why are you here? Two said: We are in small businesses, and we thought if we came in too early—we thought we could just get over this be-

cause we were afraid what it would do to the premiums. The third person who had the emergency appendectomy said: I just don't have the money to pay for this.

That is what we are hearing all over our State, in a State that tends to have one of the best health care systems in the country.

The American people know inaction is not an option. If we do not act, costs will continue to skyrocket and 14,000 Americans will continue to lose health insurance every single day. That is the status quo. We must not waiver in our efforts to enact a uniquely American solution to our Nation's health care problems. We must keep what works and fix what is broken. We must also level the playing field between consumers and insurance companies, preserve choice, expand access, and provide safeguards so that people do not lose their coverage if they lose or change their jobs, have preexisting medical conditions, or simply grow older.

As we prepare to take up landmark health reform legislation, many in Washington are looking to Minnesota as a national leader. In Minnesota, we have developed a health care system that rewards quality, not quantity. It promotes coordinated, integrated care, and it focuses on prevention and disease management and controls costs. That is why we tend to have healthier people in our State. That is why we tend to have more people covered. That is why we tend to have more quality health care, because we focus on the system as a whole.

Congressional Budget Office Director Doug Elmendorf recently testified before the Senate Budget Committee that to truly contain health care spending, Congress must change the way Medicare pays providers in an effort to encourage cost-effectiveness in health care.

I couldn't agree more. Shifting to a value-based system is critical to controlling health care costs. Because you know what—and people would be shocked by this—when you look at States that have some of the highest quality, they tend to have some of the lowest costs, and States that have the highest costs tend to have the lowest quality care. That is messed up.

Most health care is purchased on a fee-for-service basis, so more tests and more surgeries—if not done appropriately, with the patient in mind—can mean more money; quantity, not quality, pays. According to researchers at Dartmouth Medical School, nearly \$700 billion per year is spent on unnecessary or ineffective health care. That is 30 percent of total health care spending.

To rein in costs we need to have all health care providers aiming for high-quality, cost-effective results, as they do in Minnesota. That is why I have introduced legislation, along with Sen-

ator MARTINEZ, that would create a value index as part of a formula used to determine Medicare's fee schedule. This indexing will help reduce unnecessary procedures because those who produce more volume will need to also improve care or the increased volume will negatively impact fees.

To correct myself, that legislation was actually introduced with Senator GREGG, and Senator MARTINEZ and I have introduced a bill to focus on Medicare fraud.

Linking rewards to the outcomes for the entire payment area creates the incentive for physicians and hospitals to work together to improve quality and efficiency. In too many places patients must struggle against a fragmented delivery system where providers duplicate services and sometimes work at cross-purposes.

We must also look at other areas where we can help reduce inefficient health care spending because, in the end, this is about focusing on quality care and getting that care to the patients who need it. It is focusing on the patients instead of all the insurance providers and all the other people who feed off the system. It is focusing on what works best for the patients. Recent studies show if all the hospitals in the country followed the protocol the Mayo Clinic uses in the last 4 years of a chronically ill patient's life—lives where the quality index is incredibly high—I think most people in this country and their families would love to have that kind of health care. If we used the model the Mayo Clinic uses, we would save \$50 billion every 5 years in Medicare spending. That money can be used to bring more people into the system. That money can be used to make health care more affordable for the people of this country.

That is what we are talking about when we talk about health care reform. The bill we have on Medicare costs and Medicare fraud—the bill I have with Senator MARTINEZ—would require direct depositing of all payments to providers under Medicare and Medicaid so they are not ripping off the system or scamming the system; that it is going to the people who need it. The bill has been endorsed by the AARP, the National Association of District Attorneys, and the Credit Union National Association. Representative PATRICK MURPHY is carrying the legislation in the House.

It is no small task, but we must reform America's health system. I strongly believe in reaching this goal to reform, making sure we don't have the status quo, where it is becoming harder and harder and harder for people in this country to afford health care. We need a system that depends on rewarding and controlling costs, that rewards quality and stopping fraud and making the system work for the people of this country.

For the sake of our fiscal health and for the sake of the millions of Americans struggling to afford the care they need, enacting effective health care reform in this country is essential. We know it is not easy and it will not happen overnight. It is 17 percent of this economy. But we also know that doing nothing and saying no to everything and calling things names, when we are effectively trying to find a solution, is the wrong way to go.

I hope my colleagues in the Senate will start working on this bill constructively so we can get something done for the people of this country.

I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Illinois.

Mr. DURBIN. Madam President, I see the Senator from Nevada is on the floor, and I would like to ask, before I seek recognition here—I would be happy to yield the floor to the Senator, with the understanding that I would follow him, if the Senator from Nevada would give me an indication of how long he might be speaking.

Mr. ENSIGN. At the most, 10 minutes.

Mr. DURBIN. Madam President, I ask unanimous consent, following the morning business statement of the Senator from Nevada, that I be recognized.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. The Senator from Nevada.

HEALTH CARE REFORM

Mr. ENSIGN. Madam President, I thank the assistant leader from the Democratic side, the Senator from Illinois, for that courtesy.

I rise today to talk about health care reform. It is critical in our system that we address the issue of cost. We have the finest quality health care system in the world, but it is too expensive for too many Americans, and because of that, many Americans are uninsured. Not only are too many Americans uninsured, for a lot of folks who have insurance, especially those who receive insurance through their employer, they probably haven't received the kind of raises they would have otherwise received simply because employers are paying more and more for their employees' health insurance and there isn't money left over to provide higher wages.

It is critical for many reasons that we address the cost issue. We spend about \$2 trillion a year in the United States on health care. Some people say we need to spend more, but I disagree with that. I actually think we spend plenty of money in the United States on health care, we just don't spend it in the right ways. We need to eliminate waste and the bureaucratic spending of our health care dollars and get that money to the patients.

There are five different committees between the House and the Senate that are working on health care reform proposals—three in the House, two in the Senate. Let me quickly address the HELP Committee bill, which is one of the committees in the Senate that has passed a bill. The HELP bill was passed on a straight party line vote. I think the reasons for that, which I will point out, are the flaws that are in that bill.

First of all, the bill is not paid for. Second of all, it is too expensive and it doesn't cover enough people, especially for the money it spends. Two hundred times in the bill the Secretary of Health and Human Services is given new powers to establish programs, parameters, appropriate moneys, and otherwise dictates the course of one-sixth of our economy—200 different times. The HELP bill is around 600 pages. If each one of those times where it detailed or gave powers to the Secretary of Health and Human Services—if that was actually written in bill form at that point, the bill would probably have been about 5,000 pages. That is how incredibly complex our health care system is and how even more complex some people are trying to make it.

This bill creates 50 new offices, bureaus, commissions, programs, and bureaucracies, with 87 new government programs created in the Community Transformation Grants Program alone. The Democrats rejected by party-line vote, an amendment that would have prevented the bill from spending funds on sidewalks, parks, bike paths, and street lights. We all like those kinds of things. I actually ride bikes. I like to see bike paths and things such as that. But certainly there is not a place for that in the health care reform bill that we are trying to work out before the Senate and the House of Representatives.

Furthermore, the final cost of the bill has not been released. I serve on the Finance Committee, and there is a group of bipartisan Senators trying to work together to come up with an agreement. They have not been able to do that, and the big reason for that is they are trying to finalize the details. The details are extraordinarily challenging because of how complex our health care system is today.

That is why we need to take our time and get it right. You don't mess with one-sixth of the economy of the United States and get it wrong. There are no do-overs when it comes to health care reform. If we mess it up, we literally can mess up our country. We can mess up the economy of our country and potentially threaten the very existence of our system of government because we can bankrupt our country.

We all know Medicare and Medicaid are threatening to bankrupt our system of government as it stands today. All that the HELP Committee bill and the other that have been introduced

bills do so far, is accelerate how fast Medicare and Medicaid can bring economic collapse to the United States.

I am working on other proposals. There are examples out there where things are being done right in the health care system. I have told this story to my colleagues many times. Safeway is a company that saw their health care costs skyrocketing year after year. With 200,000 employees, they were spending about \$1 billion a year on health care expenses, with costs increasing every year. When a company is only making \$200 million to \$300 million a year, and their costs are going up 20 percent a year, you can see the writing on the wall. They were going to bankrupt their company with health care costs alone.

Safeway set out on a new course and focused on four areas. They incentivized their employees through lower premiums, if they didn't smoke or they would quit smoking, they provided smoke cessation products. They focused on the area of obesity with weight management. If employees were in the proper body mass index or if they lost weight, they would give them a lower health care premium. They also focused on cholesterol and hypertension. They didn't penalize employees for having high cholesterol, but they rewarded them for keeping their cholesterol under control and they rewarded them for keeping their blood pressure under control.

Rewarding healthy choices actually works. Safeway is a very good example. What happened to Safeway in the last 4 years, compared to the rest of the United States, is that Safeway has been able to lower their health care costs by 40 percent.

Unfortunately, the Congressional Budget Office, which is the official scorekeeper around here and determines how much money is going to be saved, does not have a model that works with something like the Safeway program. CBO's economic models don't work that way. The bean counters around here, unfortunately, don't know how to put that in application for the rest of the country. That is unfortunate because I believe, if we used some of the same modeling Safeway did for the rest of the country, we could save huge amounts of money in our health care system.

We don't have to save 40 percent, such as Safeway did. Maybe we could save 10 percent. Actually, if we don't save anything, and just freeze the rate of growth, we would be so far ahead in money that we would have plenty left over to cover the uninsured. As I said, unfortunately, the Congressional Budget Office doesn't say a model like Safeway's will save money. It is ludicrous, though, to believe that having people quit smoking and rewarding them for proper weight management wouldn't save money. I think we need

to change the economic models we have around here.

Not only would that save money, but it would also lead to higher quality lives. Obesity is an epidemic in the United States. Type II diabetes is rampant. Most Type II diabetics can actually reverse, or at least control their diabetes through diet and exercise. We need to encourage healthier behaviors in the United States. Instead of just having a sick care system, let's actually create a true health care system in the United States.

Another thing we need to do, I believe very strongly—and this is a role for the government—we need to provide transparency on cost and quality so individuals can shop. In the bay area, a colonoscopy can cost anywhere from \$800 to \$8,000. Well, if the government were to provide cost and quality measurement information across the United States, people could set up plans and they could see what the various costs are. Let's say that between the \$800 and the \$8,000, they might decide to pay \$1,200. And then if they want the more expensive one, they have to pay the difference. If they want the less expensive one, they can get the difference. That will cause people to comparison shop and they will have the information based on cost and quality of outcomes to be able to make smart medical decisions.

The one thing we don't want to do is put a bureaucrat between the doctor and the patient making those sorts of decisions. There is a precious relationship between a doctor and a patient, and we don't want the government making those kinds of decisions. I don't want to see a government-run plan that says, you know what, we are going to have rationing. That is how so many other countries around the world control their costs. They actually ration care, or there is delayed care. We have better outcomes in the United States on cancer, on cardiovascular disease, and in so many other areas than Canada, Great Britain, and other places that have government-run health care plans.

I think it is critical we get together as Republicans and Democrats—as Americans—and come up with a health care system that is lower in cost and even better in quality than we have today. The bills before some of the committees out there are not going to achieve that.

I have done several telephone town-hall meetings in the last couple of weeks. We have called almost 200 thousand Nevadans now and talked to many of them. They answered questions. We have gotten their feedback. The one thing that seems not quite unanimous, but from the calls we are receiving it is overwhelming, is that is people do not want a government plan. They do not want a government bureaucrat rationing their health care.

Whatever plan we come up with should not include a government-run health care plan. I feel strongly about that. I think as more and more of the American people find out what the effects of a government-run plan will be, we will see a lot more opposition coming from them.

I appreciate the Senator from Illinois allowing me to go first. Let's get together as Americans and do the right thing on health care. Let's join as Republicans, Democrats, and Independents across this country and have a health care system that has lower costs and better quality.

I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Illinois is recognized.

ORDER OF PROCEDURE—H.R. 3357

Mr. DURBIN. Madam President, on behalf of the majority leader and under the authority of the order of July 29 and after consulting with the Republican leader, I now ask that after the conclusion of my remarks, the Senate proceed to H.R. 3357 under the provisions of the July 29 order.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. DURBIN. Madam President, I ask unanimous consent to speak as in morning business.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

HEALTH CARE REFORM

Mr. DURBIN. Madam President, the Senator from Nevada has just expressed his views on health care, and I would perhaps like to give a little different view on where we are and where we should go. We are wrapping up this end-of-July session. We will be taking a recess for a few weeks. It is one of the few chances during the year for us to be back home, get a little time with our families before school starts. We are all looking forward to it, as everyone does each year. But we have had important work we have done this year, and more important work is to follow.

This year we hope to take up before the end of the year, and pass, health care reform for America. The House of Representatives is moving a bill, a matter that will be considered in September by the House. We are counting on the Finance Committee to work with us to develop a bill for consideration on the floor of the Senate about the same period of time.

These bills and the concepts they contain are going to be there throughout the month of August for everyone to take a close look at and review. This is not going to be done in haste because it is too important. It is going to be

there, and the critics will have a chance to look at it, people will be able to come up with suggestions—constructive suggestions, I hope—that will lead us to the passage of health care reform in this country.

I listened earlier to my colleague and friend from Nevada, Senator ENSIGN, talk about government-run health care. In my hometown of Springfield, IL, a doctor wrote a letter to the editor warning us about government-run health care. I would like to put it in perspective.

There are about 300 million people living in our great Nation. Of those 300 million people, 45 million of them are currently covered by Medicare. Medicare, for seniors and disabled people in America, is a government-run health care plan. For many of these people it is the first health insurance plan they have ever been covered by.

A realtor in southern Illinois came up to me, a woman 63 years old. She said: Senator I want you to meet somebody who has never had health insurance protection one day of her life. I never could afford it. I was a realtor. I didn't have enough money. Knock on wood, lucky for me, I have been pretty healthy. I didn't need it. I was able to pay my medical bills. But, she said, thank God in 2 years I will be under Medicare so the savings I put aside for my retirement are not going to be wiped out by one illness or one surgery. I will have Medicare.

She will join the ranks of 45 million people on a government health insurance plan called Medicare that we have had for 45 years in America and is wildly popular. Not one single critic on the other side of the aisle who stands up and shakes their fist and rails against government health care has said eliminate Medicare. Of course they would not. That is not a position the American people are going to support.

Some people are a little confused though. One of my colleagues went back home over the weekend and somebody said: Senator, listen; whatever you do, don't let the government start meddling in my Medicare plan.

He said: Pardon me, ma'am, but the government runs your Medicare plan.

She didn't understand that. Some people don't, but that is a fact.

So there are 45 million people under Medicare. There are another 65 million Americans, maybe as high as 70 million, who are covered by Medicaid. Medicaid is the health insurance plan for the poorest people in America. We said: If you are poor in America, you are still going to get health care, and we are going to provide it, working with the States. So more than one-third of the people who live in America today are covered by government health insurance.

I have never heard a person on the other side of the aisle say eliminate Medicaid. They don't. They understand

we are a caring, compassionate country, and we are going to provide this health insurance coverage, as we have for decades, as we should.

Here we have one-third of America currently under a government health plan, and on the other side of the aisle people are waving their fists saying: Whatever you do, don't have a government health plan.

It does not work. It is inconsistent. Many people say: I like my health insurance right now. I don't want to change. I don't want to go into Medicare or Medicaid. I like what I have. Would you please leave people alone.

The answer is yes. In fact, we guarantee it. We are going to put in any legislation considered by the House and Senate the protection of you, as an individual, to keep the health insurance you have, if that is what you want. What we are trying to create are voluntary choices and opportunities. These are critically important because, let's face it, the cost of health care is going out of sight. We know it. We sense it.

Some people say: Senator, easy for you to say, you have that famous Senator health care plan.

We have heard all about that one. Let me set the record straight. Members of Congress, if they choose—and I have chosen on behalf of my family—can sign up for the Federal Employees Health Benefits Plan. It is not a special program for Senators or Congressmen. We sign up for the same program that covers Federal employees across the United States, 8 million Federal employees and their families. It is a great program. That is why I signed up for it for my wife and myself.

Open enrollment is once every year. How about that. We get to go shopping once every year for the best health insurance for our families.

What do we choose from? In my case, in Illinois, nine different private health insurance plans. We pick the one best for our families. If we want a lot of coverage, they take more out of our paychecks; less coverage, less out of our paychecks. But it is a voluntary choice, and I think that is what the bottom line should be for Americans.

We are trying to move toward that model, create pools of people similar to Federal employees so they can bargain with the private insurance companies, have good coverage at a reasonable cost. We want to build into this as well health insurance reform. What good is it to have a health insurance plan that says they offer coverage for everything except our sickness? That happens. People who may have turned in a claim last year for an aching back can find this year it is a preexisting condition; it is not covered.

People who, 2 or 3 years ago, may have survived prostate cancer or breast cancer may find no coverage for cancer illness in the future. That is unaccept-

able. That is not really health insurance. Health insurance isn't worth much if it is not going to cover your illness.

So we say as part of health care reform they can no longer exclude people for preexisting conditions. They can no longer exclude people who live in certain parts of the country over those who live in other parts of the country. They cannot discriminate based on age or geography except within certain limitations. This gets health insurance to where it ought to be, not a game where the health insurance companies try to pick and choose the healthiest people in America and push everybody else over the cliff.

We want everybody under the tent. We want folks to understand if they buy health insurance in America, it really will protect them.

I was interviewed this morning on WMAY, a station in my hometown. Jim Leach asked me a question: Senator, if you don't allow insurance companies to discriminate against people with previous conditions, won't all our premiums go up?

The honest answer is, if everybody has health insurance in America, premiums can go down. We are not just paying for our care, we are paying for the care of the uninsured. Uninsured people in America are not going to die on the street, thank God. They are going to show up in an emergency room and they are going to be cared for. When they can't pay their bills, that hospital, that doctor, will pass their medical charges through the system on to those of us who are paying for health insurance.

So if we bring everybody in with health insurance protection, this cost transfer is not going to happen. It is going to reduce the upward push for health insurance premiums in our country.

Second, if we don't have basic rules about health insurance as to what they will cover, hold on tight. We found out in Illinois not too long ago there were actually health insurance companies—I remember this, as a person working in the Illinois General Assembly—there were actually health insurance companies that were selling maternity coverage to new mothers and their children but excluding the newborn baby for the first 30 days of life. Do you know why? Because if you have a premature infant or an infant with a real problem, those first 30 days of medical care can be very expensive. So they just wrote it out of the policy.

We said no way. As a matter of policy in Illinois, if they want to sell health insurance to cover a family or maternity benefits or cover children, they do it from the moment that child is born. We put it in the law.

We can argue that is going to raise the cost of insurance. Maybe it did. But if health insurance is not there when

we need it, frankly, it is not worth the cost. That is why we are doing this health care reform.

There is one other aspect I want to mention, and that is small business. I guess small businesspeople know better than any other group what is happening because these businesses are struggling to survive in a recession. The men and women who own these businesses in good conscience are trying to provide for their employees. Yesterday we had a gentleman from Aberdeen, MD, who came to speak at a press conference. He owns a moving and storage company. His last name is Derbyshire. Mr. Derbyshire inherited this business from his father. He brought his son Garrett with him in the hopes his son would carry it on, I am sure. He always felt a special kinship and connection with his employees. He wants them to do good work and he wants them to be loyal and he wants them to know they are appreciated. So Mr. Derbyshire pays, as an employer, 85 percent of each individual employee's health care premiums—85 percent, and 75 percent of the family's. That is pretty good. I give him an A+ for caring and trying. But he told us he can't keep up with it. Health insurance premiums are going up so fast he doesn't know how long he can do it.

I heard the same thing again. I heard it from the man who owns Starbucks—which, incidentally, offers health insurance to its employees—who told us not that long ago: We want Congress to do this. We think it is the right thing to do, even for part-time employees. But if the costs keep going up we will not be able to continue.

That is the reality small businesses face. When we take a look at what they are facing, last year, only 49 percent of small businesses, three to nine workers, offered health insurance; 78 percent of businesses with 10 to 24 workers offered some type of health insurance. In contrast, 99 percent of businesses with more than 200 employees offer health insurance. It shows if you are operating close to the margin in a small business, and a little added expense pushes you over the edge, one of the first casualties is health insurance protection. It means, incidentally, the employees have no protection. It also means the openers of the business have to go out on the private market.

What happens when they go out on the private market? For small businesses, their choices are limited. The overhead costs, administrative costs are dramatically higher than they are for the larger companies, and many of them cannot afford to do it.

What we are trying to do is offer, through health care reform, a way for every person working, for a business, large and small, to have health insurance. Look at the uninsured people in America and we are going to find that

most of them are not the poorest people in our country. They have Medicaid. Of course, they are not the luckiest people in the world like myself and other families who already have health insurance. They are smack dab in the middle. They are the people working for small businesses, and their children and they are the ones who are uninsured.

If we are going to fill the gaps in America and provide for coverage, that is the way we have to go. What are our goals? Our goals are simply stated. We want to have health care reform which helps the middle class in America. We want to make sure at the end of the day we have stable costs so people know what they can anticipate, so the costs will not run them out of health insurance coverage even if they lose a job. We want to provide a helping hand, for example, to lower income people so they can buy health insurance, giving them a tax break and giving them an incentive. We want to provide incentives and opportunities for businesses so they have the right to shop for the right health insurance coverage. We want to make sure they have stable coverage so these health insurance companies cannot waive the magic wand and all of a sudden they are not covered by health insurance anymore.

Stable costs, stable coverage, and make sure at the end of the day we have quality care available for all Americans.

One element we should be rewarding that the current system does not reward is preventive care.

There are a lot of things we can do to reduce the cost of health care in America and improve the health of individuals and families. We need to create incentives for that to happen. There are ways to do that.

Steve Burd is the CEO of Safeway and of Dominick's. He has a plan for his management employees where they can voluntarily sign up. They go through a health screening, they identify any risk that person might have: being overweight or diabetic or high blood pressure, high cholesterol, things of that nature, smoking. Then they create a little profile and say: What we would like you to do is move toward more fitness, better diet, monitoring your diabetes, monitoring your cholesterol and your blood pressure.

As they show improvement, they earn cash incentives. In other words, they pay them extra money if they get healthier. What has happened to the health insurance costs at Safeway in the last 3 years? It has been flat. It has not increased. Across the board in other companies across America on average it is has gone up 38 percent. So they are on to something.

By incentivizing employees to get healthier, they not only have better lives but better health outcomes and lower costs for their company. Why is

that not a national model? Why are we not doing that across the board saying we are going to move toward a healthier country so we have fewer health care costs?

Second, we have to eliminate the incentives for piling on medical bills. Ever had a member of your family go to the hospital for a day or two or a week, then a month later they send you the bill? Were you amazed at how thick it was? You turn it page after page and say: My goodness, thank goodness I have health insurance—if you do.

But if you do not, you look at the bottom line and say: I do not know how I am going to pay for these things. We reward doctors and hospitals for piling on every single line on the page. Every single line is a profitmaker, instead of saying the real goal is wellness and making certain people get well from diseases and illnesses. So we need to create a new incentive in the way we have health care in America, to take the best and brightest women and men who serve as our medical professionals working at these hospitals and give them the incentive for the best outcome.

Senator KLOBUCHAR from Minnesota was here a few moments ago, and she talked about the Mayo Clinic for which I have the highest regard and highest respect. This is a clinic which gets some of the best results in medicine in America at the lowest cost. How do they do it? What is so miraculous or magic up there in Rochester, MN?

Well, they pay their physicians a salary. The physician does not make an extra buck if he orders an extra test. The physician, instead, looks at that patient and says: I think we need three specialists in this room right now, and let's see if we can work out a plan for wellness. They come together and they work it out. It is not a matter of how many lines there are on a page and final billing. It is a matter of that person going home well, and it works. They have reduced cost, and it happens across America. We have seen it many places such as the Cleveland Clinic, and so many other places have been noted as examples of centers of excellence. That is what I want to see in my State of Illinois. That is what every State and every Senator should be working for.

I will close by saying, let's not fall into the trap of this health care reform debate and let the buzzwords and the words that infuriate people stop us from a meaningful, honest debate. This has to be patient-centered health care not government-centered health care.

We are not talking about rationing. We are talking about a rational health care system that is geared toward wellness and disease prevention. We have to make certain that at the end of the day we allow people to choose their own doctors and their own hospitals

and their own health insurance plans and to keep the health insurance plan they have if they want to.

We have to help small business provide the kind of health insurance coverage they want to have for themselves as owners and for their employees as well. At the end of the day, we can improve this system. It is the biggest single issue challenge Congress has faced in at least 40 years, maybe in a much longer period of time, because it affects every single person in this country.

We can do it. With the President's leadership and his commitment, we can get this right.

I yield the floor, and I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. BEGICH). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mrs. BOXER. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

HIGHWAY TRUST FUND RESTORATION

The PRESIDING OFFICER. Under the previous order, the Senate will proceed to the consideration of H.R. 3357, which the clerk will report.

The legislative clerk read as follows:

A bill (H.R. 3357) to restore sums to the Highway Trust Fund, and for other purposes.

AMENDMENT NO. 1907, AS MODIFIED

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. VITTER. Mr. President, I call up my amendment and ask that it be modified with the changes at the desk.

The PRESIDING OFFICER. The clerk will report the amendment, as modified.

The legislative clerk read as follows:

The Senator from Louisiana [Mr. VITTER] proposes an amendment numbered 1907, as modified.

The amendment, as modified, is as follows:

(Purpose: To temporarily protect the solvency of the Highway Trust Fund)

Strike section 1 and insert the following:

SECTION 1. TEMPORARY PROTECTION OF HIGHWAY TRUST FUND SOLVENCY.

Notwithstanding section 5 of the American Recovery and Reinvestment Act of 2009 (Pub. Law 111-5), from the amounts appropriated or made available and remaining unobligated under such Act, the Director of the Office of Management and Budget shall transfer \$7,000,000,000 to the Highway Trust Fund. The Director of the Office of Management and Budget shall report to each congressional committee the amounts so transferred within the jurisdiction of such committee. The amounts so transferred shall remain available without fiscal year limitation.

Mr. VITTER. Mr. President, I urge all colleagues to come together, as the American people surely want us to do, and adopt this amendment. I truly believe this amendment is the responsible way to address the shortfall in the highway trust fund.

This amendment funds the highway trust fund shortfall by using money from the already-passed stimulus bill. That is important because otherwise we are racking up yet more deficit and more debt on top of the mountains of debt we have already accumulated to pass on to our children and grandchildren. This is important so that, yes, needed highway work can be done, particularly needed work in the midst of a recession, but it can be done without racking up yet more debt to weigh down the economy and burden our children and grandchildren.

I wish to make two central points about this idea and why this amendment is necessary. First, the level of debt we are accumulating is truly staggering. It is beyond our ability to get our hands around. This year alone, the deficit has surpassed \$1 trillion. This year's deficit spending has gone beyond \$1 trillion. By the way, we are not finished this year. It continues to grow. This year, we have racked up over \$1.8 trillion of new debt because there is the \$1 trillion in the normal year's spending plus the huge stimulus bill of \$800 billion. In terms of racking up new debt to put on the backs of our children and grandchildren, there is \$1.8 trillion of new debt this year. That is way beyond anything we have experienced in our lifetime. Just the trillion dollars of deficit spending rivals the sort of numbers we used to talk about not so long ago for the entire Federal budget.

But, unfortunately, it gets worse. It gets significantly worse because this Congress, over my objection, passed President Obama's budget, and that budget takes those mountains of debt I just described—at already sky-high historic levels—and what does it do? Does it work it down? No. It doubles that level of debt in 5 years. It more than triples that level of debt in 10 years. That is the path we are on, and that is the legacy we are handing to our children and grandchildren. That is simply completely irresponsible. To have this mountain of debt already accumulated this year, at historically high levels—\$1.8 trillion accumulated this year alone, and it is growing—and then to have a budget plan that doubles that in 5 years and triples it in 10 years is inexcusable. In that 5-year period, this President will have racked up more debt than every predecessor President before him combined. We need to get off that path, and the American people know it.

The American people understand, through their common sense, that this is a recipe for disaster. All of us as par-

ents want to hand our kids a better world, a world of more opportunity, a better future than even we had handed to us from our parents. Yet we are on a path to do exactly the opposite and hand our kids an enormous burden, hand them a tomorrow full of clouds and uncertainty, particularly dominated by this threat—central fundamental economic threat—of deficit and debt. We cannot accept that. Yet here we are on the floor with the other side proposing to fund the highway trust fund with—guess what—more debt, more borrowing, more borrowing by the government from whoever buys our debt, including wonderful allies around the world like the Communist Chinese Government.

We need to get off this path, and this is one important step in doing that, saying: Yes, we will continue vital highway programs, but we will do it by taking from the already-appropriated stimulus funds. That is appropriate money that is already appropriated through the process. We will not do it by borrowing yet more money.

The other side has fancy arguments about: Well, this is really taking back a loan we sent the general fund 8 years ago. Let's make no mistake about it, that money is long gone. This is racking up more debt, purely and simply. For that very reason—because it is racking up more debt, because it increases outlays in this fiscal year—it has a budget point of order against it, which I will raise before our final vote. So if you need any further proof that the underlying bill requires borrowing yet more money, racking up yet more debt, it is nailed down by the fact that there is a budget point of order against the underlying bill, which I will raise.

The second critical reason we should adopt the Vitter amendment and fund highway projects from stimulus money and not rack up yet more debt goes to the nature of the stimulus and the attempt which has been very slow and very faltering of using those stimulus dollars to help revive the economy. Of course, that was the whole argument behind the stimulus: We are in a severe recession. We need to do something. We need to get spending and economic activity out the door. We need to hold down unemployment. That was the whole argument. From the very beginning, I did not think that would be the result. That is why I voted against the stimulus, both because of the nature of the spending—it is a lot of big government programs, not a lot of true shovel-ready infrastructure spending—and because of the timing of the spending. I thought from the very beginning that relatively few dollars would go out the door immediately and a lot of the stimulus money would not be spent for years. Well, unfortunately, all of that is coming true. Again, if you look at the nature of the spending in the stimulus and the timing of it, it leaves a lot to be desired.

I think all of us in this body, and Americans across the country, favored infrastructure spending as the centerpiece of the stimulus. Yes, let's do real, concrete, shovel-ready projects. Let's build roads and highways and bridges as the best example of a true, concrete, shovel-ready infrastructure project. I certainly strongly supported that element of spending as a way—not the only way but as a way—to help revive our economy.

Unfortunately, that type of project was never a major part of the stimulus bill as passed. In fact, if you take all of the roads and highways and bridges, all of that construction in the entire stimulus, how much of the bill do you think it is? Fifty percent? Certainly not. Thirty percent? Keep going down. Twenty percent? No. Ten percent? Try 3.5 percent. Mr. President, 3.5 percent of the entire stimulus focused on what the American people thought really could be spent to help stimulate the economy: shovel-ready infrastructure projects on roads and highways and bridges.

My amendment is a way to increase that part of the stimulus that goes to that project to increase highway funding through the stimulus, which I think there was a very broad consensus to do from the beginning, but it never got done in the stimulus.

The second big problem with the stimulus is the timing of that money. It has gone out the door very slowly. Of the entire \$800 billion stimulus bill, which was supposed to be immediate relief for the economy—let's start turning the corner on this recession immediately passing that bill—today, months later, a half a year later, 10 percent has gone out the door. Only 10 percent has been spent. That is ludicrous.

Of that tiny slice that was roads and highways and bridges—the 3.5 percent—guess how much of that money has gotten spent. Mr. President, 1 percent of that. Not 1 percent of the whole bill, not almost a third of the 3.5 percent. I mean 1 percent of the 3.5 percent; in other words .035 percent of the entire bill—a meaningless amount. So let's increase the amount of money we take from the stimulus pot and immediately get it out the door for vital highway projects.

Because of those factors in the stimulus—the nature of the spending, which was never focused on real, shovel-ready infrastructure; only 3.5 percent going to roads and highways and bridges; and the timing of the money, which has been amazingly slow; only 10 percent of the stimulus spent right now and only 1 percent on roads and highways and bridges—what has been the effect on the economy? Well, of course, the effect has been slim to none.

This chart I have in the Chamber says it all. This graph is what the proponents of the stimulus bill say would

happen to unemployment over time: We pass the stimulus, and it is going to help revive the economy. It is going to make sure unemployment peaks at less than 8 percent and then comes down. Well, unfortunately, the reality has been very different, because compared to this prediction by the proponents of the stimulus, this is the reality, as I show you on this chart. This is what unemployment has been doing in the last several months—going up and up and up, well beyond the peak that was predicted, reaching almost 10 percent today.

Again, this is the second fundamental reason we need to adopt the Vitter amendment, because the stimulus, as it was put together, is not weighted nearly enough toward real infrastructure such as roads and highways and bridges, and it is not weighted nearly enough on spending now versus years from now. This Vitter amendment will help change that for the better. It will reweight the stimulus, at least at the margin, to more roads and highways and bridges and more spending now because we need it now in the midst of this recession now.

So again I urge all of my colleagues to come around and embrace and support this Vitter amendment. Doesn't it make sense to say we need to start now in terms of rejecting this path of more and more and more debt? Because the underlying bill, make no mistake about it, is funded by more borrowing, more debt. That is why a budget point of order lies against the underlying bill. I will raise that budget point of order before the end of our debate.

Secondly, doesn't it make sense to say: Look, the stimulus idea was about exactly this sort of spending? Americans across the country favor stimulus spending that is really focused on roads and highways and bridges and real infrastructure, things that are truly shovel ready. They do not favor big government waste programs and they do not favor spending 3 years from now because that is going to have no impact to get us out of this recession right now.

This amendment, again, will fine-tune the stimulus in the positive direction, toward spending on roads and highways and bridges, and virtually all of us support more of that spending, including the distinguished chairman of the Environment and Public Works Committee. She had an amendment on the stimulus to do just that, which was opposed and defeated by the other side.

This amendment will also fine-tune the stimulus to get more money out the door now. Don't we need that? Only 10 percent of the \$800 billion has been spent. Don't we need to front-load it a lot more than that to have any sort of significant positive impact on this recession?

Again, tragically, the unemployment figures say it all. The prediction: Peak

at 8 percent, come down from there. The reality: We continue to go up and up and up—perilously close right now—toward 10 percent.

Again, I urge all of my colleagues, Democrats and Republicans, to join together, to work together, as the American people want us to do, around a basic commonsense idea. Let's stop the debt. Let's stop racking up yet more debt, putting it on the backs of our children and grandchildren. Let's front-load the stimulus and do shovel-ready infrastructure now rather than big government projects 3 years from now.

With that, Mr. President, I yield back my time.

The PRESIDING OFFICER. The Senator from California.

Mrs. BOXER. Mr. President, could the Presiding Officer let us know how much time remains on the Vitter amendment and general debate?

The PRESIDING OFFICER. The Senator from California has 30 minutes remaining. The Senator from Louisiana has yielded back his time. There is 20 minutes of debate on the bill itself.

Mrs. BOXER. Mr. President, thank you very much.

Mr. President, of all the times to stop job creation in its tracks, I will tell you, this is not the time to do it. The Republican response to the bill that has come over from the House—the bill that would restore the funding, make sure there is funding in the highway trust fund to get us through September 30, and also make sure we can handle unemployment insurance and also ensure that our families can get mortgages, those who qualify—the answer from our Republican friends, and they have a right to do it, is to take that funding from the unobligated stimulus package.

Now, here is the thing. We know we are starting to finally get those dollars for our economic recovery out the door. We know that. Yes, they are not flying out the door because the administration wants to make sure these are worthy projects. But I will tell you right now, the Republicans are putting at risk the very program they say they embrace: the highway program. The fact is, we still have \$10 billion for highway-related jobs that would be subjected to the Vitter amendment. So, irony of ironies, they say they are extending the highway trust fund, but that amendment puts these funds at risk, puts these jobs at risk.

The stimulus is designed to create those jobs. The funding is getting out the door. I have gone to my State and seen it at work. Yes, we know employment is lagging. So what do you do when employment is lagging? You do not go to a program that is designed to put people to work.

I think it is important to note that the House bill is not only deficit neutral, it actually reduces the deficit. Ac-

cording to CBO, not only does it do it in 2010 but over the next 5- to 10-year period. That is because of the way they are funding the trust fund and the way they are funding the housing priority.

What the Republicans are doing is they are taking a deficit reduction measure that keeps the highway trust fund solvent through the end of September, that makes sure people can continue to get unemployment insurance, that makes sure people can get mortgages—those who qualify—and they are saying that, instead of reducing the deficit, let's slash the stimulus program, take funding away from our States, away from our counties, our cities, and our businesses back home when it is not necessary.

Mr. DURBIN. If the Senator will yield further, I am trying to see whether there is net job creation from the Senator's amendment or if we would lose ground with it. If our goal is to create more jobs in America—I listened to the Senator's explanation, and I would like to ask the Senator from California this: Even if we just take the money out of one pocket and move it to another pocket, how does that create new jobs in America?

Mrs. BOXER. Clearly, it is not even moving funds, it is slashing funds from the stimulus program, which has one purpose, and that purpose is to create jobs.

Mr. VITTER. Will the Senator yield?

Mrs. BOXER. We have heard from our Republican friends over and over again, who voted against the stimulus—although I have to say some of them are standing in front of projects built with stimulus dollars, but we will forget that for now—we are hearing from them that the stimulus isn't working fast enough. What do they want to do today but cut the funding?

What I have suggested—and I want to get my friend's reaction to this—to my friends on the other side—because I agree we ought to extend the highway trust fund for 18 months; I don't like the way they are paying for it—is to wait until the end of the stimulus program, and if there is funding at that time that hasn't been obligated, that has been left on the table, take those funds and add them to the highway trust fund.

Mr. DURBIN. If the Senator will further yield, I ask the Senator from California this: Since the Senator from Louisiana didn't support the President's recovery and reinvestment program, and most of those on his side of the aisle did not, those of us who voted for it did it with the understanding it would do a number of things. It provides tax relief for families, and it provides a helping hand to those who are unemployed, so they can afford health care insurance if they have lost their job, for example. It does provide infrastructure programs and projects. It is my understanding we are a little over 4

months into this 2-year stimulus program—not quite 5 months into it—and the Senator from Louisiana wants to basically declare it a failure, never having voted for it. I ask the Senator from California, when the Senator from Louisiana talks about the number of dollars committed, the number of projects we have agreed to, it was my understanding that, as of a couple weeks ago, we had obligated over \$200 billion out of the \$787 billion, meaning we promised we will pay, once the projects are underway and the jobs are actually created, and that number is going to continue to grow as we obligate it. Is it not also true that we want to make certain, whether we are spending money for projects under the highway trust fund or the stimulus bill, that we don't waste taxpayer dollars; we want to look carefully at each project to make sure it serves a public purpose and make certain Americans are going to work at a decent wage, and when it is over, we not only get through the recession, but we have a legacy of projects that will serve our economy and our Nation.

If the Senator from Louisiana has his way, he is going to take the money out that we are currently investing into creating jobs in America and move it into the highway trust fund. I am wondering if the Senator could respond. Does it make any sense for us to take a different approach on the stimulus and not be careful that the money we spend is actually spent well?

Mr. VITTER. Will the Senator yield?

Mrs. BOXER. I will yield to the Senator from Louisiana on his time, but I will keep my time right now. It is very important we thread this needle in the right way. We want those jobs out there, and we want them out there as fast as they can get there.

Out of the \$27 billion for highway projects, there is \$10 billion remaining. I can assure both my friends that it is very important to be careful in the way you do it. If you do it too quickly, you know what will happen on the floor of the Senate. We will have our friends on the other side saying: "they rushed." We want to be careful, but we don't want to, at this point, as we see this recovery starting to take hold—we all believe and hope it is true—we know employment is the lagging indicator. This is not the time to throw a dagger into the heart of job creation. That is what the Senator's amendment will do.

Mr. DURBIN. I ask the Senator from California, if I have the appropriate amendment before us, does the Senator from Louisiana go beyond the highway trust fund in the money that is transferred? Does he apply some of the money from the stimulus to unemployment and to mortgage insurance or is that a separate amendment? I know his amendments were filed late last night, and I am not sure.

Mrs. BOXER. I believe the Senator's amendment—and he can explain it—

deals with the trust fund, and others will have similar amendments for UI and mortgage insurance.

Mr. DURBIN. I ask the Senator—and this is a legitimate inquiry, as I don't know the answer—on the stimulus projects we are funding, what is the requirement for a local match for those projects, as opposed to requirements for projects under the highway trust fund?

Mrs. BOXER. My understanding is it is 100 percent because it is the stimulus. We are trying to do that because our States are suffering—yours is and mine. We saw our Republican Governor talk about how heavy our hearts are back there, and we decided to help our State. This is very different. It is 100 percent offset.

Mr. DURBIN. The stimulus is 100 percent Federal, which means projects go forward even if States are struggling with the budget. If the money goes into the highway trust fund for projects, most of that required a State or local match, right?

Mrs. BOXER. That is correct; 20, 30 percent.

Mr. DURBIN. Most States, including Illinois, California, and others, would have a more difficult time moving projects forward through the highway trust fund rather than the stimulus, which is 100 percent Federal dollars.

Actually, the Senator from Louisiana is cutting down the opportunity, reducing the opportunity for infrastructure projects by requiring this match through the highway trust fund; isn't that correct?

Mrs. BOXER. I say to the assistant majority leader, he is absolutely correct. I understand the need to extend the trust funds to 18 months. On that part, Senator VITTER and I are in agreement. But the way he funds it is hurtful to the American people, to the American workers, to our businesses, and to our contractors. Even though we know a lot of us want to see these funds get out there quicker, they are on the verge—Vice President BIDEN has said we have committed more than a fourth of the Recovery Act total funds. We are on track to meet the deadline set when the act was passed in February, spending 70 percent by the end of September of 2010. He points out that the purpose of the stimulus was the jolt for immediate help but then a long-term economic recovery.

This kind of amendment—and the others we will see—which says to the American people: Gee, it is 4 months and we want to forget about this whole notion—doesn't make sense. The timing of this is way off. If at the end of the 2-year period, within which the stimulus is supposed to act, there is money left over, I will be the first one saying: Let's either reduce the deficit with it or let's put it into the highway trust fund. I do believe infrastructure should have gotten more funds from the stimulus, but that is another point.

Mr. DURBIN. My last question to the Senator from California—and I join her in opposition to this amendment—is this: If the net result of the Vitter amendment is not to increase jobs in America but actually will reduce jobs in America, it seems like it is the opposite of what we ought to be doing in the middle of a recession, with so many Americans losing work. We want to create good-paying jobs here at home, and the Vitter amendment, by increasing the need for a State and local match, for example, is going to decrease the likelihood of creating jobs. The stimulus money—100 percent Federal money that is for shovel-ready projects—will move more quickly into the economy and into paychecks and will help us rebound from this recession we are in.

I say to the Senator from California, I thank her for her opposition to this amendment. I hope our colleagues on both sides will realize that even if you didn't vote for the stimulus, voting for the Vitter amendment is going to take money away from projects in your States that will create good-paying jobs.

Mrs. BOXER. Before my friend leaves, I think I can put some specifics out to him. We already know there are \$10 billion worth of highway projects that have not been obligated. That is at risk right away. We know there are Superfund cleanups that are long overdue. We have funds for that. We have \$5.5 billion in construction-related activity that deals with cleaning up underground leaking storage tanks and the specialized, good-paying jobs that those activities create. We have \$300 million to restore our Nation's wildlife refuges. We have \$100 million in a great program Republicans and Democrats have been lauding in my committee—the Economic Development Administration—where you leverage those funds from business. That would be at risk. We have \$5 billion available for flood control. It is ironic that my friend from Louisiana—I have been working with him and Senator LANDRIEU to do everything in our power to stop flooding. We have problems in our State, and Lord knows and the world knows about the problem in Senator VITTER's State; \$5 billion was available for flood control, for water supply and harbor maintenance, all of which are focused on job creation, and the irony of ironies is that those funds could well be cut under the Vitter amendment.

Mr. DURBIN. So the Senator's amendment would effectively cut funds used in the stimulus for flood control?

Mrs. BOXER. Any funds not obligated out of the \$5 billion available. As we know, Vice President BIDEN says, on average, 25 percent of the funds have been obligated. That means a good portion of the \$5 billion for flood control would, in fact, be at risk.

I thank my friend for coming over and helping me explain to our colleagues and the American people why we oppose this amendment, even though it may be well intentioned. At the end of the day, it hurts our people and their chance to get good jobs.

I yield the floor and reserve my time.

The ACTING PRESIDENT pro tempore. The Senator from Louisiana is recognized.

Mr. VITTER. Madam President, let me briefly address some of the issues and misconceptions that have come up by focusing on four key points.

First, I believe the Senator from Illinois said: Why would we want to take anything out of the stimulus and stop job creation? I have a news flash: There is no job creation. Unemployment is going up. Again, unfortunately and tragically, the unemployment numbers say it all. This was the projection from the proponents of the stimulus about unemployment peaking at 8 percent and then coming down. Tragically, this is the reality. Joblessness goes up and up, toward 8 percent. So there is no job creation right now.

No. 2, the Senator from Illinois said: Why would we want to move money from one pocket into another pocket? That doesn't do anything. Well, it does a lot if the pocket we are removing money from is stuff that would not be spent until after 2011, and we move it to a pocket focused on real, concrete roads, highways, and bridges—spending that can be done now. That is a big change in terms of the type of spending we are talking about. It is a big change in terms of the timing of the spending.

The biggest reason for the stimulus having no significant impact on unemployment is the type and the timing of the spending. On the timing side, only 10 percent of the entire \$800 billion stimulus has been spent to date. On the type of spending, only 3.5 percent of the whole bill was ever for roads, highways, and bridges. Only 1 percent of that—1 percent of the 3.5 percent—has been spent yet. So, yes, we are moving money from one pocket to another so as not to run up more debt. In the process, we are having a lot more imme-

diated, positive impact on employment. That is very important.

Point No. 3: In direct response to the Senator from California, if she would like to wall off any stimulus money—the money for roads, highways and bridges and the money for flood control—and say the President cannot use that money in this transfer, I would be very open and supportive of such a second-degree amendment.

I did not do that simply to give the administration maximum flexibility in terms of working out those details. However, again, if the Senator from California would like to propose a second-degree amendment to wall off true highway funding or flood control funding, or whatever, I would be happy to support that.

Fourth and finally, I couldn't believe my ears, but I think the Senator from California said the underlying bill involves deficit reduction. Let's get real. I know Washington is a fairy tale world. I know things are turned upside down so often, like Alice in Wonderland, but the underlying bill involves racking up more debt, more deficit. That is the whole motivating factor of my amendment. The underlying bill does nothing but borrow more. Don't take my word for it; look at the fact that there is a budget point of order against the underlying bill which I will point out and raise for consideration by the Senate.

So the underlying bill clearly involves more debt. How could it not? We are taking money from the general fund to fill in the highway trust fund. Guess what. We are deficit spending in the general fund. We are already, through the general fund, racking up a deficit. So if we take money from there, we have to backfill that if we spend the same amount with more borrowing, more deficit, more debt.

Again, if we care about turning the corner on deficit and debt, this is the responsible amendment to support and the responsible approach to take. The underlying bill racks up more debt; the Vitter amendment avoids that.

Again, there is a budget point of order against this underlying bill about

which, with the cooperation of the Senator from California, I believe she needs to make some introductory comments, but I will make that budget point of order now.

I yield the floor to the Senator from California.

Mrs. BOXER. Madam President, how much time remains on the Vitter amendment on either side?

The ACTING PRESIDENT pro tempore. The Republican side has 9½ minutes for Senator VITTER; 15 minutes for Senator BOXER.

Mrs. BOXER. And on the general debate?

The ACTING PRESIDENT pro tempore. Twenty minutes on the general debate.

Mrs. BOXER. Madam President, I am going to put a couple of items in the RECORD and make sure Senator VITTER can offer his budget point of order. I asked if Senator DURBIN would be willing to take 10 minutes on our side on the general debate. I don't think I have to ask unanimous consent, but why don't I do that. I ask unanimous consent that after I conclude and after Senator VITTER makes his point of order, then we get to Senator DURBIN for his 10 minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mrs. BOXER. Madam President, on the issue of the Congressional Budget Office score that scores the House bill as deficit reduction, I find it intriguing that my friend who supports the CBO when they say we are spending money—for example, on the health bill, they say: Oh, look. CBO says it costs money, but he derides it when CBO says this particular bill is a deficit reducer.

I ask unanimous consent to have printed in the RECORD the CBO score that shows, in fact, the bill sent over from the House reduces the deficit.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

H.R. 3357: TO RESTORE SUMS TO THE HIGHWAY TRUST FUND AND FOR OTHER PURPOSES

	Changes in direct spending (in millions of dollars)			
	2009	2010	2009–2014	2009–2019
Section 1—Appropriate \$7 billion to the Highway Trust Fund:				
Budget Authority	0	0	0	0
Estimated Outlays	1,000	–1,000	0	0
Section 4—Increase Loan Limit to \$400 Billion for the GNMA Mortgage-backed Securities Loan Guarantee Program Account:				
Estimated Budget Authority	–40	0	–40	–40
Estimated Outlays	–40	0	–40	–40
Total, H.R. 3357:				
Estimated Budget Authority	–40	0	–40	–40
Estimated Outlays	960	–1,000	–40	–40

NOTES:

Section 2 would have no estimated budgetary impact relative to CBO's baseline. The costs of providing benefits under the unemployment compensation program are assumed in the baseline, consistent with section 257 of the Deficit Control Act of 1985, which states that "funding for entitlement authority is assumed to be adequate to make all payments required."

Section 3 also would not have a budget impact. Allowing FHA to guarantee additional loans has no cost or savings because under the Federal Credit Reform, CBO's estimate of the subsidy cost of new FHA guarantees is zero.

Source: Congressional Budget Office.

Mrs. BOXER. Madam President, notwithstanding the order of July 29, I ask

that it be in order for Senator VITTER to make a budget point of order

against H.R. 3357 at this time, and that a motion to waive the applicable point

of order be considered made, with the vote on waiving the point of order occurring at a time to be determined.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. VITTER. Madam President, I will make that point of order. The underlying bill is such a great deficit reduction that it would involve more borrowing and more debt and more mandatory spending. It would specifically increase mandatory spending and exceed the committee's section 302(a) allocation. Therefore, I raise a point of order against the bill pursuant to section 302(f) of the Congressional Budget Act of 1974.

The ACTING PRESIDENT pro tempore. Under the previous order, the waiver is considered made.

Mr. DURBIN. Madam President, I seek recognition pursuant to the unanimous consent agreement of the Senator from California, 10 minutes remaining on our side on the general debate.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. DURBIN. Madam President, the Senator from Louisiana suggests the stimulus bill the President enacted is not creating jobs because we still have unemployment. The fact is, it is creating jobs and we are still in a recession. Were we not working with the stimulus bill to put money back in the economy to create American jobs, it would be worse. We all know that.

When the President came to office, he encountered an economy that was losing on average 700,000 jobs a month. Our growth rate had hit a negative 6.3 percent. Foreclosures were at record levels, and residential investment had fallen. Banks were in crisis and freezing lending. Madam President, \$10 trillion in wealth had been lost. Virtually every American with a savings or retirement account had taken a hit. That is when the President took his hand off the Bible and accepted the responsibility of office, and that is what he inherited.

He came to Congress and said: Let's put money in the economy and get Americans back to work. Let's invest in things that will pay off in the long run. Let's build the bridges, the highways, the airports. Let's make sure we make investments that not only create jobs today, but we can rely on in the future to build our economy. And we did it, with limited help from the other side of the aisle.

The Senator who is offering this amendment voted against it. The position for most Senators on the other side of the aisle was, let's do nothing; let's let the market work this out.

Do you have any idea where we would be today if the market was still working this out? I am afraid we would be in sorry shape. We would continue to see

job loss and continue to see more and more unemployed Americans, which is exactly the opposite of what we want.

Now comes the Senator from Louisiana who opposed the stimulus package in the midst of this economic crisis and now says: Let's take money out of the stimulus package that is creating good-paying jobs in America. Let's take it away from the States where they get 100 percent Federal funding for their projects. Let's put it in a different fund. It isn't creating any new investment, but let's put it in a different fund that now requires a State match.

What that means is, if your State budget is struggling—we know a lot of States are—the Senator from Louisiana does you no favor. He is taking a project in your State that is important for your economic future, closes it down and says: We will be glad to give you some of that money back as long as you can come up with matching funds.

I am afraid that is not helpful. It is hurtful at a time when this economy needs all the help it can get. When it comes to the stimulus package, understand, we are a little over 4 months into this stimulus, this 2-year stimulus package.

The Senator from Louisiana says: I am prepared to declare it a failure; let's stop right now.

I am not prepared to declare it a failure. In fact, I think there is an indication that it is starting to put America back to work.

Because of the Recovery Act, on which the Senator from Louisiana wants to reduce spending—listen to this—95 percent of working families are already getting tax credits in their paychecks. Those dealing with job loss are collecting an extra \$25 a week if they are out of work. That does not sound like much if you have a job, but if you are out of work, it means something.

There also is help for unemployed people to pay health insurance. I don't know if the Senator from Louisiana didn't vote for that. I don't know if he thinks that is a good idea. If I were unemployed, I would want my family to have health insurance. That is pretty basic.

There is money to help seniors and college students, many of whom have faced the idea of suspending their college education because mom and dad are struggling at home. The Senator from Louisiana may be opposed to that; I am not. I want them to stay in school. I want them to get their degrees because they will lead America.

We provided \$34 billion in funds for States for Medicaid because our States are struggling to provide health care for the poor. The Senator from Louisiana may oppose that. That is his right to do. I happen to think that providing basic health care to the poor in

America is evidence we are a caring and compassionate nation and will continue to be.

The money that has gone to States and local governments has avoided the layoffs of teachers and police officers and other law enforcement in Louisiana, Illinois, California, and around the Nation. The Senator from Louisiana may think that is a waste of money, we never should have done that. But for a safer America and for an America where kids can go to school and have the teachers they need, I think the money was well spent.

Beyond that, this Recovery Act in which we are involved is one that is starting to make some results. Just starting. I am not being Pollyanna-ish about this. We are still in a recession. I think we are coming out—I hope we are coming out.

In January, the month before this Recovery Act went into law, we lost 741,000 jobs. Terrible. By June, the economy was losing one-third fewer jobs. I wish we were not losing any jobs, but the fact is the stimulus is starting to work.

The Senator from Louisiana, who did not support it, who had no plan for this economy, now wants to take the money out just at the moment it is starting to work. Boy, the perfect Washington answer. Let's move in right now, 4 months into a 2-year program, and declare it a failure. That may be his approach, but I don't think it works for America.

In less than 160 days, more than 30,000 projects have been started under this bill—30,000 across the country. I went to Peoria, IL. There is a project at the airport which is critical to its economic future funded by the stimulus bill, creating good-paying local jobs right in the heartland of Illinois. More than \$23 billion will be made available to fund over 6,600 shovel-ready construction projects; 3,200 are underway. If the Senator from Louisiana has his way, we will stop right there. We will start cutting back on these projects right now. That is his idea of economic recovery.

Over \$369 million has been put into rural water systems. I can tell you, representing a State with a lot of small towns, such as Louisiana, they need this money to make sure their drinking water is safe for the people who live there. The Senator from Louisiana says: Enough said; let's start cutting back on that.

Madam President, \$2 billion has been moved out to State governments and community organizations for weatherization and energy efficiency on low-income homes, and half a billion in overdue cleanup of Superfund sites. The Senator from Louisiana says: Let's cut that money; let's reduce that money. I don't think that makes sense.

We know if we did not have this Recovery Act, there would be more unemployment, more people out of work,

fewer dollars being paid in taxes to the Federal Government and State governments. Our situation would be worse when it comes to the deficit. The more people who are unemployed, the fewer who are paying taxes, the more people need services. It is a recipe for a deficit that grows.

The Vitter amendment, by reducing the spending power of the stimulus funds, will make our deficit worse. That is a fact. He must acknowledge that. I hope he does.

In terms of obligating these funds, I want to make sure at the end of the day, having voted for this and supported it, that the money is well spent. I don't want a single dollar wasted. We are going to take care to make sure these projects make sense, that we have a justification for them, and they will serve America and our economy's future. That is responsible and accountable transparency.

I know the Senator from Louisiana says we are 4 months in, we have not gotten it spent, it is time to bail out. That kind of shortsightedness will not work. The idea that we would cut back on funds for flood control in the States of Louisiana and Illinois makes no sense whatsoever. The Senator from Louisiana is wanting to cut back those funds so he can transfer money into the highway trust fund.

I think we are on the path to recovery. I hope that path is a short one and we reach it soon. In the meantime, the Vitter amendment will not help. The Vitter amendment makes it worse. The situation is that the projects we are counting on to get America back to work, good-paying jobs right here at home, are in danger because of this amendment.

I urge my colleagues on both sides of the aisle, even if they didn't vote for the stimulus package, do the math—100 percent Federal money for the project in that State, as opposed to the Vitter approach which would require 20 percent or more from the State before they could go forward with any projects at a time when most States are struggling. This is not the answer. This will not be the only part of the problem; it will be a big part of the problem.

I yield back the remainder of my time.

The PRESIDING OFFICER (Mrs. HAGAN). The Senator from Nevada.

AMENDMENT NO. 1905, AS MODIFIED

Mr. ENSIGN. Madam President, I call up my amendment at the desk and ask that it be modified with the changes that are at the desk.

The PRESIDING OFFICER. The instruction line of the amendment is so modified.

The clerk will report.

The legislative clerk read as follows:

The Senator from Nevada [Mr. ENSIGN] proposes an amendment numbered 1905, as modified.

Mr. ENSIGN. Madam President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To offset the appropriation of funds to replenish the Unemployment Trust Fund with unobligated nonveterans funds from the American Recovery and Reinvestment Act of 2009)

On page 3, after line 12, add the following:

SEC. 5. USE OF STIMULUS FUNDS TO OFFSET APPROPRIATION OF FUNDS TO REPLENISH UNEMPLOYMENT TRUST FUND.

The unobligated balance of each amount appropriated or made available under the American Recovery and Reinvestment Act of 2009 (Public Law 111-5) (other than under title X of division A of such Act) is rescinded pro rata such that the aggregate amount of such rescissions equals \$7,500,000,000 in order to offset the amount appropriated to the Unemployment Trust Fund under the amendment made by section 2 of this Act. The Director of the Office of Management and Budget shall report to each congressional committee the amounts so rescinded within the jurisdiction of such committee.

Mr. ENSIGN. Madam President, in my home State of Nevada, the unemployment rate has reached 12 percent, and we are seeing unemployment continue to rise across the country. The President said the stimulus bill that was passed this year was going to keep unemployment no higher than 8.3 percent across the country. We know it is a lot higher than that everywhere now. This is not just a Nevada problem, it is a problem in every State.

American families across the country are hurting, and they are hurting badly. I am offering an amendment that will help families during these tough times. 18 States have depleted their State unemployment fund and are now borrowing from the Federal unemployment fund to cover benefits. The Federal Fund is now running dangerously low. I am offering an amendment to shore up the Federal fund and help the States that have depleted their own funds. My amendment will help in a way that is fiscally responsible. My amendment is very simple. It would say we are going to use money out of the stimulus bill to replenish the Federal unemployment funds that the States are borrowing from, and we are going to do that in a way where we don't increase the deficit. My amendment does not play any phony numbers games, unlike the bill that was sent over here from the House of Representatives. The House bill says, technically, it is not increasing the deficit. The Federal Government, however, is borrowing from future generations, and will very likely forgive the States that have borrowed money, which will therefore increase the deficit.

The U.S. Department of Labor estimates it will take about \$7.5 billion to replenish the Federal fund for the rest of the Fiscal Year. Next year, it is pro-

jected to be at \$30 billion. And we have already seen in the stimulus bill that this Congress is giving money away to the States. We will continue to borrow from future generations so we can forgive that debt the States have run up. States are not going to be able to pay back all they have borrowed, right? That is what we all assume. So let's show some fiscal responsibility and take the money needed to replenish the Federal unemployment fund, out of the stimulus.

The Senator from Illinois was just on the floor talking, and I listened carefully to some of the things he was saying. He was saying that if we actually borrow less—as does the Vitter amendment, for instance—it means our deficit is going to be more. Well, that just doesn't pass the commonsense test. I know what he is saying. He is saying, basically, if we take the money away from the stimulus—in other words, we borrow less now—it is not going to help the economy as much. That was the philosophy behind the stimulus package, that by borrowing money and putting that government money into the economy, we would help the economy recover. I think it is not arguable that there are a certain amount of jobs that can be created by government spending.

The reason I voted against the stimulus bill is because I thought a lot of the money was irresponsibly spent and it was going to run up the deficit. So I was looking more long term, not just short-term. The problem with continuing to borrow more and more is we have the threat of long-term economic harm. We have the threat of long-term inflation in this country, which will be devastating to this economy.

Under the President's budget that was passed here in the Congress, it is projected that our national debt will double in 5 years and triple in 10 years. Think about that. Take all of the debt that was borrowed in the history of this country, from George Washington to George W. Bush, and that debt is going to be doubled in 5 years and tripled in 10 years. That is unsustainable. We have to think about future generations.

States do need help to replenish their Federal unemployment insurance fund. They do need that help. We recognize that. But let's do this in a way where we are not borrowing more money from our children's future. That is really what this is about.

We had the former Fed Chairman, Alan Greenspan, talking to our conference at lunch a couple of weeks ago. One of the things he talked about and one of his big fears is that the United States is borrowing too much money and that can be a future threat to our economy in the form of inflation. If we get to the point where other countries decide not to loan us this money anymore—if they quit buying our Treasury

bills, in other words—our economy falls off a cliff. We don't want to get to that point.

That is why we need to start taking small steps, which can lead to larger steps on being fiscally responsible in this country. We hear Senators from both sides of the aisle get up and talk all the time about being fiscally responsible. Yet every time we have a small proposal that shows fiscal responsibility around here, it is rejected: We can't do that now. We can't do that with this program. The stimulus program is off limits.

Even though a large amount of the stimulus isn't going to be spent for a long time, it was originally supposed to help our economy this year. And the Senator from Illinois just said the economy is recovering. There are signs the recession is slowing down; however, this looks as if this is going to be a completely jobless recovery. That is not what the stimulus bill was supposed to be about. It was supposed to be about creating jobs.

We had alternatives, actually, that would have created jobs, that would have helped the housing industry. The housing industry was the part of our economy that drug the rest of the economy down. So we thought we should have fixed housing before we started putting money into all these other projects and all these other government programs. That was rejected by the Democratic majority, unfortunately. I still believe we need to help the housing industry.

Senator JOHNNY ISAKSON from Georgia has a good proposal—to give a \$15,000 tax credit to anyone who would buy a home. In my State of Nevada, the housing market is still devastated. We have huge foreclosure rates. We have a large amount of inventory to sell out there. The housing market is starting to turn around in some of the other States, but it still has a long way to go, and we could really help the housing market.

The bottom line is that we need to be more fiscally responsible to future generations. My amendment today is just taking a small step toward that.

My dad used to tell me all the time when I was growing up: You have to watch the small amounts of money. He used to say: If you watch the \$20 bills, the large amounts of money will take care of themselves. Well, let's start watching the small amounts. I know \$7.3 billion is not a small amount of money, but around here, it is. Let's start watching at least these amounts of money so that when we are talking about the \$1.8 trillion deficits, we can start taking care of that and we can start being fiscally responsible to future generations.

I urge my colleagues to support this commonsense amendment. I think the Vitter amendment is the right direction to go as well. This is something we need to do for future generations.

Madam President, I yield the floor.

The PRESIDING OFFICER. The Senator from California.

Mrs. BOXER. Madam President, I rise to speak against the Ensign amendment, and I want to explain why, so I will take my time off that discussion and retain the remainder of my time on the other amendments.

Let me say that Senator ENSIGN has come to the floor and he wants to talk about fiscal responsibility. I welcome that debate. He blames the Democrats for not doing anything to help us get a handle on deficits and debt. But let's go back to recent history—not ancient history, recent history.

Bill Clinton left the White House in the year 2000, and we had a budget surplus. That was very hard to get to, but we Democrats did it with him and with the help of some of our Republicans. We had a debt practically eliminated. It was on the way down. And I remember discussions about what do we do when we have no more Treasuries to buy.

Then we had George Bush elected, and we had the Republicans supporting him. In a nanosecond, the whole table turned. We went from budget surpluses as far as the eye could see to deficits as far as the eye could see. We went from a debt that was going to be extinguished to a debt that began climbing.

As a result of these policies, there was a call for change in this country. We had more Democrats elected. We have a Democratic President, and he inherited one giant mess. The chickens came home to roost.

So our President said to the Nation: I am going to do everything I can to get out of this economic mess. Help me. Help me pass a bill that will put people to work. He said: I know it is going to be hard. I know it is going to take time, but we need to do this because of the recession. And if we don't get out of this recession, we are not going to be able to attack the problem of deficit and debt.

Anyone who knows President Obama knows that when he was a Senator, he was always conscious of our fiscal issues and distressed about the course we had been on for the last 8 years.

So here is what happens. We are 4 months into the economic recovery package. I have been to places in California, I have seen people getting those jobs—highway jobs, water infrastructure jobs, cleaning up Superfund sites, restoring our wildlife refuges. Those are just some examples of the jobs. And we know, according to Vice President BIDEN, that about 25 percent of those funds have been obligated.

Senator VITTER came down here and said nothing is working; we are not getting those jobs out there. Let's go in and cut that stimulus program—put a dagger in its heart is what they want to do, when it isn't necessary to do so.

The Congressional Budget Office, as I have said—and I have put into the

Record—tells us the bill the House sent us does nothing to increase the deficit. As a matter of fact, it is a small benefit to the deficit over 10 years. They figure it is about \$40 million—not much, but it doesn't produce more deficits.

So they come to the floor and they are arguing the House bill at the desk causes deficits when the Congressional Budget Office says, after they had done a study, absolutely not. They still insist it does. Fine. They do not agree with the CBO.

By the way, they do agree with the CBO when the CBO says there are costs to health care reform. Then they embrace the CBO. But now they can't because it doesn't fit their political rhetoric.

So all I can say is, if you take all these amendments—and, look, I don't think they are meant to be mean-spirited. I think they are honest in their approach. They do not like the fact that we passed the stimulus bill. They do not believe in it, even though a few of them on the other side—a few of them—have gone to see some of the projects that are putting their own people to work. A few have done that. I find that a little disingenuous, but that is their choice.

Their argument just doesn't hold up. Look, if we take the funding out of the stimulus, we put at risk \$10 billion of highway-related jobs. We put at risk millions of dollars that would otherwise be paid to our construction industry. We put at risk very important construction projects at military bases, long overdue Superfund cleanups, the creation of clean energy jobs in the future, improvements to outdated rural water systems. Why would we want to do this—Why, in the middle of a recession, when we have come up with a way to handle this that does not add to our deficit?

On the highway trust fund, Democrats and Republicans in the Senate agree we ought to do an 18-month extension. On that part of the Vitter amendment, you will find me on his side, but not to take the funds out of the unspent stimulus money that is on the ground and putting people to work and will continue to do so. It has only been 4 months since the funding has started to get out the door. Have a little patience. You know, for 8 years we saw the economy turn into a bad way. For 8 years, we saw this economy turning bad. For 8 years, we saw the recession building. For 8 years, we saw the deficit building. For 8 years, we saw the debt building. It is not going to take 4 or 5 months to turn this around. And why would we put a dagger in the heart of job creation at this point, no matter how noble the effort?

I believe it is very important that we don't play games with this bill that is at the desk. For example, Senator BOND is going to offer a very good

amendment. It has nothing to do with cutting the stimulus; it just corrects a real problem, and it restores funding to the trust fund. He is absolutely right on that, and I absolutely will support his amendment. But here is the thing. We have until September 30 to make that fix, when we have to reauthorize the program. This is just a financial transfer into the fund. September 30, we need to actually reauthorize the highway bill. We take care of Senator BOND. But the reason I cannot support it is, as he well knows, the House has stated—and I do not agree with their attitude, I don't agree with it but they have stated—this is it. We are giving you this quick influx of funds, and we do not want to have it come back with amendments.

We can put off the Bond amendment. We have time to deal with it. I praise Senator BOND for continuing to raise this matter before us because we do have to take care of it. Let's just get it straight. When people come down to this floor and rail against deficits and rail against the debt, just remember that little simple piece of history that is documented, that President Clinton left President George W. Bush a surplus as far as the eye could see and a debt going down. Now the other side of the aisle claims our President is not moving fast enough on all these fronts. Let me assure my colleagues our President cares a lot about the financial future of this country. He has two little kids. He knows exactly what their burden is. I do not believe that fiscal responsibility belongs to the other party because it was our party, under Bill Clinton, that got this country in the best financial shape it was in for decades. It only took a few short years to see all that go out the window.

Let's not lecture each other. If they continue to do it, I will just continue to bring up the facts. But, again, I see Senator BOND is here. I am going to repeat what I said before he got here. I complimented the good Senator because I think he is totally right on his amendment. However, I do know if it is attached to this bill what will happen because the House has told us. They will not take up the replenishment. We risk the highway trust fund running out of funds. I personally will work with the Senator from Missouri and my colleague, Senator INHOFE, to make sure the Bond amendment is part of the reauthorization which we will have to do in September. But I thank him because he perseveres. He brings it up all the time, and it is good that he does so. I support exactly what he is trying to do, but the timing, unfortunately, would undermine the replenishment of the trust fund.

I yield the floor and retain the remainder of my time.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized.

Mr. INHOFE. Madam President, as the ranking member of the committee,

first of all, while I love the chairman dearly, she is dead wrong on all the information she just gave you. Let me go over that briefly.

First of all, on the Clinton administration. Let's keep in mind that even then-Vice President Al Gore admitted they had a recession coming at that time and that reduced the amount of money that was coming in to run the government. We all know that is basic economics. We also know during the 8 Clinton years he downgraded the military by 40 percent—not 10 percent or 15 percent. I will never forget the euphoric attitude: The Cold War is over now; we don't need a defense any longer. We cut down our end strength and our modernization program and all of a sudden 9/11 came and we were in the middle of fighting a war with a military that was downgraded by the President. Obviously, it took a lot of money to bring us out.

I would say on behalf of President Bush that was a tough situation, but he grabbed hold of it. Yes, we had to spend more money at the time, but he had to rebuild what was torn down during the Clinton years.

One word about the Vitter and Ensign amendments. They are both good amendments, and all they are doing is what I thought the chairman of our committee joined me in wanting to do back when we were considering the stimulus bill, the \$789 billion bill. Only 3.5 percent of that went to roads and highways and bridges. That would really have stimulated the economy. I had an amendment cosponsored by the chairman, Chairman BOXER. We were unable to get it passed. That would have turned this into a real stimulus bill. Frankly, we would not be here today if we had been successful doing that.

Look, 67 percent of that \$789 billion is unobligated today. What better use could there be than using that for construction, for getting into something where we can actually stimulate the economy? This has to be done. Our roads, our highways, our bridges are in deplorable condition. Our chairman and I agree on that. We want a robust reauthorization bill. But in the meantime, to be able to take some of the money that is in the stimulus bill that doesn't stimulate anything—we are not talking about taking away from military construction. I am the second ranking member on the Armed Services Committee. I wouldn't tolerate that. That is already in there. But the unobligated funds amount to about 67 percent or about over \$400 billion of the stimulus bill.

I am going to strongly support—in fact, I recommended to both Senators Vitter and Ensign—that this is a good place to find the money we have to find in order to rebuild our system.

I have to say something about the Bond amendment because I will have to

leave the floor in just a minute. I am fully supportive of the amendment. The rescission is bad for every State and bad for the highway program. This amendment corrects an accounting provision in SAFETEA that removes \$8.7 billion of what was supposed to be unneeded contract authority.

I think the rescission was not intended to have the real funding impacts on the States, but the provision in the Energy Independence and Security Act of 2007 changed how the rescission was to be implemented. Now States stand to lose about \$400 million of real money.

Madam President, \$40 million of that \$400 million comes from Oklahoma. Right now the Oklahoma secretary of transportation, Gary Ridley—and I believe he is the best secretary of transportation anywhere in the Nation—recently told me my State will be forced to cancel \$40 million in projects that were supposed to begin this year. For this reason, this amendment cannot be put off. We have to pass it now; otherwise, States will have to cut planned projects in anticipation of this rescission.

Some are arguing this amendment would somehow endanger the passage of the trust fund rescue. I flatly reject this argument. The other body is still in session. Right now they are over there, and we should not bow to its whims. This is not just a Senate problem to fix. The House has a responsibility to address it too.

As I stated earlier, the House is still in session and they can take a few extra hours before their adjourning to pass a highway fix bill with the Bond rescission language in it. It is ludicrous to talk about infrastructure spending being an ingredient in creating jobs on one hand and on the other hand allowing \$8.7 billion in contract authority to disappear.

I urge my colleagues to support all three of these amendments.

I yield the floor.

The PRESIDING OFFICER. The Senator from Missouri is recognized.

AMENDMENT NO. 1904

Mr. BOND. Madam President, I thank the ranking member, Senator INHOFE, for his support of the amendment. I thank the Chair for her kind words, even though we disagree. We, all three of us, strongly support the need to get highway funds moving to build the infrastructure we need in our transportation. This is a critical time.

Right now our economy is struggling to recover from the worst recession in generations; hard-working Americans in my home State of Missouri and across the nation are losing their jobs; and our states are straining to fund projects that are critical to our constituents. Unfortunately, unless we act now, our economy, workers, and our States will be dealt another heavy blow.

At the end of September, millions will be cut in on-going, shovel ready highway projects. That does not have to happen. This drastic cut will halt critical transportation projects—like the repair of highways and bridges—across the Nation. In addition to halting critical infrastructure projects, this cut will cost jobs in all 50 States.

My amendment is the action we must take now to protect our struggling economy and protect jobs from this dangerous rescission. This amendment will protect our economy and workers by eliminating the \$8.7 billion rescission of contract authority mandated in the last highway bill—SAFETEA LU—for September 30, 2009.

The reason for repealing this dangerous cut now is simple. We should not be giving money to States for infrastructure, jobs and economic growth with one hand and on September 30 taking money away with the other. This contradictory action just doesn't make any sense and runs counter to our own efforts to improve our Nation's infrastructure.

According to our State departments of transportation, rescinding contract authority can limit our state's ability to fund their priorities and operate their programs as efficiently as possible. There are real world consequences for our States if we continue with these rescissions. The most obvious consequence will be a halt to much needed improvements to our Nation's infrastructure.

I don't think I need to remind people of the state of our infrastructure around this country. If I do, then you simply aren't paying attention.

We are beginning to burst at the seams, our vehicle miles traveled remain at historic highs, congestion rates are up with more and more people sitting in traffic next to trucks carrying products to and from businesses across the Nation. Our deteriorating infrastructure is a real problem and it is taking an economic toll at a time when we simply cannot afford more burdens on our system. Unfortunately, the real world consequences of this dangerous cut will be hardest on workers and families. The Missouri Department of Transportation estimates that this rescission would mean about \$201 million in lost projects and countless pink slips in Missouri. Missouri is not alone. The numbers for other States are startling: California, \$793 million; Pennsylvania, \$404 million; New York, \$406 million; Maryland, \$140 million. But most importantly, behind these numbers there are jobs. The American Association of State Highway and Transportation Officials estimates that for every billion dollars rescinded, our States will miss out on nearly 33,000 jobs.

If Senators were to contact their State's department of transportation they would quickly understand the full

impact this rescission would have back at home. I urge my colleagues to do that before voting.

In fact, let's hear from some State DOT directors on the real effect this recession will have back at home.

Colorado Director of Transportation Russell George stated that the upcoming \$8.7 billion rescission will cost the State \$98.7 billion:

that could have otherwise been obligated and out the door helping to employ hard working Coloradoans and providing important infrastructure projects to the State. This real dollar cut is about 20 percent of the total federal funds Colorado receives each year.

The Department of Transportation director in Nevada, Susan Martinovich, said that the upcoming rescission of \$61 million represents 25 percent of the State's annual \$236 million Federal aid allocation and that she would be forced to cancel \$48 million of projects that are already under construction, having a "devastating effect" on workers.

We have kicked the can down the road on this rescission for far too long.

Right now, with this amendment, is our last opportunity to do what is best for our economy, American workers, and our States by repealing this rescission. I know that I don't want to go back to my State having voted against so many jobs for Missouri.

Repealing this rescission will allow States to continue to move forward to meet our infrastructure needs and to create the jobs that struggling families and this economy so desperately needs.

I also have a letter of support from Americans for Transportation Mobility. I ask unanimous consent it be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

FASTERBETTERSAFER, AMERICANS
FOR TRANSPORTATION MOBILITY,
Washington, DC, July 30, 2009.

TO THE MEMBERS OF THE UNITED STATES SENATE: The Americans for Transportation Mobility (ATM) coalition strongly urges you to pass H.R. 3357, which would address the looming shortfall in the Highway Trust Fund, and make highway and public transportation reauthorization a top Congressional priority during the remainder of the year. The coalition also supports the Bond amendment, which would repeal the rescission of \$8.708 billion in highway contract apportionment to states scheduled to take effect on September 30, 2009.

The 2005 highway and transit reauthorization legislation, the "Safe, Accountable, Flexible, Efficient, Transportation Equity Act: a Legacy for Users" (SAFETEA-LU), which expires at the end of September, guaranteed at least \$223 billion for federal highway program investments through fiscal year 2009. This investment level was predicated on a forecast of anticipated revenues collected for the Highway Trust Fund's Highway Account over the life of SAFETEA-LU. Unfortunately, the Highway Account is expected to run short of cash to liquidate obligations sometime in the next few weeks.

To avert the imminent crisis, Congress should provide revenue to support the Highway account expeditiously. H.R. 3357 would

achieve this by transferring \$7 billion from the general fund of the Treasury to the Highway Trust Fund's Highway Account. This measure would provide states and localities with needed continuity in federal reimbursements to ensure infrastructure efforts around the country do not come to a screeching halt.

While H.R. 3357 is critical to supporting ongoing infrastructure efforts, it is only a short-term solution to an imminent crisis. Continued bailouts for the Highway Trust Fund are hardly a sustainable approach to the nation's infrastructure investment needs. Congress must develop a comprehensive, long-term solution to ensure the platform of our economy is sound.

The "user fee" system has been in place since 1956 when Congress dedicated the gas tax to pay for construction of the Interstate Highway System. This system and the Highway Trust Fund have been a stable source of funding for decades and have offered states and localities the predictability and consistency necessary for capital investment. Additional revenue will be needed to sustain this system and fuel taxes are currently the simplest, fairest, and most effective way to fund surface transportation infrastructure investment. Capital investment requires capital, and there is no alternative for the systemic funding needed at the federal level.

The Coalition strongly urges you to pass H.R. 3357 to address the imminent shortfall in the Highway Trust Fund and support the Bond amendment to repeal the looming rescission. Congress must make highway and public transportation reauthorization the national priority it should be to ensure long-term stability in national infrastructure planning and investment.

Sincerely,
AMERICANS FOR TRANSPORTATION MOBILITY.

Mr. BOND. For the RECORD, this is composed of the American Public Transportation Association; American Road and Transportation Builders Association; Associated Equipment Distributors; Association of Equipment Manufacturers; Associated General Contractors; American Society of Civil Engineers; International Union of Operating Engineers; Laborers International Union of North America; National Asphalt Pavement Association; National Stone, Sand and Gravel Association; United Brotherhood of Carpenters and Joiners of America; and the U.S. Chamber of Commerce.

Madam President, our distinguished chairman of the committee has said if this bill is amended, it will fail because the House of Representatives may not take it. But as the ranking member pointed out, they are still in session. If we believe this is right, accept the Bond amendment, pass this bill as amended, send it to the House, give them the chance to do what is right. Our job is to make sure we get this business right before we go home on August recess.

If the House refuses to take it, they will have to go home and spend all next week explaining why they are at home instead of having passed a bill that could have had workers on highway and bridge projects working at home. They should be asked, if they go home, if they refuse to pass it: Why did you

leave early? The Senate is still in session. You could have stayed there and gotten rid of the rescission that will cut jobs.

There is, I guess, going to be a Budget Act point of order raised against this bill. I will, of course, ask to waive the Budget Act point of order. I would note that if you are going to take budget points of order seriously, this whole bill could be challenged on a Budget Act point of order. I will not do that because I want to see this done.

But let's be clear: This so-called money for this bill comes in from going back and assuming interest was paid on the intergovernmental transfers. We do not do that. That is totally bogus. That is a pencil-whipping trick that I do not believe anybody would honestly score.

That is the problem with the whole bill itself, not just with my amendment. If you want to be serious about paying for this bill, and my amendment, the Vitter amendment, it is very simple: We can rescind a small amount of money, a small portion of the stimulus bill that was passed, and less than only 10 percent has been used. That money we can use to put people to work on shovel-ready projects, make sure the work goes on that otherwise would be cut off by an artificial September 30 date.

I hope my colleagues will support the waiver of the point of order on the budget amendment. Because if you do not, quite simply, to put it in terms we are using every day, if we fail to repeal the rescission, we will be taking the shovels out of hands of workers ready to go to work on shovel-ready projects. That is not something I wish to go home and explain to the people of my State. I do not think Senators and Members of the House would want to go home and explain to the people or the constituents in their areas that they represent.

I call up my amendment.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Missouri [Mr. BOND] proposes an amendment numbered 1904.

Mr. BOND. Madam President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To repeal a certain provision of the SAFETEA-LU)

At the appropriate place, insert the following:

SEC. ____ . RESCISSION OF UNOBLIGATED BALANCES.

Section 10212 of the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (119 Stat. 1937) is repealed.

Mr. LEVIN. Madam President, I support repealing the rescission contained

in the SAFETEA-LU bill that requires that on September 30, 2009, \$8.7 billion of apportioned contract authority provided to States for investment in infrastructure be rescinded. This is important to Michigan and all the other States across the Nation that cannot afford to have Federal infrastructure funding cut at a time of severe funding constraints. I will work to repeal this rescission so Michigan and other States do not lose these needed Federal transportation funds.

Based on the assurances of the chairman of the Senate Environment and Public Works Committee that this will be corrected before September 30 and the extremely time sensitive nature of the underlying bill, I will oppose the motion to waive the Budget Act with respect to the Bond amendment to this bill. H.R. 3357 restores funding to the highway trust fund to keep it solvent through September. With the House of Representatives scheduled to adjourn tomorrow any Senate amendment to H.R. 3357 would require that it be sent back to the House, likely killing this important bill. We cannot risk letting the highway trust fund run out of funds.

I will work with the chairman of the Senate Environment and Public Works Committee to repeal the SAFETEA-LU rescission as part of the bill to extend SAFETEA-LU programs for 18 months.

Ms. STABENOW. Madam President, I support rescinding section 10212 of the Safe Accountable, Flexible, Efficient, Transportation Equity Act: A Legacy for Users. Section 10212 will rescind apportioned contract authority for States for infrastructure investment on September 30, 2009. If section 10212 goes into effect, my State could lose up to \$100 million in transportation funds this year alone. While I support the intent of amendment No. 1904, offered by my colleague, Senator BOND, to rescind section 10212 and maintain apportioned contract authority for States, I believe it is more important to follow the direction of Chairman BOXER and pass H.R. 3357 as a clean bill with no amendments. Providing funding for transportation, unemployment insurance, and housing programs included in H.R. 3357 are vital for the State of Michigan, and we must pass this bill quickly rather than delay it in a long conference process. I look forward to working with both Chairman BOXER, who is committed to resolving the problems surrounding section 10212, and with Senator BOND to address this problem in a timely manner.

The PRESIDING OFFICER. The Senator from California.

Mrs. BOXER. Before Senator BOND leaves the floor, I wanted to thank him for his leadership on this issue. I wanted to assure him and all the people who support this amendment that this amendment will pass. It will not pass today, I do not think, for one main rea-

son. We are fearful of playing these parliamentary games with the House on the highway trust fund.

We have until September 30 to address this issue. My friend is entirely correct, we must deal with this rescission. We have to repeal it and we are going to repeal it. I will work with him to do that.

I simply wished to say that on September 30, when we are faced with our next deadline, the entire bill has to be reauthorized. So it is not only this problem but many other issues have to be addressed. Again, I wish to state this: I am not happy the House sent us this very short extension.

I and I know my colleague wanted to see the highway trust fund extended for 18 months. I think the places we differ have to do with how we pay for the extension. Senator VITTER and all my colleagues who are dealing with unemployment insurance and the rest want to cut funds out of the job-producing stimulus program. I think it is unnecessary.

I also would say to my colleagues who say we are borrowing and we are borrowing to do all this: Simply look at the CBO score which scores this as a positive. The House bill is scored as a positive because of some of the legislative changes in it. Again, I wish to be clear, I will work side by side with Senator BOND. We are going to reauthorize the highway bill. It might be for 18 months. Maybe we can get together and we can come up with a bill for 5 or 6 years. We have to find a funding source to do that. I hope we can. But we will deal with the Bond amendment. We have to deal with it. The Senator is exactly right—exactly right.

He talks about taking shovels away from workers. The only place I disagree with him is that I think you are taking shovels away from workers by cutting the stimulus. I visited my State. I see people being put to work.

As Vice President BIDEN said: We have only seen 25 percent of the stimulus money go out the door.

So I also wanted to ask unanimous consent when Senator MCCAIN comes to the floor he wanted some time to speak on the Bond amendment. So I ask Senator MCCAIN be given up to 15 minutes to speak on the Bond amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mrs. BOXER. I yield the floor and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MCCAIN. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MCCAIN. Madam President, I rise in opposition to the Bond amendment

No. 1904, which if enacted would add another \$8.5 billion to the \$1.8 trillion deficit we are accumulating this year.

As many of my colleagues will recall, when Congress considered the Safe, Accountable, Flexible, Efficient Transportation Equity Act in 2005, the so-called SAFETEA Act, we included a section that required that \$8.543 billion of unobligated contract authority be rescinded on September 30, 2009.

The question, obviously, would arise: Why would we do such a thing, authorize money but then say it will be rescinded or cancelled? It was done for one simple reason; that is, because of the size of the bill it would have been subject to a point of order because it exceeded the budget.

By the way, I would remind my colleagues this was a \$223 billion bloated and earmarked highway bill. So apparently it is not sufficient, in the minds of some, that we at least honor a commitment we made, which would have canceled about \$8.5 billion.

Please keep in mind it was a \$223 billion piece of legislation. Please keep in mind that earlier this year we passed a \$787 billion stimulus bill, that only 10 percent of the money has been spent, and only 1 percent of the \$787 billion stimulus has been spent on highway and infrastructure projects.

So we know there are many billions of dollars more that will be spent on highway and infrastructure projects out of the stimulus bill that has not been spent. Yet that does not seem to be enough, we need to add another \$8.5 billion.

I would point out that this amendment, the same amendment, was considered in the Senate Environment and Public Works Committee on July 15 and was defeated by a vote of 14 to 5.

Well, sometime we have to stop. You keep coming to the floor time after time and saying: At some point we have to consider our children and our grandchildren and the kind of debt they are inheriting. This is another \$8.5 billion which was not budgeted, which will add to the burgeoning debt America is staggering under and at a time when we know that tens of billions of dollars additional will be spent on highway and infrastructure.

It is almost sad to see this because it began with gimmickry in order that the bill on the floor at that time would not be subjected to a budget point of order, knowing there would be an attempt at some point to restore it, which is now being made.

In 2005, we were accumulating deficits but unlike anything we have experienced in the last several months and since the economy cratered back in September of last year.

I hope my colleagues will reject this amendment. It is unnecessary, unneeded, and unwanted. Frankly, it is another sign that we don't understand how serious the deficit problem is, that

we are accumulating the biggest deficit since World War II as a percentage of our gross national product.

I hope my colleagues will vote against the amendment.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. REED. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 1905

Mr. REED. Madam President, I rise in opposition to the Ensign amendment. This amendment would fund the unemployment compensation trust fund by taking unobligated money from the recovery package. It is ironic that one of the major tools we are using to maintain employment and grow it is the recovery package. In Rhode Island, our State used about \$200 million, which is a significant sum in their budget, to ensure they didn't have to lay off workers, which would have increased the demand on unemployment, and that they could maintain services. All of this is a result of the recovery package.

We are beginning to see the momentum pick up. For example, with respect to weatherization, Rhode Island initially received some funds, but then the bulk of the funds would be received based upon submission of their plan. The plan is underway. The State will see roughly \$20 million over the next several months to get people to work doing weatherization. Not only does this help the environment, it also provides employment, particularly for those most hard hit, the construction industry.

To take this money now and put it in the trust fund is counterintuitive and counterproductive. On those grounds alone, we have to seriously look at this amendment.

The other issue that should be mentioned, among several, is that CBO has indicated that this approach of moving funds in the underlying bill has no effect on their baseline. It is an intergovernmental transfer that the underlying legislation is proposing.

So this issue, again, is more of a comment, perhaps, on the recovery package than trying to effectively stem unemployment and to provide funds for those who are unemployed.

The issue of unemployment is probably the most significant one we face in the country, particularly in my home State. We know joblessness is rising. It is 12.4 percent in Rhode Island. Rhode Island and 18 other States have had to borrow \$12 billion to keep their State unemployment trust funds solvent. Rhode Island has borrowed more than \$80 million itself to cover unemployment costs, and over the next few

months, they will draw on a line of credit of about \$40 million to keep paying these benefits, which are absolutely critical to families who have lost their jobs. If we don't, today, transfer these funds, as suggested in the underlying legislation, Rhode Island and many other States would be looking at a real crisis in which they would fail to be able to respond to this need for unemployment compensation.

On the merits of where the money comes from—i.e., the Recovery Act, which is the biggest tool we have that is trying to keep people working and employ more people—it doesn't make sense. And not making this transfer, as suggested by the underlying legislation, would imperil the State's ability to provide unemployment compensation in a labor market that is still very weak. We have to do more, and we also have to be more innovative in our approach to unemployment.

One of the things my State has done with its own resources is a work-share program. Rhode Island and 17 other States are using their resources to provide WorkShare, an effective program. Essentially, it allows an employer to cut back on the number of hours a worker is engaged, and that worker would qualify for what is basically a partial unemployment check,—not the full check, so it doesn't put that much of a drain on the trust fund. Part of the conditions in Rhode Island is that the employer must maintain the benefits the workers enjoy. So it is really a win-win-win. First, people do not lose their health care because they must maintain the benefits. Second, they are still employed, so there is continuity of workers on the factory floor or in the office. Third, the pressure on the State trust fund is lessened.

One of the things that is particularly appropriate to mention when it comes to this program is that it provides a big bang for the buck. Mark Zandi, an economist who is well renowned, has indicated that for every dollar of funds we put in through the unemployment system, we get \$1.69 back. That makes sense. People who are getting these funds are using them right away. They are going into the economy with their other funds to buy food, to buy the necessities of life they need. This has a stimulus effect on the economy. That is another reason we have to move very aggressively.

But I would like to broaden this concept of WorkShare, which has been so effective in Rhode Island, to ensure we have a system that would provide some Federal support to those States that are engaged in work share programs. Again, it is not only a very efficient program, it is very popular with industry and business in Rhode Island.

I had the occasion to visit a Hope Global plant, and they have engaged in WorkShare. In fact, the number of companies in the State engaged in

WorkShare has gone up dramatically, given the economic recession.

At this company, I listened to a woman who worked there with her husband, and they benefitted from this program. She said, point blank: Without it, we would have lost our health care and we would have lost our home.

So we can do more when it comes to flexibility and innovation with respect to unemployment. This also includes passing legislation immediately to extend unemployment insurance. Over half a million workers will exhaust their benefits by the end of September, and 1.5 million will run out of coverage by the end of the year. This is an extraordinary number of Americans, and we need to provide them the support of the unemployment system, particularly high unemployment States like Rhode Island.

Also, as I indicated before, this is a way in which we cannot only moderate the crisis of unemployment for families but also to stimulate our economy. In fact, in that sense, it complements the Recovery Act. To take away funds from the Recovery Act to place into the unemployment trust fund would blunt the overall macroeconomic stimulus that we need to get this economy moving again.

The unemployment levels today are unacceptable, particularly in my State of Rhode Island. It is the No. 1 concern. Related to unemployment, for many people in my State, is the concomitant loss of their health care. So we have to move aggressively on health care reform also. But we have to act, and we can act, and we should act. I urge my colleagues to reject the Ensign amendment.

I yield the floor.

The PRESIDING OFFICER (Mr. UDALL of New Mexico). The Senator from Georgia.

Mr. CHAMBLISS. Mr. President, I ask unanimous consent to speak as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The remarks of Mr. CHAMBLISS are printed in today's RECORD under "Morning Business.")

Mr. CHAMBLISS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. COBURN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. COBURN. Mr. President, I am expecting Senator MCCAIN on the Senate floor anytime, but I think I will begin.

The Government Accountability Office released a report yesterday that talked about the highway trust fund. What they noted is that over the last 4 years \$78 billion of that trust fund has

been spent on things other than highways, bridges, and roads.

Some of the things it has been spent on nobody would have any question. But here we find ourselves—the second time in a year—trying to bail out the trust fund, and we are going to get to decide whether we are going to steal it from our kids or steal it from the stimulus bill, which will actually make it much more stimulative than the money that is there.

But we find ourselves in trouble. When this trust fund was first set up, it was set up during the Eisenhower administration. It was designed to build the Interstate Highway System and help us with roads and bridges and secondary roads and bridges throughout the country. What it has morphed into is that a large percentage of it now does not go for any of that.

So we find ourselves in the midst of a recession—with last year having high gas prices which depressed the money going into the fund, and with a recession now, with decreasing revenues going into the fund—and we have all these projects that we know are priorities for us that need to be fixed.

The other thing we learned from this report is that 13,000 people in this country a year die because of bad roads, bad bridges, and bad highways. So it would seem to me the highway trust fund moneys ought to be spent to eliminate those 13,000 deaths, and the priority ought to be about roads, bridges, and highways.

I will put into the RECORD many other items where the money is spent. Ten percent is mandated for highway beautification. Well, I think that is great—if we do not have a trust fund that is broken, and we do not have 200,000 bridges in the country that structurally have some defect, 93,000 of which are seriously structurally defective. I think it is important that we turn our attention to priorities that will support that.

We are going to have a lot of votes on this today.

I am supportive of us doing what we need to do for the trust fund. I am also supportive of making sure the priorities of the trust funds are about bridges, roads, and highways. Because of what happened in Tulsa, OK, yesterday, we have a man in ICU. Somebody hit a bridge with a car, and he was driving under the bridge in another lane, and chunks of concrete fell through his windshield and seriously injured him. Our highway department knew we had a problem with that bridge—not going under it or over it, but the foundation was suspect in terms of the concrete underlying it, and the uprights. So the dollars that went to build a bicycle path and to plant flowers along the highways and the dollars that went to put in walking paths means that guy is in the hospital today because the dollars didn't go for what they were intended.

So when we have had \$78 billion over the last 4 years that didn't go for roads, highways, and bridges, and instead went for things that aren't going to enhance safety or help save 13,000 lives a year, America has to ask: What are your priorities?

I commend to my colleagues the GAO report: "Highway Trust Fund Expenditures on Purposes Other Than Construction and Maintenance of Highways and Bridges During Fiscal Years 2004–2008" on the GAO Web site at www.GAO.gov.

Mr. President, I make the point that as they look at this, there are important things for us to consider. We know that had we passed a better stimulus bill, we would be doing twice as much now in terms of fixing the real problems in this country in terms of transportation infrastructure. But we didn't. We passed a stimulus bill that created transfer payments on 70 percent of it, and 20 percent of it may be considered to be stimulative. So the hope is that, as we go forward—and we are going to bail this out—what we really need to do is, let's have our own money. In Oklahoma, we have never gotten 100 percent back. The highest was last year. When I came to Congress, we were getting back 74 cents out of every dollar. If we can keep that money, we can get more done with it than what we get done through the trust fund now. That may be one solution to ultimately getting us out of this situation.

Mr. INHOFE. If the Senator will yield, it is a real problem we have here. I remember, up until about 5 years ago, our trust fund took care of our needs. The problem we had was not just the fact that as it goes up, the proceeds go down, but that we got involved in things that had nothing to do with transportation. It used to be bridges, transportation, and highways. It was adequate at that time, but the hitchhikers would say there is a big surplus, so let's tap into that, and now we have all these things having nothing to do with transportation.

Mr. MCCAIN. Will the Senator yield?

Mr. COBURN. Yes, but first I have one other point.

In the last 20 years, we have built 25 transportation museums rather than the money going to highways. Remember the Minneapolis bridge that collapsed? We are putting money into museums, and I wonder if we are going to build a museum about the collapse of the bridge in Minneapolis. We are putting money into museums instead of making sure the roads and bridges—especially the bridges—are safe in this country. Our priorities are messed up, and the American people know that. Hopefully, we can redirect transportation dollars to true transportation projects, not to the aesthetics that we cannot afford now, even though they may be nice, and, No. 2, are causing additional deaths on our highways.

Mr. McCAIN. Will the Senator yield for a question?

Mr. COBURN. Yes.

Mr. McCAIN. Couldn't it also be traced to earmarks and porkbarrel and "demonstration projects"? Couldn't it be traced to the fundamental fact that the 1982 highway bill included 10 demonstration projects totalling \$386 million? The 1987 bill had 152 porkbarrel projects, totaling \$1.4 billion. The 1991 bill had 538 locations with specific porkbarrel projects, totaling \$6.1 billion. The 1998 highway bill had 1,850 earmark projects, totaling \$9.3 billion, and then in 2005 had 5,634 earmark projects, totaling \$21.6 billion. How can anybody who calls himself or herself a fiscal conservative stand by and allow this kind of thing to happen?

And what happens? There was \$2.3 billion for landscaping enhancements along, of all places, the Ronald Reagan Freeway; \$480,000 to rehabilitate a historic warehouse along the Erie Canal; \$600,000 for the construction of horse-riding trails in Virginia; \$2.5 million for the Daniel Boone Wilderness Trail Corridor; \$400,000 to rehabilitate and redesign the Erie Canal Museum; \$400,000 for a jogging, bicycle, and trolley trail in Columbus, GA. How in the world can those things be justified and then expect our constituents not to rise up?

Mr. COBURN. The answer to the Senator's question is, they can't. There is no question that there are certain priorities. What has happened is, as we try to address priorities for individual States, because the States don't get their money back—and there may be a great project in there, and along comes a lousy one.

I just make the point that we have our eye off the ball. The eye needs to go back. All you have to do is go read the story that happened in Tulsa, OK, yesterday. Had we been applying money to transportation instead of nontransportation through this trust fund, that gentleman probably would not be in the hospital today. A 700-pound piece of concrete fell through his windshield, trapping him in the car. We don't just have a problem of not enough money in the trust fund, our problem is that the money that goes out doesn't go for the real things the trust fund was designed to do in the first place.

I will restate, and then I will yield back. We have to do one of two things. Until this country gets out of the financial damage it is in, first, we have to make sure the money is spent on transportation projects, real transportation projects, to save some of those 13,000 who are being lost because we are not fixing roads, bridges, and highways. Second, let's eliminate the thing and let the States keep their money, and we will figure out how to spend it at home. In Oklahoma, we have never gotten a square deal yet.

Mr. McCAIN. Will the Senator yield for a question?

Mr. COBURN. I am happy to.

Mr. McCAIN. Does the Senator know how much we are spending on highway and transportation projects in the stimulus, the \$787 billion stimulus bill?

Mr. COBURN. It could be around 4 or 5 percent. Senator INHOFE will know the answer to that.

Mr. INHOFE. The answer is 3.5 percent, and an additional 3.5 percent in military construction, totaling about 7 percent.

Mr. McCAIN. Does the ranking member know how much of that has been spent in dollars?

Mr. INHOFE. Sixty-seven percent has not been obligated, so 33 percent is obligated.

Mr. McCAIN. I thank the Senator.

Mr. COBURN. Let me add, also, that if you go to USAspending.gov and to recovery.gov, you will find that as of last week—I don't know what it is this week—only \$78 billion of the whole stimulus package has actually been spent. More of it has been obligated but not actually spent. I think there is another \$150 billion obligated out of that. That is one of the reasons we are not seeing the effect of the stimulus. One, it is not going to stimulate things, and it is not getting to where we need it.

Mr. INHOFE. If the Senator will yield, that is another reason the Vitter amendment and Ensign amendment are good. You are talking about money that is out there, not recoverable. Let's try to direct it where we can get something from it. I had an amendment during the stimulus bill to try to triple the amount of money that would go into actual construction, and they would not take it up.

The PRESIDING OFFICER. The Senator from Arizona is recognized.

Mr. McCAIN. Mr. President, as Senator COBURN has just mentioned, we released a report today examining how the highway trust fund receipts have been used for projects other than road and bridge construction and maintenance over the past 5 years. It relies heavily on the new GAO analysis that was performed at our request on how we prioritize, or fail to prioritize, our Nation's transportation spending.

Again, I remind my colleagues that the GAO concluded that, over the last 5 years alone, we spent \$78 billion on projects other than road and bridge construction and maintenance. I will repeat that—\$78 billion on projects other than the construction and maintenance of roads and bridges.

Where did it go? According to GAO, over \$2 billion was spent on 5,547 projects for bike paths and pedestrian walkways. As one example, it identified a \$878,000 project for a pedestrian and bicycle bridge for a Minnesota town of 847 people. I don't know what that works out to be, but it works out to roughly \$1,000 per person. I would be

interested to know how many inhabitants actually use that bridge. We all know about the "bridge to nowhere"; perhaps this is a "bridge for no one." Another \$850 million went for 2,272 "scenic beautification" and landscaping projects around the country, and \$84 million was spent on roadkill prevention, wildlife habitat connectivity, and highway runoff pollution mitigation projects. Yet another \$84 million went to 398 pedestrian and bicyclist safety projects. I don't mean to diminish safety, but do we really need to spend Federal dollars for brochures like the one we cited in our report that encouraged bicyclists to "make eye contact, smile, or wave to communicate with motorists. Courtesy and predictability are a key to safe cycling." Still another \$28 million went to the transportation museums, and \$215 million went to scenic or historic highway programs. The list goes on. I know Americans find these numbers as disturbing as I do. They should because they demonstrate that Congress is not focused on our Nation's transportation priorities.

We should not forget that 2 years ago, the I-35 West Bridge over the Mississippi River collapsed during rush hour, killing 13 and injuring 123 more of our fellow citizens. That tragedy exposed a nationwide problem of deficient bridges. According to the Department of Transportation, in 2008, of the Nation's 601,396 bridges, 151,394, or 25 percent, of our bridges were deficient. Over 71,000 of them had significant deterioration and reduced load-carrying capability, and almost 80,000 didn't meet current design standards. Yet we have been spending billions of dollars on bike paths, museums, landscaping, and roadkill-reduction programs.

Part and parcel of the problem, obviously, is the addiction to earmarks. As I mentioned before, the way the earmarks have grown, one of the standard arguments made by the earmarkers and porkbarrelers in Congress is that it has always been like this; we have always had congressional discretion because we know better than the bureaucrats where the taxpayers' money should go. Frankly, I agree that sometimes that is the case, if it competes with other programs, if it is scrutinized and authorized by the appropriate committees. But what we do is we earmark these porkbarrel projects, and many times—let's have a little straight talk, Mr. President—they are in return for campaign contributions, and we see corruption.

People are under investigation. Lobbyists' offices are being raided by the FBI. Again, I am not going to repeat what I said to the Senator from Oklahoma, but the 1982 highway bill had 10—count them—10 demonstration projects, and it was \$386 million; in 1987, \$1.4 billion; 1991, \$6.1 billion; 1998, we get up to 1,850, totaling \$9.3 billion;

and 2005, 5,634 earmarked projects totaling \$21.6 billion of American taxpayers' dollars. That is where we find the bypasses and the beautification projects and the trails. And all those are earmarked by specific Members of Congress. Meanwhile, we have 25 percent of our bridges that are deficient and 71,000 of them have significant deterioration and reduced load-carrying capability and 80,000 that do not meet current design standards.

What are we going to say to the taxpayers of America if, God forbid—and I pray not—there is another bridge collapse? What do we say to them? That we took their tax dollars and built a museum instead of fixing their bridges and highways to ensure their safety?

Maybe—just maybe—if we had not spent \$21.6 billion on earmarked projects, maybe some of that money, just maybe some of that money might have gone to fix the design problems on the bridge over the Mississippi. Maybe not. Maybe we didn't know. I am not making a judgment here. But it seems to me that sooner or later, if you earmark as much as \$21.6 billion of the taxpayers' money for museums and bypasses and brochures, sooner or later the priority projects suffer.

Again, projects originally authorized under SAFETEA-LU, the 2005 highway bill, included \$3.2 billion for landscaping enhancements along the Ronald Reagan Freeway. I have often wondered how often Ronald Reagan turns over in his grave. I bet he was spinning on that one. Mr. President, \$480,000 to rehabilitate a historic warehouse along the Erie Canal; \$600,000 for the construction of horse riding trails in Virginia. You will notice all these projects are earmarked to a specific locality. That is what, among other things, they have in common. There is \$2.5 million for the Daniel Boone Wilderness Trail Corridor; \$400,000 to rehabilitate and redesign the Erie Canal Museum; \$400,000 for jogging, bicycle, and trolley trails in Columbus, GA. The list goes on and on.

No one thinks our Nation should be without flowers, ferries, bike paths, and boat museums. But today we have to make some choices about priorities and how we spend limited resources.

This has to be considered in the backdrop of this year a \$1.8 trillion deficit, the largest in the history of this country since World War II. There is no end in sight. It is almost overwhelming, a \$1.8 trillion deficit this year. But what is worse, there is no way out. No one knows of a plan to bring us to a balanced budget without fundamental reform of Medicare and Social Security. Here before us on health care reform, we see another trillion dollars piled on that.

When are we going to decide we cannot afford taxpayers' dollars to rehabilitate and redesign museums, for trails, for beautification and land-

scaping enhancements when we have other priorities on transportation that have to do with the safety of our citizens?

I thank the Senator from Oklahoma for his continued advocacy for the taxpayers of America. I thank him for all the efforts he makes. I regret that neither he nor I will be elected Miss Congeniality in the Senate again this year. But I also believe the American people are beginning to wake up, and they are beginning to get angry. We saw this in the tea parties that took place all over this country. I hear it and see it in response to my Twitters. Over 1 million people now follow my Twitters and my tweets. They are very interested in this. We are going to post all these. We are going to let the American people know where their dollars have gone.

I urge my colleagues, let's, for once, catch up with the American people and start becoming fiscally conservative. One of the best ways we can be careful stewards of their tax dollars is to make sure we place as our highest priority their safety as they travel the highways and cross the bridges of the United States of America.

I yield the floor.

The PRESIDING OFFICER. The Senator from Alabama is recognized.

Mr. SESSIONS. Mr. President, what is the time remaining on this side?

The PRESIDING OFFICER. On the Vitter amendment, 9 minutes is remaining.

Mr. MCCAIN. If the Senator will yield, so I may make a unanimous consent request, I ask unanimous consent to have printed in the RECORD the Introduction and Conclusion of a report entitled "Out of Gas: Congress Raids the Highway Trust Fund for Pet Projects While Bridges and Roads Crumble" by Senator COBURN and myself.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

INTRODUCTION

One of the many recent government bailouts consisted of \$8 billion for the bankrupt Highway Trust Fund (HTF)—a fund set up to support, through federal gasoline and other taxes, all federal transportation programs and projects.

However, the \$8 billion did not solve the problem. The Highway Trust Fund will go bankrupt (again) by the end of August 2009 unless Congress bails it out (again). This week the U.S. House of Representatives voted to spend \$7 billion of taxpayers' money, just to keep the Fund temporarily afloat, and the U.S. Senate is poised to do the same. Mere months ago, Congress provided over \$27 billion for highway and infrastructure projects as part of the American Recovery and Reinvestment Act of 2009.

Yet billion-dollar government bailouts are not the solution to protect our nation's infrastructure. Congress must begin by reprioritizing funds.

Flowers, bike paths, and even road-kill reduction programs, are just some of the many examples of extraneous expenditures (some of which are legally required) funded by Con-

gress through federal transportation bills. Many of these projects are funded as earmarks, while others are born from legislators turning their private passions into public programs. Congress instead should allow states greater flexibility to allocate their highway dollars to their most pressing transportation needs. If Congress fails to reprioritize transportation spending, then crumbling bridges, congested highways, and poor road conditions will continue to deteriorate much to the detriment of all Americans.

Congress must also curb its addiction to earmarking and setting aside transportation funding for legislators' pet projects and programs. If history is any guide, though, the next highway bill will not be earmark free. Congress has increased significantly the earmarking of federal highway funding:

The 1982 highway bill included 10 demonstration projects totaling \$386 million;

The 1987 highway bill included 152 demonstration projects totaling \$1.4 billion;

The 1991 highway bill included 538 location-specific projects totaling \$6.1 billion;

The 1998 highway bill included 1,850 earmarked projects totaling \$9.3 billion; and

The 2005 highway bill included over 5,634 earmarked projects totaling \$21.6 billion.

GAO RELEASES NEW REPORT

A new U.S. Government Accountability Office (GAO) report, compiled at the request of Senators Tom Coburn and John McCain, details how the U.S. Department of Transportation (DOT) has obligated \$78 billion over the last five years for "purposes other than construction and maintenance of highways and bridges." This \$78 billion figure does not fully capture how much has been promised, or authorized, by Congress over the last five years for these "other purposes," it just reflects how much has been released for spending, or obligated, so far.

The \$78 billion, five-year total for obligated expenditures for non-highway, non-bridge construction or maintenance projects includes:

Over \$2 billion on 5,547 projects for bike paths and pedestrian walkways and facilities;

\$850 million for 2,772 "scenic beautification" and landscaping projects;

\$488 million for behavioral research;

\$313 million for safety belt performance grants;

\$224 million for 366 projects to rehabilitate and operate historic transportation buildings, structures, and facilities;

\$215 million for 859 projects under scenic or historic highway programs;

\$121 million on 63 projects for ferryboats and ferry terminal facilities;

\$110 million for occupant protection incentive grants;

\$84 million for 398 projects for safety and education of pedestrians and bicyclists;

\$84 million for 213 road-kill prevention, wildlife habitat connectivity, and highway runoff pollution mitigation projects;

\$28 million to establish 55 transportation museums;

\$19 million for 25 projects to control and remove outdoor advertising;

\$18 million for motorcyclist safety grants; and

\$13 million on 50 projects for youth conservation service.

While some of these expenditures may merit funding, periodic congressional review is essential to determine if all merit continued funding, if measurable outcomes are demonstrating their success, and if their goals could be accomplished with fewer dollars.

Upon review, Congress may find some of these expenditures are unnecessary luxuries and others—such as establishing new transportation museums—simply cannot be justified while the Highway Trust Fund has insufficient funds for repairing dangerous roads and bridges.

RE-EXAMINE BEFORE REFILLING

As Congress debates “refilling” (by deficit spending) the soon-to-be-empty Highway Trust Fund, it should first look at ways to reprioritize areas of current spending that may not reflect the realities of a decaying national transportation infrastructure. Many politicians are quick to defend spending millions in federal funds on their districts’ bike paths, transportation museums, road-side flowers, and even the “bridge to nowhere.” Yet, Congress needs to evaluate whether such projects merit federal funding in light of our current trillion-dollar deficit, the economic downturn, and the realities of a collapsing transportation infrastructure that literally is costing American lives.

THE STATUS QUO WILL NOT WORK

Critics of the GAO report and this report will claim these examples are but a small portion of overall transportation spending and do not begin to address the long-term Trust Fund shortfall.

Yet, we cannot continue to spend \$78 billion in areas other than crucial road and bridge construction and maintenance and beg Congress to steal from our nation’s children and grandchildren when the Highway Trust Fund runs dry. We cannot spend hundreds of millions of tax dollars to renovate “historic facilities” such as gas stations and then complain that history will look poorly on a nation that let its vital interstate transportation system fall into disrepair.

We should not force states to spend approximately 10 percent of all their surface transportation program funds on “enhancement” projects like landscaping, bicycle safety, and transportation museums, when fixing a bridge or repairing a road would be a more practical and necessary use of these limited funds.

We have asked individuals and families across the country to examine their own budgets and start spending more responsibly. We should expect nothing less of our nation’s leaders in Congress.

TOM COBURN.
JOHN MCCAIN.
U.S. Senators.
CONCLUSION

Our country is literally running on empty. Future generations of Americans will inherit a multi-trillion dollar debt because Washington politicians have long relied on reckless borrowing to finance their wish lists of pet projects and programs. There seems to be no crisis facing our nation that Washington politicians believe borrowing or bailouts cannot solve.

Now the politicians want to be trusted with yet another bailout, this time of The Highway Trust Fund. Politicians will not make tough choices, so taxpayers must begin demanding them.

The choices faced today with the Highway Trust Fund are:

What is the best way to spend Highway Trust Funds: Is it to make roadways and bridges more scenic, or more safe?

What is the best way to pay for our nation’s infrastructure needs: Is it to raise taxes on gasoline, borrow more money for yet another government bailout, or reduce spending on non-essential projects that do not strengthen roads or bridges?

GAO reports our nation obligated \$78 billion over five years to projects other than crucial bridge and highway maintenance and repair. Now, Congress is being asked to borrow \$7 billion from general tax revenues to only temporarily refill the Highway Trust Fund.

No one is saying our nation should be without flowers and ferries or bike paths and boat museums. But today’s choices must be about priorities. Should those priorities include spending millions on programs that tell bikers to smile and making states use funds for the safety of their turtles instead of the safety of their citizens?

At a minimum, states should be given the flexibility to opt out of the federal Transportation Enhancement funding requirement.

The shortfall in the Highway Trust Fund could also be addressed without further deficit spending by shifting unused funds from the American Recovery and Reinvestment Act of 2009. Transferring unspent stimulus funds to ensure the Highway Trust Fund remains solvent would be consistent with a stated purpose of the Act to improve our transportation infrastructure to support job growth.

Congress should walk the fiscally responsible path. Each chamber should implement a moratorium on all transportation-related earmarks for the remainder of the 111th Congress.

Washington politicians should be required to sit down with the new GAO report, the transportation bailout request, and our red pens. From there, crossing out extraneous transportation spending should be our first priority. Lives depend on it.

Mr. MCCAIN. I thank my colleague from Alabama.

Mr. SESSIONS. Mr. President, while Senator MCCAIN is here, we were talking about the amount of money the government has spent. We talked about how a third of the money has been obligated from this stimulus package. But I advise, according to the CBO report in June, they only expected 11 percent of the money to actually be disbursed by the end of this year, at least the money that deals with highways, mass transit, and issues of that kind. That is stunningly low because we were told something quite different.

This Vitter amendment is exactly the kind of thing we need to be doing every single day: try to challenge the conventional thinking to figure out how we can deal with a need today without increasing America’s debt.

What Senator VITTER says is when we passed this \$800 billion stimulus package in January, nobody had a chance to read it. We were told repeatedly—and the President himself said more than once—it was to build infrastructure, to complete highways, roads, and bridges. That is what the money was going to be for. He said in February: They are not going to be make-work jobs but jobs doing the work Americans desperately need done, jobs rebuilding our crumbling roads and bridges, and jobs repairing our dangerously deficient dams and levees so we won’t face another Katrina.

I am not sure Congress can stop another Katrina from coming, but we can

perhaps be better prepared for it. But what a lot of people do not know, is that less than 4 percent of the money in that bill was directed for highways and bridges. It was a game, a political trick, because the American people believe that when you need to create jobs, you might as well build something that is permanent, that will benefit the people for years to come and that creates real jobs. In their minds, I think most people envisioned stepping up our road projects. But only, as I said, 4 percent of the entire package went for that purpose.

Now we have a lot of that money not spent. Apparently, 89 percent will not be spent by the end of this fiscal year. Some of it is not obligated at all. We have a shortage in the foundational highway trust fund bill, and we need to come up with \$27 billion. So which do we do? Do we take some of the money that was in the stimulus package that we were told was to be for roads and bridges and use that money and not increase the deficit because that money is already showing up as a hit to the U.S. Treasury or does the money come from some other source that will increase the debt by \$27 billion?

The only reason not to oppose this, that I can see, is some people have already spent this \$27 billion in their own minds. They don’t want to see it utilized for this purpose, and they are undermining our ability to do so. We have a national crisis.

Let me show this chart. It is so stunning that people don’t believe it, but it is based on the budget that President Obama submitted, his 10-year budget. It was analyzed by the Congressional Budget Office, our own group here who has a good reputation. Basically, the Director is elected by a Democratic majority in the Congress, and this is what they show about our deficit.

We have to stop doing this. We cannot sustain a deficit.

In 2008, the debt was \$5.8 trillion. The debt of the United States, since the founding of the American Republic, was \$5.8 trillion. In 5 years, according to the CBO, by following this budget, counting this stimulus package but not even counting the trillion dollar health care proposal and other things that might get added to it, they scored that in 5 years, the debt would be \$11.8 trillion—double. In 5 more years, taking it to 10 years, the debt would triple to \$17.3 trillion. This is the entire debt of the United States of America since the founding of the Republic—it will triple in 10 years. It is unacceptable. We cannot sustain this.

Let me show this chart. Trillions is difficult for people to comprehend, but when you borrow money and you go into debt, you have to pay interest on it. People buy Treasury bills. That is what we do to fund the deficit.

In 2009, this fiscal year, we will make interest payments of \$170 billion on the

debt and the money we borrowed. The total Federal highway program, I believe, is \$40 or \$50 billion, isn't that right Senator INHOFE? He is the expert. So this is four times the Federal highway bill annually. We spend approximately \$100 billion on education. These interest payments increase every year. According to the Congressional Budget Office, 10 years from now, we will not be spending \$170 billion on interest, we will be spending \$799 billion. That is the red numbers, \$799 billion in interest, for which we get not 1 foot of highway paved, not \$1 to the classroom, not \$1 for health care, just interest because we borrowed so much money.

I also point out the numbers do not get better. Over the 10-year budget, the Obama budget, the debt goes up rapidly in the outyears. I note that President Bush was criticized for having a big deficit. The highest deficit he ever had—which was unacceptable, I have to say—was \$459 billion. According to the Congressional Budget Office, there is not 1 year in the next 10 that we will have a deficit that low. The lowest year is over \$600 billion. They calculate the deficit as it grows, and in the 10th year, they calculate the deficit for that 1 year to be \$1.1 trillion—\$1.1 trillion—on an upward spiral.

What I wish to say is there is no plan to pay this debt off. The only plan we have is to see surging debts into the future. That is why you have heard this phrase repeatedly, "This is not sustainable." And it is not. But when we cannot even use our stimulus money to fix the road problem we have, we are not serious about the challenges facing this country.

The bit about interest, if the interest rates go up higher than CBO has scored based on the amount of money we have to borrow—and that could happen—we could end up with an annual interest payment of over \$1 trillion.

Mr. INHOFE. Will the Senator yield? Mr. SESSIONS. Yes, I will.

Mr. INHOFE. First of all, we made an effort—and the Senator referenced the Vitter amendment. We have 67 percent of the \$789 billion that is not obligated. That means it is not there. The Senator is right; in their minds it may be obligated, but it is not obligated. We tried to have an amendment to triple the amount of money that would have gone to roads and highways and bridges back during the consideration, and we couldn't get that in. The Senator was a cosponsor of my amendment. Now we are trying to do the same thing we were unable to do then.

This is supposed to be a stimulus bill. The total amount of stimulus in this bill, in my opinion, is about 7½ percent. This is an opportunity to do something with real jobs and not have any problem in increasing our debt or deficit.

So I appreciate the fact that my colleague is coming down, and several

Senators will be coming down, and drawing this to the attention of the American people as well as to our friends on the other side. There is our opportunity to save lives, to do infrastructure—one of the major reasons we are here in this Chamber today.

Mr. SESSIONS. I appreciate that comment and my colleague's leadership. He has consistently been a champion for infrastructure and roads. We face a tight budget, and I feel strongly about this. I know I am raising my voice but somehow we have to break through the fog and let the American people know that every time we face a little problem we can't just spend more money. We have to look for ways to solve the problem that doesn't increase our debt.

By the way, in case anybody has any doubts, any new spending that we initiate increases the debt because we are running a deficit. So any new spending increases the deficit for the year because it is not offset or paid for.

So I am worried about where we are heading. I do believe infrastructure will pay for itself in the long run, but there is a limit to how much we can spend on it. However, I will concede that we certainly don't need to have a savaging of our highway bill at this point in time and have hundreds of thousands of people perhaps laid off from work because we don't have the money to finish projects that need to be completed. Instead, let's take the money that is in the stimulus bill. Let's take that money and use it now to fix the shortfall in the highway trust fund. Once we do that, we will create jobs. How many, I don't know, but it will create jobs, and that is a double benefit.

We get a permanent benefit for the American infrastructure, and we create jobs for Americans now. We take the money that is sitting there and not being spent and accelerate its use in the time we need it.

I would point out to my colleague the reason this is important, and the reason the administration was able to ram through this stimulus bill—the largest single expenditure in the history of the American Republic, almost \$800 billion in one fell swoop, with hundreds of pages and people having no idea what was in it—is because they said we are facing rising unemployment, and we need to get this money out in a hurry so we can put people to work. Well, only 11 percent of it is going to be obligated by the end of this year.

Unemployment is already at 9.5 percent, and most experts are predicting it will probably continue to go up to 10, maybe 11 percent. Yet we can't get this money out, and we are cutting the highway budget? When we have this shortfall, what do people come up with? Well, they are going to pay for it by adding more debt. We have an economic slowdown, so we no longer have

to worry about the deficit. We don't have to worry about the deficit, they tell us. But we do.

Our children are going to be paying interest on these trillions of dollars for the rest of their lives, and the only people who are going to get the benefit from it are the people living today. That is a selfish thing. We should use the stimulus in an effective way to create jobs—and there are even debates about how wise some of those methods are economically. But the way this package is being managed, the money is not getting out, unemployment is surging, and there doesn't seem to be any hope for the short term for unemployment to abate. So I am worried about it. I do believe we can do better.

They will say: Well, President Bush had a deficit. We inherited all this. But President Bush didn't ask for the \$800 billion in stimulus money that President Obama asked for this year. That is on top of the debt, and I think anybody who is president needs to be thinking about how to reduce spending not see it spin out of control. I don't believe President Bush would have submitted a budget that shows in 10 years—in that one year, 2019—it would be \$1.1 trillion. We have never seen anything like that.

There will not be a year of President Obama's Presidency, according to this—if he serves 8 years—in which this deficit will be as low as President Bush's, and they are predicting growth. No recession is projected in the next 10 years, when CBO scored what the deficits might be. So this is a fair analysis of it.

Mr. President, I want to say I am pleased Senator VITTER has proposed a way that will allow us to meet the shortfall in the highway trust fund without increasing the debt this year, and it is consistent with what the people who proposed the stimulus bill promised all along—that the stimulus money would be used for highways and bridges. It is the right thing to do. I hope we can pass this, and I think the American people should watch closely on how the votes go on this bill.

I thank the Chair, I reserve the remainder of the time, and I yield the floor.

The PRESIDING OFFICER. The Senator from Illinois is recognized.

Mr. DURBIN. Mr. President, our national debt is a national challenge and a national problem, and we can face it and face it honestly, Democrats and Republicans. We can't leave these debts to our children. That is a fact. But let's have some honesty in recounting the history of this debt.

When President Clinton left office 9 years ago, he gave to President George W. Bush a surplus not a debt, a surplus. He had not only balanced the budget, he was generating a surplus, and it was giving longer life to Social Security. President George W. Bush inherited

this surplus and an accumulated national debt over the 200-year history of the United States of \$5 trillion—\$5 trillion. Remember that number because 8 years later, when President Bush left office, the national debt had doubled—doubled—with the support of his party.

Why did it double? It doubled because he fought a war and didn't pay for it. He accumulated debt year after year—in addition to the terrible casualties and losses of our brave fighting men and women—and left that debt to future generations. Then, in the midst of this, he cut taxes. For the first time in the history of the United States of America, a President, in the midst of war, cut taxes for the wealthiest people in our country, supported by the same party that comes now and preaches to us their sermon of fiscal integrity.

So when President Bush left office, he left President Obama a deficit and a national debt that had doubled under his watch, with Republican congressional leadership support. That is a fact. Those are facts. President Obama inherited that debt and inherited the problems that came with it and the sickest economy America had seen in 75 years. That is what he was given.

So President Obama said: We have to be serious about our debt, but we have to be honest about it too. Until we get out of this recession, until we stop this rampant unemployment where people are losing their jobs and can't fend for their families and can't pay taxes—obviously, because they do not have work—we are going to see this deficit continue to grow. To stabilize this economy, we need to put people back to work.

The President said: I know it is tough to spend money when you are in debt, but at this moment in time it is like buying a tourniquet to stop the bleeding. We have to do it, even if it takes every penny we have. And he put together a stimulus bill to get this economy back on its feet. With the exception of three then-Republican Senators, not a single one of them would support this effort to stop the recession.

When President Obama came to office, we were losing 741,000 jobs a month. Now, 4 months into our 24-month stimulus, we have cut that number by one-third, and I hope we have turned the corner. But this massive economy of ours, connected throughout the world with so many other global economies, it is pretty tough to turn this battleship and move it in the right direction. I think the President has done the right thing.

The amendment offered by the Senator from Louisiana is an amendment which says: Give up. Give up on stimulating this economy. Give up on stopping this recession. Stop building these projects that create American jobs—good-paying jobs. Stop investing in our infrastructure for future generations.

Stop addressing this recession head on and pray for a good outcome.

I am sorry, but I can't buy it. The Senator from Louisiana is offering a proposal to take money out of the President's recovery and reinvestment package that was determined to stabilize this economy. He wants to take the money out of it when we are 4 months into it. He says this morning: We are not spending this money fast enough.

Incidentally, he voted against this, but now he is criticizing it saying we are not spending it fast enough. Well, I want to spend it quickly, but I want to spend it wisely, and I want accountability. At the end of the day, the taxpayers will hold us all accountable: Did you spend our tax dollars wisely? Did you spend them on projects that really do benefit our country? Did you waste it? Was there fraud? I want those questions answered in the positive frame of mind that we have done everything we can do. So it is not being spent as fast as its critics say, but I think it is being spent wisely, and we are creating jobs all across America.

Thousands of projects are on line now creating good-paying jobs. The amendments we are considering today on the Republican side of the aisle, all from Members who opposed the President's effort to stop this recession with the stimulus bill, every one of them wants to put an end to the stimulus package. With 150 days into this 2-year bill, they want to put an end to it by starting to take money out of it. They have given up on it. They have given up on a package which, incidentally, provided a tax break for 95 percent of the working families in America.

Does that help? You bet it does. These families are struggling in the recession too. They have seen their life savings devastated by the stock market in the last year. Giving them a helping hand is a sensible thing to do.

It is a bill they voted against—the President's bill—which says let's give unemployed workers \$25 more per week so they can get by. Sure, it doesn't sound like a lot of money, except when you don't have a job and every penny counts. They want to criticize, as well, the President's idea of providing health insurance to unemployed workers. No, they said that was a terrible idea. They voted against it.

Think about this: You have just lost your job, you may lose your house, your child has to go to the doctor with a raging fever, and you pray to God a diagnosis isn't going to come down that will wipe out your life savings. For them it is an extravagance—the idea of providing health insurance for unemployed people. For me, it is part of America, a caring country that stands by people when they are facing the misfortunes of losing their job.

The list goes on and on, and they oppose all of it. They now come and say,

we not only opposed it at the outset, we are going to start taking money out of it. We are going to pass it around, moving it in a lot of directions. Some want to put it in the highway trust fund, some in unemployment insurance, and some want to put it in housing programs. But the net result is the same. It takes the money the President wanted to use to stimulate this economy and create good-paying jobs. We need to resist these amendments.

Mr. President, I understand Senator DEMINT wants to offer an amendment, and we are supposed to close at 2. So I don't know if he is prepared at this time, but if he is, I would be happy to yield the floor.

THE PRESIDING OFFICER. The Senator from South Carolina is recognized.

Mr. DEMINT. I thank my colleague. I would like to make a few comments. I am not going to offer an amendment at this time.

Mr. President, sometimes in this place it is hard to extract the truth from the words. I, frankly, don't understand the opposition to using money for transportation that has already been allocated to transportation.

I think we have had enough of saying we need to spend more money and borrow more money because the Bush administration spent too much and borrowed too much. This is a bipartisan problem. Hopefully, we will have a bipartisan solution.

What is being proposed today is we need more money for highways. The highway trust fund is running out of money. We need more money to pay unemployment benefits. They are running out of money. We would like more money for FHA loans. We have to decide do we want to use money that is already designated for purposes of our economy and helping people who don't have jobs or do we want to borrow more money and spend more money and add more money to our debt?

I don't think this situation is a good reason to say: Hey, we were bad in the past, so let's continue those practices. We are not suggesting with these amendments that we should stop the stimulus plan. We are saying we should use it for the same purposes it was set up for. Let's use it to build roads and bridges and create jobs. Let's use it to make sure those who are unemployed get their benefits. Let's use it to restimulate our housing market.

THE PRESIDING OFFICER. The Senator will now suspend. The Senate is ready to take a recess.

Mr. DEMINT. I thank the Chair for all the time to speak, and I yield the floor.

THE PRESIDING OFFICER. Under the previous order, the Senate stands in recess until 3 p.m.

RECESS

Thereupon, the Senate, at 2 p.m., recessed until 3 p.m., and reassembled

when called to order by the Presiding Officer (Mr. FRANKEN).

HIGHWAY TRUST FUND EXTENSION—Continued

The PRESIDING OFFICER. The Senator from Texas is recognized.

Mrs. HUTCHISON. Mr. President, I wish to speak about the transfer of the highway trust fund money. I do, of course, support having the money in the highway fund because so many States need to have this money and we need to assure it is there. I also support the amendments that would use the stimulus money so it would not be new money.

But I do wish to talk about the highway trust fund because I think it is important, as we are talking about this very important transportation issue for our States, that we begin the debate about whether the highway trust fund is now the appropriate vehicle for keeping our Federal highways repaired and also doing the best for every State in transportation. What concerns me is that the first reason for the highway trust fund back in President Eisenhower's day over 50 years ago has been achieved. Yet we are still continuing to have the same formulas where some States are winners and some States are losers. But every State today has the capacity to determine its own priorities and the capacity to fund those priorities, unlike 50 years ago when there were many States that had very little capacity. They had little property, they had little taxable revenue sources, and therefore there was a need for a national system of highways to assure that we had national security. That was the first reason for it—but also mobility and commerce.

Today, however, I think it is time for us to start all over. I think it is time for us to allow States to opt out of the highway trust fund.

Of course, I am speaking for the largest donor State in America. We give more back to other States than any other State. We are a State that has more highway miles than any other State; therefore, we collect more taxes. Because we are a donor State, we give the most away. If these were States that could not meet their own needs and my State of Texas was a State that had its needs covered, maybe you could argue that would be OK. But, in fact, that is not the case. In fact, Texas is facing a huge shortage in our highway funding. We now have two cities that have mass transit systems that are certainly very successful but very far behind the curve when it comes to the transportation glut on our highways. We need to have the money in Texas to start meeting our great transportation needs.

This also affects our environment, because when we have people clogged in traffic, sitting on freeways hour

after hour, of course it is bad for the ability to get where you want to go, but it is also bad for the environment to have the fumes going in the air.

I think today it is time for us to start the debate. Why not let a State opt out, agree to keep in good repair the Federal highway system and allow the States to use their own taxpayer dollars for their own priorities to meet their own transportation and mobility needs? If Texas could keep all the money it raises, rather than toll roads, which are now being contemplated throughout our State, perhaps we could have a mobility plan that would include highways, rapid transit, high-speed rail, and more innovative ideas that are very costly, which we cannot afford at this time.

Obviously, today we are going to go forward with extending the trust fund and replenishing the highway trust fund because that is what people want to do because we don't have time to address the whole issue of reauthorization at this very complicated time. I wish we were not going to consider an 18 month extension in September because I think we ought to have a short-term extension, so we do have the reauthorization of the highway bill, so we can start discussing these priorities—so we can start maybe thinking outside the box. Maybe we can start all over.

The highway trust fund and the highway authorization bill is a mishmash of different projects. I don't think there is fairness in the system at all. You have donor States, you have winner States, and the winner States have all the capacity. The loser States have as much need as the winner States, and the winner States have the ability, I believe, to fund their own options.

Even though I know we are going to extend the highway bill for 18 months by the end of September, and I know we are going to replenish the highway fund today—and I wish it would be from our stimulus package so it would not be yet another deficit-inducing measure from this Congress—I think I am going to lose all the arguments I am making. But I do think it important that we bring this issue to the forefront.

There is no reason in this country today for winner States and loser States. Our States should be able to plan for themselves, make their own priorities, meet their needs, be able to be more efficient, have multimodal systems—which is what I hope for Texas—and be able to use our own tax dollars for our own needs. Were we a State that did not have needs, were we a State that was not growing, maybe we could afford to continue giving 8 cents back for every \$1 we send to Washington. Maybe we could afford to leave the 8 cents in Washington.

Instead, we are getting 92 cents back for every \$1 we send to Washington. That is hundreds of millions of dollars

that we need for our high-growth State that has many traffic problems and congestion problems today. We will repair our highways. We would sign an agreement to repair our highways so there would be no Federal responsibility for that. But I hope this argument will be the beginning of a debate so we can instate a system that will be more in tune with today's times, 50 years after the National Highway System was created—a wonderful system that connects our country but one, now, that is finished. We have our National Highway System. We do have connectivity among our States. Why not allow the States to go out from those Federal highway miles and lanes, to go into their States in the best way for each individual State?

I thank Senator BROWN for allowing me to speak on this issue. I hope, as we go through, we will have more of a discussion.

I do have a bill introduced that would allow States to opt out. It is something I think the time has come to address.

I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. Without objection, the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BROWN. Mr. President, I ask unanimous consent the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BROWN. I ask unanimous consent to speak in time counting against the Ensign amendment. I ask unanimous consent to speak as in morning business and the time be counted against the Ensign amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BROWN. Mr. President, I first congratulate the Presiding Officer for his first time in the Presiding Officer's chair and wish him many more of these. I know the experience will continue to enrich him and enrich the Senate. I thank the Presiding Officer of the Senate.

Mr. President, last week, more than 1,500 Ohioans woke up at dawn to wait in a line that snaked around the W.O. Walker Center, co-owned by the Cleveland Clinic and University Hospital.

Last week, President Obama also visited the Cleveland Clinic—one of our Nation's premier health care centers.

He observed firsthand how the Cleveland Clinic and cutting-edge health care centers like University Hospitals and Metro Health are providing high-quality care while reducing patients' costs.

But the more than 1,500 Ohioans who stood in line at 5 a.m. last Saturday morning were not waiting for President Obama.

They were waiting to see one of hundreds of dermatologists, nurses, urologists, cardiologists, neurologists, infectious disease specialists, dentists, and

other volunteers who were providing free health care for one of Cleveland's first mass health clinics.

Need a pair of glasses? Lead optician Dr. Rob Engel checked your vision while volunteer Sharon Connor helped you select a pair on the spot.

Need prescription medicine? You were able to visit Margo and Rob Roth, who ran the clinic's pharmacy.

Worried about women's health services? Dr. Laura David, an obstetrician from University Hospitals, was ready to help.

Along with volunteers Maria Parks and her husband Lee, I helped sign-in and register a number of Ohioans.

Many of them were members of hard-working families worried that they might join the 14,000 Americans who lose health insurance each day.

Maria, Lee, and I heard one organizer call a medical volunteer a "hero" for stepping forward to help their neighbors.

That same volunteer responded by saying the real heroes are the fathers, mothers, sons, and daughters struggling every day in the shadow of a looming health care crisis that threatens to send their family into financial ruin.

In fact, most of the people who sought health services at the weekend clinic were from middle class families who had fallen on hard times.

Together with MetroHealth, St. Vincent's, University Hospitals, Case Western Reserve University, and the Cleveland Clinic, Medworks volunteers provided the kind of health care all Americans need, but too many don't receive.

Medworks founder Zac Ponsky turned not only to his community but to his family to contribute their time.

Zach's wife Taryn helped coordinate the many moving parts of the clinic. Kim Ponsky, Zac's sister, is a professional photographer who documented the weekend.

Meanwhile, Zac's father Jeff, brothers Lee and Todd, and sister-in-law Diana—all physicians—provided a standard of care that most of the patients that day had never received.

During a single weekend, the generous volunteers of Medworks taught us the meaning of compassion and humility.

They led by example.

Many patients received multiple services, while doctors made instant referrals to other Cleveland-area doctors for those patients not originally scheduled.

Over the course of the weekend, seven people needing advanced care, once diagnosed, were able to receive it at local hospitals.

More than 130 women had pap tests and nearly 100 women received vouchers for free mammograms at Women's Diagnostics.

Nearly 300 people either walked out of the clinic with a brand new pair of

glasses or will be receiving a new pair soon.

A number of patients received vouchers for follow-up eye care at St. Vincent's Charity Hospital, an exceptional hospital in Cleveland.

Approximately 50 people were tested for HIV. But it was not just health care services that were provided. Each patient also spent time with a social worker who provided counseling and information about followup services. The Ohio Benefits Bank was on hand to offer prescreening for medical, housing, energy, tax, employment and other programs. Approximately 100 patients took advantage of that service.

All told, approximately 300 community members, 100 doctors, 175 nurses, and social workers volunteered their time and services during this Saturday/Sunday event. This includes a number of volunteers who simply showed up unannounced. It included a few patients who were so grateful for the care they then volunteered to stay after their appointments to help.

Building on effectiveness of the weekend, MedWorks is now focused on patient followup. Currently, a team of doctors is reviewing medical records to follow up with emergency cases and to help those people suffering from chronic illness.

MedWorks volunteer and chief of surgery at University Hospitals, Dr. Jeff Ponsky, said:

We're very hopeful that this will become a regular part of our community. We'll get better at it, and we'll be a leader for the country.

We can do more for the millions of Americans who are one illness away from financial ruin. We can do more for the 14,000 Americans who lose their insurance every day. We can do more for the 45 million uninsured and the tens and tens of millions of underinsured in this country.

Today is the 44th anniversary of President Johnson's signing of Medicare. Medicare changed our Nation. It helped pull millions of seniors out of poverty; it fostered personal independence; it fueled our economy; and it helped retirees live long and healthy lives.

Just as those who worked tirelessly 44 years ago to secure health care for America's seniors, the generous MedWorks volunteers in Cleveland are doing all they can for their community.

In Washington, we are working to effect change in our health care system. That is our duty, to make this historic change, to reform the health insurance industry, to allow our Nation to move on from human tragedy—from the health care related bankruptcies, from the competitive disadvantage American businesses face from the huge costs, the burden that small businesses face in this country. We can keep working, keep fighting for the change Americans are demanding.

The Ohioans I met in Cleveland last Saturday, and every Ohioan from Lima to Zanesville, from Chillicothe to Ash-tabula, every American in every town in every State in this Nation all deserve the humane justice of stable and secure health care. That means quality and affordable health care options, public and private both. It means the health care plan that was voted out of the HELP Committee on which the Presiding Officer sits. It means the plan that came out of that committee 2 weeks ago, a plan that injects competition between private insurance plans and a public option, an option that people can choose. It will make those plans work better, cut costs, and keep the insurance companies honest. That will mean people, if they are laid off—if people are laid off in Marion or Dayton, OH, people who have lost their insurance, people in Wapakoneta, in rural Ohio, all will have a public option to compete with sometimes all too few private insurance companies in their areas.

To all the MedWorks volunteers, including Jack Ponsky and his family, including Karil Bialostosky, Joel Goldstein, and Brian Smith, I thank all of you for your commitment, your compassion, and your care for those in need.

Now it is up to us to provide the kind of health care to protect what works in our health care system and to fix what is broken in our health care system.

I yield the floor, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. LIEBERMAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LIEBERMAN. Mr. President, I ask unanimous consent now that the debate time remaining with respect to amendments offered be yielded back; that after Senator THUNE offers his amendment, then debate time on that amendment extend until 3:45 p.m., divided as previously provided; that at 3:45 p.m. today, the Senate proceed to vote in relation to the amendments and motion to waive in the order listed, with 2 minutes of debate equally divided and controlled, in order prior to each vote, with the vote time after the first vote limited to 10 minutes each as follows:

Vitter amendment No. 1907, as modified; Ensign amendment No. 1905, as modified; Bond amendment No. 1904; the Thune amendment I have referred to; and the Boxer motion to waive the applicable Budget Act point of order; that with reference to amendment No. 1904, if a Budget Act point of order is raised against the amendment, then a motion to waive the applicable point of

order be considered made, further that all other provisions of the previous order remain in effect.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LIEBERMAN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mrs. BOXER. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mrs. BOXER. Mr. President, we are going to vote on a series of Republican amendments to a bill that has come over from the House of Representatives that funds the highway trust fund until September 30, that funds unemployment insurance, and that helps us with the housing crisis and allows us to see more mortgages go to qualified families of America.

It is important to note that if we don't accept the House package, we are really playing Russian roulette with the highway trust fund. As the chairman of the Environment and Public Works Committee, who works very hard with my colleague Senator INHOFE across party lines to ensure we have a robust infrastructure program, I want to be clear: If we don't pass this House bill, then we are up against the wall. We send a very bad signal to the people who are counting the contracts that go out for the highway program and the work that follows. We have many working people who count on these jobs.

I support one of these amendments. The Bond amendment makes eminent sense. I do take issue with the timing because we have been told by our House colleagues that this is all we are going to do; if we amend this bill, then we are stuck. So it is one of those awkward and difficult moments.

Truth be told, the people out there who are working hard are not going to get all the subtleties of the moment. They want to make sure their job is there in the morning.

So even though I support one of these amendments, the Bond amendment—and I have stated and Senator BOND understands that I will be supporting him when we reauthorize this bill September 30; we will take care of this rescission—we don't have to take care of it now. What we must take care of today is the highway trust fund. It is running out of funds. We have to act. I hope we can do it across party lines.

The other thing I support is an 18-month extension of highway programs. That is, again, something I have done with my Republican colleagues. We passed out of the Environment and Public Works Committee, on a unanimous vote, an 18-month extension. Senator BAUCUS, over on Finance, was able

to come up with an intergovernmental transfer that does not add to the deficit of about \$27 billion to ensure that we can go forward for 18 months while we sit down across party lines and figure out the long-term answer to funding our highway and transportation needs over the next 5 years.

There is a split between the Senate approach and the House approach. The House approach, which I don't agree with, is to keep making short-term extensions as a way to force us to act in the long term. But we all know we have to figure out a funding source that will take us through the next 5 or 6 years. It is going to take time, and we need to do it right. I believe in making sure we have a pay-go system. I am not willing, as the chairman of the committee, to simply hand off a huge bill to the Finance Committee without any recommendations. So it will take us a little while. We have a difference between the House approach and the Senate approach.

But here is the point and why I believed it was important to be heard before we vote. The House has a very short-term extension. That is what they have given us. They have told us that if we don't take this, we are not going to be able to ensure that the highway trust fund is solvent. I, for one, am not willing to play games with this. It is too serious. Even though I don't agree with the House approach, we have other days left to make the case.

The other point I want to make is that the Republican approach to this is the 18-month extension, which I fully support, and the way they pay for it is by saying: We are going to take money out of the stimulus program, the economic stimulus program that has just begun to take hold in the country. The Republicans didn't vote for it, most of them—three of them did, but the others didn't—and they want to stop it. It is counterproductive, in a time of recession, to stop a jobs program right in the middle. These are jobs for highways, transportation, cleaning up Superfund sites. These are jobs that are dealing with water infrastructure, with education. Of all the times to come up here and recommend that we stop this jobs program now, this is wrong.

I am totally willing to work with my colleagues so at the end of the stimulus bill, at the end of that time, which is in about 18 months, if we have not spent some of those funds, we should take a hard look at putting those funds into the Treasury to reduce the deficit, perhaps. Perhaps we need at that point to use some of it for the highway trust fund. But today is not the day.

If I could summarize where I see things today, we have a series of Republican amendments that basically say we should stop this, we should take funds out of the stimulus package now

in order to pay for unemployment insurance, in order to pay for the highway trust fund, and in order to pay to help our people with their mortgages. And it is counterproductive.

On the one hand, they are doing something to help the economy by helping our people with mortgages, by ensuring there is unemployment insurance, and ensuring there is money in the highway trust fund. On the other hand, they are stopping jobs to do it, and it is not necessary. The House bill, although I do not appreciate the fact that it is a very short-term extension of the highway trust fund, is deficit neutral. CBO has so scored it. So we do not have to do this, and we should not do this.

As I understand it, it is time now to have that series of votes. So I make a parliamentary inquiry as to what time we are having those votes.

The PRESIDING OFFICER. The time under the previous order has expired.

Mrs. BOXER. All right. Then I would yield the floor, and I hope we would be voting at this point.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. INHOFE. Mr. President, it is my understanding that Senator SESSIONS is going to get one more amendment in, and then we will start the voting; is that correct?

Mr. SESSIONS. Mr. President, that would be my preference. I would be pleased to call up this amendment now. I do not know what the time agreement is at this point.

Mr. INHOFE. We are ready to vote as soon as the Senator brings it up.

AMENDMENT NO. 2223

Mr. SESSIONS. Mr. President, I ask unanimous consent to call the amendment up and to be able to speak for 2 minutes.

Mr. INHOFE. That sounds good.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SESSIONS. Mr. President, we have an opportunity to save \$200 billion. It is time for us to do the right thing. We cannot keep spending more and more.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Alabama [Mr. SESSIONS] proposes an amendment numbered 2223.

The amendment is as follows:

(Purpose: To restore sums to the Highway Trust Fund and for other purposes in a fiscally responsible manner)

Strike all after the enacting clause and replace:

SECTION 1. FUNDING OF THE HIGHWAY TRUST FUND.

Subsection (f) of section 9503 of the Internal Revenue Code of 1986 (relating to determination of trust fund balances after September 30, 1998) is amended—

(1) by striking paragraph (2), and

(2) by adding at the end the following new

“(2) INCREASE IN FUND BALANCE.—Out of money in the Treasury not otherwise appropriated, there is hereby appropriated (without fiscal year limitation) to the Highway Trust Fund \$7,000,000,000.”.

SEC. 2. ADVANCES TO THE UNEMPLOYMENT TRUST FUND AND OTHER FUNDS.

The item relating to “Department of Labor—Employment and Training Administration—Advances to the Unemployment Trust Fund and Other Funds” in title I of division F of the Omnibus Appropriations Act, 2009 (Public Law 111-8; 123 Stat. 754) is amended by striking “to remain available through September 30, 2010” and all that follows (before the heading for the following item) and inserting “such sums as may be necessary”.

SEC. 3. FHA MORTGAGE INSURANCE COMMITMENT AUTHORITY.

The item relating to “Federal Housing Administration—Mutual Mortgage Insurance Program Account” in title II of division I of the Omnibus Appropriations Act, 2009 (Public Law 111-8; 123 Stat. 966) is amended by striking “\$315,000,000,000” and inserting “\$400,000,000,000”.

SEC. 4. GNMA MORTGAGE-BACKED SECURITIES GUARANTEE COMMITMENT AUTHORITY.

The item relating to “Government National Mortgage Association—Guarantees of Mortgage-Backed Securities Loan Guarantee Program Account” in title II of division I of the Omnibus Appropriations Act, 2009 (Public Law 111-8; 123 Stat. 967) is amended by striking “\$300,000,000,000” and inserting “\$400,000,000,000”.

SEC. 5. USE OF STIMULUS FUNDS TO OFFSET APPROPRIATION OF FUNDS.

The unobligated balance of each amount appropriated or made available under the American Recovery and Reinvestment Act of 2009 (Public Law 111-5) is rescinded pro rata such that the aggregate amount of such rescissions equals the aggregate amount appropriated under the amendments made by this Act. The Director of the Office of Management and Budget shall report to each congressional committee the amounts so rescinded within the jurisdiction of such committee.

Mr. SESSIONS. I thank the Presiding Officer.

We cannot keep spending more and more. We have several different problems—we have housing problems; we have a problem with unemployment insurance because more people are unemployed than had been predicted; and we have a problem with a shortfall in the highway fund.

Some Senators could argue we do not need to fix every one of these because we do not have the money. But in a way we do have the money because we passed \$800 billion in a stimulus package earlier this year. It was supposed to be primarily, we heard, for roads. But only 4 percent went to roads. So we can fix the shortfall in the highway trust fund by using some of the \$800 billion we have already spent. We can fix the other two problems—unemployment insurance and housing—in the same fashion. Those can be fixed out of this fund.

This amendment would do that. It would reduce the other accounts across the board. Of course, we will still be in

session this year and next year. If we need to adjust other things in some way, we can. Don't let anybody tell you this is going to savage some other account because we can fix those accounts.

I will just say—I know my time is short—this is \$200 billion that will either go to increase spending and increase debt, or we can meet these needs—which hopefully are all necessary—out of the funds we already have out there. If we do not start making these kinds of decisions soon, we are going to have a real problem. According to the scoring of the President's own budget, the total debt of America debt has gone from \$5 trillion this year, to \$11 trillion 5 years from now, to \$17 trillion 10 years from now.

I thank the Presiding Officer and yield the floor.

AMENDMENT NO. 1907, AS MODIFIED

The PRESIDING OFFICER. Under the previous order, there is 2 minutes, equally divided, on the Vitter amendment.

The Senator from Louisiana.

Mr. VITTER. Mr. President, I rise and urge strong bipartisan support for the Vitter amendment. The Vitter amendment simply moves \$7 billion from the stimulus—less than 1 percent of the original stimulus program—to backfill and take care of the need in the highway trust fund.

This is important to do for two reasons.

First of all, we need to stop the reckless borrowing. We are borrowing ourselves into oblivion. We are borrowing our children into poor economic times. We need to reverse that trend. The underlying bill fixes the hole in the highway trust fund simply by racking up more debt, and that is why there is a budget point of order against it. So we need to stop this never-ending upward spiral of borrowing.

No. 2, by doing this, we can focus a little bit of the stimulus on something I believe we all think it always should have been focused on: infrastructure spending and spending now versus later. This will move the \$7 billion toward roadway spending now, which is effective stimulus.

The PRESIDING OFFICER. The Senator has used 1 minute.

The Senator from California.

Mrs. BOXER. Mr. President, I urge strong bipartisan support against the Vitter amendment. There is nothing about reckless borrowing going on. I have already put into the RECORD today the CBO analysis of the House bill that is before us that says it even creates a little bit of surplus because of how this is handled. This is not going on the debt. So let's not stand here and say what it is about.

The second point is, there are tens of billions of dollars in unspent funds that we authorized on a bipartisan vote on the stimulus package. I know most of

my colleagues on the other side never wanted to do that stimulus package. I understand that. I respect it. But the fact is, we finally see these funds going out and hiring the people we want to make sure have jobs. We see and we hear from our Governors that the funding is helping them retain teachers, police officers. We see funding is helping them move forward with shovel-ready projects.

The PRESIDING OFFICER. The Senator's 1 minute has expired.

Mrs. BOXER. OK. I urge a “no” vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

Mr. VITTER. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second.

The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. DURBIN. I announce that the Senator from West Virginia (Mr. BYRD), the Senator from Massachusetts (Mr. KENNEDY), and the Senator from Maryland (Ms. MIKULSKI) are necessarily absent.

The PRESIDING OFFICER (Mrs. SHAHEEN). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 42, nays 55, as follows:

[Rollcall Vote No. 249 Leg.]

NOT VOTING—3

Byrd	Kennedy	Mikulski
------	---------	----------

The amendment (No. 1907), as modified, was rejected.

Mrs. BOXER. Madam President, I move to reconsider the vote.

Mr. DURBIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1905, AS MODIFIED

The PRESIDING OFFICER. There is 2 minutes equally divided.

The Senator from Nevada.

Mr. ENSIGN. Madam President, the next amendment we are going to vote on is a very simple vote, similar to the last one. What it says is the States right now are borrowing from the Federal unemployment trust fund, and that trust fund has been depleted. There are more States that are going to need to borrow from it. It is temporarily putting back into that trust fund a little over \$7 billion.

Next year, there is going to be about \$30 billion that is going to be needed. Does anyone around here, with the dire straits States are in, believe we will not forgive this debt for the States? That is why I am saying don't just borrow the money—even though CBO says this is deficit neutral, let's not borrow the money, which is what is going to end up happening. Let's take it out of the stimulus funds and let's be fiscally responsible around here. States need the help. Those who are unemployed need help. Let's give the help but do it in a fiscally responsible way. That is really the purpose of this amendment. I encourage all Senators to vote for it.

The PRESIDING OFFICER. Who yields time in opposition?

The Senator from Illinois.

Mr. DURBIN. Madam President, I rise in opposition to the Ensign amendment. I know the Senator has the best of intentions. The underlying bill takes care of the unemployment insurance account. It does it in a deficit-neutral fashion. In fact, it generates a surplus, extra funds beyond what is needed for this purpose.

What the Senator from Nevada wants to do, if you can imagine, is he wants to cut back on spending in the stimulus program, which is building highways and projects across America. He wants to reduce the President's effort to create jobs, thereby creating more unemployment in order to have more money for unemployment in America. It does not work.

We have a good program here. The underlying program takes care of the need of the UI fund, and the President's stimulus package, now 150 days into operation, is generating jobs and opportunities across America. We do not need to kill the stimulus package at this moment. We need to make sure it works to get America back to work.

Please defeat the Ensign amendment.

Mr. ENSIGN. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The question is on agreeing to the amendment. The clerk will call the roll.

The bill clerk called the roll.

Mr. DURBIN. I announce that the Senator from West Virginia (Mr. BYRD), the Senator from Massachusetts (Mr. KENNEDY), and the Senator from Maryland (Ms. MIKULSKI) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 41, nays 56, as follows:

[Rollcall Vote No. 250 Leg.]

YEAS—41

Alexander	Ensign	McCain
Barrasso	Enzi	McConnell
Bennett	Graham	Murkowski

Feingold		

NOT VOTING—3

Byrd	Kennedy	Mikulski
------	---------	----------

The amendment (No. 1905), as modified, was rejected.

AMENDMENT NO. 1904

The PRESIDING OFFICER. There is now 2 minutes evenly divided before a vote with respect to the Bond amendment.

The Senator from Missouri.

Mr. BOND. Madam President, if I could have the attention of my colleagues, please, this measure simply ends the rescission in the SAFETEA-LU highway funding bill we passed 4 years ago which otherwise takes \$8.7 billion out of highway and bridge contract authority for the States. Best estimates are that this would cost 250,000 jobs in all 50 States.

To the argument that we have to take this exactly as the House has passed it because they won't stick around—well, they are in session. If this is right, let's do it.

And for the Budget Act point of order, if you wanted to have this paid for, you should have taken the Vitter amendment. The underlying bill requires the Budget Act point of order waived because it is funded by claiming the nonexistent interest on intergovernmental transfers. That is a trans-

parent sleight of hand or a sleight of pen.

If you want to keep from taking the shovels out of the hands of workers on shovel-ready jobs in every State in the Nation, please vote aye on the waiver of the Budget Act point of order.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DURBIN. Madam President, I would like to ask my colleagues if they will follow me for just one moment. This is a little complex, but if you will follow me.

First, I agree with Senator BOND's amendment and will vote for it, but not at this moment. Here is why. This rescission Senator BOND wants to achieve is something most of us agree with. If it doesn't happen, the penalties will come to our States on September 30. What we have is the assurance of the chairman of the Environment and Public Works Committee that she will put this rescission in the reauthorization of the highway trust fund before September 30 so there would not be any loss to States.

So what is the problem? Why don't we do it today? Because if we do it today, we jeopardize this extension of the highway trust fund until September 30. We are trying to get this done in short order so we can end the session and come back and do the right thing before September 30. All we are asking today is for you to join us in saying to Senator BOND: Thank you for your good thought, but hold that thought until September.

We still have time to make sure we do the right thing, and we have the assurance of the chairman that it is going to happen. It pains me greatly to raise a point of order against my friend from Missouri on an amendment whose substance I agree with, but if we want to protect the highway trust fund and we want to have an orderly adjournment to the session and not jeopardize jobs, then we need to vote against the Bond amendment.

The PRESIDING OFFICER. The Senator has used his time.

Mr. DURBIN. Madam President, I make a point of order that the pending amendment violates section 302(f) of the Congressional Budget Act of 1974.

Mr. BOND. Madam President, do I have any time?

The PRESIDING OFFICER. The Senator has used his time as well.

Under the previous order, a motion to waive is considered made.

Mr. DURBIN. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question occurs on agreeing to the motion.

The clerk will call the roll.

The legislative clerk called the roll.

Mr. DURBIN. I announce that the Senator from West Virginia (Mr. BYRD), the Senator from Massachusetts (Mr. KENNEDY), and the Senator from Maryland (Ms. MIKULSKI) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The yeas and nays resulted—yeas 34, nays 63, as follows:

[Rollcall Vote No. 251 Leg.]

YEAS—34

Alexander	Harkin	Sanders
Barrasso	Hutchinson	Shaheen
Begich	Inhofe	Shelby

NOT VOTING—3

Byrd	Kennedy	Mikulski
------	---------	----------

The PRESIDING OFFICER. On this vote, the yeas are 34, the nays are 63. Three-fifths of the Senators duly chosen and sworn not having voted in the affirmative, the motion is rejected.

The point of order is sustained and the amendment falls.

AMENDMENT NO. 2223

Under the previous order, there will now be 2 minutes of debate equally divided prior to a vote in relation to amendment No. 2223, offered by the Senator from Alabama.

Mr. SESSIONS. Madam President, among some of the things I think most Members would like to accomplish is fixing the highway trust fund, fixing the unemployment insurance shortfall, and to do something about the housing loan authority. Those are three matters we can address without increasing our deficit. There is \$7 billion in the highway fund this amendment would fix, which is the short-term fix the House did; another \$7 billion for unemployment insurance; and the \$185 billion for the housing fix. Those things we can do within the stimulus package.

Only 11 percent of the \$800 billion will be spent by the end of this fiscal

year. We can use that money to fund these programs, take care of them as we planned to do from the beginning but without increasing the debt.

People say the underlying bill will not increase the debt. That is not accurate. If we agree to this amendment, we will prevent increasing the Nation's debt by \$200 billion.

I urge your support for the amendment. At this point in time we need to save a few billion dollars.

The PRESIDING OFFICER. The Senator from California is recognized.

Mrs. BOXER. Madam President, I hope colleagues will listen. What this Sessions amendment does, it takes all the corrections that are in the underlying bill—making sure the highway trust fund does not go bust, making sure the unemployment trust fund is full, making sure we have help for our middle-class families seeking to get mortgages—and it funds it instead of in a deficit-neutral way that is in the underlying bill which I put in the RECORD, the CBO score which actually scores positive in terms of the surplus over the 10 years, it slashes the stimulus funding right as it is beginning to take hold.

If you want to take care of all these things, and I think we all do, let's do it the right way. Let us not do it the wrong way and slash funds from the stimulus bill as we are beginning to see it take hold.

I urge a "no" vote on the Sessions amendment.

The PRESIDING OFFICER. All time has expired. The question is on agreeing to the Sessions amendment.

Mr. SESSIONS. Madam President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The clerk will call the roll.

The legislative clerk called the roll.

Mr. DURBIN. I announce that the Senator from West Virginia (Mr. BYRD), the Senator from Massachusetts (Mr. KENNEDY), and the Senator from Maryland (Ms. MIKULSKI) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 40, nays 57, as follows:

[Rollcall Vote No. 252 Leg.]

YEAS—40

Alexander	DeMint	McCain
Barrasso	Ensign	McConnell
Bayh	Enzi	Murkowski
Bennett	Graham	Nelson (NE)
Bond	Grassley	Risch
Brownback	Gregg	Roberts

Feingold	Menendez	Whitehouse
Feinstein	Merkley	Wyden

NOT VOTING—3

Byrd	Kennedy	Mikulski
------	---------	----------

The amendment (No. 2223) was rejected.

The PRESIDING OFFICER. Under the previous order, there will now be 2 minutes of debate equally divided prior to a vote on the motion to waive.

The Senator from California.

Mrs. BOXER. Madam President, I yield 30 seconds to Senator INHOFE.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. INHOFE. Madam President, this is a very significant vote. I am very upset that we have a lot of things in here I didn't want—the unemployment insurance loans, the Federal Housing Administration loan limit increase. That should not be there. The amendments failed. I wish they had passed. I voted for them.

The thing that bothers me more than anything else is the House put us in this position. They said: Here is the bill; you do it; we are leaving town. That is exactly what happened.

So this is the final vote. We have to have 60 votes. For all practical purposes, this is the final vote. I urge my Republican friends to support waiver of the point of order.

The PRESIDING OFFICER. The Senator from California.

Mrs. BOXER. Madam President, I thank my ranking member. He and I, as everyone knows, don't always agree. But when we do agree, we hope our colleagues will follow. We do not want to play Russian roulette with the highway trust fund. We have to make sure it stays solvent. I urge an "aye" vote.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. VITTER. Madam President, this is about a budget point of order. That means the bill, since it was not amended as I would have liked, is contrary to the Budget Act. It has more outlays this year. It also requires us to rack up more debt, borrow more money. In the face of \$2 trillion of new debt this year, doubling that in 5 years, and tripling it in 10, this is a critical vote. Either you vote yes and say let's continue to go down that path or you vote no and say we need to change course about debt.

Mrs. BOXER. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be.

The question is on agreeing to the motion.

The clerk will call the roll.

The legislative clerk called the roll.

Mr. DURBIN. I announce that the Senator from West Virginia (Mr. BYRD), the Senator from Massachusetts (Mr. KENNEDY), and the Senator from Maryland (Ms. MIKULSKI) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The yeas and nays resulted—yeas 71, nays 26, as follows:

[Rollcall Vote No. 253 Leg.]

YEAS—71

Akaka	Franken	Nelson (FL)
Alexander	Gillibrand	Pryor
Baucus	Hagan	Reed

Cornyn	Isakson	

NOT VOTING—3

Byrd	Kennedy	Mikulski
------	---------	----------

The PRESIDING OFFICER. On this vote, the yeas are 71, the nays are 26. Three-fifths of the Senators duly chosen and sworn having voted in the affirmative, the motion is agreed to.

Mrs. BOXER. Madam President, I move to reconsider the vote.

Mrs. MURRAY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. NELSON of Nebraska. Madam President, when the stimulus bill was being debated, I advocated that any package include a robust investment in rebuilding our Nation's infrastructure. While the stimulus takes a big step in the right direction to address the needs of our aging transportation system, many more steps need to be taken.

I believe that the issues that we face with the solvency of the highway trust fund is an opportunity to make sure that more funding from the stimulus is

directed towards our Nation's roads, while not adding new spending and increasing the Federal deficit. I would encourage any unobligated funding that is redirected as a result of the passage of the amendments offered today be in addition to any stimulus funding already provided for road projects; especially in the case of local road projects. Road projects at the local level will be vital part of the engine that drives our Nation's economic recovery in communities across the country and not maintaining funding for those projects would be a step in the wrong direction.

Finally, an investment in our Nation's roads is a two-for-one: it creates jobs while helping to rebuild our infrastructure. By making sure the highway trust fund remains solvent and continuing to invest in important transportation projects, we can rededicate our efforts to addressing our transportation system needs.

Mr. DODD. Madam President, I rise in strong support of this legislation.

In addition to the important sections dealing with transportation and unemployment insurance, the bill before us today includes two important provisions that are crucial to our Nation's housing market—it increases the authority of the Federal Housing Administration—FHA, to insure loans and the authority of the Government National Mortgage Association—GNMA, to guarantee securities backed by FHA loans.

Just about 2 years ago, the housing market started to implode as the predatory and abusive loans that were pumped out by banks and mortgage lenders started to fail in great numbers. These loans were made by lenders who knew these borrowers could not afford to repay them, and they were made under the eyes of regulators who were indifferent to the fate of the borrowers and who underestimated the impact on our financial system.

These loans were originated by mortgage brokers or retail lenders with funds provided by Wall Street. Nobody took any responsibility for the quality of these loans because everyone thought they were laying the risk off on the next guy by securitizing the loans and selling them off. Regrettably, it is the American people—and the economy—that is paying the price today in the form of a severe credit crunch that is affecting homeowners, small businesses, entrepreneurs, and every consumer that uses a credit card.

As we all know, foreclosures have skyrocketed. Some analysts predict that 8 million homeowners will lose their homes to foreclosure before this crisis is over.

In fact, as the mortgage market has ground to a halt, housing prices have fallen all over the country, in many places by 20 percent or more. This problem is being exacerbated by foreclosed homes flooding the market, driving home prices down further.

The only mortgage credit available in this country is credit that is provided, directly or indirectly, by the Federal Government. A key component of this, accounting for about 30 percent of the new mortgages being made in the market today, is FHA-insured mortgages.

The legislation before us would increase FHA's authority to insure mortgages. If we do not do this, FHA could shut down while we are away on recess. That would mean that about 30 percent of the mortgage credit that is available today to homebuyers and homeowners would simply vanish from the marketplace.

The impact of this would be immediate and devastating—a likely spike in interest rates; more foreclosures; and fewer home purchases as buyers withdraw from the market.

Just this week, we heard some data which indicate that home prices may be stabilizing. But the situation is fragile. If we eliminate FHA from the marketplace, we could eliminate tens of thousands of potential home buyers from the market, as well. As demand dropped, so would home prices, starting a new cycle of economic despair and disinvestment in our cities and towns. That is why the National Association of Realtors, the National Association of Home Builders, and the Mortgage Bankers Association all strongly support this legislation.

The story is much the same with the GNMA increase. GNMA makes it possible for lenders to make FHA loans, and then sell them in federally guaranteed loan pools. GNMA creates an essential outlet for FHA loans so that banks and other lenders can make more mortgage credit available. Without the increased commitment level included in this bill, GNMA will also be forced to close its doors.

These two provisions of the bill before us are crucial for working American families. I strongly urge my colleagues to pass this legislation so that we can send it to President Obama for his signature.

Mr. WARNER. Madam President, as the Highway Trust Fund Act moves through the Senate, I would like to take a moment to stress the importance and urgency of reforming our national transportation system.

I commend Chairman BOXER for her leadership on this effort to keep the trust fund solvent. But the fact that we needed this emergency infusion indicates a much greater problem with the transportation system and how it is funded. I recognize and appreciate the desire to pass a clean 18-month extension of SAFETEA-LU. However, I think we can all agree that fundamental reform will be needed when the time comes to consider a full 6-year authorization bill.

Our Nation's infrastructure is currently inadequate to preserve our global competitiveness and the way we allocate funds for surface transportation lacks true accountability. In short, we do not tie funding to performance. To move to a true performance-based system, there are some immediate steps that should be taken.

An 18-month extension provides a unique opportunity to take some of these steps. Without making any policy reforms or adding any programs, we can begin to collect information on how well transportation funds are serving the public, which will ease our transition to a reformed and effective long-term policy. I have drafted an amendment that would direct the Secretary of Transportation to coordinate with states, metropolitan planning organizations and our new chief performance officer to develop metrics to address the following factors: (1) National Connectivity: How have transportation investments improved the connection of people and goods across the Nation?

(2) Metropolitan Accessibility: How have transportation investments allowed Americans in metropolitan regions to access their jobs and other activities more reliably and efficiently?

(3) Energy Security and Environmental Protection: How have transportation investments reduced carbon emissions and petroleum consumption?

(4) Safety: How have transportation investments improved safety by reducing fatalities and injuries associated with transportation?

My proposal outlines how States and metropolitan regions can begin to report these measures. The factors above are outcome-oriented, objective and measurable. They are also designed to cut across all modes of transportation, and to measure performance across an entire region as opposed to measuring specific projects in a vacuum.

This legislation will help ease the transition to a more performance-based system. Not only will it provide us with actual performance data, but it will help clarify what additional resources states will need to better provide such data in the future.

I look forward to working with my colleagues in the Senate on this initiative to ensure its inclusion in any extension of SAFETEA-LU.

Mr. INHOFE. Madam President, I have worked with the chairmen of the Environment and Public Works, Banking, Commerce and Finance Committees over the last month to put a bill together to address two urgent issues facing the Nation's highway program. First, the highway trust fund is going to run out of money sometime in the next few weeks and will require an infusion of \$5 to \$7 billion to get us through the rest of fiscal year 2009. Second, SAFETEA the 2005 highway bill, is set to expire in 9 weeks. With no realistic chance of Congress passing a

fully funded reauthorization before the program expires, it is essential to provide funding certainty with a longer term extension. States cannot afford to move forward with transportation development activities without confidence in long-term and consistent future Federal reimbursements.

Unfortunately, the House chose not to address both issues, but rather just provide the money necessary to ensure that the highway trust fund does not go broke over the August recess. Their decision has put the Senate in a situation of taking or leaving their bill. I do not like it and frankly think the responsible thing would have been to take up the Senate bill, which would have provided for an 18-month extension of the existing program. The House has been short sighted in forcing the Senate to only address the trust fund fix; with so many other important issues facing Congress, the Senate now must return in 30 days to do this all over again before the program expires at the end of September. I also did not like the added provisions of the loans to unemployment insurance fund or the increase in the Federal Housing Administration cap on loans they can authorize under the Mutual Mortgage Insurance Program. Finally, I thought all the amendments offered by my Republican colleagues were improvements to the bill, but unfortunately, none of them were adopted. Nonetheless, I supported final passage and most importantly voted to waive the point of order that was raised because we cannot afford to allow the highway trust fund to become insolvent. While the bill we adopted today only addresses the immediate trust fund shortfall I look forward to taking care of the extension of the program when we return in September along with the fix of the \$8.7 billion rescission as proposed by Senator BOND's amendment. Given the fiscal pressures on states and the current economic downturn, I agree with the administration that this uncertainty would be devastating to States and would translate into job losses, and so we need to provide certainty until we are able to pass a comprehensive bill.

I am hopeful that as soon as we return from August recess that we will immediately consider the extension legislation introduced earlier this week by all the relevant committees.

The PRESIDING OFFICER. Under the previous order, the clerk will read the bill for the third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall the bill pass?

Mr. GREGG. Madam President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second.

The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. DURBIN. I announce that the Senator from West Virginia (Mr. BYRD), the Senator from Massachusetts (Mr. KENNEDY), and the Senator from Maryland (Ms. MIKULSKI) are necessarily absent.

Mr. KYL. The following Senator is necessarily absent: The Senator from Oklahoma, Mr. INHOFE.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 79, nays 17, as follows:

[Rollcall Vote No. 254 Leg.]

YEAS—79

Akaka	Franken	Nelson (NE)
Alexander	Gillibrand	Nelson (FL)
Baucus	Graham	Pryor
Bayh	Grassley	Reed
Begich	Hagan	Reid
Bennet	Harkin	Risch
Bingaman	Hutchison	Roberts
Bond	Inouye	Rockefeller
Boxer	Isakson	Sanders
Brown	Johnson	Schumer
Brownback	Kaufman	Shaheen
Burris	Kerry	Shelby
Cantwell	Klobuchar	Snowe
Cardin	Kohl	Specter
Carper	Landrieu	Stabenow
Casey	Lautenberg	Tester
Chambliss	Leahy	Udall (CO)
Cochran	Levin	Udall (NM)
Collins	Lieberman	Vitter
Conrad	Lincoln	Voinovich
Cornyn	Lugar	Warner
Crapo	Martinez	Webb
Dodd	McCaskill	Whitehouse
Dorgan	Menendez	Wicker
Durbin	Merkley	Wyden
Feingold	Murkowski	
Feinstein	Murray	

NAYS—17

Barrasso	DeMint	Kyl
Bennett	Ensign	McCain
Bunning	Enzi	McConnell
Burr	Gregg	Sessions
Coburn	Hatch	Thune
Corker	Johanns	

NOT VOTING—4

Byrd	Kennedy
Inhofe	Mikulski

The bill (H.R. 3357) was passed.

Mrs. BOXER. Madam President, I move to reconsider the vote.

Mr. REID. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mrs. BOXER. Madam President, I wish to take a moment to thank everyone. This was a very complicated series of amendments. It was daunting to figure out what each one of them meant.

The bottom line is that we did replenish the highway trust funds until September 30. Most of us would have liked to have done better than that. We helped with unemployment insurance, and we helped families get mortgages. We also made a commitment to Senator BOND that we are going to take care of his amendment at the appropriate moment.

I particularly thank Senator DURBIN for all his help on the floor. Again, this was a confusing series of amendments. I am pleased with the outcome.

I yield the floor.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. REID. Madam President, for the information of all members, I have had a number of conversations with Senator MCCONNELL this afternoon. It appears, at this stage, we have a path toward completing our work next week. We are going to move forward with the Agriculture appropriations bill this evening. We will be on that tonight and tomorrow, and it will be open for amendments. It appears, on that matter, we will either have a vote after 5 o'clock on Monday on final passage or on cloture on that appropriations bill.

Tuesday, we will move to the Supreme Court nomination of Judge Sonia Sotomayor. I haven't had a chance to talk with the chairman and ranking member of the Judiciary Committee. With their approval, we will move to that matter on Tuesday.

We will set a time certain to vote on cloture on the Travel Promotion Act. We need a time certain because, as everyone knows, Senator MIKULSKI is in the hospital now having repair work done on her leg as a result of a fall. We will set that time. And there may be some nominations we will need to deal with.

At this stage, I think that is where we are headed. There will be no votes tonight or tomorrow. It appears the next vote will be Monday afternoon. I have spoken to Senator KOHL and Senator BROWNBACK, and they agree on the appropriations bill that is the way to move forward. I appreciate everyone's cooperation.

The PRESIDING OFFICER. The Senator from Georgia is recognized.

ANTHONY DEJUAN BOATWRIGHT ACT

Mr. ISAKSON. Madam President, I rise on an issue of particular importance. I am delighted Senators BURRIS and DODD are on the floor. Along with Senator CHAMBLISS, the four of us joined in a very important piece of legislation. In fact, in the gallery tonight is a lady named Jackie Boatwright, whose young son Juan, 8 years ago, was severely injured in a daycare center.

For a second, I wish to talk about the legislation we have introduced and encourage all the Members of the Senate to support it. On September 9, 2001, 2 days before the tragedy of September 11, on a Sunday morning, Mrs. Boatwright got up and took her son to daycare and went to church. On her way home, her cell phone rang. She got a call telling her that her son Juan was now in the hospital. While at the daycare center, he pulled up beside a mop bucket, bent over and fell head-first in the bucket, which was full of dirty mop water and bleach.

Juan, today, lies semicomatose in a hospital on a ventilator.

The daycare center had no liability insurance. To Mrs. Boatwright's credit, from the day of that tragedy, she has advocated on behalf of parents and young children, so that it is required they be able to know the insurance available to them to protect their children in a daycare center. I mentioned that Senators DODD, BURRIS, CHAMBLISS, and myself have introduced legislation, which already passed the House. It requires that any daycare center receiving Federal funds from the Child Care and Development Block Grant Program must disclose, upon registration and admittance, to any child and their parents the liability coverage they have to protect that child.

Mrs. Boatwright wants to make sure that what happened to little Juan, and what happened in her life as a tragedy, never happens in the life of any other mother anywhere in America. Mrs. Boatwright is a resident of Augusta, GA. I am proud of her for the example she has set. So many citizens don't think they can make a difference. Mrs. Boatwright is taking a tragedy and making a difference for thousands of parents and children for years to come.

I am proud to encourage the Members of the Senate to help us get unanimous consent to agree with the House and pass this legislation, Juan Boatwright's legacy, the Anthony DeJuan Boatwright Act, requiring disclosure of liability insurance coverage to every parent whose child is entering daycare.

I yield the floor.

The PRESIDING OFFICER. The Senator from Connecticut is recognized.

Mr. DODD. Madam President, I thank my colleague from Georgia. Along with ORRIN HATCH, I am the original cosponsor of the Child Care and Development Block Grant Program more than 20 years ago, the first childcare program in this country since World War II. It was a long struggle to pass that legislation. There were battles over supporting people who could not afford expensive child care—to be able to do that for working families. In those days, when we drafted the legislation, it was very hard to convince people of the importance of establishing some standards in childcare. There was a lot of resistance to it. Nonetheless, we got the bill done at minimum standards.

That bill made a huge difference in the lives of millions of people, particularly working women with young children, raising them on their own, to be able to hold down the job and make sure their child could be in a safe place. That was important. I remember talking about how we had better Federal regulations when it came to pets being cared for than we did for children. Your automobile got better care, under Federal regulations, than your child. Ultimately, that legislation became law.

Along with my colleague from Georgia, I, too, commend Mrs. Boatwright for taking on this issue, showing how one individual can change things regarding the minimum requirement that parents be informed as to whether the childcare facility has appropriate insurance. In fact, I would have presumed that was the case, even as author of the original legislation, believing that was something States would have required, let alone Federal legislation.

We have a bill that passed the other body before us, and it makes eminently good sense to me, as someone who has been involved in this issue for 25 years, along with OLYMPIA SNOWE, from Maine, a terrific advocate for the Child Care and Development Block Grant Program.

I don't know where the objections are coming from. I am prepared to work with my colleague and say to Mrs. Boatwright and her family and others that we thank you for raising this issue. I will do whatever I can to see if we cannot get this cleared on the floor of the Senate and have it go to the President for signature. That is a small accomplishment on a major issue that can make a difference in the lives of families.

I thank my colleague from Georgia.

Mr. ISAKSON. I thank the distinguished acting chairman of the HELP Committee for offering that assistance and assisting in the passage of this legislation.

The PRESIDING OFFICER (Mr. BEGICH). The Senator from New Jersey.

Mr. MENENDEZ. Mr. President, I ask unanimous consent to speak as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

NAACP 100TH ANNIVERSARY: IMAGES OF HISTORY

Mr. MENENDEZ. Mr. President, I rise in recognition of the NAACP in this, its 100th anniversary month. I rise in praise of what this extraordinary organization has so proudly come to represent to every American who deeply believes in freedom, human dignity, and equal justice under the law.

Yet I rise with a heavy heart, filled with powerful lasting images of the unimaginable suffering surrounding the founding of this great organization, images of the savage hand of racism—horrific lynchings in the middle of the night, the 1908 race riot in Springfield, IL, the birthplace of Abraham Lincoln, that led a bold band of Americans to do all they could, whatever they could, to end the violence against Blacks, the vicious, unveiled hatred and intolerance that to this day has left deep and painful scars on this Nation.

I rise in recognition of those courageous men and women who, a century ago, stepped forward to found the

NAACP, those who stood against violence, who stood against hatred, Blacks such as W.E.B. Du Bois, Ida B. Wells-Barnett, Mary Church Terrell, and Whites such as Mary White Ovington and Oswald Garrison Villard, descendants of America's first abolitionists. These men and women came forward, echoing the call of W.E.B. Du Bois to secure for all people the rights of the 13th, 14th, and 15th amendments to the Constitution to end slavery, provide equal justice under law, and ensure universal adult male suffrage.

We all know that the full realization of equality, freedom, civil rights, voting rights, and equal justice under law has been a long, sometimes faltering, journey fraught with dead ends, deep divides, and seemingly insurmountable obstacles on the road to a more perfect Union. It has been a journey of starts and stops, with harrowing moments—some horrific, some heart-wrenching, but all equally historic, all part of the American saga, each forever etched in the collective memory of this Nation.

The magnificent building in which we do our work today is a monument to that journey. Those who labored to raise this glorious building in tribute to American democracy were themselves slaves. They laid the foundation. They cut the stones. They raised the walls and built the magnificent dome of the U.S. Capitol. Those slaves lived here on Capitol Hill in the shadow of what is now the Statue of Freedom that looks eastward toward the rising Sun and what was then the new dawn of a rising nation.

They are, in many ways, the ancestors of Freedom herself, the precursors of an event to which we have so boldly stood witness in January, in the shadow of their labors, as a Black man raised his hand on the west front of the Capitol to take the oath of office as President of the United States. What greater tribute to them.

We may have come a long way since they built this monument to democracy, but every day, with every troubling racial incident we see on television or read about in blogs or in newspapers, it is clear the century-long work of the NAACP goes on, the work continues. But it is equally clear, with Barack Obama in the White House, we have come of age, united by a common history, tragic at times, fought on the bloody battlefields of a civil war and still being waged in the hearts of the intolerant and unenlightened among us.

Let the images of history tell the story of America plainly, honestly, for what it is—from the labors of those slaves who built this Capitol to the founding of the NAACP; from the battlefields of Gettysburg and Manassas to the freedom rides and marches through Selma and Montgomery; from bloodshed, tragedy and travails, sacrifices and sorrows from those who lived and

died on plantations or rode the Underground Railroad north, to those freed by the Emancipation Proclamation; from the devastating inhumanity of slavery to the election of Barack Obama.

There are countless images of courage and heroism, humiliation and humility, honor and horror, dignity and indignity; images of hope and despair, fear and frustration; images of fire hoses and police dogs turned on Americans whose only crime was the longing to be free and equal; images still clear in our minds, triumphant images of Martin Luther King at the Lincoln Memorial, millions marching on Washington; deeply moving images of peace-loving men like Congressman JOHN LEWIS beaten down by billy clubs because he simply wanted to cross a bridge; images of abject poverty, of two worlds separate and apart and far from equal; tragic images of a great man lying in a pool of blood on a motel balcony in Atlanta in April of 1968. But none so powerful, none so deeply moving as Barack Obama taking the oath of office as President of the United States on the west front of the Capitol 41 years later.

These are the awesome images of the history of race since the founding of the NAACP. They represent the history of America as much as they represent the history of the NAACP, and we must—all of us, Black and White alike—embrace them, understand them, and learn from them; learn from the tragedy and the sorrow; learn from the long, hard-fought battle that was the civil rights movement; learn from the debate on this floor that eventually led to the Voting Rights Act; learn from the pro-segregationist terrorism that led to the assassination of NAACP Mississippi field secretary Medgar Evers and the death of Dr. King. Today, all of these images, the good as well as the bad, remain part of who we are, part of the American story in which the NAACP has played a pivotal role.

But the Nation has changed, and so the mission of the NAACP has evolved from what it was 100 years ago. The violence has lessened, but the virus of racism and prejudice has mutated, as all viruses do.

Now too often, intolerance rears its ugly head with the mere mention of the word “immigration.” And when it does, let us be comforted by the knowledge that the NAACP is still there, still working, still fighting the good fight.

Today, the NAACP is an expanded organization dedicated to the elimination of all race prejudice in America, whether that prejudice be against Hispanic Americans, Asian Americans, and all Americans who seek political, educational, economic, and social equality. For 100 years, the goal of the NAACP has been to tear down the walls of racial discrimination through the

democratic process and make tolerance and equality a reality for all of us. Let that goal be realized in our generation, in our time, and let us continue—one nation, indivisible—on that long journey to a more perfect Union.

Mr. President, I yield the floor.

AGRICULTURE, RURAL DEVELOPMENT, FOOD AND DRUG ADMINISTRATION, AND RELATED AGENCIES APPROPRIATIONS ACT, 2010

The PRESIDING OFFICER. Under the previous order, the Senate will now proceed to the consideration of H.R. 2997, which the clerk will report.

The legislative clerk read as follows:

A bill (H.R. 2997) making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agency programs for the fiscal year ending September 30, 2010, and for other purposes.

AMENDMENT NO. 1908

(Purpose: In the nature of a substitute.)

Mr. KOHL. Mr. President, I call up the substitute amendment.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Wisconsin [Mr. KOHL], for himself and Mr. BROWNBACK, proposes an amendment numbered 1908.

Mr. KOHL. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The amendment is printed in today's RECORD under “Text of Amendments.”)

Mr. KOHL. Mr. President, I ask unanimous consent that the following staff have unlimited floor privileges during the consideration of the fiscal year 2010 Agriculture appropriations bill: Galen Fountain, Jessica Frederick, Dianne Nellor, Fitzhugh Elder, Stacy McBride, Phil Karsting, and Riley Scott.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KOHL. I ask unanimous consent that Bob Ross, a detailee from the Department of Agriculture to the Committee on Appropriations, and Katie Toskey, an intern on the Committee on Appropriations, be granted unlimited floor privileges during consideration of the Agriculture appropriations bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KOHL. Mr. President, I rise today in support of the fiscal Year 2010 appropriations bill for the U.S. Department of Agriculture, the Food and Drug Administration and related agencies. This bill was unanimously reported out of Committee on July 7, and I believe it is a well-balanced bill that deserves the support of all Senators.

This bill includes total spending of \$124 billion. Of that total, \$101 billion is for mandatory programs, such as the Supplemental Nutrition Assistance

Program, formerly known as Food Stamps, which is funded at \$61 billion, and the Child Nutrition Programs, which are funded at \$17 billion.

Discretionary spending totals \$23 billion, an increase of \$2.3 billion, and is within our 302(b) allocation. While this is a significant increase from last year, the President's request in just four areas—WIC, food and drug safety, humanitarian food assistance, and rural rental assistance—account for nearly 90 percent of the total increase. The depth and breadth of the responsibilities held by the USDA and FDA are far greater than I believe most Americans realize.

The funds in this bill are used to help ensure the most basic of human needs are met. This bill provides the funds for the two major agencies charged with keeping America's food and medical supply safe, something we nearly always take for granted. It provides funds to ensure that low-income families in rural America have access to affordable housing and opportunities for homeownership. It provides funds to ensure that over 11 million kids receive breakfast and 31 million kids receive lunch at school every day. It provides funds to make sure 2 million kids from low-income families receive a nutritious meal during the summer when their parents are not home. It provides funds to developing countries to provide meals to children when they go to school—which is often the only way to get them there. USDA is also responsible for important agricultural research, conservation activities, community development, animal and plant health activities, agricultural trade, and much more. It is an important bill—more important than many may realize.

There are many specific high notes to mention.

Of the total funding provided in this bill, 69 percent is directed to nutrition programs. The WIC program is funded at more than \$7 billion, which is an increase of almost \$700 million over last year's appropriations bill. This is the amount necessary to meet the increasing need for this program, and will provide nutritious food to nearly 9.8 million low-income mothers and children each month. There is also language included to ensure that military families are not disqualified from the WIC Program because of increased combat pay—this is a small provision, but an important one in recognizing the sacrifices that our soldiers and their families make.

This bill includes \$163 million for the Commodity Supplemental Food Program, which provides supplemental food to nearly 450,000 very low-income senior citizens and more than 30,000 low-income women and children. The Emergency Food Assistance Program, which provides free food to food banks, many of which have seen private dona-

tions decrease significantly, will receive \$253 million in fiscal year 2010. An additional \$7 million is provided to assist food banks in maintaining and upgrading their facilities and equipment so they can continue to serve those in need. In difficult economic times, these programs are vital to those that might otherwise go hungry.

In the area of food and drug safety, this bill provides the full budget request for both the Food Safety and Inspection Service and the Food and Drug Administration. The FDA is provided \$2.3 billion, an increase of nearly \$300 million. This increase, one of the largest in FDA's history, is necessary to continue the slow turnaround of an ailing organization whose responsibilities have vastly outgrown its funding over the past several years. The FDA is in charge of ensuring the safety of one-quarter of consumer products, and it is imperative that it has the funding to carry out its responsibilities. Similarly, the Food Safety and Inspection Service is responsible for ensuring that all of the Nation's meat and poultry is safe to eat. FSIS is provided the full budget request of more than \$1 billion to carry out its mission.

This bill provides substantial funding to support international humanitarian food assistance. The PL 480, Food for Peace, and McGovern-Dole programs are funded at the President's request, which together is an increase of more than \$500 million above last year. These programs are vital to helping relieve hunger in some of the most distressed parts of the world and to encourage children in developing countries to receive an education. To enhance those programs, funding is provided to support the use of micro-nutrient fortified foods and to develop new food aid products that can make a real difference in saving lives and securing long-term health benefits, especially for children. The bill also provides \$13 million, as requested by the President, for USDA to help develop agricultural systems in countries facing severe food shortages. We believe that the development of sustainable food systems is the proper alternative to emergency food assistance. Therefore, this bill provides guidance and support for USDA, in partnership with the country's land grant institutions, PVOs, and others, to work together toward global food security.

America's farmers and ranchers face some of the tightest credit conditions they have faced in years. Agricultural producers are having difficulty obtaining capital necessary to maintain operations, and demands for Federal credit have skyrocketed. This bill provides over \$4 billion of needed credit, representing an increase of nearly \$750 million over 2009. These funds will help sustain agricultural producers as private credit markets stabilize.

This bill also provides increased funding for development of rural Amer-

ica, including housing, essential community facilities, business assistance, and infrastructure. In response to the recent housing crisis, USDA rural housing programs remain among the most important, and the most active, for Americans to achieve home ownership. Over \$13 billion is available for housing loans and grants, including funds for new construction, repair and rehabilitation, and housing vouchers and rental assistance to ensure shelter for the lowest income rural residents. Almost \$1.6 billion is available for loans and grants to small towns to support clean water and sanitary waste disposal systems that are essential for thriving communities.

Agricultural research agencies receive a total of \$2.5 billion in the bill, an increase of nearly \$130 million, not counting research funding provided in the 2008 farm bill. The Agricultural Research Service is USDA's premier in-house research agency. Funding is provided in this bill for ARS scientists to conduct increased research on bio-energy; improved livestock and crop production; human nutrition, including the prevention of childhood obesity; and the reduction of world hunger, among other issues. USDA's National Institute of Food and Agriculture, NIFA, formerly the Cooperative State Research, Education and Extension Service, CSREES, funds research, education and extension projects at universities and other partners throughout the country. As part of NIFA, the bill includes an increase of more than \$94 million for the Agriculture and Food Research Initiative that awards competitive research grants throughout the Nation. These programs allow USDA the flexibility to adapt to meet changing research needs and to work with leading researchers throughout the country.

This bill makes substantial investments to protect the Nation's animal and plant resources from diseases and pests. Almost \$40 million is provided to combat the emerald ash borer which has been found in thirteen states and threatens hardwood forests. Over \$30 million is available to fight the Asian long horned beetle, and almost \$46 million is provided to support the citrus health response program to combat citrus greening.

In all, this bill provides a proper balance among all the agencies funded and sets the proper priorities. Conservation, food and drug safety, farm programs, rural development, renewable energy, nutrition, trade, and the day-to-day functions of USDA and FDA are provided adequate funding and proper guidance. The programs funded by this bill touch the lives of every American numerous times each day, and impact the lives of people living on the other side of the world. These are important programs, and I urge each Senator to support this bill.

Mr. President, I would also like to recognize and thank my ranking member, Senator BROWNBACK, for his counsel and support in putting together this bill, and look forward at this time to his opening statement.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. BROWNBACK. Mr. President, I wish to first thank my colleague for the work he has done on this bill. Senator KOHL and his staff have done an excellent job in putting together a responsible, good, and important bill, and I am delighted to be a part of it and a part of the process. It has been a great group to work with.

The Appropriations Committee, unlike a lot of other committees in the Congress, most of the time has to work in a bipartisan fashion, and that is a good thing. Senator KOHL and his staff have been very good for us to work with, and I think because of that we have what I believe is a solid bill and one for which we are going to be able to get strong and broad support.

Mr. President, this is the first time the agriculture appropriations bill has been on the floor of the Senate for a number of years. I think that is too bad, but I think it is also good we are finally getting it here. The 2006 Ag appropriations bill was the last Ag appropriations bill to be on the floor of the Senate. I think it is a good development that it is here, that it will be pending. I think it also bodes well for us to be able to consider this as a separate and stand-alone bill in the final process so we don't have to put it together with a whole bunch of other appropriations bills, which, to me, is the way the process should work. It is a good way to work, and it is my hope we will be able to have a separate agriculture appropriations bill that will make it the whole way through the process.

I look forward to the debate, and I wish to encourage Members now, this evening, to come to the floor and offer amendments so we can consider this expeditiously but fully. I understand from the majority leader that we want to consider a travel and tourism bill and then the Sotomayor vote and consideration next week. I hope we could get through this bill in an expeditious manner so we could get to the Sotomayor discussion; I believe most of our colleagues will want to speak about Judge Sotomayor being considered for the Supreme Court. Whether you are for or against her, people want to be heard. To have as much time as possible for that next week, it will be important we be expeditious on this Ag appropriations bill.

Overall, the budget for food aid in the bill has increased to levels that will allow us to depend less on emergency supplemental appropriations bills that are not scored, and I think it is important we have a regular scoring process

and not just do this on an emergency basis. I think that is an important improvement in this bill. By funding food aid at historical levels in the regular appropriations process, USDA and USAID will have more certainty about program resources so they can make better decisions about which situations they are able and need to commit food to.

A number of my colleagues have been to refugee camps in different parts of the world, and they have seen this food in action. It is important and it saves people's lives, and these are important food aid programs.

While I believe this is a valuable step, I am even more encouraged by the creation of two pilot programs that we have initiated in this bill. The chairman has worked on it and we have worked on it in our office. Specifically, in the area of food aid, we have created two pilot programs. The first is a nutrition fortification pilot program to develop and field test new and improved micronutrient fortified food products designed to meet the energy and nutritional needs of school-aged children, pregnant women, nursing mothers, infants, and children under 5 who are served by the McGovern-Dole Food for Education Program.

This is a program where we supply food to a number of very difficult situations in countries with poor economies around the world that is given as a school lunch. So it draws students in to go to school, and then it is a lunch for them. It has been a very successful program in both getting nutritional requirements met for children and in getting the educational needs met.

What we are talking about in this pilot program is a narrower section of it where a number of scientists around the world have said the most important thing we could fund—that any country actually could fund—to improve the health of the most people would be micronutrients in the Third World and developing countries that are having difficulty, so the children develop their mental capacity, better eyesight, and their overall health capacity.

This is a relatively low-cost, high-yield, high-benefit program. It saves lives, makes lives more productive, and it makes the United States a lot more popular around the world when we are helping people and saving lives. That is one of the pilot programs.

The second is a new food aid product development pilot program. It has been nearly 30 years since the last type of food aid was developed. Thirty years ago, we developed a corn soy blend that is used in many refugee camps and in difficult situations for individuals around the world who can't get enough food. Thirty years ago, we developed an innovative product called corn soy blend, but nutritional understanding has changed in that period of time.

What we are looking at is a new wave of food aid products and can we do it better. That is in this pilot program.

A number of people working on AIDS around the world, PEPFAR funding particularly in Africa, are saying the big problem with AIDS recipients is they are getting the antiretroviral drugs, and they are using those, but their body is weakened because they do not have their nutritional needs being met. This is to target in on what can we do to make sure those vulnerable populations are getting the nutritional needs they have.

I am excited about this because I think these are the sorts of things we can do that don't cost much. Indeed, my view would be that we don't, in the future, add to the food aid program but we make it a higher nutrient program and we target it in better ways so we can get more out of this. That is the way we should be working.

If young children have access to proper nutrition, the benefits will follow them the rest of their lives. We all know that. That is what we are trying to do with these pilot programs.

Finally, the bill requires the USDA and USAID to scrutinize how the food aid programs function without seeking to change the basic structure of the Food for Peace or McGovern-Dole Food Aid. We will use the data the Secretary and the administrator provide to the subcommittee to make sure these programs are operating as effectively as possible.

I would have preferred a hard upper limit on transportation costs myself, but I recognize there are many strongly held opinions on this matter. My hope is that all parties can agree we should strive to make these programs more efficient because greater efficiency means more people will be fed.

I have cited, for several of my colleagues, an area of great concern to me, in that 60 percent of our food aid dollar presently goes for transportation or administration. Over a majority of it goes for transportation and administration. It seems to me we ought to be able to get that to a tighter position. We have worked with the chairman on this. Everybody is concerned that we try to stretch our food aid dollars and get as much food to starving people as possible.

I greatly appreciate the courtesies Chairman KOHL and his staff have shown me in my first year as ranking member. Chairman KOHL has been at this for several years and he has done a very good job.

Specifically, I thank Galen Fountain, Jessica Frederick, Dianne Nellor, and Bob Ross for their efforts on this bill and the consideration they have shown my staff. I look forward to working through the process on the floor and moving to conference.

I would urge my colleagues, again, to start getting their amendments pending because I think the more expeditious we can be, the more time we will have to consider the amendments and then also to get to the nomination of Judge Sotomayor, which I anticipate most of the body will want to speak on, and that is going to take a long time to get through.

It is a good bill, and I am looking forward to us working through the amendments to make it a better bill through the process.

I yield the floor.

AMENDMENT NO. 2230 TO AMENDMENT NO. 1908

Mr. KOHL. Mr. President, I send an amendment to the desk on behalf of Senator TESTER.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Wisconsin [Mr. KOHL], for Mr. TESTER, for himself, Mr. ENZI, and Mrs. MCCASKILL, proposes an amendment numbered 2230 to amendment No. 1908.

Mr. KOHL. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To clarify a provision relating to funding for a National Animal Identification Program)

On page 17, beginning on line 17, strike "\$14,607,000" and all that follows through "program" on line 18 and insert the following: "\$7,300,000 shall be for a National Animal Identification program and may only be used for ongoing activities and purposes (as of the date of enactment of this Act) relating to proposed rulemaking for that program under subchapter II of chapter 5, and chapter 7, of title 5, United States Code (commonly known as the 'Administrative Procedure Act')".

Mr. KOHL. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. KOHL. Mr. President, I ask unanimous consent the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MORNING BUSINESS

Mr. KOHL. Mr. President, I ask unanimous consent the Senate proceed to a period of morning business, with Senators permitted to speak for up to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KOHL. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. WHITEHOUSE. Mr. President, I ask unanimous consent the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WHITEHOUSE. I ask unanimous consent to speak in morning business for 12 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

HEALTH CARE REFORM

Mr. WHITEHOUSE. Mr. President, I met in my office today with Donna, a Rhode Islander who suffers from vascular disease. Donna's condition forced her to give up her job, and therefore her insurance. She cannot afford to buy it on her own, since it would cost her \$650 a month—money she does not have. So she pays for her medications out of pocket. They should be \$2,000 per month, but her doctor got them down to \$450. But even this is no walk in the park. Donna read me a laundry list of procedures and services she needs but cannot afford, so like so many Americans, she sits waiting, struggling, hoping she does not get worse.

I want to tell my colleagues what I told Donna today: the Affordable Health Choices Act, the bill that the HELP Committee passed out last Wednesday, would mean hope and change and help for Donna. It would mean that insurance companies could not deny her a policy because of her vascular disease, as they can, and do, right now. It would mean that insurance companies could not charge her sky-high rates because of her vascular disease, as they can, and do, right now. It would mean that if Donna needed financial help to purchase a health insurance plan, she would get it. No pre-existing condition exclusions, affordable premium rates, and subsidies for those who need help purchasing a plan. That is what the HELP Committee's plan offers every American in this country.

I also have heard from Madeleine, a Pawtucket resident who cannot afford health coverage despite working two jobs. Her family has a history of colorectal cancer; both her sister and mother lost their fight to this disease. Tragically, Madeleine cannot afford to get a colonoscopy. Without insurance, Madeleine waits and hopes that she doesn't get sick, because that is the only option she has.

Under the Affordable Health Choices Act, Madeleine would have the financial help she needs to buy a comprehensive, affordable plan. But even before she did that, even before everything is in place for Madeline to go to a gateway and buy a plan, she could sign up for the Right Choices program. Under Right Choices, even without insurance, Madeline would have access to all basic preventive services. She would get a chronic disease health risk assessment, a care plan, and referrals to community-based resources. Most importantly, she would get the colonoscopy

she needs, so that she is not another victim of the terrible disease that took her mother and her sister. It goes without saying that preventing this disease and treating it early would, in the long run, save money for the healthcare system as well as preserve Madeleine's health.

I recently had coffee with Shirley, a Middletown resident who described her relief at turning 65. For the past 20 years, she and her husband did not have insurance. As self-employed business owners in their fifties, finding affordable insurance options was impossible, so they went without. They took their chances. Now 65 and eligible for Medicare, they finally have peace of mind. Shirley admits she and her husband were lucky to make it through those 20 years without serious health problems. During our meeting, she urged us to pass health care reform for the millions of hard-working Americans—hard-working, middle-class Americans—who are not as fortunate as she and her husband.

Under the bill passed by the HELP Committee, Shirley would not have endured 20 years of fear and uncertainty without health insurance. As a self-employed, small business owner, Shirley would be eligible for tax credits to either continue to offer health insurance to her employees, or to offer it for the first time. Shirley could also take all of her employees to the health insurance gateway, which will give small firms a choice of multiple insurance plans at a lower cost and of a higher quality than what currently exist in the small group market. If you are a small business owner, this bill is for you.

Judith from Warwick, has shared with me a story about her brother-in-law, whose lungs collapsed during an outpatient procedure. After staying in the intensive care unit for 28 days, he contracted a hospital infection and was rehospitalized four times. Thankfully, a year later, he is symptom free. However, the costs stemming from the treatment totaled over \$500,000. Like her brother-in-law, Judith and her husband are retired and live off of their monthly Social Security check. She reflects that on such a limited income, if she or her husband faced a catastrophic health issue like her brother-in-law, they would be in "dire straits."

The HELP Committee bill creates a Patient Safety Research Center at AHRQ, which will support research, technical assistance, and process implementation grants to local providers to teach and implement best practices. No one should go through what Judith's brother-in-law did. No one should contract a hospital infection that leads to not one, not two, not three, but four rehospitalizations. We know how to prevent hospital-acquired infections; we have seen tremendous results in places like Michigan and

Rhode Island for years. The HELP Committee bill finally creates a national infrastructure to support the dissemination of these proven techniques so that we can drastically improve the quality of care in our system, and in doing so, drastically lower the cost.

Finally, I recently met David, a self-employed resident from Central Falls, who described the astronomical rise in the cost of health insurance for him and his wife. Years ago, he paid \$85 per month for their plan; today, he pays approximately \$19,000 a year for their health insurance. Despite the dramatic jump in price, their health insurance plan does not cover as much as it used to. To keep their premiums and overall health costs down, David has been forced to drop dental coverage and increase the out-of-pocket expenses he and his wife pay on their plan. He noted, "I'm almost afraid to get sick, because today's health plans have so many holes in them, they can nickel and dime you to death."

The Affordable Health Choices Act would do two important things to help David. One, it would require that plans sold in the gateway offer a truly comprehensive set of benefits so that "affordable" does not mean "skinny." Affordable will mean inclusive, available, and accessible. Two, the bill would not allow insurance companies to "nickel and dime you to death" as David fears now. Insurance companies would be prohibited from imposing lifetime or annual limits on the dollar value of benefits for any enrollee. So David will not be forced to pay out-of-pocket once he exceeds certain levels of benefits, as he does now.

There is some uncertainty both in this building and around this country right now about the future of health reform. I want to remind everyone—my colleagues on both sides of the aisle, my colleagues in the House, Rhode Islanders back home, and Americans across the country, the Senate has already put forth a health reform plan that will work for you. It will work for small businesses. It will work for Americans with pre-existing conditions. It will work for Americans struggling to pay health care premiums. It will work for Americans who are in small businesses. It will work for Americans who are one illness away from their family going into bankruptcy. It will work for Americans who are uninsured. It will work for Americans who have been victims of hospital errors. It will work for Americans who need preventive services they cannot afford.

Most importantly, it will work for Donna, for Madeline, for Shirley, for Judith, and for David, and it will work for their fellow Americans all over this country whose stories are all too similar. Heartache, frustration, exhaustion, and disgust with a health care system

that has, at best, disappointed them, and at worst, turned its back on them. The Affordable Health Choices Act offers these Americans a hand up when they need it most, and I am proud to support it.

Before I yield the floor, I want to take one moment to thank the distinguished senior Senator from Iowa for his courtesy in allowing me to proceed. I know he has substantial remarks he wishes to deliver. I hope it was not too much of an inconvenience.

I yield the floor.

The PRESIDING OFFICER. The Senator from Iowa.

DEBT AND DEFICIT

Mr. GRASSLEY. Mr. President, I thank the Senator from Rhode Island for his kind remarks.

We are only 9 months into fiscal year 2009, and for the first time in American history the Federal deficit has reached and exceeded \$1 trillion. This is not one of those firsts for our great Nation that calls for celebration, and there will not be any celebration.

Unfortunately, the bad fiscal news is not yet over for the year. We are still on track for a year-end deficit of over \$1.8 trillion for fiscal year 2009. That is not according to this Senator, that is according to our official scorer, the Congressional Budget Office, the non-partisan organization.

This 2009 deficit as a percentage of gross domestic product will be a staggering 13 percent, the highest rate since the end of World War II. I have a chart that shows this, a chart that puts the deficit in context.

Here is also a chart that puts the debt into context. I want to remind the Senate that I agree with President Obama that he did, in fact, inherit part of these deficits and debt. What is not often pointed out is this: The deficits and debt were bequeathed back then on a bipartisan basis because the Democrats controlled the last Congress. Starting in the year 2007 that Congress wrote the budget, it wrote the spending bills; that Democratically controlled Congress wrote the financial bailout bill. A Republican President, George W. Bush, signed those spending bills. President Bush signed the financial bailout bill. The chart shows the bipartisan deficit President Obama inherited—and that would be the gray part of the deficit chart—and the chart shows the bipartisan debt President Obama inherited. That would be on the chart as well.

Today we have seen more revisionist fiscal history from many of my friends on the other side. It boils down to two very basic propositions. The first proposition is, all good economic policy and beneficial fiscal effects are due to the partisan tax hike of 1993. The second proposition is that all bad economic policy and detrimental fiscal effects of

this decade are due to the bipartisan tax relief plans of 2001 and 2003.

How convenient for my friends on the other side of the aisle. If we take this fiscal revisionism to its logical extreme, the answer of some on the other side might be to tax every dollar of income earned by the American taxpayer. There seems to be an attitude that any policy that allows Americans to keep more of their own money is just automatically bad, while any policy which takes more of their money and spends it is automatically good.

I think it is fairly clear the fiscal revisionists on the other side do not have a problem with huge deficits; rather, they are threatened by the prospects of Americans deciding what they want to do with their very own money.

In fact, the deficit effects of the stimulus bill passed within a short time after Democrats assumed full control of the Federal Government exceeded the deficit impact of the 8 years of the bipartisan tax relief. Again, this is comparing the tax relief with the stimulus as you see in the chart.

Since the stimulus package spilled a lot of red ink, let's take a look at how the economy has done. Unemployment currently stands at 9.5 percent, the highest rate in the last 26 years. The economy has shed 6.4 million jobs since this recession began, and that also includes, though, 2.6 million jobs lost since President Obama took office.

Even with the passage of the massive \$787 billion stimulus bill in February, the promise of jobs, jobs, jobs that went with that \$787 billion stimulus bill, there is still no end in sight to the rise of unemployment and job losses.

The President himself recently said:

My expectation is that we will probably continue to see unemployment kick up for several months.

While the short-term news is bad, I have bad news for you. The long-term news is much worse. If the Obama budget is adopted, by 2019 we will have added over \$9 trillion to the national debt held by the public, and our debt as a percentage of the economy will grow in excess of 80 percent, in excess of 80 percent, a level also that has not been seen since this country was in World War II.

Let me say, the 50-year average of that national debt, according to the economy, has been about 40 percent. So we are talking about more than doubling what it has been over the last 50 years.

The huge spike in spending that we have seen over the course of the past 9 months has been advertised as temporary. But even so, the deficit as a percentage of GDP in 2019 is projected to be 5.5 percent, a level that everybody, including the President, agrees is unsustainable. You can see that on our charts as well.

Looking beyond the 10-year window paints an even bleaker picture. I have a

chart from the Congressional Budget Office that projects a terrifying rise in debt held by the public as a percentage of GDP over the next 40 years. As we can see from the dotted line, the highest level of debt held by the public as a percentage of GDP, 107 percent, occurred in 1945 as a result and at the end of World War II. In either of the two scenarios outlined in the Congressional Budget Office's long-term budget outlook, shown by the red and green lines on the chart respectively, we are on a course to break this record sometime in the next 15 to 35 years and reach ratios of debt to GDP of up to 128 percent or, at the extreme, 321 percent by 2050.

The Congressional Budget Office's own words are these:

The systemic widening of budget shortfalls projected under CBO's long-term scenarios has never been observed in U.S. history.

Some may ask: Why is this a big deal? What does debt held by the public have to do with my everyday life? The Congressional Budget Office makes three points answering this question. This is the Congressional Budget Office, a nonpartisan group of experts whose sole job is to project, at least 10 years ahead of time, what the situation is with every spending bill and the impact of the deficit. This is what they say: If the ratio of debt to GDP continues to rise, lenders may become concerned about the financial solvency of the government and demand higher interest rates to pay for the increasing riskiness of holding government debt. No. 2, if the debt-to-GDP ratio keeps increasing and the budget outlook is not improved, both foreign and domestic lenders may not provide enough funds for the government to meet its obligations. And No. 3, if the first two points happen, no matter whether the government resolves the fiscal crisis by printing money, raising taxes, cutting spending or going into default, it is certain that economic growth will be seriously disrupted.

Whenever economic growth is seriously disrupted, job growth is seriously disrupted as well. Clearly, a debt-to-GDP ratio approaching 100 percent would have a disastrous impact on everybody's everyday life.

So where do we go from here? Clearly, we are well on our way to fiscal catastrophe unless we change course. What is the best way to break out of this recession, to start creating jobs, to reverse the mountainous growth of deficit and debt and get the economy moving again? That is a very important and long question. Let me see if I can answer. In general, Democrats and Republicans seem to have opposing viewpoints when it comes to the solution to this problem, with Republicans favoring lower taxes and lower spending, while Democrats favor higher taxes and higher spending. However, both Republicans and Democrats agree that health care reform is a crucial ingre-

dient to solving the long-term budget crisis.

Both Republicans and Democrats agree health care reform needs to be paid for as well. The Congressional Budget Office is also on the same page, asserting that, in their words:

In the absence of significant changes in policy, rising costs for health care will cause federal spending to grow much faster than the economy, putting the federal budget on a unsustainable path.

Over the past few months, the rising cost of health care has been characterized by a few creative illustrations. First, we have heard the chairman of the Budget Committee refer to the rising cost of health care as "an 800-pound gorilla." Second, we have heard the President describe the rising cost of health care as "a ticking timebomb."

Today I wish to add a third illustration. The rising cost of health care is a massive, fire-breathing debt and deficit dragon. In the King Arthur legend, the greatest knight among the Knights of the Round Table was Sir Lancelot. Sir Lancelot was also a dragon slayer. In order for Sir Lancelot to strike down the dragon, he had to be equipped with suitable weapons. The same is true today with the rising cost of health care. As Congress contemplates ways to cut down on the massive, fire-breathing debt and deficit dragon, it must wield the proper weapons.

As you can see here, we have the debt and deficit dragon.

A few weeks ago, House Democrats proposed a graduated surtax of up to 5.4 percent on taxpayers making over \$280,000 to partially offset their health care reform bill. This small business surtax would push the top marginal tax rates up to between 43 percent and 46.4 percent, a rate that would jump to over 50 percent in 39 States with Medicare and State and local taxes added in. This is according to the Tax Foundation. So is this small business surtax the proper weapon to strike down the debt and deficit dragon? I have a chart that shows not Sir Lancelot but Sur Taxalot on his way to slay the debt and deficit dragon with his mighty surtax. This is Sur Taxalot, as we can see. The surtax is a large, heavy, painful weapon and lethal to America's job engine, the goose that lays the golden egg, small business America.

Take a good look at Sur Taxalot.

However, it is not effective against the debt and deficit dragon because it does nothing to slow the dragon's exponential growth. The cost of health care that the dragon feasts upon will continue to increase much faster than the revenues that Sur Taxalot can collect with his surtax.

CBO Director Doug Elmendorf testified in front of the Budget Committee 2 weeks ago. Dr. Elmendorf stated: None of the legislative changes looked at by CBO so far, including the House Democrats' small business surtax,

"represent the sort of fundamental change of the order of magnitude that would be necessary to offset the direct increase in federal health costs from the insurance coverage proposals."

Clearly, unlike Sir Lancelot, Sur Taxalot is no dragon slayer.

Now let's look at how House Democrats' small business surtax works. In 2011 and 2012, singles making between \$280,000 and \$400,000 and families making between \$350,000 and \$500,000 will pay an extra 1-percent surtax. Singles making between \$400,000 and \$800,000 and families making between \$500,000 and \$1 million will pay an extra 1.5 percent. Finally, singles making more than \$800,000 and families making more than \$1 million will pay an extra 5.4 percent. Then in 2013 and after, these surtax rates go up to 2 percent, 3 percent, and 5.4 percent, respectively. The only way these rates would not go up in 2013 is if the President's adviser, the Director of OMB, determines in 2012 that there will be more than \$675 billion realized in estimated health care savings by the year 2019.

That is right: The trigger mechanism is back. The House Democrats have made the surtax rate increase subject to a trigger. They have left the judgment on whether to pull the trigger in the hands of a partisan Presidential adviser, not a nonpartisan organization such as the Congressional Budget Office.

As Members of Congress, we should jealously guard our constitutional prerogatives to be the one branch of government tasked with deciding whether revenue is raised by increased taxes or revenue is reduced through decreased taxes. As the great Chief Justice John Marshall said almost 200 years ago:

The power to tax is the power to destroy.

So why would we hand such an enormous power over to the executive branch? I recall, over the last 8 years, hearing from the other side of the aisle that the executive branch was attempting to usurp congressional authority. So where is that jealous guardian of congressional authority now? It seems to be absent.

We have seen this trigger mechanism from the Democrats before. While it has been a couple years, I have spoken at length about this trigger right here on the floor of the Senate.

I ask unanimous consent that a copy of my speech of May 9, 2007, entitled "A Trigger and a Tax Hike on the American People" be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATEMENT OF SENATOR CHUCK GRASSLEY: A TRIGGER WILL NOT PREVENT A TAX HIKE ON THE AMERICAN PEOPLE

Mr. President, press reports indicated we may be in the ninth inning of the budget season. The President sent his budget up to Capitol Hill over three months ago. The Senate Budget Committee marked up a budget resolution. It passed the Senate. That resolution

lays out the Democratic Leadership fiscal priorities for the next five years. As everyone knows, the American People spoke last November and sent a Democratic Majority to both Houses of Congress. For the first time in 12 years, Democrats have the privilege and the responsibility for our budget.

The Senate spoke very clearly in support of some tax relief. The voice came in the form of the Baucus amendment. My friend, the Chairman, secured \$180 billion to prevent part of the big tax increase that will go into effect on January 1, 2011. Although the Baucus amendment only provides 44 percent of the tax relief room needed, it is far superior to the House position. The House position is zero tax relief. That's right, Mr. President, zero tax relief. Zero tax relief means a total tax increase of \$936 billion over 5 years. That's the largest tax increase in history and one that occurs without a vote of Congress.

That tax increase means real dollars out of the wallets of real middle income families. I've got a chart here. The chart shows a wall of tax increase. This chart shows that a family of four at \$40,000 will face a tax increase of \$2,052. Now, for a lot of my rich liberal friends that may not seem like a lot of money. For a hard working family of four in Iowa, that \$2,052 matters.

As a senior Republican member of the Budget Committee, I've not been consulted on the budget by our Chairman, but I've made my views clear to our distinguished Chairman. What I know about the budget I've learned from press reports. If those reports are true, I'd encourage the Chairman and Senate Leadership to stand strong for the Senate position.

Press reports indicate that the Democratic Budget Committee chairmen are working on a compromise that would condition the tax relief on a surplus. That is, the Baucus amendment would be subject to a trigger. Now, Mr. President, what's a trigger?

I have another chart. This chart deals with perhaps the most famous trigger. The chart shows "Trigger," the cowboy actor, Roy Rogers', horse. You can see from the chart that Trigger is a pretty impressive looking horse. Would definitely like to have Trigger on my farm to help with the chores. Am sure my grand kids would want to ride him if Trigger were stabled on my farm.

As Western movie buffs know, Trigger is no longer with us. Trigger is stuffed and on display at the Roy Rogers-Dale Evans Museum in Branson, Missouri. Although Trigger was an impressive looking horse, this trigger device the Democratic Leadership is looking at is not impressive.

The trigger notion is something that has a long history with the Democratic Leadership. Back in 1996, the Clinton Administration and Democratic Leadership argued for a trigger for the \$500 per child tax credit and other family tax relief proposals. They took this position after President Clinton had vetoed the bill containing the family tax relief proposals. If the Clinton Administration and the Democratic Leadership had prevailed, millions of American families would have received the \$500 per child tax credit perhaps in 1999 through 2001 only. If the President Clinton and the Democratic Leadership had won and the trigger were in place, millions of families would have lost the child tax credit in the years 2002 to now.

The same dynamic occurred in 2001. With surpluses, the Democratic Leadership opposed broad-based bipartisan tax relief, including a doubling of the \$500 per child tax credit. One of the ideas the Democratic

Leadership flirted with was a trigger. There were a few Republicans attracted to the idea.

The trigger was debated somewhat, but never found to be workable. It is a complicated matter. It could be suggested that the mechanics of a broad-based tax trigger are like trigonometry. Trigonometry is a division of mathematics that deals with triangles. It is simple on its face, but you can see from this text book, can become complicated quickly.

Interweaving the complexity and uncertainty of triggered tax relief with the vast American economy could lead to a new term. That new term would be "trig-o-nomics." As much as folks complain about uncertainty and complexity in tax policy, I don't think the Democratic budget negotiators should want to take us to the land of trig-o-nomics.

To some degree, the current law sunset of the 2001 and 2003 is a de facto trigger. If you look at those in opposition to permanence of the bipartisan tax relief, you'll find that it is, with very few exceptions, the same folks who like triggers.

The tax system is a very complex and pervasive force in our society. It affects all Americans and all economic activity. Creating conditional tax relief through a trigger mechanism would de-stabilize an already unwieldy tax system. How are families, businesses, and investors supposed to plan their affairs with a trigger hanging over current law tax rules that keep taxes low? Think about that, Mr. President. What would we be doing to the hard working American taxpayer?

As an aside, those taxpayers, by the way, are sending record amounts of revenue to the Treasury. The bipartisan tax relief plans of 2001 and 2003 are growing the economy. Revenues are ahead of projections by double digit figures for the third year in a row. It's there in the black and white of Treasury and CBO reports. The American taxpayer is doing his and her part to reduce the deficit. I ask unanimous consent to insert in the record a couple of articles from the BNA Daily Report for Executives, one dated May 3, 2007 and another dated May 7, 2007.

So, why trigger on tax increases, when the current law tax levels are bringing in plenty of money to the federal Treasury? It makes no sense to punish the American taxpayer.

The biggest problem I have with a trigger is that it creates yet another budget process bias for higher federal spending. If Congress decides to spend more than planned, the trigger gives the American taxpayer the shaft. Spending taxpayers' money trumps future promised tax relief if a trigger is in place.

The American taxpayer need look no further than the budget resolution conference to see triggered future tax relief's futility. After winning the November elections by claiming to enforce fiscal discipline, Democrats have done three things with the budgets in conference. One, they've guaranteed new spending of at least \$205 billion over the budget baseline. Two, with multiple reserve funds, they've set up many arenas of new spending and new taxes. Three, for the first time in six years, a tax hike on virtually every American taxpayer is built into the budget in future years. Did the American People know that this was how fiscal discipline would be defined after the votes were counted? Higher taxes and higher spending? Did the American People vote for this definition of fiscal discipline in last year's campaign? My guess is the answer is the American taxpayer didn't think fiscal discipline meant higher taxes and higher spending.

If fiscal discipline were the real goal of the Democratic Leadership, they'd employ a

trigger on the new spending they've baked in the budget cake. Mr. President, how about that? The new spending in this budget would only be triggered if the federal budget were in surplus. Do I have any takers among the Democratic budget negotiators?

Mr. President, before the Democratic Leadership rolled out its budget, I challenged them to show a proposal with a single dollar of spending restraint dedicated to deficit reduction. It's a challenge I've issued for several years as bipartisan tax relief has been attacked on fiscal discipline grounds. My challenge has not been met. If you go back a decade, you won't find a proposal for spending restraint from the Democratic Leadership. Check the record. You won't find anything on the spending side of the ledger.

The use of a trigger is more evidence of this obsession with taxing and spending. Instead of accepting the Baucus amendment, which is supported by strongly-bipartisan votes in both bodies, the Democratic negotiators are taking a different path. They want to use a trigger as cover. The trigger will likely mean future Democratic spending proposals will gut future tax relief, thereby guaranteeing a tax increase on virtually every American taxpayer.

Mr. President, it's not too late. I suggest that, if the Democratic budgeteers want to talk the talk of fiscal discipline, they need to walk the walk of fiscal discipline. Apply the trigger. But apply it to the \$205 billion in brand new spending. Don't build a wall of tax relief on America's families. Build a wall of fiscal discipline against runaway federal spending.

I yield the floor.

Mr. GRASSLEY. I have a chart here from the 2007 speech that deals with perhaps the most famous trigger. Of course, I refer to Trigger, the horse belonging to the cowboy actor Roy Rogers. As I mentioned in the past, Trigger is no longer with us. Today he is stuffed and on display at the Roy Rogers-Dale Evans Museum in Branson, MO. Even so, Trigger, in his current stuffed state, is still much more imposing than the House Democrats' trigger device.

While past Democratic trigger proposals were bad, the current House Democrats' trigger proposal is even worse because it is under the control of a partisan OMB Director and is based upon an OMB Director's estimate—I repeat, an estimate—of health care savings for the years 2013 to 2019.

I do not think anyone really expects this trigger to be pulled. Even the non-partisan Joint Committee on Taxation, in its \$544 billion revenue estimate of the House Democrats' small business surtax proposal, assumes that the estimated savings targets will not be reached and the rates will go up, for sure, in 2013.

Clearly, on the question of how to pay for health care reform, Republicans and Democrats appear to be drifting in different directions. Republicans want to pay for health care reform through changes in the health care system—mostly on the spending side but also on the revenue side—to make health care more accessible and more affordable. In contrast, House

Democrats' most recent proposal to pay for health care reform—the small business surtax—goes far outside the universe of health care.

By abandoning the universe of health care in their financing scheme, House Democrats are clearly indicating that the goal of their health care reform proposal is increased coverage at any cost. Even the *New York Times*—now, believe this: Even the *New York Times*, hardly a strident critic of the Democrats in Congress or the White House, cautions against this coverage-at-any-cost approach:

If the government simply extends subsidized insurance to millions of uninsured people but fails to force fundamental changes in the delivery or financing of health care, then federal health care costs will keep escalating at excessive rates. That will drive up deficits in subsequent decades unless new taxes are imposed or new savings found.

That is the end of the quote from the *New York Times*.

We need to reform our health care system, but we need to do it right. That is why I am working with Senator BAUCUS, chairman of the Senate Finance Committee, along with Senators SNOWE, ENZI, CONRAD, and BINGAMAN, to reach a bipartisan solution. My Finance Committee colleagues and our staffs have been working hours and hours each day and night, and weekends, to navigate through the numerous complex issues of health care reform. Has it been easy? Obviously not. However, I am very hopeful we can reach a bipartisan agreement that makes health care in America more accessible and more affordable, while at the same time protecting taxpayers and preventing the Federal Government from taking over health care.

President Obama, in his prime time press conference last week, expressed his agreement with these principles. While stating generally that the reform he is proposing will keep government out of health care decisions, President Obama specifically made the following promises:

I'm not going to sign a bill that, for example, adds to our deficit. I won't sign a bill that doesn't reduce health care inflation so that families as well as government are saving money. I'm not going to sign a bill that I don't think will work.

I will take the President at his words on these promises, but I am going to hold him to them. The President is sending a clear signal that he could not sign the Pelosi bill, the Health, Education, Labor, and Pensions bill, or similar pieces of legislation. Why? Because each of those would drastically expand the Federal Government's control of the health care system, increase the deficit, and fail to reduce long-term health care inflation.

Here is the bottom line. When the long-term budget outlook warns that rising health care costs will cause Federal spending to grow so fast as to put

the Federal budget on an unsustainable path, Congress needs to take action. But, at the same time, when our goal is to reform 17 percent of the economy, while facing a nearly \$2 trillion annual deficit, more than \$9 trillion in new debt over the next decade, and a projected debt-to-GDP ratio of over 300 percent by 2050, we have to make sure we are doing this job right. That is what we are trying to do in the Senate Finance Committee. When we get finished, however long it takes, I hope we can send a deficit-neutral health care reform bill to President Obama that increases access, cuts costs, and puts us on a fiscally sustainable path for years to come.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Georgia.

SOTOMAYOR NOMINATION

Mr. CHAMBLISS. Mr. President, I rise this evening to speak on the nomination of Judge Sonia Sotomayor to be the next Associate Justice of the U.S. Supreme Court.

We all know elections have consequences. Because of this, I have tried to give deference to the various nominees submitted by President Obama. I have not voted for all of his nominees, but I have voted for some even though I did not necessarily believe they were the best people he might have nominated.

The case of a nominee to the Supreme Court is unique. This is not a Cabinet member who will rotate out or leave at the end of the President's term. Supreme Court Justices are there for life and decide cases that will affect present and future generations of Americans.

With this in mind, I have reviewed opinions written or concurred in by Judge Sotomayor, reviewed speeches and writings of Judge Sotomayor, talked with lawyers who practice in New York, lawyers who have tried or argued cases before Judge Sotomayor, and others who know her by reputation, and also listened to and reviewed testimony before the Judiciary Committee in her confirmation proceeding. In addition, I spent the better part of an hour in a one-on-one conversation with the judge. Certainly, she has all the education and judicial background to be confirmed as a Supreme Court Justice. Her judicial temperament is not in question. Some lawyers felt she was not qualified for the Supreme Court, and others felt she is.

Judge Sotomayor has a very compelling personal story, and being Hispanic and being female and being nominated to the U.S. Supreme Court adds more credibility to that saga of living the American dream. As Americans, we should be proud she has been nominated. But the role of the Senate is to give the President advice and consent,

and we are required to go beyond the personal side of the nominee.

After reviewing the information I have collected over and over again, I have concluded that I cannot support Judge Sotomayor's nomination. My reasoning is as follows:

First, lawyers nominated to the Supreme Court should be in a class by themselves.

My only experience as a Member of the Senate with this process is with the confirmations of Chief Justice Roberts and Justice Alito. Clearly, they are lawyers who are in a premier class. Lawyers with whom I spoke who know Judge Sotomayor do not put her in that category. Even those who say she should be confirmed do so in a less than enthusiastic way.

Second, I am a strong supporter of the second amendment, and I am concerned about the reasoning of Judge Sotomayor in cases where she has considered this issue.

In *DC v. Heller*, the Supreme Court left unanswered the issue of application of the second amendment to the States. This issue is likely to be decided by the Supreme Court in the next year or so. As a member of the Second Circuit, Judge Sotomayor ruled in the negative on this issue in the *Maloney* case without an explanation, simply citing an old Supreme Court case that is not really directly on point and is certainly outdated. This is too important an issue to give it no more than a cursory review.

Third, I am concerned about the apparent leaning of Judge Sotomayor to use foreign law to interpret U.S. laws and our Constitution.

In her April 28, 2009, speech to the Puerto Rican ACLU, Judge Sotomayor said that while foreign law should not be used as a precedent, she stated it should be "considered." My question is, Why? Judge Sotomayor's answer in that same speech to that question was to align herself with Justice Ginsburg, who supports the use of foreign law and recently stated that "foreign opinions . . . can add to the story of knowledge relevant to the solution of a question." Judge Sotomayor went on to say that unless American courts are more open to ideas in foreign cases, "we are going to lose influence in the world." From an American jurisprudence standpoint, that line of thinking is certainly scary to me.

Lastly, the highly publicized *Ricci* case is very puzzling. A per curiam opinion is unusual for such a complex and precedent-setting case. No analysis for the decision is very troubling to the lawyer in me.

In my conversation with Judge Sotomayor, she stated that the Second Circuit panel was simply following precedent and if the Supreme Court reversed the Second Circuit opinion, it would be establishing a new precedent. The Supreme Court, of course, did reverse the Second Circuit and clearly

stated that no precedent was being followed by the lower court.

Judge Sotomayor did not adequately explain what precedent she was talking about and, in fact, did not answer this question when directly asked the question by Senator KYL at her confirmation hearing. Being less than forthcoming in every respect is very disturbing.

Mr. President, for all of the above reasons, I will cast a "no" vote on the confirmation of Judge Sotomayor next week.

With that, I yield the floor.

THE PRESIDING OFFICER. The Senator from Connecticut.

Mr. DODD. Mr. President, I inquire, we are in morning business, am I correct?

THE PRESIDING OFFICER. The Senator is correct, but we have 10-minute grants.

Mr. DODD. I appreciate that.

HEALTH CARE REFORM

Mr. DODD. Mr. President, what I have done every day over the last week or so is to take the floor to talk about health care, and I do so again this evening, with a note of some sadness. I have just been told there has now been a statement issued that there will be no markup of the Finance Committee bill next week on health care. I know Senator BAUCUS has worked hard at that. I know other members of that committee, in that effort, have been working to try to reach some understanding in all of that. I regret we will now leave here, I gather, next week, at the conclusion of the nomination process for Judge Sotomayor, for a month-long recess to our respective States, or whatever other obligations our colleagues may have. So I am saddened by that.

Let me try to find a good note in all of this—there are five congressional committees between the House of Representatives, the other body, and ourselves that have some jurisdiction over the health care debate. Three of those committees reside in the other body, the House of Representatives; that is, the Energy and Commerce Committee, the Education and Labor Committee, and the Ways and Means Committee. I am told that by tomorrow those three committees will have completed their jobs. They will have reported out a bill. There are two committees in the U.S. Senate with jurisdiction. Jurisdiction over some of the most major components of health care resides in the committee chaired by our colleague from Massachusetts, Senator KENNEDY, who is not with us, as most Americans know, because of his ongoing battle today with brain cancer. In his absence, I have been asked to act as the acting chair of that committee. Two weeks and 2 days ago, we completed our work in that committee. So the

only committee remaining to do some work is the Finance Committee. So of the five committees, four, by the end of business tomorrow, will have completed their jobs.

That does not mean the work is completed. Obviously, a lot of work remains in melding these bills together to try to come up with answers to the thorny questions that remain on how we structure the health care system in our Nation to go from a sick care system, which it is today, to truly a health care system, to deal with the issues of cost, to try to manage these issues so we bend that cost in the coming decades and beyond in a different direction than we are headed today—I will talk about that in a minute—obviously, to improve the quality of health care, which all of us care about. And while we have great quality of health care in many areas of our country, there are still numerous areas where the outcome, the overall health condition, the life expectancy of our fellow citizens, is far less than it ought to be. So accessibility, quality of care, and affordability are still the primary goals. We are all working very hard to try to reach that point.

So four out of five committees will have acted. The fifth, we hope, will achieve that result at some point here or in some manner in which we can move forward with this critical debate in our Nation.

So this evening, I want to spend a few minutes talking about where we are on a couple of these issues. I have discussed, on previous gatherings, my thoughts on aspects of the legislation. Let me share where this debate is.

There is a strong case to be made—we know the economic argument. I am going to get to that in a minute. But there is a moral case to be made as well for health care reform, and it is a very strong one.

Maybe that impresses economists or actuaries, but there is a moral obligation, it seems to me, in a nation as blessed as ours, with great resources and wealth and abundance of resources, natural and otherwise. We live in the wealthiest Nation in the history of mankind. Our generation is an inheritor of incredible work that was done by those who have come before us, who sacrificed greatly, including their very lives, to produce the kind of Nation we live in today. It has been a remarkable story for little more than two centuries, which has resulted in one of the great miracles in world history—to produce a nation where the vast majority of our population can live with financial security, with job opportunities, with the ability to raise families with security, despite what we have gone through in recent years in certain instances. Nonetheless, there is a sense of stability and security about being an American.

In many ways, we are the envy of a good part of the world. So it is impor-

tant, as we think of the debate on health care, to remind ourselves what others have given to produce the kind of results that leave us with a level of lifestyle that is unmatched anywhere around the globe. In spite of that great news, we should note that also 45 million of our fellow citizens, many of whom are children, go to bed every night without health care coverage. In the wealthiest Nation in the history of mankind, nobody should be denied coverage for health care because they have some preexisting condition. What is that? That is some determination that you had a problem, a healthcare problem, before. Therefore, that insurance company will deny you coverage because of that preexisting condition, especially when that excuse is used by so many insurance companies to avoid covering victims of domestic violence, for instance, or those suffering from the most painful of long-term illnesses—those preexisting conditions.

In the wealthiest Nation in the history of mankind, nobody should have to choose between paying their electric bill or taking a sick child to the doctor. I wish that were just in minor cases, small anecdotes. It is not. Regardless of which State we represent, every one of us represents families who, every single day, make those kinds of choices, such as paying that electric bill or cutting back on the family budget because they have to make a choice about whether they can care for that sick family member.

Nobody should have to lose their home and go into bankruptcy because their medical bills are too high. I know the Presiding Officer has heard me on previous occasions in recent times talk about the statistics. Let me repeat them quickly: 62 percent of all bankruptcies in the last several years are health care crisis related—62 to 65 percent. Of that 62 percent, 75 percent of those people had health insurance. When I first saw those numbers that 60 to 65 percent of bankruptcies are due to the health care crisis, I assumed that the overwhelming majority of people in that situation must be those without health care coverage. It pained me to learn that 75 percent of those people actually had health care coverage. Despite that, they ended up in financial ruin, having to go into bankruptcy to survive economically.

In the wealthiest Nation in the world, the one that spends far more on health care than anybody else—some \$2.5 trillion a year, and we now rank 37th in the world in medical outcomes—that is in terms of our overall condition, healthwise, as a people, life expectancy. We now have the first generation of Americans who will live shorter, less healthy lives than their parents. That has never happened before in the history of our country. Each generation of Americans has been able to improve the quality of the health

care of their children. Even in that 19th century and throughout the difficulties of the 20th century, every generation did better on that score. We are about to be the first generation whose children will be less well off—not financially, although that may be the case, but in terms of their health care.

I don't know of anyone in this generation who wants to leave a legacy like that, where because we could not figure out how to deal with health care we left our children in a condition where they will have less healthy lives than we have had. I don't think any one of us—I don't care what our politics are, or where we are from—wants to be part of a generation that gets referred to in history because we could not take better care of our children.

There is a moral case for health care that I know gets dispelled by some because people don't want to take it seriously or don't want to talk about that. Let's just talk about the economics. I think, as a people, we ought to talk about it. I think it motivates us. I think all of us share that common concern that we believe in this great country of ours we ought to be able to do a better job taking care of our fellow citizenry when it comes to the basic right of being provided for when a health care crisis comes.

Today I want to make the case for reform, in addition to being the right thing to do, is also the smart thing to do, the very smart thing to do. It is the smart thing to do for our Federal deficit—and my colleague from Iowa talked about the deficit. I think he is right that we need to confront that issue. Six months ago, an American President assumed office—how quickly we forget—having inherited the largest deficit accumulated not just by any President but by every previous President combined. That is a remarkable track record. It is one thing to have a larger deficit than your predecessor, but over the previous 8 years the administration that just left town, and the Congresses that supported them, accumulated a deficit in 8 years that exceeded the deficits accumulated by all previous 42 Presidents in our American history.

All of a sudden, President Obama arrives in town on January 20 and he gets handed this “gift” from the previous administration: a mountain of accumulated debt. All of a sudden, now this is the big issue we hear about. Where were those voices over the past 8 years as that debt accumulated day after day? All of a sudden they want to lay this at the doorstep of a new President arriving in town.

If they are concerned about it—and I believe my colleagues are—then one certain way to add to it is to do nothing about health care. Let's just leave town for another month, without having addressed this issue in any concrete and thoughtful manner because, clear-

ly, if we do that, the amount of deficit this country will accumulate—Mr. President, we spend 16 cents of every dollar on health care today. I don't know of a single expert who would tell us that by 2040 we will be spending as much as 30 to 40 cents out of every dollar on health care if we do nothing, with inaction, if the status quo dominates. There is a danger of that. We are all painfully aware of that.

The bill that passed our committee 2 weeks and 2 days ago—by the way, it took a long time, 5 weeks. We had 23 sessions and went through some 60 hours—it was 4 weeks from start to finish, actually, almost 60 hours, 23 sessions, on 13 days. We actually considered 287 amendments over that month-long process day in and day out. We accepted 161 amendments offered by our friends on the Republican side. Many were technical and many were substantive amendments.

So we went through a long process and considered it at length, with long debates, with 23 of us, one-quarter of the Senate, sitting on the committee chaired by Senator KENNEDY to consider various ideas within our jurisdiction.

Under that bill we established a very large and robust marketplace where small business owners can go to comparison shop for various health care packages for their employees or themselves. Our bill is the smart thing to do for businesses which often today find themselves choosing between reducing coverage for their employees or laying off workers because they cannot afford to provide it.

In our bill—the one we passed—if our bill would be adopted, as I believe it will be, no longer will small businesses in our country be forced to act as health insurance experts. No longer would they be denied affordable insurance options. No longer would small businesses be discriminated against because they employ someone with a pre-existing condition or one who suffers a sudden unexpected health crisis, thus driving up the premiums for every employee, either making it too costly or making it impossible to provide them coverage.

In our bill we passed not only do we give small businesses somewhere to turn for insurance options, we give them the financial assistance to pay for it—\$1,000 for individuals and \$2,000 for families. Every small business could get that to assist them in that very business of trying to provide for their families.

That has been in our bill. It is written in there. If we can pass that bill, I am confident the other body would adopt it.

We give employers a healthier, more productive workforce. I point out in many parts of our country employers only have one choice or two choices for health care coverage for their employ-

ees. That is all that exists for them, and they want to shop to find out what is available. Under our marketplace in the bill, they would have a wide range of options to choose from of private carriers offering different packages and different levels of cost, allowing the employer to shop on behalf of their employees, and we give them the credit to make it available, financially, to do so. Our bill does more than anything else—certainly, when it comes to small businesses.

Importantly, for those employers who are happy, as many are, with the insurance they have—maybe they are a large employer who has invested heavily in prevention, or they have negotiated low prices and a wide network of providers as exists in some parts of our country. Under our bill nothing changes for them. They can keep the insurance as long as they choose to renew it. That is their business. We change none of that.

If you like what you have, you keep that. If you are a smaller employer and you want to change that and you want better plans, we provide the credits to do so and the option for you to have more choices.

Most of all, we believe reform is the smart thing to do for the American consumer, for those employers and employees. Some of our fellow citizens are getting a good deal when it comes to their insurance. They like the doctor they have, they like the hospital they go to when they need one, and they like the insurance plan they have. They don't want anything about their health care to change. They should not have to worry about that. Our bill protects that. If you like your doctor, your hospital, and your health care coverage, you can keep that, just as that business who wants the plan they have, they can keep that under our bill, which we wrote 2 weeks and 2 days ago—the 900 pages we worked on for almost 5 weeks and on which we considered 300 amendments.

Some of our colleagues have tried to scare our fellow Americans into believing our bill would force change upon them. That is just not true. That is a falsehood. It is being dishonest with the American people. The bill that was crafted in the HELP committee won't make anyone change their doctor or their insurance plan. If they like what they have, they get to keep it. The only change they may see is that there may be more money back in their pocket as a result of what we provided in the options available to people to make better choices at lower costs.

Here is what our opponents won't tell you: If we don't take action—if it is just the status quo and we go back to our States and walk away from all of this and never deal with this issue, you may very well lose the ability to see the doctor you like. That is at risk with inaction. If we don't take action,

you may lose that good insurance plan you have. If we don't take action, you may well find yourself unable to get the kind of care you need when you need it.

If we don't take action in the Congress, families with insurance will continue to pay that hidden tax of \$1,100 that the average family pays every single year to cover the costs of the uninsured who show up at hospitals.

In our country, you will get care. If you walk into the emergency room, we take care of you. But there is a cost for doing so. The cost is, on average, \$1,100 per family a year. That is the tax we pay today because of the failure to provide the kind of plans we adopted in our bill. So that cost falls on families.

Further, Mr. President, if we don't take action, premiums will continue to rise faster than wages. If you don't believe me, look what happened to my State of Connecticut a few weeks ago when an insurance company proposed to raise their rates by 32 percent. I wish that were uncommon. The rates in my States in the last 6 years have gone up 45, 46 percent, and since 1996 in the country, they have gone up 86 percent, vastly outstripping the rate of inflation, with no end in sight.

For those who say we can wait, we don't need to do this now, we ought to postpone all this, it is not necessary, we ought to deal with the deficit or other issues, then consider what is going to happen if we don't move and if we don't come together and get this job done. On every one of these issues, if we don't take action, no matter how secure you may feel today, you may lose that insurance, you may lose that coverage, you may find yourself unable to go to that doctor or hospital you believe you would like to and you continue to pay a rising cost in premiums to cover the uninsured.

Mr. President, 2 weeks and 2 days ago, since our committee acted, 210,000 of our fellow citizens have lost health care coverage. These are people who had insurance 2 weeks ago. Every single day we delay taking action on legislation, 14,000 of our fellow citizens lose health care coverage—every day. So since 2 weeks and 2 days ago, 210,000 of our fellow citizens lost their health care coverage, and we are about to leave for another month. Do the math on a daily basis.

While we as Members of this body go back to our respective States, we have our health care coverage, we have very good health care coverage—very good health care coverage. None of us have to worry about that as we go back and walk away, unfortunately, from a set of issues with which we should be grappling. But we can do so with the assurance, the certainty, and the stability as elected officials in this body that if something happens to any one of us, we are going to be fine because we have great health care coverage. But, unfor-

tunately, for 210,000 of our fellow citizens in the last 2 weeks, that is not the case.

Imagine tonight that you are one of those 210,000 and you wake up in the middle of the night because your child is very sick and you rush them to the hospital, or a spouse or loved one who needs that kind of care because of an accident. These things happen with the least predictability. Every one of us knows what happens. We have all had it happen to us with a child, a spouse, where all of a sudden there is a tragedy, an accident, an injury, there is an illness, and all of a sudden we need that coverage to protect us. Tonight there are 210,000 more people since 2 weeks ago who are in that free-fall hoping that nothing happens until they get back on their feet again, maybe get that new job, find that insurance company that will cover them and provide those benefits.

Imagine yourself being in that spot—think about that—that lack of stability, that lack of certainty, that lack of comfort knowing that if something happens to my family, I cannot help them.

I hope we can get them back on their feet again. I hope they get to see a good doctor, and they will have the drugs they need or care they need to restore their health. But you never get to that question if you cannot even approach it because you don't have the coverage any longer to pay for it.

Those 14,000 a day are going to continue to mount up under the present circumstances. I am disappointed, to put it mildly, that we find ourselves leaving here without continuing to do work. Not that we are going to solve all the problems in the week before we leave, and no one, of course, argues that we shouldn't do this right and we shouldn't be careful to make sure we are doing it right. It is a silly argument to suggest there are people here who don't care about crafting responsible legislation. I will not accept the argument it is too hard and that is the reason we cannot get it done. That is why reforming our health care system is so important, for all those reasons.

Even if you are satisfied with your personal health care situation, you ought not have too much comfort and believe it will be there when you may need it the most.

The bill we passed provides stability so that care that is available to you stays available day after day and provides cost savings that you will see in your family budget. Our bill eliminates entirely the annual and lifetime caps on benefits. So even if you suddenly develop a serious illness or get into a bad accident, you will be able to get the treatment you need, and it does put limits on how much money out of your income you could be forced to spend on insurance.

Today there are no limits. Our bill provides those limits so your expenses

will never be more than you can afford to pay.

Our bill we passed prohibits insurance companies from discriminating against people with preexisting conditions. That is gone forever in our bill. That argument about preexisting conditions is absolutely gone. If we do nothing, it is still there, and so that certainty you think you have is not certain at all with preexisting conditions that exist today. Our bill eliminates those.

You don't have to stay in a job just because you have an illness that would keep you from getting coverage elsewhere. I cannot tell you how many stories I have heard about that, where people have miserable jobs with miserable pay, but they don't dare leave it because they know if they do and they have a preexisting condition, they will be denied the kind of coverage they need to have.

Our legislation also prohibits insurance companies from changing or dropping coverage or refusing to renew it if you get sick. It mandates that these companies cover the things that will help you stay well, such as mammograms or annual checkups, at no additional charge to you as a patient.

The truth is that too many Americans are getting a bad deal, even those who are operating with a comfort that they believe that what they have will be there whenever they need it, and the ones who are getting a good deal might not be able to keep it unless we take action to provide the kind of stability people are looking for.

Even those who somehow are able to ignore the urgent moral imperative of reform I think should support the legislation we crafted simply because it is a better deal for American consumers, and it is the smart thing to do.

It has now been, as I said, more than 2 weeks since our HELP Committee passed its legislation. It is a good bill. It is not a perfect bill, and more work needs to be done. All of us acknowledge that. But it is one that I think every Member of this body can get behind. Every single member of that committee, all 23 of us, every single member added contributions to the original draft. Every Democrat, every Republican added amendments that were adopted to our bill.

By the end of this week, as I pointed out earlier, four of the five committees with health reform bills will have completed their work. I know the Finance Committee, as I said earlier, is working hard to produce a bill as well. When their work is complete, I look forward to sitting down with them to merge our efforts, which is clearly going to happen. We are going to merge our efforts. We are going to take what we have done and merge it with what the Finance Committee has done. So the Senate will have two committees on equal footing dealing with health care

issues. I know the leaders guaranteed that, the President has spoken about it, and I am sure my colleagues will support that effort.

I heard some of my colleagues mention that now is not the time to plow ahead. I disagree. I can't think of a more urgent issue for all the reasons I mentioned this evening and how important it is. I said it may not be as much an urgency for those of us with the stability and certainty of our own health care policies, but for so many of the people we represent—those who are uninsured or underinsured—they have a right to insist we do the job, face the difficult questions, and have the courage to lead on this issue, to be leaders. That is what we are asked to be when people chose us to represent them.

I know it is the case in my own State, as it is across the country. A lot of the choices we have to make are tough ones and hard to explain, in some cases, because they will involve the shared responsibility that all Americans must be involved in if this is going to work. That is why we get sent here. Occasionally, there are matters that require us to stand and make tough choices. We are at such a moment. For us to do less, to walk away from this, I think, will be one of the great tragedies of our time.

I regret we will not be working on this legislation in the coming weeks, although we will in our own way—our staffs will be working and we will be back in our respective States listening to our constituents. I hope when we come back in September, we will have a renewed sense of purpose and get the job done. We have a President who cares about this deeply. We have Members of both bodies who were elected and ran on this issue of reforming our health care system. Major industries, the insurance industry, the providers, the doctors, nurses, the pharmaceutical industry, all today are on the side of getting something done. There are disagreements on how to do this, but wonderful people in public and outside public life are committed to this. It is different than it was 14 years ago. We ought to be able to take advantage of that new alignment, if you will, and get this job done.

I yield the floor.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. BROWN. Mr. President, I appreciate the opportunity to speak after Chairman DODD, who has probably, more than anybody else this year, led the health care effort. As he pointed out, in our committee, it was the longest markup of any bill I have ever seen in my years in the House and Senate.

I spoke today to a Washington Post reporter who said she had never seen a markup so thorough. We faced 160 Republican amendments, either passed or accepted, many of them substantive, some of them not but certainly a major

bipartisan effort. In the HELP Committee, we went over it section by section. This is a very good work product.

We are joined by three committees in the House of Representatives—the Ways and Means Committee and the Education and Labor Committee, which have already completed their work on a similar bill, and another committee is working on it tonight, the Energy and Commerce Committee, a committee on which I sat in my years in the House of Representatives.

All four of these bills are similar. They all protect what works in our health care system, and they fix what is broken. They all provide that, if you are happy with your insurance, you can keep what you have. But in addition, your premium is much more likely to stabilize because, as Chairman DODD said, you are no longer subsidizing to the tune of \$1,100, \$1,200 a year uncompensated care for others. You are paying for your health insurance, but others in society will be paying for their own health insurance rather than what is called cross-subsidies. This legislation obviously covers millions of Americans who are not insured.

All that aside for a moment, I have come to the floor to read letters from people, which I have done every day for the last several days and will continue. We use words such as “market exclusivity, gateway, exchange, cross-subsidies,” and all these kinds of terms. When it gets right down to it, it is how this affects people individually in our country and our State. Whether they are in West Haven or Hartford, whether they are in New London, CT, or New London, OH, people are hurting, and these are some letters from constituents I have received.

I would like to share five, six letters with my colleagues and with the Presiding Officer.

Diana from Seneca County in Ohio writes:

I am a middle-aged widow who returned to college. Next month, I will graduate. I have no health insurance and have been seeking employment for a year. Please help the good citizens of Ohio get health care, many of whom have found themselves in a terrible predicament through no fault of their own. Please help me help myself.

This is an example of people working hard, doing the right thing. Chairman DODD said 14,000 Americans lose their health insurance every day now, and people such as Diana from the Tiffin area in northwest Ohio cannot get ahead of the game, cannot get ahead of the curve, cannot get insurance, has not found a job. In economic times such as these, there are an awful lot of people similar to Diana from Seneca County. That is why it is so important we pass legislation when we come back in September.

Ian from Franklin County—that is central Ohio, the Columbus area:

I am a 31 year old without health insurance. I have a 4-year degree but work part

time. I have no sick days, no vacation days, or personal days. I'm sick and tired of being scared of getting sick. . . . Health care should be based on need rather than ability to pay. Enough.

Just think of how many people in this country live that way. They think about being sick. They think: What happens if I am sick? I am barely making a living. I know if I get sick, I will have to choose between my medical bills and paying my rent or choose between my medicine or sufficiently heating my home in the winter.

Those kinds of choices are very real choices to hundreds of thousands—more than that—Americans every single day.

Lee from Cuyahoga County writes:

I have worked in health insurance in some form or another since 1973. I know Medicare and Medicaid as well as private health insurance. I have seen health insurance from just about all angles and could probably write a book on it. Many times I have told potential clients that “shopping around for health insurance is like going to a casino and betting against the house—where the house is making up the rules, changing the rules, and not letting you know that the rules have been changed.”

This is an expert who made his living by dealing with health care issues. He knows what happens with insurance companies. That is why we did consumer protection in this legislation—no more preexisting conditions, no more dropping coverage indiscriminately, no more caps on coverage, no more gaming the community rating system, no more discrimination. That is what this legislation is all about.

If you have insurance and you like what you have, you can keep it. Absolutely our bill guarantees that. But you also will have these consumer protections because plenty of people who are satisfied with their insurance get sick and find their insurance has been canceled. No more of that under this legislation.

Susan from central Ohio, from Franklin County, writes:

I am in my mid-50s and have been unemployed for over a year, looking for a new job the entire time. Living without health insurance at this point in my life is terrifying.

I am 56. This woman is in her midfifties. She has been unemployed for a year. She is living without health insurance. It sounds like she is healthy but always thinking about it, always scared.

My father was a physician in private practice in Columbus from the 1950s through the 1980s, in the days when the physicians made the diagnoses and the health care providers trusted them to do so. Please fix the health care system, and make it possible for everyone to have access to good medical care.

Susan is somebody who understands the health care system from within. She is the daughter of a physician and understands, in her words:

. . . living without health insurance at this point in my life is terrifying.

Think about that. With all the worries someone has when they are in

their mid-fifties and thinking about what happens if they get sick.

Libby, also from Franklin County, says:

I need a follow-up CT scan for kidney cancer, but I can't afford the co-pay. I have to take early retirement, but can't wait 2 years for disability. I hope having to wait doesn't kill me, but I am one of many. Please fix our broken health care system.

We hear stories every day about health care denied and health care delayed—which really is health care denied—and what happens to people when they have to delay. Libby, from this letter, sounds to me as if she is hoping, hoping, hoping that we can move quickly so she can get insurance and can have the follow-up CT Scan for her kidney cancer.

Claudia, from Franklin County in central Ohio, says:

My husband and I have owned our own successful business for 21 years. Our health insurance costs have escalated to the point where we barely can pay the bill and our coverage is truly awful. With a \$5,000 deductible per person, we are insuring against catastrophic illness only. Little money is available for regular checkups, recommended annual tests, or dental care. I never thought we would be in this position and there is no relief in sight. Many self-employed people are now discontinuing health care because of the cost. We need help.

Claudia and her husband are like small business owners all over this country—people who are self-employed, who have maybe 5 to 10 employees. They can no longer afford health insurance, particularly if they are a business of 30, 40 or 50 people and 2 or 3 of those employees get very sick and they need Remicade or they need Percetin or one of those biologic drugs that cost \$10,000, \$20,000, sometimes \$50,000 or even \$100,000 a year. What happens to that small business, if they have 20 or 30 employees and a couple of those employees end up with drug costs of \$50,000 or \$100,000 a year? That may cause the employer to have to cancel their insurance because the insurance premiums go so high as a result of three or four or five sick people.

This legislation, as Chairman DODD points out, has specific provisions to help small business. It lets them go to the health exchange so they can spread out their costs among the larger numbers of people than the small employers of 10, 15 or 20 people—or in the case of self-employed people such as Claudia from Columbus and her husband—who simply don't have any chance of getting insurance. They know people with insurance in small businesses will no longer have to pay the cost of the uninsured—the extra \$1,100, \$1,200 a year they have to pay. They will get additional tax credits so they can insure themselves and insure their employees.

Almost every employer I know wants to insure their employees. They want to insure their employees. So many simply can't afford it. This bill will

make a difference for small business. It will make a difference with the consumer protections that will help those people who are happy with their insurance but are always anxious about perhaps their insurance being canceled or caps being put on their insurance or all of those issues that happen to people.

That is why this legislation is so important. That is what is reflected in these letters from individual people, whether they are from Zanesville or Mansfield or Urbana or Youngstown. People all over my State are hurting. People all over this country are hurting. People in the State of the Presiding Officer—in Boulder, in Denver. Anywhere in Colorado or in Connecticut we know these problems are every bit as severe as they are in my State. That is why we need to take action.

We have 14,000 Americans every day losing health insurance, and I am hearing from a lot of them. I am hearing from people who are looking for work and can't find work and can't find insurance. It is time we move forward.

Mr. President, I yield the floor.

The PRESIDING OFFICER (Mr. BENNET). The Senator from Connecticut.

Mr. DODD. Mr. President, I thank my colleague from Ohio. He has been a member of our committee, and as I mentioned earlier, he has done a tremendous job, as others have as well. SHERROD BROWN brings a wealth of experience. He has been dealing with these issues, obviously, in the other body.

And I think in talking about real people with these issues, there is a tendency of all of us to kind of discuss these matters from about 30,000 feet, using the language we are familiar with to describe what is going on, and too often I think for people across the country, they wonder if anybody is talking about them. I think by reading letters from citizens in Ohio and what they are wrestling with every day, it brings this back down to a level that we need to think of more often when we debate these issues, and that is that every single day, of those 14,000 people who are losing their health insurance, there are many who do confront a health care crisis and lack the ability to respond to it other than showing up in an emergency room or hoping there will be free health care for them because they do not have the capacity to pay for it.

So I appreciate tremendously Senator BROWN's contribution, not only during those long days we spent day in and day out crafting the legislation that is now before us, but now, when we need to do more talking about what is in that bill. Because from a small business perspective, as well as the insured, the prevention, the quality of care, or workforce issues, they are all very significant contributions to our debate.

The Class Act, which allows individual people, at no government expense, to contribute to their own long-term care needs is one of the most innovative and creative ideas in our bill. That will provide not only substantial resources, but the ability of people to lead independent lives who have disabilities under what might otherwise force them to live under more expensive care or tapping into Medicare. In fact, the projections under the Congressional Budget Office is that we have saved \$2 billion in Medicare costs just by having the Class Act—that is the long-term care provisions in the bill.

I invite all my colleagues to read the bill and to go to the briefings. I spent a little more than an hour today with my colleague from California, DIANNE FEINSTEIN, who requested that I come by with staff, with her staff, and go through the various sections of the bill and how it would work; how it would affect people in their State; how these various provisions would work.

I don't want to speak for her, but I think she was pleased to hear what we had done. Obviously, there is more to be done out of the Finance Committee, and I don't have answers for that because there is no bill out of the Finance Committee as yet, but on the part of the effort we have made, as our Members and colleagues look at what we have done, I think they will be pleasantly pleased about the efforts we have made to assist the insured with preexisting conditions, the caps, as I have mentioned, the credits we provide to small businesses to allow them to make that health care insurance available to their employees—as many would like to be able to do—at a cost they can afford, without crippling them because one employee ends up with a serious health condition thus raising the cost of every other employee and the cost of overall health care. That is gone as a result of what we have written in our legislation.

So I urge my colleagues to read the bill, to talk with us, to raise the questions you have, particularly over these weeks between now and the time we come back. I think you will again be pleased at the effort our colleagues have made to vastly improve the status quo and, I think, contribute significantly to where we need to be going with regard to health care reform.

So I am very grateful to Senator SHERROD BROWN of Ohio for his contribution.

Mr. President, I yield the floor.

HONORING OUR ARMED FORCES

LIEUTENANT BRIAN N. BRADSHAW

Mr. CHAMBLISS. Mr. President, I rise today to honor the life and selfless commitment of LT Brian N. Bradshaw to the U.S. Army and to our Nation.

Lieutenant Bradshaw died as a result of an improvised explosive device on

June 25 in Kheyl, Afghanistan. He was 24 years old.

Coincidentally, Lieutenant Bradshaw's life was taken the same day that pop star Michael Jackson died. A Google News search reveals that the number of news stories in the past month filed about Michael Jackson is 142,929, the number filed about Lieutenant Bradshaw? Twenty-six.

It is time the American people know a bit more about this young man who sacrificed for his country his life, his family, and all his potential, giving up all he had and all he was going to be.

In his youth, Lieutenant Bradshaw served his community in Steilacoom, WA, as a search-and-rescue volunteer, as an altar boy, and as a summer camp counselor. Family and friends describe him as a man with "a wry sense of humor" and a deep love for American history.

He graduated from Pacific Lutheran University in the spring of 2007 and joined the Army and began service in Afghanistan in March of 2009. As a member of the U.S. Army, Lieutenant Bradshaw served in the 1st Battalion, 501st Parachute Infantry Regiment, 4th Airborne Brigade Combat Team, 25th Infantry Division, and was stationed at Fort Richardson, AK.

Described as a man who found more meaning in actions than words, it is no surprise that Lieutenant Bradshaw found meaning in his service in Operation Enduring Freedom. In the course of his deployment, he sought to help the less fortunate people of Afghanistan and to improve life for the children there, frequently writing home for packages of gifts to give to local children.

Lieutenant Bradshaw found his voice in the honor and patriotism of the Army. With a father who is a retired National Guard helicopter pilot and a mother who is a retired Army nurse, Lieutenant Bradshaw was a man with the military in his blood.

Thus, it is only fitting the transfer of his remains on June 25 to Bagram Air Force Base was carried out in a ceremony of honor and patriotism that typifies the ideals of the U.S. Armed Forces.

Sent to retrieve Lieutenant Bradshaw's body were members of the Air National Guard from my home State of Georgia. On their sad mission, they landed their C-130 using night-vision goggles in blackout conditions. What appeared to be hundreds of his fellow soldiers in his company stood in formation in the dark as Lieutenant Bradshaw's body was carried aboard the plane.

In a letter to Lieutenant Bradshaw's family, CPT James Adair and MSG Paul Riley of the Georgia Air National Guard, who were present at the ceremony, described the experience:

Everyone we talked to spoke well of him—his character, his accomplishments and how

well they liked him. Before closing up the back of the aircraft, one of Brian's men, with tears running down his face, said, "That's my platoon leader, please take care of him."

The world may have been occupied with other things, the media with other stories. But for one brief moment, the war stopped to honor LT Brian Bradshaw.

Mr. President, it is my honor and privilege today to pay tribute to Lieutenant Bradshaw, who illustrates the commitment to excellence, honor, and courage that exemplifies our Nation. It is thanks to citizens such as him that America has been and will continue to be a great and free Nation.

HEALTH CARE REFORM

Mr. REID. Mr. President, we have come so very far.

But there are some who think we should scrap everything we have accomplished and go back to square one. The truth is that throwing out all the great work we have done until now would be a terrible waste of time, energy and hard work.

There are some who do not think now is the right time to reform health care. In reality, for many who feel that way, there will never be a good time to reform health care.

It is easy to talk only about the part of the road we have yet to cover. As any parent knows, for some, the only question is, "Are we there yet?"

But it would be a mistake not to also acknowledge and appreciate the great distance we have traveled.

For generations, we have been working to fix our broken health care system. This has been the No. 1 issue on our agenda for a long time now. Throughout this year alone, we have explored numerous proposals in numerous bipartisan roundtables, committee hearings and constituent meetings.

Harry Truman recognized long ago that we must do more to make it easier to live a healthy life in America. Shortly after the Second World War, he lamented the fact that millions of our own lack "a full measure of opportunity to achieve and enjoy good health." He knew it was wrong that Americans had no security against what he called "the economic effects of sickness."

Truman knew in 1945 that "the time has arrived for action to help them attain that opportunity and that protection."

Senator KENNEDY—the man who, more than any other, has dedicated his life to our fight for fair health care—echoed Truman's call. He said:

One of the most shameful things about modern America is that in our unbelievably rich land, the quality of health care available to many of our people is unbelievably poor, and the cost is unbelievably high.

Senator KENNEDY did not give this speech last month, though it would

have been very timely if he had. He did not give it last year, though it would have been equally relevant and true. He did not even give it last decade, or the decade before that.

It was in 1978 when Senator KENNEDY decried our shameful system. Yet his words and his cause are as urgent today as ever. In fact, since then our need for reform has gotten significantly worse.

Today we are closer than ever to getting it done. But I know Senator KENNEDY agrees that it should not have taken more than 30 years for Truman's call to compel his echo, that it should not have taken another 30 years for us to come as far as we have today. And I know we cannot afford to wait another 30 years—or even 1 more year—to act.

But for some, more than 60 years of work to stabilize health care for those who have it and secure it for those who don't is "rushing it."

Someone who was born when Harry Truman first called for reform in 1945, but lived his or her entire life without the ability to afford health care as it got more and more expensive every year, would today—finally—be just months away from becoming eligible for Medicare. I don't think that's "rushing it."

For too many, the interests of the insurance rackets still outweigh the interests of the American people.

The difference is that those of us who know we cannot wait any longer know that the American people must come first.

Those who oppose the reform we so desperately need like to talk about it in the abstract.

They use code words, scare tactics and sound bites. They rely on misinformation—like the myth that your government wants to control your health—and misrepresent the real issues.

But reforming health care is not about the abstract, because health care isn't just theoretical. Neither is it about rhetoric or politics. It is about people.

Unlike just about any issue we debate and discuss in this body, health care affects every single living, breathing American citizen.

So I find it curious that in the weeks and months we have talked about health care this year, I haven't heard our opponents say a single word about real families with real problems—families with real diseases, real medical bills and real fears.

This is what health care is about: It is about people like Lisa, in Gardnerville, NV. Lisa lost her job and with it her health care. Now she can't afford to take her sick daughter to the doctor to find out why she gets seizures.

It is about people like Braden in Sparks, NV. Braden owes a hospital \$12,000 for a trip to the emergency

room—the only place he could afford to go for medical care because he doesn't have health insurance.

It is about people like Alysia from Las Vegas, NV. Alysia has suffered with a kidney disease since birth, but she can't get coverage because in the language of the insurance business, her lifelong disease is a preexisting condition.

It is about people like Steve in Henderson, NV. No health insurance company will cover Steve because he has Parkinson's disease. That doesn't just mean he can't get the care he needs to help him cope with this terrible illness—it also means that if Steve gets the flu, or breaks his arm or needs a prescription, he can't afford any medicine or treatment at all.

It is about people like Caleb, a high school student from outside Reno, NV. Caleb was born without legs, and needs new pairs of prosthetics as he grows bigger in his teen years. But his insurance company has decided it knows better than Caleb's doctors, and has decided that last year's legs will have to do.

When we say we are fighting for health care reform that lowers costs, we aren't talking about a balance sheet—we are talking about people like Lisa, Braden, Alysia, Steve and Caleb.

When we say we are fighting for reform that brings security and stability back to health care, we aren't talking about policies and contracts—we are talking about people like Lisa, Braden, Alysia, Steve and Caleb.

When we say we are fighting for reform that will no longer let insurance companies use preexisting conditions as an excuse to deny you the coverage you need, we aren't talking about fine print—we are talking about people like Lisa, Braden, Alysia, Steve and Caleb.

We are talking about the hundreds of thousands just like them across Nevada, and the millions like them across the country.

This cannot be about politics. This must be about them.

Nearly half a century ago, America fearlessly confronted the most confounding medical and economic issue of its day. And a former Senate majority leader reminded us that we must resist the temptation to let the legislation on the written page distract us from its application in the real world. We were asked to look beyond policy and look instead to the people it affects.

It was 44 years ago today—July 30—that President Johnson signed into law the bill that would create the Medicare Program. And on this day in 1965, in Truman's hometown and with the former President at his side LBJ said the following:

Many men can make many proposals. Many men can draft many laws. But few have the piercing and humane eye which can see beyond the words to the people that they touch.

Few can see past the speeches and the political battles to the doctor over there that is tending the infirm, and to the hospital that is receiving those in anguish, or feel in their heart painful wrath at the injustice which denies the miracle of healing to the old and to the poor. And fewer still have the courage to stake reputation, and position, and the effort of a lifetime upon such a cause when there are so few that share it.

But it is just such men who illuminate the life and the history of a Nation.

Today, each of us can be that leader. We each can fulfill the vision of Harry Truman and Lyndon Johnson—each of whom brought honor to this Senate chamber—and of TED KENNEDY, who still does.

Today, if we can each look past our partisan passions and see the patients, the parents, the people who need our help, we can once again renew the life and history of America, and of all Americans.

ENERGY AND WATER APPROPRIATIONS

Mr. KYL. Mr. President, I rise today to speak on my amendment to the fiscal year 2010 Energy and Water Appropriations bill.

This amendment prevents the Department of Energy from spending taxpayer dollars on companies that invest significant resources or do business in Iran's energy sector to fill the Strategic Petroleum Reserve.

Earlier this year, the Department signed contracts with energy giants Shell, Vitol, and Glencore to add almost 17 million barrels to the Strategic Petroleum Reserve. Open source material indicates that these three companies make up a majority of Iran's gasoline imports.

Companies that sell gasoline to Iran should not receive the support of the American taxpayers, and this body has now gone on record multiple times opposing government contracts with companies that have substantial investment in or do business with Iran's energy sector.

My amendment does not penalize the Department of Energy for this activity, but prevents this sort of thing from happening again. Ending taxpayer support for Iran's energy sector is a commonsense step and crucially important. Most major importers of gasoline to Iran have substantial ties to the U.S. Government, and unanimous adoption of my amendment sends a clear message to those involved in Iran's energy sector: You can do business with us, or you can do business with Iran—not both.

MODELING AND SIMULATION R & D

Mr. WARNER. Mr. President, during yesterday's consideration of the fiscal year 2010 Energy and Water Development Appropriations bill, I noted that the managers included certain report language related to modeling and simulation capabilities for an unconven-

tional fossil fuels program. I would like to ask the chairman and ranking member of the subcommittee if their intent was to improve modeling and simulation for unconventional fossil energy technologies, by working in collaboration with universities and industry to establish joint programs for research and development.

Mr. DORGAN. Yes, that is our intent. This legislation would spur innovation and improve modeling and simulation efforts.

Mr. WARNER. I am pleased to learn that, because the Virginia Modeling and Simulation Center—VMASC—at Old Dominion University has extensive experience in modeling, simulation, and visualization of complex systems and events. Its capabilities include a complete suite of visualization software that can incorporate geospatial information with simulation and analysis of energy-related systems and the impact of those systems on various aspects of the environment. It also has extensive experience modeling critical infrastructure components of fossil fuel, electric and natural gas systems. VMASC has also developed capabilities for modeling policy aspects of global warming that can be adapted specifically to fossil fuel systems, and help to identify unconventional oil, natural gas, and coal resources.

VMASC has developed capabilities to model the production of unconventional resources using a combination of computational techniques that can be adapted to simulate a wide variety of scenarios associated with the fossil fuel industry and its relationship to environmental impacts.

Mr. BENNETT. Mr. Chairman, I worked to develop this initiative to incorporate a capability that the Department has failed to cultivate, yet offers tremendous potential to develop our domestic fossil energy potential. The University of Utah's Simulation and Computing Institute which has worked with both the Office of Science and NNSA computing programs is a leading computing program with tremendous potential to contribute to this effort. This outstanding computing capability is coupled with the vast oil and gas production capabilities at the 25 year-old Energy and Geoscience Institute. This organization operates on seven continents and shares research and technology with its 66 corporate members that all have energy production experience. The goal of this program will be to facilitate the development of unconventional fossil energy resources utilizing state of the art computing simulation and modeling capabilities.

Mr. DORGAN. I agree that high performance computing applications are important research tools that can help lead to breakthroughs in energy production. North Dakota State University, NDSU, uses computational modeling and simulations to help analyze

theories and validate experiments that are dangerous, expensive or impossible to conduct. Through its Center for High Performance Computing, NDSU is collaborating with the Department of Energy and its national laboratories on a number of energy research projects.

The capabilities of VMASC, University of Utah, North Dakota State University and other institutions should receive due consideration as the Department of Energy executes this provision.

(At the request of Mr. REID, the following statement was ordered to be printed in the RECORD.)

EXECUTIVE ACCOUNTABILITY ACT OF 2009

• Mr. BYRD. Mr. President, I draw the attention of the Senate to a bill I recently introduced, S. 1529, the Executive Accountability Act of 2009. This legislation is similar to H.R. 473, introduced in the House of Representatives in January by Mr. JONES of North Carolina.

“Those who cannot learn from history are doomed to repeat it.” That is Santayana’s Law of Repetitive Consequences, and it is the reason I introduced this legislation—that we might learn from history so that we do not repeat it.

The Executive Accountability Act certainly addresses lessons learned from the debate leading to the Iraq conflict, but it is also a lesson we should have learned, and should have corrected, as a result of executive branch actions leading to and during the Vietnam conflict, World War II, the Mexican War, the Spanish-American War and other points in our history when Presidents have distorted the facts, withheld critical information, or exaggerated circumstances in order to sway public opinion and congressional will.

History is replete with examples that know no partisan allegiance. Presidents from both parties have fallen into the trap of inflating fear and distorting facts, if not resorting to outright fabrication, in order to win approval for or justify using military force.

Democratic President Lyndon Johnson misled Congress during the Gulf of Tonkin incident in 1964, publicly announcing that a second attack had occurred. On the same day, however, a naval commander in the Gulf of Tonkin cabled that a review of the second attack was doubtful, calling for a complete evaluation before any further action was taken. Without the complete facts, Congress passed the Gulf of Tonkin resolution, leading the United States in to a war that ultimately took more than 55,000 American lives.

Republican President Richard Nixon expanded the Vietnam conflict in 1969 by authorizing bombing operations in

Cambodia and directing that they be conducted clandestinely. Operational reports of the bombings were either not made or were falsely described as having occurred over South Vietnam rather than Cambodia. A few Members of Congress were informed, secretly, of the bombings, but the remainder of Congress was deceived about the secret bombing campaign over a nation with which the United States was not at war.

Most recently, of course, another President, his Vice President, and other Cabinet officials, used scare-mongering tales of “smoking guns” and “mushroom clouds”; of non-existent weapons of mass destruction; dubious tales of mobile biological laboratories; fictional African trips to buy yellowcake; and, improbable and unsupported rumors of alliances between dictators and terrorists to stampede a fearful nation and a spineless Congress into a so-called “preemptive” invasion of another sovereign nation.

President Abraham Lincoln, an opponent of the Mexican-American War during his service in the House of Representatives, well understood the dangers of preemptive war and the need for the constitutional check on executive power inherent in the requirement for a congressional declaration of war or an authorization to use military force. Lincoln condemned President Polk for driving the U.S. into war with Mexico by putting U.S. forces in danger on disputed territory. Polk then inflamed public and congressional anger by asserting that Mexican soldiers had shed U.S. blood on U.S. soil. Lincoln explained his concerns with his usual eloquence:

Allow the President to invade a neighboring nation, whenever he shall deem it necessary to repel an invasion, and you allow him to do so, whenever he may choose to say he deems it necessary for such purpose—and you allow him to make war at pleasure. Study to see if you can fix any limit to his power in this respect, after you have given him so much as you propose. If, today, he should choose to say he thinks it necessary to invade Canada, to prevent the British from invading us, how could you stop him? You may say to him, “I see no probability of the British invading us,” but he will say to you, “be silent; I see it, if you don’t.”

Lincoln went on to say,

The provision in the Constitution giving the war-making power to Congress was dictated, as I understand it, by the following reasons. Kings had always been involving and impoverishing their people in wars, pretending generally, if not always, that the good of the people was the object. This, our Convention understood to be the most oppressive of all Kingly oppressions; and they resolved to frame the Constitution that no one man should hold the power of bringing this oppression upon us. But your view destroys the whole matter, and places our President where kings have always stood.

Lincoln’s insight considered preemptive wars only against neighbors. One can only imagine what he would think

of the global reach that the current military might of the United States gives to an unfettered executive. One can only wonder if Lincoln would think the “good of the people” has been served by a war that has climbed to more than \$845 billion in direct costs, with a total cost to the U.S. economy estimated by some to be more than \$3 trillion. What good has been served that is worth the more than 4,000 U.S. combat deaths and more than 31,000 U.S. casualties?

S. 1529 is a simple piece of legislation that applies only in the most limited but most important intergovernmental communications—the warmaking power. It prohibits the President, Vice President, and other executive branch officials from deliberately misleading Congress in an effort to persuade the Congress to authorize the use of force by the Armed Forces of the United States.

Officials are not prohibited from being wrong or having incomplete facts, but they may not knowingly and willfully falsify, conceal, or cover up by any trick, scheme, or device a material fact, or make any materially false, fictitious, or fraudulent statement or representation. They may not make or use any false writing or document that they know to contain any materially false, fictitious, or fraudulent statement. If the Congress finds that it has been deceived or lied to, the official can be referred to the Attorney General by either House of Congress for investigation and judicial action, if warranted.

The Executive Accountability Act is limited to executive branch officials only, and only with regard to lying to Congress and only about decisions on the use of force. Therefore, its penalties are unlikely to inhibit the normal flow of intergovernmental communications by creating a fear that any statement made before Congress might result in the threat of prosecution.

To those who say that there are already laws that prohibit individuals from making false statements to Congress, rendering the Executive Accountability Act unnecessary, I urge them to read the history of the False Statements Act, section 1001 of Title 18, U.S. Code.

In 1995, the Supreme Court ruled in *Hubbard v. United States* that section 1001 covered only false statements made to the executive branch, not to the judiciary or to Congress. Congress then moved to reverse the ruling by legislating changes to section 1001 in 1996. However, that bill, as enacted, applies only to administrative matters within Congress and any investigation or review conducted pursuant to the authority of any committee, subcommittee, commission or office of the Congress.

The Executive Accountability Act clarifies the requirement for honest

testimony and discussion with the Congress about the most important question debated by Congress and provided by the most authoritative officials of the government.

The Framers were absolutely clear about the warmaking power: they gave the President the authority to lead troops after war was declared and to repel invasions of the United States, but only the Congress could authorize the use of force—the ability to send troops into battle. The Framers were well aware of the dangers inherent in vesting the warmaking decision with a single executive, having the history of the world's kings and emperors as their foundation.

Our recent history has shown us that a powerful and persuasive executive can, and too often has, used his command of the intelligence and information gathering and dispensing functions of government to paint a distorted picture designed to frighten and sway Congress into ceding even more power to him. Presidents of all political parties have shown themselves to be equally susceptible to the lure of absolute power, making the Executive Accountability Act a non-partisan solution to a deep-seated problem.

S. 1529 restores balance to the system of checks and balances by reinforcing the role of Congress in decisions to use force. Congress does not have millions of civil servants working for it. It does not have its own intelligence community or its own diplomatic corps. Congress must rely upon the executive branch for those missions and for the product of those missions. So Congress must be confident that the information it receives is complete and factual—particularly when that information is used to inform a decision to commit U.S. troops and U.S. treasure to any foreign battlefield. Testimony and communications from the White House and the executive branch must be reliable—not fictional, not distorted, not embellished, not cherry-picked for the purpose of supporting only the decisional outcomes desired by the President.

I urge my colleagues to support S. 1529. It is not retroactive. It will not reach back to affect any statements made by previous administrations. We can learn from the past, make this necessary correction, and move into the future with greater assurance that the most difficult and consequential decisions made by Congress—those involving the use of military force—will be made on the basis of open and frank discussion based on all of the facts.●

CONGRESSIONALLY DIRECTED SPENDING ITEMS

Mr. INOUE. Mr. President, I submit pursuant to Senate rules a report, and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DISCLOSURE OF CONGRESSIONALLY DIRECTED SPENDING ITEMS

I certify that the information required by rule XLIV of the Standing Rules of the Senate related to congressionally directed spending items has been identified in the committee report which accompanies S. 1406 and that the required information has been available on a publicly accessible congressional website at least 48 hours before a vote on the pending bill.

VOTE EXPLANATION

Mr. MENENDEZ. Mr. President, I was unavoidably detained for rollcall vote No. 248, passage of H.R. 3183, Energy and Water Development and Related Agencies Appropriations Act, 2010. Had I been present, I would have voted "yea."

STENNIS CENTER PROGRAM

Mr. KOHL. Mr. President, for 7 years now, the John C. Stennis Center for Public Service Leadership has conducted a program for summer interns working in congressional offices. This 6-week program is designed to enhance their internship experience by giving them an inside view of how Congress really works. It also provides an opportunity for them to meet with senior congressional staff and other experts to discuss issues ranging from the legislative process to the influence of the media and lobbyists on Congress.

The program is a joint effort of the Stennis Center and a number of current and former senior congressional staff who have completed the Stennis Congressional Staff Fellows leadership program. These Stennis Senior Fellows use their experience and expertise to design the program and to participate in each of the interactive sessions and panel discussions.

Interns are selected for this program based on their college record, community service background, and interest in a career in public service. This year, 21 outstanding interns, most of them juniors and seniors in college, who are working for Democrats and Republicans in both the House and Senate, participated.

I congratulate the interns for their participation in this valuable program, and I thank the Stennis Center and the Senior Stennis Fellows for providing such a unique experience for these interns and for encouraging them to consider a future career in public service.

I ask unanimous consent to have a list of 2009 Stennis congressional interns and the offices in which they work be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Matthew Blake, attending the University of South Dakota, interning in the office of

Rep. Stephanie Herseth Sandlin, Jennifer Brody, attending the University of Wisconsin-Madison, interning in the office of Sen. Herb Kohl, Benjamin Eachus, attending Pitzer College of the Claremont Colleges, interning in the House Committee on Science and Technology, Tyler Ernst, attending Michigan State University, interning in the office of Sen. John Barrasso, Susan Gleiser, attending Vanderbilt University, interning in the House Committee on Science and Technology, Zack Hester, attending North Carolina State University, interning in the House Committee on Science and Technology, Ashley McCabe, attending Florida State University, interning in the office of Sen. Robert Menendez, Chase Neely, attending George Mason University, interning in the office of Rep. Sam Farr, Christopher Neuman, attending the University of Pennsylvania, interning in the office of Rep. Robert A. Brady, Dwayne Petersen, attending the University of the Virgin Islands, interning in the office of Rep. Donna Christensen, Beersheba, Philippe, attending Boston University, interning in the office of Rep. Donald Payne, Jeleesa Randolph, attending Morgan State University, interning in the office of Rep. Donna Christensen, Ted Ratchford, attending Tulane University, interning in the office of Rep. Michael N. Castle, George Read, attending Amherst College, interning in the office of Sen. John Barrasso, Tyler Roth, attending the University of Wisconsin-Madison, interning in the office of Sen. Herb Kohl, Twaun Samuel, attending the University of Mississippi, interning in the office of Rep. Maxine Waters, Mary Lynn Seery, attending the Catholic University of America, interning in the office of Rep. Donald Payne, Niki Shah, attending Rutgers University, interning in the office of Rep. Donald Payne, Ken Story, attending Minot State University, interning in the office of Sen. Kent Conrad, Zachary Wittchow, attending Northwestern University, interning in the office of Rep. Thomas E. Petri, Alina Zarr, attending the University of Texas, interning in the office of Rep. Lynn Woolsey.

ADDITIONAL STATEMENTS

REMEMBERING ROBERT ROSAS

● Mrs. BOXER. Mr. President, I am honored to remember U.S. Border Patrol agent Robert Rosas, who was killed in the line of duty at the age of 30.

On July 23, 2009, Agent Rosas was shot and killed after responding to a call in Campo, CA. Every day he placed duty ahead of his personal safety while protecting our Nation's Southwest border. In spite of the known dangers, Agent Rosas and thousands like him answer the call to service.

Agent Robert Rosas was born and raised in El Centro, a border city in Imperial County. He joined the U.S. Border Patrol in May 2006, and was assigned to the Campo Station in the San Diego sector. Agent Rosas was also a reserve officer for the El Centro Police Department, known as an outstanding officer and a positive role model in the community.

Agent Rosas is survived by his wife Rosalie, a son, Robert, age 2, and a daughter, Kayla Alisa, 11 months.

My thoughts and prayers are with Rosalie, Robert, and Kayla Alisa Rosas at this tragic time. They have lost a husband and father. I also send my deepest condolences to Agent Rosas' colleagues in the Border Patrol service. Theirs is a difficult and too often dangerous job. I commend their service, protecting our Nation, and our people.●

COMMENDING DR. GARY V. WHETSTONE

● Mr. KAUFMAN. Mr. President, I wish to honor Dr. Gary V. Whetstone, the senior pastor and founder of Victory Christian Fellowship and of Gary Whetstone Worldwide Ministries. He is a Delawarean who, over the past quarter century, has touched the lives of thousands through his proactive and inspirational ministry.

This week marks the 25th anniversary of Pastor Whetstone's ministry, and it will be celebrated in Wilmington this Thursday through Sunday at the Riverfront Center. The festivities will include renowned gospel preachers, including T.D. Jakes, Donnie McClurkin, Martha Munizzi, and Rod Parsley.

A man of great charity, Pastor Whetstone established over 85 outreach ministries throughout Delaware and the surrounding area. This includes the very successful "Blessings, Dressings, and More" program, begun more than a decade ago, which serves over 2,500 Delawareans in need with food and clothing each week.

His work with victims of HIV/AIDS, substance and alcohol abuse, and the incarcerated are testament to his mission to improve lives.

His hands-on approach to ministry has not stopped at the State line. Internationally, Pastor Whetstone has founded over 400 Bible schools in countries as far and varied as Ireland, Nigeria, and India. His vision to spread the teachings of his faith across the globe has undoubtedly been furthered by his comprehensive Bible learning programs.

Pastor Whetstone recently presented "Murder What's Next," an original dramatic production that teaches about effects on children of being raised in a fatherless home. This show, with its large cast and professional quality, delivers a powerful message about the benefits of involved fathers and of a strong spiritual foundation. Over the past 2 years, the production has been seen by over 35,000 people and has received local and national acclaim, including from the premiere Christian periodical, Charisma Magazine.

I am proud to offer Dr. Gary V. Whetstone my congratulations on the 25th anniversary of his ministry. I also wish him and his wife, Pastor Faye Whetstone, all the best as they continue in their noble work.●

RECOGNIZING COUNTY SUPER SPUDS

● Ms. SNOWE. Mr. President, 2 weeks ago, residents in Aroostook County took part in the 62nd Annual Maine Potato Blossom Festival, a weeklong celebration of the indispensable role agriculture has played in Northern Maine's economy. Indeed, early in the 20th century, Northern Maine was known as the Potato Capital of America. While the times have changed and varieties of crops have expanded, potato farming remains a prevalent way of life in rural Aroostook County. With this in mind, I wish to recognize a fifth-generation family-owned small potato company from Mars Hill, County Super Spuds, whose owners, the McCrum family, have been harvesting potatoes in Northern Maine since the mid-1880s.

It was Lemuel McCrum who, in 1886, moved across the border from New Brunswick, Canada, to the small town of Mars Hill in order to establish a future for his family in potato farming. Lemuel and his wife Ada had 14 children, teaching them the value of good stewardship of the land and work ethic, thus ensuring that future McCrums would harvest bountiful crops on the same land. In the 1960s, Dana McCrum, a member of the family's third generation, moved to a new location in Mars Hill, where County Super Spuds has been situated ever since. The fourth generation of McCrums Jay and David began their farming in the early 1970s, and they were joined by their sister's husband, Bobby Lunney, in 1981. By 2004, the family's fifth generation, Jay's sons, Darrell and Wade, and David's sons, Nicholas and Jonathan, began cultivating their own futures at County Super Spuds.

Since its founding, County Super Spuds has grown into a thriving business that now encompasses three subsidiaries: JDR Transport, a family trucking firm launched in 1992; Penobscot McCrum, LLC, a potato processing plant in Belfast that supplies spuds to customers and restaurants around the world; and Sunday River Farms, a 500-acre farming operation in Rumford Point. McCrum family members all operate and manage these firms, which stretch across the State of Maine. Additionally, the McCrum principle of seeking and finding resolutions to issues of quality assurance with their crops was epitomized by their decision in 2006 to begin utilizing a new GPS system. This technique assists the McCrums in accurate equipment placement within its fields in order to maintain the highest quality product for the Nation's dinner tables.

A proud family with a rich tradition of potato farming, the McCrums have been lauded with prestigious awards on numerous occasions. Jay McCrum was named Young Farmer of the Year in 1986 by the Maine Potato Board, the

State's foremost advocate for the potato industry, and a decade later was also named as the Farmer of the Year. And in 2001, County Super Spuds received the Maine Potato Board's highest honor, as they were recognized as the Farm Family of the Year. These awards exemplify that this family has been and continues to be an example of the dedication and determination of the McCrum spirit to succeed within this prestigious profession through every season and every economic and environmental trial and tribulation.

However, many across Maine, and indeed the Nation, may know County Super Spuds best for its most recent work. The company was one of five potato growers selected from farms across the Nation by FritoLay to star in a nationwide advertising campaign for Lay's Potato Chips, including television and print media, as well as on-pack and in-store displays. In fact, County Super Spuds has been working with Lay's for 23 years, and in that time, the firm has sold approximately 2,300 trailer loads of its delicious potatoes to FritoLay. In the television advertisement, Darrell McCrum, manager for the company's Northern Maine Farm Operations, states that, "We grow potatoes in New England, and Lay's makes potato chips in New England, so that's a pretty good fit." As part of the ad campaign's rollout, Darrell was invited to New York City in mid-May to join the four other farmers and ring the opening bell at the New York Stock Exchange. This was a well-placed honor for a truly distinguished family-owned business with such deep roots in the local community. He simultaneously discusses a photograph showing nearly two dozen family members, once again showcasing that Lemuel and Ada McCrum planted their feet firmly in Aroostook County in 1886 with high hopes for their future and their family and over 12 decades later a legacy of 5 generations stand firmly on the foundation they built.

With annual growth of between 11 and 18 percent in recent years, County Super Spuds and the McCrum family have certainly made a positive impact not only within the Maine economy but across this Nation. Their high business acumen and work ethic have distinguished them as a profitable and trusted company. As the McCrum family continues in the footsteps of their forefathers, they remain an invaluable asset in one of Maine's most prestigious and vital industries. I congratulate the McCrums and everyone at County Super Spuds for their work to promote Maine potatoes across the country, and I wish them continued success in the decades to come.●

REPORT RELATIVE TO THE CONTINUATION OF THE NATIONAL EMERGENCY WITH RESPECT TO THE ACTIONS OF CERTAIN PERSONS TO UNDERMINE THE SOVEREIGNTY OF LEBANON OR ITS DEMOCRATIC PROCESSES AND INSTITUTIONS—PM 28

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Banking, Housing, and Urban Affairs:

To The Congress of the United States:

Section 202(d) of the National Emergencies Act (50 U.S.C. 1622(d)) provides for the automatic termination of a national emergency unless, prior to the anniversary date of its declaration, the President publishes in the Federal Register and transmits to the Congress a notice stating that the emergency is to continue in effect beyond the anniversary date. In accordance with this provision, I have sent to the Federal Register for publication the enclosed notice stating that the national emergency declared with respect to the actions of certain persons to undermine the sovereignty of Lebanon or its democratic processes and institutions is to continue in effect beyond August 1, 2009.

In the past 6 months, the United States has used dialogue with the Syrian government to address concerns and identify areas of mutual interest, including support for Lebanese sovereignty. Despite some positive developments in the past year, including the establishment of diplomatic relations and an exchange of ambassadors between Lebanon and Syria, the actions of certain persons continue to contribute to political and economic instability in Lebanon and the region and constitute a continuing unusual and extraordinary threat to the national security and foreign policy of the United States. For these reasons, I have determined that it is necessary to continue the national emergency declared on August 1, 2007, to deal with that threat and the related measures adopted on that date to respond to the emergency.

BARACK OBAMA.
THE WHITE HOUSE, July 30, 2009.

MESSAGES FROM THE HOUSE

At 9:58 a.m., a message from the House of Representatives, delivered by Ms. Niland, one of its reading clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 3357. An act to restore sums to the Highway Trust Fund and for other purposes.

ENROLLED BILL SIGNED

At 10:14 a.m., a message from the House of Representatives, delivered by

Ms. Niland, one of its reading clerks, announced that the Speaker has signed the following enrolled bills:

S. 1513. An act to provide for an additional temporary extension of programs under the Small Business Act and the Small Business Investment Act of 1958, and for other purposes.

H.R. 838. An act to provide for the conveyance of a parcel of land held by the Bureau of Prisons of the Department of Justice in Miami Dade County, Florida, to facilitate the construction of a new educational facility that includes a secure parking area for the Bureau of Prisons, and for other purposes.

The enrolled bills were subsequently signed by the President pro tempore (Mr. BYRD)

At 11:51 a.m., a message from the House of Representatives, delivered by Mrs. Cole, one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 1665. An act to structure Coast Guard acquisition processes and policies, and for other purposes.

H.R. 2034. An act to permit refinancing of certain loans under the Rural Housing Service program for guaranteed loans for rural housing, and for other purposes.

H.R. 2093. An act to amend the Federal Water Pollution Control Act relating to beach monitoring, and for other purposes.

H.R. 2529. An act to amend the Federal Deposit Insurance Act to authorize depository institutions and depository institution holding companies to lease foreclosed property held by such institutions and companies for up to 5 years, and for other purposes.

H.R. 2623. An act to amend the Federal securities laws to clarify and expand the definition of certain persons under those laws.

H.R. 3072. An act to designate the facility of the United States Postal Service located at 9810 Halls Ferry Road in St. Louis, Missouri, as the "Coach Jodie Bailey Post Office Building".

H.R. 3139. An act to extend the authorization of the National Flood Insurance Program, and for other purposes.

H.R. 3330. An act to amend the Federal Deposit Insurance Act and the Federal Credit Union Act to provide more effective reviews of losses in the Deposit Insurance Fund and the Share Insurance Fund by the Inspectors General of the several Federal banking agencies and the National Credit Union Administration Board, and for other purposes.

The message also announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 159. Concurrent resolution recognizing the fifth anniversary of the declaration by the United States Congress of genocide in Darfur, Sudan.

At 1:44 p.m., a message from the House of Representatives, delivered by Mrs. Cole, one of its reading clerks, announced that the House has passed the following bill, without amendment:

S. 1107. An act to amend title 28, United States Code, to provide for a limited 6-month period for Federal judges to opt into the Judicial Survivors' Annuities System and begin contributing toward an annuity for their spouse and dependent children upon their death, and for other purposes.

The message also announced that the House has agreed to the following concurrent resolutions, without amendment:

S. Con. Res. 29. Concurrent resolution expressing the sense of Congress that John Arthur "Jack" Johnson should receive a posthumous pardon for the racially motivated conviction in 1913 that diminished the athletic, cultural, and historic significance of Jack Johnson and unduly tarnished his reputation.

S. Con. Res. 35. Concurrent resolution authorizing printing of the pocket version of the United States Constitution.

At 5:02 p.m., a message from the House of Representatives, delivered by Ms. Niland, one of its reading clerks, announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 172. Concurrent resolution providing for a conditional adjournment of the House of Representatives and a conditional recess or adjournment of the Senate.

MEASURES REFERRED

The following bills were read the first and the second times by unanimous consent, and referred as indicated:

H.R. 1665. An act to structure Coast Guard acquisition processes and policies, and for other purposes; to the Committee on Commerce, Science, and Transportation.

H.R. 2034. An act to permit refinancing of certain loans under the Rural Housing Service program for guaranteed loans for rural housing, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

H.R. 2529. An act to amend the Federal Deposit Insurance Act to authorize depository institutions and depository institution holding companies to lease foreclosed property held by such institutions and companies for up to 5 years, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

H.R. 2623. An act to amend the Federal securities laws to clarify and expand the definition of certain persons under those laws; to the Committee on Banking, Housing, and Urban Affairs.

H.R. 3072. An act to designate the facility of the United States Postal Service located at 9810 Halls Ferry Road in St. Louis, Missouri, as the "Coach Jodie Bailey Post Office Building"; to the Committee on Homeland Security and Governmental Affairs.

H.R. 3139. An act to extend the authorization of the National Flood Insurance Program, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

H.R. 3330. An act to amend the Federal Deposit Insurance Act and the Federal Credit Union Act to provide more effective reviews of losses in the Deposit Insurance Fund and the Share Insurance Fund by the Inspectors General of the several Federal banking agencies and the National Credit Union Administration Board, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

The following concurrent resolution was read, and referred as indicated:

H. Con. Res. 159. Concurrent resolution recognizing the fifth anniversary of the declaration by the United States Congress of genocide in Darfur, Sudan; to the Committee on Foreign Relations.

MEASURES READ THE FIRST TIME

The following bill was read the first time:

S. 1552. A bill to reauthorize the DC opportunity scholarship program, and for other purposes.

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on today, July 30, 2009, she had presented to the President of the United States the following enrolled bill:

S. 1513. An act to provide for an additional temporary extension of programs under the Small Business Investment Act of 1958, and for other purposes.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, and were referred as indicated:

EC-2527. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Part 121 Pilot Age Limit" ((RIN2120-AJ01)(7-16/7-15)) received in the Office of the President of the Senate on July 28, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2528. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Bombardier Model DHC-8-102, DHC-8-103, DHC-8-106, DHC-8-201, DHC-8-202, DHC-8-301, DHC-8-311, and DHC-8-315 Airplanes Equipped with a Cockpit Door Electronic Strike System Installed in Accordance with Supplemental Type Certificate (STC) ST02014NY" ((RIN2120-AA64)(7-20/7-20/0313/NM-144)) received in the Office of the President of the Senate on July 28, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2529. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Airbus Model A310 Series Airplanes" ((RIN2120-AA64)(7-20/7-21/1201/NM-007)) received in the Office of the President of the Senate on July 28, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2530. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Standard Instrument Approach Procedures, and Takeoff Minimums and Obstacle Departure Procedures; Amendment 3331" ((RIN2120-AA65)(7-20/7-21/30677/3331)) received in the Office of the President of the Senate on July 28, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2531. A communication from the Program Analyst, Federal Aviation Administration,

Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Standard Instrument Approach Procedures, and Takeoff Minimums and Obstacle Departure Procedures; Amendment 3330" ((RIN2120-AA65)(7-20/7-21/30676/3330)) received in the Office of the President of the Senate on July 28, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2532. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Amendment of Class E Airspace; Ankeny, Iowa" ((RIN2120-AA66)(7-23/7-28/0187/ACE-3)) received in the Office of the President of the Senate on July 28, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2533. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Amendment of Class E Airspace; Minneapolis, Minnesota" ((RIN2120-AA66)(7-23/7-28/0062/AGL-2)) received in the Office of the President of the Senate on July 28, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2534. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Aerospaciale Model SN-601 (Corvette) Airplanes" ((RIN2120-AA64)(7-23/7-21/0646/NM-055)) received in the Office of the President of the Senate on July 28, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2535. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Airbus Model A380-841, -842, and -861 Airplanes" ((RIN2120-AA64)(7-23/7-21/0644/NM-059)) received in the Office of the President of the Senate on July 28, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2536. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Airbus Model A330-301, -321, -322, -341, and -342 Series Airplanes, and Airbus Model A340-211, -212, -213, -311, -312, and -313 Series Airplanes" ((RIN2120-AA64)(7-23/7-21/0645/NM-034)) received in the Office of the President of the Senate on July 28, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2537. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; BAE Systems (Operations) Limited Model BAe 146 and Avro 146-RJ Airplanes" ((RIN2120-AA64)(7-23/7-21/0398/NM-193)) received in the Office of the President of the Senate on July 28, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2538. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Boeing Model 707 Airplanes and Model 720 and 720B Series Airplanes" ((RIN2120-AA64)(7-23/7-21/0645/NM-358)) received in the Office of the President of the Senate on July 28, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2539. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Airbus Model A319, A320, and A321 Series Airplanes" ((RIN2120-AA64)(7-23/7-21/1365/NM-076)) received in the Office of the President of the Senate on July 28, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2540. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Boeing Model 747-400 and -400D Series Airplanes" ((RIN2120-AA64)(7-23/7-21/28988/NM-047)) received in the Office of the President of the Senate on July 28, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2541. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Honeywell International Inc., T5313 and T5317 Series Turboshift Engines" ((RIN2120-AA64)(7-23/7-21/1311/NE-48)) received in the Office of the President of the Senate on July 28, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2542. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; British Aerospace Regional Aircraft Model HP.137 Jetstream Mk.1, Jetstream Series 200 and 3101, and Jetstream Model 3201 Airplanes" ((RIN2120-AA64)(6-25/6-24/0570-CE-033)) received in the Office of the President of the Senate on July 22, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2543. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Airbus Models A330-200 and -300, and A340-200 and -300 Series Airplanes" ((RIN2120-AA64)(7-13/7-15/0137/NM-201)) received in the Office of the President of the Senate on July 22, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2544. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Pratt & Whitney JT9D-7 Series Turbofan Engines; Correction" ((RIN2120-AA64)(6-25/6-25/0758/NE-02)) received in the Office of the President of the Senate on July 22, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2545. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Establishment of Class E Airspace; Kona, Hawaii" ((RIN2120-AA66)(7-9/7-10/0002-AWP-1)) received in the Office of the President of the Senate on July 22, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2546. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Establishment of Class D and Class E Airspace, Modification of Class E Airspace; Ocala, Florida" ((RIN2120-AA66)(6-25/6-24/0326/ASO-15)) received in the Office of the President of the Senate on July 22, 2009; to the

the Committee on Commerce, Science, and Transportation.

EC-2547. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Establishment of Class E Airspace; Floydada, Texas" ((RIN2120-AA66)(6-25/6-30/1367/ASW-1)) received in the Office of the President of the Senate on July 22, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2548. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Establishment of Class D Airspace; Fort Worth, Texas" ((RIN2120-AA66)(6-25/6-30/0283/ASW-8)) received in the Office of the President of the Senate on July 22, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2549. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Establishment of Area Navigation Route Q-42; East-Central United States" ((RIN2120-AA66)(6-25/6-30/1026/AEA-17)) received in the Office of the President of the Senate on July 22, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2550. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Modification of Class E Airspace; Montrose, Colorado" ((RIN2120-AA66)(7-2/7-7/0042/ANM-1)) received in the Office of the President of the Senate on July 22, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2551. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Modification of Class E Airspace; Twin Falls, Idaho" ((RIN2120-AA66)(7-2/7-7/0253/ANM-2)) received in the Office of the President of the Senate on July 22, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2552. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Amendment of Class E Airspace; Port Clinton, Ohio" ((RIN2120-AA66)(7-2/7-6/0188/AGL-5)) received in the Office of the President of the Senate on July 22, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2553. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Amendment of Class E Airspace; Devine, Texas" ((RIN2120-AA66)(7-2/6/0089/ASW-4)) received in the Office of the President of the Senate on July 22, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2554. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Amendment of Class E Airspace; Coleman, Texas" ((RIN2120-AA66)(7-13/5-15/1139/ASW-23)) received in the Office of the President of the Senate on July 22, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2555. A communication from the Program Analyst, Federal Aviation Administra-

tion, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Amendment of Class E Airspace; Natchitoches, Louisiana" ((RIN2120-AA66)(6-25/6/24/1229/ASW-26)) received in the Office of the President of the Senate on July 22, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2556. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Amendment of Class E Airspace; Ord, Nebraska" ((RIN2120-AA66)(6-25/6-30/0066/ACE-1)) received in the Office of the President of the Senate on July 22, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2557. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Amendment of Class E Airspace; Ada, Oklahoma" ((RIN2120-AA66)(6-25/6-30/0051/ASW-3)) received in the Office of the President of the Senate on July 22, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2558. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Amendment of Class E Airspace; Mansfield, Ohio" ((RIN2120-AA66)(6-25/6-30/1271/AGL-18)) received in the Office of the President of the Senate on July 22, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2559. A communication from the General Counsel of the Department of Commerce, transmitting the report of proposed legislation relative to the Fiscal Year 2010 Budget; to the Committee on Commerce, Science, and Transportation.

EC-2560. A communication from the Secretary of Commerce, transmitting, pursuant to law, the Annual Report for Fiscal Year 2008 of the Department of Commerce's Bureau of Industry and Security; to the Committee on Commerce, Science, and Transportation.

EC-2561. A communication from the Acting Director of Sustainable Fisheries, National Marine Fisheries Service, Department of Commerce, transmitting, pursuant to law, the report of a rule entitled "Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Snapper-grouper Fishery of the South Atlantic; Closure of the 2009 Commercial Fishery for Golden Tilefish in the South Atlantic" (RIN0648-XO54) received in the Office of the President of the Senate on July 23, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2562. A communication from the Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service, Department of Commerce, transmitting, pursuant to law, the report of a rule entitled "Magnuson-Stevens Fishery Act Provisions; Fisheries of the Northeastern United States; Final Rule" (RIN0648-AW70) received in the Office of the President of the Senate on July 23, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2563. A communication from the Director of Sustainable Fisheries, National Marine Fisheries Service, Department of Commerce, transmitting, pursuant to law, the report of a rule entitled "Fisheries of the Exclusive Economic Zone Off Alaska; Northern Rockfish in the Western Regulatory Area of the Gulf of Alaska" (RIN0648-XQ25) received in the Office of the President of the Senate

on July 24, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2564. A communication from the Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service, Department of Commerce, transmitting, pursuant to law, the report of a rule entitled "Fisheries Off West Coast States; Coastal Pelagic Species Fishery; Amendment 12 to the Coastal Pelagic Species Fishery Management Plan" (RIN0648-AU26) received in the Office of the President of the Senate on July 24, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2565. A communication from the Director of Sustainable Fisheries, National Marine Fisheries Service, Department of Commerce, transmitting, pursuant to law, the report of a rule entitled "Fisheries of the Exclusive Economic Zone Off Alaska; Pacific Ocean Perch in the Western Regulatory Area of the Gulf of Alaska" (RIN0648-XQ18) received in the Office of the President of the Senate on July 24, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2566. A communication from the Deputy Assistant Administrator for Operations, National Marine Fisheries Service, Department of Commerce, transmitting, pursuant to law, the report of a rule entitled "Fisheries of the Northeastern United States; Northeast Multispecies Fishery; Secretarial Final Interim Action" (RIN0648-AW87) received in the Office of the President of the Senate on July 24, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2567. A communication from the Under Secretary of Defense (Comptroller), transmitting, pursuant to law, a quarterly report entitled, "Acceptance of Contributions for Defense Programs, Projects, and Activities; Defense Cooperation Account"; to the Committee on Armed Services.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-68. A joint resolution adopted by the Senate of the State of Tennessee relative to enacting the "Honor the Written Intent of our Soldier Heroes Act"; to the Committee on Armed Services.

SENATE JOINT RESOLUTION No. 352

Whereas, federal law under 10 U.S.C. 1482(c) prohibits a service member from designating a person other than a surviving spouse, blood relative, or adoptive relative to direct the disposal of a service member's remains; and

Whereas, before deploying on a combat operation, a service member is asked to designate a person who will be responsible for arranging the service member's memorial services and overseeing the service member's burial arrangements; and

Whereas, service members fill out DD Form 93, on which they express their last wishes with the expectation that their last wishes regarding memorial services and burial arrangements will be honored; and

Whereas, since 2003, more than 4,000 service members who have served their country honorably have given their lives in combat; and

Whereas, a service member deploying on a combat operation in defense of our country should be allowed to designate any person the service member wishes to direct the disposition of the service member's remains; and

Whereas, H.R. 1633 of the 111th U.S. Congress, the "Honor the Written Intent of our

Soldier Heroes Act", also referred to as the Honor the WISH Act, amends 10 U.S.C. 1482(c) to allow a service member to designate any person the service member wishes to direct the disposition of the service member's remains, regardless of the designated person's relationship to the service member; now, therefore, be it

Resolved by the Senate of the one hundred sixth General Assembly of the State of Tennessee, the House of Representatives concurring, That this General Assembly hereby urges the United States Congress to enact H.R. 1633 of the 111th U.S. Congress, the "Honor the Written Intent of our Soldier Heroes Act"; and BE IT FURTHER

Resolved, That an enrolled copy of this resolution be transmitted to the Speaker and the Clerk of the United States House of Representatives, the President and the Secretary of the United States Senate, and each member of Tennessee's Congressional Delegation.

POM-69. A concurrent resolution adopted by the Senate of the State of Louisiana urging Congress to maintain the private, dual charter banking system as well as to preserve the thrift charter and mutuality; to the Committee on Banking, Housing, and Urban Affairs.

SENATE CONCURRENT RESOLUTION NO. 114

Whereas, the United States currently uses a dual banking system that allows FDIC insured financial institutions to choose between state and federal bank charters and multiple regulators when organizing their business; and

Whereas, the architecture of this dual banking system has been developed over a long period of time, adapted to changing markets, needs and innovations at the national and state level, and has proven remarkably efficient and effective; and

Whereas, FDIC insured banks and thrifts in Louisiana are safe and strong, highly regulated, and have not experienced many of the issues being encountered in the financial services industry at the national level; and

Whereas, Louisiana banks and thrifts have remained true to their core business and have greatly outperformed their United States counterparts as a whole, especially in the areas of loan growth, deposit growth, and asset growth; and

Whereas, many of the problems experienced in the financial services industry at the national level were the result of unsound lending practices by loosely regulated, non-FDIC insured institutions; and

Whereas, as a result of the problems experienced by the financial services industry at the national level and in the economy as a whole, Congress has and will continue to explore ways to restructure the financial services industry; and

Whereas, in 2008 the United States Department of the Treasury proposed, under its "Blueprint for a Modernized Financial Regulatory Structure," ending the dual banking system by requiring all state chartered banks and state and federally chartered thrifts to convert to federally chartered banks, thereby eliminating the state bank and thrift charters entirely; and

Whereas, eliminating the dual charter banking system would require a large percentage of Louisiana banks and thrifts to change charters, thereby reducing regulator options and forcing many financial institutions to accept a federal regulator that may not have the same familiarity, as a state regulator, with the specific needs of a particular financial institution or with the local banking environment; and

Whereas, abolishing remarkably efficient state banking regulatory regimes in favor of one, consolidated federal regulator just does not make sense when federal oversight of Government Sponsored Entities (GSEs), such as Fannie Mae and Freddie Mac, and Wall Street investment firms have proven to be an utter failure; and

Whereas, the Office of Thrift Supervision (OTS) regulates federally chartered thrift institutions; and

Whereas, the idea of eliminating the OTS has also been discussed as part of regulatory restructuring of the financial services industry; and

Whereas, eliminating OTS would serve to eliminate charter and regulator choice for thrifts operating in Louisiana; and

Whereas, some thrifts operating in Louisiana organize as mutual institutions, whereby the depositors are also the owners of the institution; and

Whereas, a financial institution's ability to organize as a mutual institution should be preserved by Congress. THEREFORE, be it

Resolved, That the Legislature of Louisiana memorializes the Congress of the United States to take such actions as are necessary to maintain the private, dual charter banking system as well as to preserve the thrift charter and mutuality; and be it further

Resolved, That a copy of this Resolution shall be transmitted to the secretary of the United States Senate and the clerk of the United States House of Representatives and to each member of the Louisiana delegation to the United States Congress.

POM-70. A resolution adopted by the Senate of the State of Louisiana memorializing Congress to protect Louisiana consumers and competition by opposing efforts to interfere with free markets in order to artificially regulate payment system interchange fees; to the Committee on Banking, Housing, and Urban Affairs.

SENATE RESOLUTION NO. 145

Whereas, credit and debit cards are held and used by tens of millions of Americans; and

Whereas, the development of the electronic payment card system in the competitive environment has benefitted consumers, merchants, and the United States economy; and

Whereas, the current payment card system has greatly enhanced consumer convenience, merchant sales, and overall commerce in Louisiana and in this country; and

Whereas, interchange fees paid by merchants for use of the payment card system help defray the extensive infrastructure costs, increasing fraud losses, and non-payment possibility that are assumed by Louisiana financial institutions involved in the payment card system; and

Whereas, for merchants, interchange fees are a legitimate cost of doing business that entitle them to all of the benefits they receive from the payment card system, including fast and guaranteed payment while bearing little, if any, risk; and

Whereas, consumers and merchants are free to choose from a selection of payment options to complete their transactions, including cash, checks, ACH, prepaid cards, debit cards, credit cards, and alternative online payment options; and

Whereas, merchants are free to choose not to accept credit cards, debit cards, cash or checks or other payment methods; and

Whereas, merchants are free to offer discounts or incentives for the use of cash and checks; and

Whereas, merchant groups have had various interchange fee proposals introduced in

Congress in an attempt to shift their legitimate costs of doing business and to pass such costs on to consumers and financial institutions; and

Whereas, such proposals would seriously disrupt the proper functioning of our nation's electronic payment system to the detriment of consumers, businesses, and the broader economy; and

Whereas, one such merchant proposal that recently failed in Congress would have created a new federal bureaucracy that had the ability to price fix interchange fees paid by merchants to financial institutions for access to the payment card system; and

Whereas, consumers could be harmed if the protection of antitrust laws were removed to allow for anti-competitive behavior in connection with negotiation of payment card acceptance and interchange fees; and

Whereas, government imposed price controls on the payment system would make many Louisiana financial institutions less competitive and potentially make them unable to afford issuing payment cards to Louisiana customers, thereby likely decreasing competition and increasing the cost of obtaining credit for consumers; and

Whereas, the United States Department of Justice has strongly warned that antitrust exemptions should be strongly disfavored by Congress, and cautioned that strong antitrust laws are critical to promoting and protecting consumer welfare; therefore, be it

Resolved, That the Legislature of Louisiana memorializes the Congress of the United States to protect Louisiana consumers and competition by opposing efforts to interfere with free markets in order to artificially regulate payment system interchange fees; and be it further

Resolved, That a copy of this Resolution shall be transmitted to the secretary of the United States Senate and the clerk of the United States House of Representatives and to each member of the Louisiana delegation to the United States Congress.

POM-71. A resolution adopted by the House of Representatives of the Legislature of the State of Texas urging Congress to enact legislation facilitating the ability of cities to access appropriate financing for critically needed municipal projects; to the Committee on Banking, Housing, and Urban Affairs.

HOUSE RESOLUTION NO. 1085

Whereas, Deteriorating conditions in the credit markets have severely diminished the ability of cities to access traditional sources of funding for projects that meet critical local needs; consequently, many municipal projects today are in jeopardy or are being delayed, with prospects for their future realization highly uncertain; and

Whereas, Municipal projects provide important, effective economic stimulus and are worthy of partnership with the federal government; civic projects instantly create and cause the retention of multiple thousands of jobs in many different industries; city projects often include partnerships with the private sector that create a leveraging of mutual interests and maximum economic benefit for the greater community; many city projects are transit oriented, which spurs additional economic benefit; moreover, when projects involve the enhancement or development of public mass transit, they result in reduced highway congestion, reduced air pollution, and reduced dependence on foreign oil; and

Whereas, Projects supported by municipal bonds are vetted locally, approved in elections by local voters, and administered locally, conditions that promote the highest

level of transparency and accountability; and

Whereas, Recently passed amendments to the Troubled Assets Relief Program (TARP) legislation that are contained in H.R. 384, Section 402, clarify the authority of the U.S. Treasury regarding municipal securities; exercising the authority to directly purchase such bonds, and/or provide credit enhancements for them, would provide an opportunity to realize immediate, significant contributions to our economic recovery; and

Whereas, Directly purchasing municipal securities at appropriate interest rates, or providing credit enhancements that allow cities access to traditional market interest rates for bonds, would give the federal government the opportunity to be repaid, with interest, the entire sum it furnishes through the partnership; in addition, providing this relief in the municipal credit markets would result in a significant tax reduction for local taxpayers in the form of dramatically reduced publicly funded interest costs; and

Whereas, Working together to construct an efficient application of the authorization provided in H.R. 384, Section 402, would greatly enhance our country's progress toward economic recovery; now, therefore, be it

Resolved, That the House of Representatives of the 81st Texas Legislature hereby respectfully urge the United States Congress to enact legislation facilitating the ability of cities to access appropriate financing for critically needed municipal projects; and, be it further

Resolved, That the chief clerk of the house forward official copies of this resolution to the president of the United States, to the speaker of the house of representatives and the president of the senate of the United States Congress, and to all the members of the Texas delegation to Congress with the request that this resolution be officially entered in the Congressional Record as a memorial to the Congress of the United States of America.

POM-72. A resolution adopted by the House of Representatives of the Legislature of the State of Texas expressing opposition to any federal legislation that would create an optional federal charter for insurers; to the Committee on Banking, Housing, and Urban Affairs.

HOUSE RESOLUTION NO. 798

Whereas, For more than 150 years, state insurance regulators have provided effective consumer protection and industry oversight; some members of the United States Congress, however, have proposed to undermine this time-tested regulatory system by allowing insurance companies to opt out of state oversight and into a new federal system of chartering, licensing, regulation, and supervision; and

Whereas, State lawmakers have a unique understanding of the needs of their constituents and of the specific conditions and characteristics that apply in their insurance marketplace; they are able to assess and respond to changing circumstances specific to their states with appropriate modifications to regulations; and

Whereas, A federal charter system would permit companies to circumvent carefully crafted consumer protection laws and strong solvency requirements that have been put in place by individual states; proponents of such a federal system have cited the recent collapse of the American International Group as justification for a federal charter, but in fact, the insurance subsidiaries of AIG

that are regulated at the state level have generally retained their value while federal oversight failed to prevent the meltdown of the parent company; and

Whereas, Given the faltering economy, it is more important than ever for state officials to exercise strong oversight of the insurance industry for the benefit of consumers and to maintain the stability of insurance companies; moreover, premium taxes on insurance are a significant source of revenue for the general funds of all states, providing more than two percent of state tax revenues according to the United States Census; experts estimate that an optional federal charter could eventually draw away from the states more than \$14 billion in premium taxes and fees; and

Whereas, The bifurcation of the insurance regulation system is unnecessary and likely to promote confusion, ambiguity, and fragmentation; it would create an expensive new federal bureaucracy that would inevitably be less nimble and responsive than state regulatory systems, while weakening the ability of the states to protect the interests of their residents; the McCarran-Ferguson Act of 1945 affirmed the role of states as principal regulators of insurance, and there is no compelling reason to make a change in the regulatory rights and responsibilities of the states; Now, therefore, be it

Resolved, That the House of Representatives of the 81st Texas Legislature hereby express its opposition to any federal legislation that would create an optional federal charter for insurers; and, be it further

Resolved, That the chief clerk of the Texas House of Representatives forward official copies of this resolution to the president of the United States, to the speaker of the house of representatives and the president of the senate of the United States Congress, to the members of the U.S. House Financial Services Committee, to the members of the U.S. House Banking Committee, to the U.S. secretary of the treasury, and to all members of the Texas delegation to Congress with the request that this resolution be officially entered in the Congressional Record as a memorial to the Congress of the United States of America.

POM-73. A concurrent resolution adopted by the Senate of the State of Louisiana memorializing Congress to consider appropriate legislation that would require the Federal Communications Commission to prescribe auditory volume standards for commercial advertisements broadcast on television; to the Committee on Commerce, Science, and Transportation.

SENATE CONCURRENT RESOLUTION NO. 106

Whereas, network television plays a prevalent part in society and, to retain that competitive edge amongst the plethora of digital media and other telecommunication advancements, must be sensitive to consumer preference and choice; and

Whereas, commercial advertisers spend millions of dollars annually to purchase brief intervals of broadcast time in which to promote the purchase of their products and to influence consumer behavior in a positive manner; and

Whereas, to capitalize on these fleeting and costly time periods, many advertisers resort to an excessive increase in the decibel level of commercials during a telecast in comparison to the programming in which each advertisement is embedded, all in an effort to grab the attention of the viewer and to market the product; and

Whereas, these erratic, excessive volume levels sometimes have an adverse effect on

the well-being of consumers and often have a negative effect on consumer behavior, purchasing decisions, and viewing preferences; and

Whereas, proposed legislation introduced in the 111th Congress for 2009-2010, H.R. 1084: Commercial Advertisement Loudness Mitigation Act (CALM), referred to the House Committee on Energy and Commerce, addresses this controversial issue; and

Whereas, implementation of CALM would order the Federal Communications Commission (FCC), to create and to enforce governmental regulations that require that the volume level of commercials on television is broadcast at an equal auditory level as the programming in which it is embedded; and

Whereas, commercial advertisement makes the entertainment and information of over-the-air free television possible, offers a myriad of products and services to public view, and sustains mass communication as an integral part of market-driven economics; and

Whereas, control of decibel levels for advertisements broadcast over commercial airwaves falls within the purview of federal regulation, and that control is essential to the comfort and sensibilities of the viewing public; Now, therefore, be it

Resolved, That the Legislature of Louisiana memorializes the Congress of the United States to consider appropriate legislation that would require the Federal Communications Commission to regulate auditory volume standards for commercial advertisements broadcast on television; and, be it further

Resolved, That a copy of this Resolution shall be transmitted to the secretary of the United States Senate and the clerk of the United States House of Representatives and to each member of the Louisiana delegation to the United States Congress.

POM-74. A concurrent resolution adopted by the Senate of the State of Louisiana urging and requesting support and assistance in providing funding for the Wood to Electricity Program; to the Committee on Energy and Natural Resources.

SENATE CONCURRENT RESOLUTION NO. 49

Whereas, the major focus of the Wood Products Development Foundation is the expansion or development of new uses of wood and wood waste products that result in a positive impact on the economic conditions of the state; and

Whereas, the timber industry has experienced a serious decline in recent years, and this downturn will continue unless new use sources are developed in the immediate future; and

Whereas, after studying numerous potential industries, the foundation determined a project that used wood and wood waste products to create electricity would be the most economically viable expansion of raw wood products for the long term; and

Whereas, the use and need for electricity will continue to increase, and these projects will provide a renewable, green source of electric power that does not affect the nation's food supply or demand for food-based agricultural products and materials for an indefinite period; and

Whereas, these wood to electricity projects provide an additional market for raw wood products even in a distressed market, provide an additional source of electricity at a market rate that is carbon neutral, and provide a dedicated electrical source available locally to supply viable defense structures and critical facilities in times of natural disasters; and

Whereas, the foundation has completed plans for two centrally located plants within the state that will use wood waste products from wood producers in the vicinity; and

Whereas, the electrical production will be made equally available to wood-related industries and a grid for the benefit of low-income households within reasonable vicinity of the plant sites; and

Whereas, the two proposed projects will inject sixty million dollars into the economy in terms of construction and start-up costs and will create a minimum of thirty permanent full-time jobs at the plant sites and approximately one hundred jobs for suppliers of the wood fuel feedstock; and

Whereas, in the last several months, significant regional job losses in the wood industry make this effort even more vital to securing new alternatives for value-added market activity related to the wood resources of the state; and

Whereas, there is a current need for additional funding to complete the necessary regulatory, environmental, engineering, and administrative functions to fulfill the requirements for construction loan approvals: Now, therefore, be it

Resolved, that the Legislature of Louisiana does hereby urge and request the Louisiana congressional delegation, the governor, the Department of Economic Development, the Department of Agriculture and Forestry, and the Public Service Commission to assist in providing funding for any necessary additional requirements, documentation, or studies that may be needed to secure long-term funding, and to assist in developing state and federal policies for wood to electricity projects that put them on a commensurate funding and taxation level with wind and solar generated electricity; and be it further

Resolved, that a copy of this Resolution be transmitted to the Louisiana congressional delegation, the governor, the Department of Economic Development, the Department of Agriculture and Forestry, and the Public Service Commission.

POM-75. A concurrent resolution adopted by the Senate of the State of Louisiana memorializing Congress to support the American Clean Energy and Security Act of 2009; to the Committee on Energy and Natural Resources.

SENATE CONCURRENT RESOLUTION NO. 158

Whereas, a federally mandated energy efficiency and renewable energy standard for utilities is currently being debated in Congress; and

Whereas, federal standards for the regulation of climate change gases, primarily carbon dioxide, are also being actively debated in Congress; and

Whereas, Louisiana's coast is comprised of forty percent of the nation's coastal wetlands and it recognizes the importance of coordinated and effective actions to reduce the emissions of climate change gases; and

Whereas, in areas of the country with limited wind and hydroelectric resources, renewable energy standards, if improperly implemented, can have significant adverse impacts on non-participating ratepayers; and

Whereas, renewable energy resources that are non-dispatchable and non-reliable do not reduce capacity requirements of utilities and thus present an undue adverse impact on non-participating ratepayers; and

Whereas, energy efficiency can produce energy and demand savings for a fraction of the cost of most forms of renewable energy; and

Whereas, renewable portfolio standards are traditionally based solely on electrical energy production; and

Whereas, in air conditioning-dominated climates, electrical energy usage is a much larger component of total energy use compared to heating dominated climates; and

Whereas, heating energy sources such as heating oil pose both environmental and national security risks as they contribute to air pollution emissions and increased oil imports: Now, therefore be it

Resolved, that the Senate of the Legislature of Louisiana memorializes the Congress of the United States to support the American Clean Energy and Security Act of 2009; and, be it further

Resolved, that the Legislature of Louisiana does hereby urge and request the Louisiana congressional delegation to take appropriate action to insure the following:

(1) Any federally mandated renewable portfolio standard contain provisions whereby states with limited, currently available, affordable renewable energy resources, such as Louisiana, be allowed to utilize verifiable energy efficiency improvements to existing loads to meet a minimum of sixty percent of any such standard.

(2) That the state be allowed to set up a mechanism whereby Louisiana utility companies taking action in advance of the imposition of the standard be allowed to bank any energy efficiency savings and renewable energy production achieved in order to help meet the requirements under any such standard.

(3) That tax credits and rebates offered by the state of Louisiana or any local jurisdiction within the state be declared by the United States Internal Revenue Service to be nontaxable income and will not reduce the tax credit basis of any federal energy efficiency or renewable energy tax credit.

(4) That mandates for renewable energy production that is not dispatchable and reliable be limited to no more than ten percent of the required production standard.

(5) That any energy efficiency and renewable energy standard be based on a percentage of total energy consumption, not just electrical energy consumption, regardless of how it is implemented and collected; and, be it further

Resolved, that a copy of this Resolution be transmitted to the secretary of the United States Senate and the clerk of the United States House of Representatives, and to each member of the Louisiana delegation to the United States Congress.

POM-76. A concurrent resolution adopted by the Senate of the State of Louisiana memorializing Congress to review and consider eliminating provisions of federal law which reduce Social Security benefits for those receiving pension benefits from federal, state, or local government retirement or pension systems, plans, or funds; to the Committee on Finance.

SENATE CONCURRENT RESOLUTION NO. 32

Whereas, the Congress of the United States has enacted both the Government Pension Offset (GPO), reducing the spousal and survivor Social Security benefit, and the Windfall Elimination Provision (WEP), reducing the earned Social Security benefit for any person who also receives a federal, state, or local retirement or pension benefit; and

Whereas, the intent of Congress in enacting the GPO and the WEP provisions was to address concerns that a public employee who had worked primarily in federal, state, or local government employment might receive a public pension in addition to the same Social Security benefit as a person who had worked only in employment covered by Social Security throughout his career; and

Whereas, the purpose of Congress in enacting these reduction provisions was to provide a disincentive for public employees to receive two pensions; and

Whereas, the GPO negatively affects a spouse or survivor receiving a federal, state, or local government retirement or pension benefit who would also be entitled to a Social Security benefit earned by a spouse; and

Whereas, the GPO formula reduces the spousal or survivor Social Security benefit by two-thirds of the amount of the federal, state, or local government retirement or pension benefit received by the spouse or survivor, in many cases completely eliminating the Social Security benefit; and

Whereas, the WEP applies to those persons who have earned federal, state, or local government retirement or pension benefits, in addition to working in employment covered under Social Security and paying into the Social Security system; and

Whereas, the WEP reduces the earned Social Security benefit using an averaged indexed monthly earnings formula and may reduce Social Security benefits for affected persons by as much as one-half of the retirement benefit earned as a public servant in employment not covered under Social Security; and

Whereas, because of these calculation characteristics, the GPO and the WEP have a disproportionately negative effect on employees working in lower-wage government jobs, like policemen, firefighters, teachers, and state employees; and

Whereas, because the Social Security benefit statements do not calculate the GPO and the WEP, many public employees in Louisiana are unaware that their expected Social Security benefits shown on such statements will be significantly lower or nonexistent due to the service in public employment through which they are required to be members of a Louisiana public retirement or pension system, plan, or fund; and

Whereas, these provisions also have a greater adverse effect on women than on men because of the gender differences in salary that continue to plague our nation and the longer life expectancy of women; and

Whereas, Louisiana is making every effort to improve the quality of life of its citizens and to encourage them to live here lifelong: Now, therefore, be it

Resolved, that the Legislature of Louisiana does hereby memorialize the Congress of the United States to review the GPO and the WEP Social Security benefit reductions and to consider eliminating or reducing them by enacting the Social Security Fairness Act of 2009 (H.R. 235 or R.S. 484) or a similar instrument; and be it further

Resolved, that a copy of this Resolution shall be transmitted to the secretary of the United States Senate and the clerk of the United States House of Representatives and to each member of the Louisiana delegation to the United States Congress.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. LIEBERMAN, from the Committee on Homeland Security and Governmental Affairs, without amendment:

H.R. 774. A bill to designate the facility of the United States Postal Service located at 46-02 21st Street in Long Island City, New York, as the "Geraldine Ferraro Post Office Building".

S. 1314. A bill to designate the facility of the United States Postal Service located at 630 Northeast Killingsworth Avenue in Portland, Oregon, as the "Dr. Martin Luther King, Jr. Post Office".

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Mr. CORKER (for himself and Mr. WARNER):

S. 1540. A bill to provide for enhanced authority of the Federal Deposit Insurance Corporation to act as receiver for certain affiliates of depository institutions, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. BROWN:

S. 1541. A bill to amend title IV of the Higher Education Act of 1965 to authorize private education loan refinancing under the Federal student loan program; to the Committee on Health, Education, Labor, and Pensions.

By Mr. SCHUMER (for himself, Mr. SANDERS, Ms. KLOBUCHAR, Mr. FEINGOLD, Mrs. MURRAY, and Mrs. SHAHEEN):

S. 1542. A bill to impose tariff-rate quotas on certain casein and milk protein concentrates; to the Committee on Finance.

By Mr. DODD (for himself, Mr. KENNEDY, Mrs. MURRAY, and Mr. LIEBERMAN):

S. 1543. A bill to amend the Family and Medical Leave Act of 1993 and title 5, United States Code, to provide leave for family members of members of regular components

of the Armed Forces, and leave to care for covered veterans, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

By Mr. KOHL (for himself, Mr. BENNET, Mrs. MCCASKILL, and Mr. FEINGOLD):

S. 1544. A bill to amend the Employee Retirement Income Security Act of 1974 with respect to the composition of the board of directors of the Pension Benefit Guaranty Corporation, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

By Mrs. GILLIBRAND:

S. 1545. A bill to expand the research and awareness activities of the National Institute of Arthritis and Musculoskeletal and Skin Diseases and the Centers for Disease Control and Prevention with respect to scleroderma, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

By Mr. BENNETT (for himself and Mr. HATCH):

S. 1546. A bill to provide for the conveyance of certain parcels of land to the town of Mantua, Utah; to the Committee on Energy and Natural Resources.

By Mr. REED (for himself, Mr. BOND, Mrs. MURRAY, Mr. JOHNSON, Mr. KERRY, and Mr. DURBIN):

S. 1547. A bill to amend title 38, United States Code, and the United States Housing Act of 1937 to enhance and expand the assistance provided by the Department of Veterans Affairs and the Department of Housing and Urban Development to homeless veterans and veterans at risk of homelessness, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. CARDIN (for himself and Mr. BURR):

S. 1548. A bill to improve research, diagnosis, and treatment of musculoskeletal diseases, conditions, and injuries, to conduct a longitudinal study on aging, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

By Mr. MENENDEZ (for himself, Mr. KENNEDY, and Mrs. GILLIBRAND):

S. 1549. A bill to protect United States citizens from unlawful arrest and detention; to the Committee on the Judiciary.

By Mr. MENENDEZ (for himself and Mrs. GILLIBRAND):

S. 1550. A bill to ensure that individuals detained by the Department of Homeland Security are treated humanely, provided adequate medical care, and granted certain specified rights; to the Committee on the Judiciary.

By Mr. SPECTER (for himself, Mr. REED, and Mr. KAUFMAN):

S. 1551. A bill to amend section 20 of the Securities Exchange Act of 1934 to allow for a private civil action against a person that provides substantial assistance in violation of such Act; to the Committee on the Judiciary.

By Mr. LIEBERMAN (for himself, Ms. COLLINS, Mrs. FEINSTEIN, Mr. VOINOVICH, Mr. BYRD, and Mr. ENSIGN):

S. 1552. A bill to reauthorize the DC opportunity scholarship program, and for other purposes; read the first time.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. BENNETT (for himself, Mr. WYDEN, Mr. WICKER, Mr. JOHANNES, Mr. COBURN, and Mr. CRAPO):

S. Res. 231. A resolution expressing the sense of the Senate that any health care reform proposal should slow the long-term growth of health costs and reduce the growth rate of Federal health care spending; to the Committee on Finance.

By Mr. WYDEN (for himself and Mr. MERKLEY):

S. Res. 232. A resolution celebrating the 100th anniversary of the Tillamook County Creamery Association; to the Committee on the Judiciary.

By Mr. BROWNBACK:

S. Res. 233. A resolution commending Russ Meyer on his induction into the National Aviation Hall of Fame; to the Committee on the Judiciary.

ADDITIONAL COSPONSORS

S. 252

At the request of Mr. AKAKA, the name of the Senator from Illinois (Mr. BURRIS) was added as a cosponsor of S. 252, a bill to amend title 38, United States Code, to enhance the capacity of the Department of Veterans Affairs to recruit and retain nurses and other critical health-care professionals, to improve the provision of health care veterans, and for other purposes.

S. 254

At the request of Mrs. LINCOLN, the name of the Senator from Illinois (Mr. BURRIS) was added as a cosponsor of S. 254, a bill to amend title XVIII of the Social Security Act to provide for the coverage of home infusion therapy under the Medicare Program.

S. 423

At the request of Mr. AKAKA, the name of the Senator from Minnesota (Mr. FRANKEN) was added as a cosponsor of S. 423, a bill to amend title 38, United States Code, to authorize advance appropriations for certain medical care accounts of the Department of Veterans Affairs by providing two-fiscal year budget authority, and for other purposes.

S. 446

At the request of Mr. SPECTER, the name of the Senator from Delaware (Mr. KAUFMAN) was added as a cosponsor of S. 446, a bill to permit the televising of Supreme Court proceedings.

S. 493

At the request of Mr. CASEY, the name of the Senator from New York (Mrs. GILLIBRAND) was added as a cosponsor of S. 493, a bill to amend the Internal Revenue Code of 1986 to provide for the establishment of ABLE accounts for the care of family members with disabilities, and for other purposes.

S. 581

At the request of Mr. BENNET, the name of the Senator from Maine (Ms. SNOWE) was added as a cosponsor of S. 581, a bill to amend the Richard B. Russell National School Lunch Act and the Child Nutrition Act of 1966 to require the exclusion of combat pay from income for purposes of determining eligibility for child nutrition programs and

the special supplemental nutrition program for women, infants, and children.

S. 601

At the request of Mrs. HUTCHISON, the name of the Senator from West Virginia (Mr. ROCKEFELLER) was added as a cosponsor of S. 601, a bill to establish the Weather Mitigation Research Office, and for other purposes.

S. 663

At the request of Mr. NELSON of Nebraska, the name of the Senator from Nebraska (Mr. JOHANNIS) was added as a cosponsor of S. 663, a bill to amend title 38, United States Code, to direct the Secretary of Veterans Affairs to establish the Merchant Mariner Equity Compensation Fund to provide benefits to certain individuals who served in the United States merchant marine (including the Army Transport Service and the Naval Transport Service) during World War II.

S. 694

At the request of Mr. DODD, the name of the Senator from Massachusetts (Mr. KENNEDY) was withdrawn as a cosponsor of S. 694, a bill to provide assistance to Best Buddies to support the expansion and development of mentoring programs, and for other purposes.

At the request of Mr. DODD, the name of the Senator from Massachusetts (Mr. KERRY) was added as a cosponsor of S. 694, *supra*.

S. 714

At the request of Mr. WEBB, the name of the Senator from Minnesota (Mr. FRANKEN) was added as a cosponsor of S. 714, a bill to establish the National Criminal Justice Commission.

S. 765

At the request of Mr. NELSON of Nebraska, the name of the Senator from Arkansas (Mrs. LINCOLN) was added as a cosponsor of S. 765, a bill to amend the Internal Revenue Code of 1986 to allow the Secretary of the Treasury to not impose a penalty for failure to disclose reportable transactions when there is reasonable cause for such failure, to modify such penalty, and for other purposes.

S. 812

At the request of Mr. BAUCUS, the name of the Senator from Nebraska (Mr. NELSON) was added as a cosponsor of S. 812, a bill to amend the Internal Revenue Code of 1986 to make permanent the special rule for contributions of qualified conservation contributions.

S. 941

At the request of Mr. CRAPO, the names of the Senator from Utah (Mr. HATCH) and the Senator from Oklahoma (Mr. INHOFE) were added as cosponsors of S. 941, a bill to reform the Bureau of Alcohol, Tobacco, Firearms, and Explosives, modernize firearm laws and regulations, protect the community from criminals, and for other purposes.

S. 994

At the request of Ms. KLOBUCHAR, the name of the Senator from Nebraska (Mr. NELSON) was added as a cosponsor of S. 994, a bill to amend the Public Health Service Act to increase awareness of the risks of breast cancer in young women and provide support for young women diagnosed with breast cancer.

S. 1065

At the request of Mr. BROWNBACK, the name of the Senator from Idaho (Mr. CRAPO) was added as a cosponsor of S. 1065, a bill to authorize State and local governments to direct divestiture from, and prevent investment in, companies with investments of \$20,000,000 or more in Iran's energy sector, and for other purposes.

S. 1066

At the request of Mr. SCHUMER, the name of the Senator from New Jersey (Mr. LAUTENBERG) was added as a cosponsor of S. 1066, a bill to amend title XVIII of the Social Security Act to preserve access to ambulance services under the Medicare program.

S. 1071

At the request of Mr. CHAMBLISS, the name of the Senator from Utah (Mr. HATCH) was added as a cosponsor of S. 1071, a bill to protect the national security of the United States by limiting the immigration rights of individuals detained by the Department of Defense at Guantanamo Bay Naval Base.

S. 1171

At the request of Mr. PRYOR, the name of the Senator from Arkansas (Mrs. LINCOLN) was added as a cosponsor of S. 1171, a bill to amend title XVIII of the Social Security Act to restore State authority to waive the 35-mile rule for designating critical access hospitals under the Medicare Program.

S. 1222

At the request of Mrs. LINCOLN, the name of the Senator from Oklahoma (Mr. INHOFE) was added as a cosponsor of S. 1222, a bill to amend the Internal Revenue Code of 1986 to extend and expand the benefits for businesses operating in empowerment zones, enterprise communities, or renewal communities, and for other purposes.

S. 1301

At the request of Mr. MENENDEZ, the name of the Senator from Arkansas (Mrs. LINCOLN) was added as a cosponsor of S. 1301, a bill to direct the Attorney General to make an annual grant to the A Child Is Missing Alert and Recovery Center to assist law enforcement agencies in the rapid recovery of missing children, and for other purposes.

S. 1321

At the request of Mr. UDALL of Colorado, the name of the Senator from Georgia (Mr. CHAMBLISS) was added as a cosponsor of S. 1321, a bill to amend the Internal Revenue Code of 1986 to

provide a credit for property labeled under the Environmental Protection Agency Water Sense program.

S. 1379

At the request of Mr. WHITEHOUSE, the name of the Senator from Oregon (Mr. MERKLEY) was added as a cosponsor of S. 1379, a bill to encourage energy efficiency and conservation and development of renewable energy sources for housing, commercial structures, and other buildings, and to create sustainable communities.

S. 1401

At the request of Mr. MARTINEZ, the names of the Senator from Wyoming (Mr. ENZI), the Senator from Utah (Mr. HATCH), the Senator from Utah (Mr. BENNETT), the Senator from Mississippi (Mr. WICKER), the Senator from North Carolina (Mr. BURR), the Senator from Illinois (Mr. DURBIN), the Senator from South Dakota (Mr. THUNE), the Senator from Wyoming (Mr. BARRASSO) and the Senator from Minnesota (Ms. KLOBUCHAR) were added as cosponsors of S. 1401, a bill to provide for the award of a gold medal on behalf of Congress to Arnold Palmer in recognition of his service to the Nation in promoting excellence and good sportsmanship in golf.

S. 1422

At the request of Mrs. MURRAY, the name of the Senator from Hawaii (Mr. AKAKA) was added as a cosponsor of S. 1422, a bill to amend the Family and Medical Leave Act of 1993 to clarify the eligibility requirements with respect to airline flight crews.

S. 1535

At the request of Mrs. FEINSTEIN, the name of the Senator from Rhode Island (Mr. WHITEHOUSE) was added as a cosponsor of S. 1535, a bill to amend the Fish and Wildlife Act of 1956 to establish additional prohibitions on shooting wildlife from aircraft, and for other purposes.

S. CON. RES. 36

At the request of Mrs. LINCOLN, the names of the Senator from New Hampshire (Mrs. SHAHEEN) and the Senator from Maryland (Mr. CARDIN) were added as cosponsors of S. Con. Res. 36, a concurrent resolution supporting the goals and ideals of "National Purple Heart Recognition Day".

S. RES. 71

At the request of Mr. WYDEN, the name of the Senator from Utah (Mr. HATCH) was added as a cosponsor of S. Res. 71, a resolution condemning the Government of Iran for its state-sponsored persecution of the Baha'i minority in Iran and its continued violation of the International Covenants on Human Rights.

AMENDMENT NO. 1907

At the request of Mr. JOHANNIS, his name was added as a cosponsor of amendment No. 1907 proposed to H.R. 3357, a bill to restore sums to the Highway Trust Fund, and for other purposes.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. CORKER (for himself and Mr. WARNER):

S. 1540. A bill to provide for enhanced authority of the Federal Deposit Insurance Corporation to act as receiver for certain affiliates of depository institutions, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

Mr. CORKER. Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 1540

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Resolution Reform Act of 2009".

SEC. 2. PURPOSES.

The purposes of this Act are—

(1) to allow the Federal Deposit Insurance Corporation (in this Act referred to as the "Corporation") to resolve the holding companies, affiliates, and subsidiaries of failed or failing insured depository institutions, consistent with the statutory mission of the Corporation, recognizing that depository institution holding companies serve as a source of strength for their subsidiary institutions, and that their affiliates and subsidiaries may provide critical services for such institutions; and

(2) to provide a clear and cohesive set of rules to address the increasingly complex and interrelated business structures in which insured depository institutions operate in order to promote efficient and economical resolution.

SEC. 3. DEFINITIONS.

For purposes of this Act, the following definitions shall apply:

(1) **AFFILIATE.**—The term "affiliate" has the same meaning as in section 2(k) of the Bank Holding Company Act of 1956.

(2) **BRIDGE DEPOSITORY INSTITUTION HOLDING COMPANY.**—The term "bridge depository institution holding company" means a new depository institution holding company organized by the Corporation pursuant to section 53(b) of the Federal Deposit Insurance Act.

(3) **CORPORATION.**—The terms "Corporation" and "Board" mean the Federal Deposit Insurance Corporation and the Board of Directors thereof, respectively.

(4) **COVERED AFFILIATE OR SUBSIDIARY.**—The term "covered affiliate or subsidiary" means any affiliate or subsidiary of a depository institution holding company, or any subsidiary of an insured depository institution that is a subsidiary of that depository institution holding company, as to which the Corporation is appointed receiver.

(5) **COVERED DEPOSITORY INSTITUTION HOLDING COMPANY.**—The term "covered depository institution holding company" means a depository institution holding company with one or more affiliated or subsidiary insured depository institutions for which grounds exist to appoint a receiver pursuant to section 11(c) of the Federal Deposit Insurance Act.

(6) **FOREIGN.**—The term "foreign" means any country other than the United States and includes any territory, dependency, or possession of any country other than the United States.

(7) **INSURED DEPOSITORY INSTITUTION.**—The term "insured depository institution" has the same meaning as section 3(c)(2) of the Federal Deposit Insurance Act.

SEC. 4. HOLDING COMPANY RESOLUTION AMENDMENTS TO THE FEDERAL DEPOSIT INSURANCE ACT.

The Federal Deposit Insurance Act (12 U.S.C. 1811 et seq.) is amended by adding at the end the following:

"SEC. 51. RESOLUTION OF COVERED DEPOSITORY INSTITUTION HOLDING COMPANIES, AFFILIATES, AND SUBSIDIARIES.

"(a) **IN GENERAL.**—Notwithstanding any other provision of Federal or State law, except section 52(c), it shall be the responsibility of the Corporation to resolve depository institution holding companies of failed or failing insured depository institutions and the affiliates and subsidiaries of a depository institution holding company, including any subsidiary of an insured depository institution that is a subsidiary of the depository institution holding company, using the powers and authorities conferred upon it by this Act.

"(b) **DEFINITIONS.**—For purposes of this section and sections 52 and 53, the following definitions shall apply:

"(1) **BRIDGE DEPOSITORY INSTITUTION HOLDING COMPANY.**—The term 'bridge depository institution holding company' means a new depository institution holding company organized by the Corporation pursuant to section 53(b).

"(2) **COVERED AFFILIATE OR SUBSIDIARY.**—The term 'covered affiliate or subsidiary' means any affiliate or subsidiary of a depository institution holding company, or any subsidiary of an insured depository institution that is a subsidiary of that depository institution holding company, as to which the Corporation is appointed receiver under section 52.

"(3) **COVERED DEPOSITORY INSTITUTION HOLDING COMPANY.**—The term 'covered depository institution holding company' means a depository institution holding company with one or more affiliated or subsidiary insured depository institutions for which grounds exist to appoint a receiver pursuant to section 11(c).

"(4) **FUNCTIONALLY REGULATED AFFILIATE OR SUBSIDIARY.**—The term 'functionally regulated affiliate or subsidiary' means any company—

"(A) that is not a depository institution holding company or a depository institution; and

"(B) that is—

"(i) a broker or dealer that is registered under the Securities Exchange Act of 1934;

"(ii) a registered investment adviser, properly registered by or on behalf of either the Securities and Exchange Commission in accordance with the Investment Advisers Act of 1940, or any State, with respect to the investment advisory activities of such investment adviser and activities incidental to such investment advisory activities;

"(iii) an investment company that is registered under the Investment Company Act of 1940;

"(iv) an insurance company that is subject to supervision by a State insurance regulator, with respect to the insurance activities of the insurance company and activities incidental to such insurance activities; or

"(v) an entity that is subject to regulation by the Commodity Futures Trading Commission, with respect to the commodities activities of such entity and activities incidental to such commodities activities.

"(5) **FUNCTIONAL REGULATOR.**—The term 'functional regulator' means the Federal or

State regulator responsible for regulating the types of activities engaged in by the depository institution holding company, its subsidiary institutions, or other affiliates and subsidiaries. The 'functional regulators' are—

"(A) the Securities and Exchange Commission, if the depository institution holding company, any subsidiary institution, or other affiliate thereof, is a broker or dealer registered with the Commission under section 15(b) of the Securities Exchange Act of 1934 (15 U.S.C. 78o(b)) in conjunction with the authorities granted to the Securities Investor Protection Corporation, as created by the Securities Investor Protection Act in resolution of brokers or dealers;

"(B) the Commodity Futures Trading Commission, if the depository institution holding company, its subsidiary institution, or other affiliate thereof, is a futures commission merchant or a commodity pool operator registered with the Commodity Futures Trading Commission under the Commodity Exchange Act; and

"(C) a State insurance commission or other board or authority, if the depository institution holding company, or an affiliate or subsidiary thereof, is an insurance company.

"SEC. 52. APPOINTMENT OF THE CORPORATION AS RECEIVER.

"(a) **DEPOSITORY INSTITUTION HOLDING COMPANIES.**—

"(1) **IN GENERAL.**—Notwithstanding any other provision of Federal law, the law of any State, or the constitution of any State, and subject to subsection (c), the Corporation shall accept appointment, and shall act as the receiver of a covered depository institution holding company upon such appointment, in the manner provided in paragraph (2) or (3), if the Corporation determines, in its sole discretion, that such appointment will reduce the cost to the Deposit Insurance Fund, and that grounds specified in subsection (f) exist. If the Corporation determines that such appointment will not reduce the cost to the Deposit Insurance Fund, the Corporation may decline the appointment, as provided in subsection (c).

"(2) **APPOINTMENT BY THE APPROPRIATE FEDERAL BANKING AGENCY.**—Whenever the appropriate Federal banking agency appoints a receiver for a depository institution holding company, the Federal banking agency shall tender the appointment to the Corporation, and the Corporation shall accept such appointment, unless the Corporation declines the appointment, as provided in subsection (c).

"(3) **APPOINTMENT OF THE CORPORATION BY THE CORPORATION.**—The Board of Directors may appoint the Corporation as receiver of a depository institution holding company, after consultation with the appropriate Federal banking agency, if the Board of Directors determines that, notwithstanding the existence of grounds specified in subsection (f), the appropriate Federal banking agency having supervision of a covered depository institution holding company has declined to appoint the Corporation as receiver.

"(4) **FUNCTIONALLY REGULATED DEPOSITORY INSTITUTION HOLDING COMPANIES.**—When the appropriate Federal banking agency appoints the Corporation as receiver of a covered depository institution holding company, or the Board of Directors appoints the Corporation as receiver of a covered depository institution holding company, the appropriate Federal banking agency or the Corporation shall consult with the covered depository institution holding company's functional regulator, if any.

“(b) AFFILIATES AND SUBSIDIARIES.—

“(1) IN GENERAL.—Notwithstanding any other provision of Federal law, the law of any State, or the constitution of any State, and subject to paragraph (2) and subsection (c), in any case in which the Corporation is appointed under this section as receiver for a depository institution holding company, the Corporation may appoint itself as the receiver of any affiliate or subsidiary of the insured depository institution or depository institution holding company that is incorporated or organized under the laws of any State, if the Corporation determines that such action would facilitate the orderly resolution of the insured depository institution or depository institution holding company, and is consistent with the purposes of this Act.

“(2) FUNCTIONALLY REGULATED SUBSIDIARIES.—The Corporation shall consult with the appropriate Federal or State functional regulator when the Corporation appoints itself as the receiver of any functionally regulated affiliate or subsidiary.

“(c) BANKRUPTCY OR STATE INSURANCE RESOLUTION OPTION.—

“(1) BANKRUPTCY GROUNDS FOR DECLINING APPOINTMENT.—The Corporation may decline to accept appointment for a covered depository institution holding company, when, in its sole discretion, the Corporation determines that the resolution of that holding company would be better accomplished under title 11, of the United States Code, or under applicable State insurance law.

“(2) RULEMAKING REQUIRED.—The Corporation shall, not later than 180 days after the date of enactment of this section, adopt regulations that establish criteria pursuant to which the Corporation will make the determination described in paragraph (1).

“(d) SEPARATE ENTITIES.—

“(1) IN GENERAL.—Subject to paragraph (2), each separate legal entity for which the Corporation is appointed receiver shall constitute a separate receivership.

“(2) APPLICABILITY.—Paragraph (1) shall not apply to any insured depository institution subsidiary for which the Corporation has appointed itself as receiver.

“(e) CORPORATION NOT SUBJECT TO ANY OTHER AGENCY.—When acting as the receiver pursuant to an appointment described in subsection (a) or (b), the Corporation shall not be subject to the direction or supervision of any other agency or department of the United States or any State in the exercise of its rights, powers, and privileges.

“(f) GROUNDS FOR APPOINTMENT.—The grounds for appointing the Corporation as receiver of a depository institution holding company, affiliate, or subsidiary are that one or more grounds exist under section 11(c) to appoint a receiver for one or more affiliated insured depository institutions.

“(g) TERMINATION AND EXCLUSION OF OTHER ACTIONS.—The appointment of the Corporation as receiver for a depository institution holding company or an insured depository institution that is an affiliate or subsidiary of a depository institution holding company shall immediately, and by operation of law, terminate any case commenced with respect to the depository institution holding company or any affiliate or subsidiary under title 11, United States Code, or any proceeding under any State insolvency law with respect to the depository institution holding company or affiliate or subsidiary. No such case or proceeding may be commenced with respect to the depository institution holding company or any affiliate or subsidiary of the insured depository institution at any time

while the Corporation acts as receiver of the depository institution holding company or any affiliate or subsidiary, without the written agreement of the Corporation.

“(h) JUDICIAL REVIEW.—

“(1) IN GENERAL.—If the Corporation is appointed (including the appointment of the Corporation by itself) as receiver of a depository institution holding company under subsection (a), the depository institution holding company may, not later than 30 days thereafter, bring an action in the United States district court for the judicial district in which the home office of such depository institution holding company is located, or in the United States District Court for the District of Columbia, for an order requiring the Corporation to be removed as the receiver (regardless of how such appointment was made), and the court shall, upon the merits, dismiss such action or direct the Corporation to be removed as the receiver.

“(2) OTHER APPOINTMENT.—If the Corporation appoints itself as receiver of any affiliate or subsidiary of the insured depository institution or depository institution holding company under subsection (b), the affiliate or subsidiary of the insured depository institution or depository institution holding company may, not later than 30 days thereafter, bring an action in the United States district court for the judicial district in which the home office of such any affiliate or subsidiary of the insured depository institution or depository institution holding company is located, or in the United States District Court for the District of Columbia, for an order requiring the Corporation to be removed as the receiver, and the court shall, upon the merits, dismiss such action or direct the Corporation to be removed as the receiver.

“SEC. 53. POWERS AND DUTIES OF CORPORATION AS RECEIVER.

“(a) RULEMAKING AUTHORITY OF CORPORATION.—The Corporation may prescribe such regulations as the Corporation determines appropriate regarding the orderly resolution and conduct of receiverships of covered depository institution holding companies or any affiliate or subsidiary, in accordance with section 52.

“(b) RECEIVERSHIP, BACK-UP EXAMINATION, AND ENFORCEMENT POWERS.—Except as provided in subsections (c) and (e), the Corporation shall have the same powers and rights to carry out its duties with respect to depository institution holding companies, or affiliates and subsidiaries, as the Corporation has under sections 8(t), 10(b), 11, 12, 13(d), 13(e), 15, and 38, with adaptations made, in the sole discretion of the Corporation, that are appropriate to the differences in form and function among depository institution holding companies, insured depository institutions, and their affiliates and subsidiaries.

“(c) AUTHORITY TO OBTAIN CREDIT.—

“(1) IN GENERAL.—A bridge depository institution holding company with respect to which the Corporation is the receiver may obtain unsecured credit and issue unsecured debt.

“(2) INABILITY TO OBTAIN CREDIT.—If a bridge depository institution holding company is unable to obtain unsecured credit or issue unsecured debt, the Corporation may authorize the obtaining of credit or the issuance of debt by the bridge depository institution holding company—

“(A) with priority over any or all of the obligations of the bridge depository institution holding company;

“(B) secured by a lien on property of the bridge depository institution holding company that is not otherwise subject to a lien; or

“(C) secured by a junior lien on property of the bridge depository institution holding company that is subject to a lien.

“(3) LIMITATION.—The Corporation may authorize the obtaining of credit or the issuance of debt by a bridge depository institution holding company that is secured by a senior or equal lien on property of the bridge depository institution holding company that is subject to a lien, only if—

“(A) the bridge depository institution holding company is unable to otherwise obtain such credit or issue such debt; and

“(B) there is adequate protection of the interest of the holder of the lien on the property with respect to which such senior or equal lien is proposed to be granted.

“(d) DISPOSITION OF CERTAIN DEPOSITORY INSTITUTION HOLDING COMPANIES, AFFILIATES, AND SUBSIDIARIES.—Notwithstanding any other provision of law (other than a conflicting provision of this Act), the Corporation, in connection with the resolution of any insured depository institution with respect to which the Corporation has been appointed as receiver, shall—

“(1) in the case of any depository institution holding company, or a covered affiliate or subsidiary for which the Corporation is appointed receiver, that is a member of the Securities Investor Protection Corporation (in this section referred to as ‘SIPC’), coordinate with SIPC in the liquidation, if any, of the company, to facilitate the orderly and timely payment of claims under the Securities Investor Protection Act; and

“(2) in the case of any other depository institution holding company, or covered affiliate or subsidiary, that is functionally regulated, coordinate with the appropriate Federal or State functional regulator in the disposition of the company, to facilitate the orderly and timely payment of claims under applicable guaranty plans, including State insurance guaranty plans.

“(e) PRIORITY OF EXPENSES AND UNSECURED CLAIMS.—

“(1) IN GENERAL.—Allowed claims (other than secured claims to the extent of any such security) against a covered depository institution holding company or any covered affiliate or subsidiary that are proven to the satisfaction of the receiver for such covered depository institution holding company, affiliate, or subsidiary shall have priority in the following order:

“(A) Administrative expenses of the receiver.

“(B) Any obligation of the covered depository institution holding company, or covered affiliate or subsidiary, to the Corporation.

“(C) Any general or senior liability of the covered depository institution holding company, or covered affiliate or subsidiary (which is not a liability described in subparagraph (D) or (E)).

“(D) Any obligation subordinated to general creditors which is not an obligation described in subparagraph (E).

“(E) Any obligation to shareholders, members, general partners, limited partners, or other persons with interests in the equity of the covered depository institution holding company, or covered affiliate or subsidiary, arising as a result of their status as shareholders, members, general partners, limited partners, or other persons with interests in the equity of the covered depository institution holding company, or covered affiliate or subsidiary.

“(2) CREDITORS SIMILARLY SITUATED.—All claimants of a covered depository institution holding company, or covered affiliate or subsidiary, that are similarly situated under

paragraph (1) shall be treated in a similar manner, except that the receiver may take any action (including making payments) that does not comply with this subsection, if—

“(A) the Corporation determines that such action is necessary to maximize the value of the assets of the covered depository institution holding company, or covered affiliate or subsidiary, to maximize the present value return from the sale or other disposition of the assets of the covered depository institution holding company, or to minimize the amount of any loss realized upon the sale or other disposition of the assets of the covered depository holding company, or covered affiliate or subsidiary; and

“(B) all claimants that are similarly situated under paragraph (1) receive not less than the amount provided in section 11(i)(2).

“(f) **RULE OF CONSTRUCTION.**—Nothing in the Resolution Reform Act is intended to supersede the administration of claims under applicable State laws governing insurance guaranty funds or the Securities Investor Protection Act of 1970.

“(g) **RULEMAKING.**—The Federal Deposit Insurance Corporation shall conduct a rulemaking to be completed within 180 days of enactment that will lay out specific guidelines and priority of all secured and unsecured claims as well as where the resources to satisfy those that will be satisfied will be derived.”.

SEC. 5. OTHER SPECIFIC MODIFICATIONS TO FEDERAL DEPOSIT INSURANCE CORPORATION AUTHORITY.

(a) **RECORDKEEPING.**—Section 11(e)(8)(H) of the Federal Deposit Insurance Act (12 U.S.C. 1821(e)(8)(H)) is amended to read as follows:

“(H) **RECORDKEEPING.**—The Corporation, after consultation with the appropriate Federal banking agencies, may prescribe regulations requiring that any insured depository institution or depository institution holding company maintain such records with respect to qualified financial contracts (including market valuations) as the Corporation determines to be necessary or appropriate to enable it to exercise its rights and fulfill its obligations under this Act.”.

(b) **GOLDEN PARACHUTE PAYMENTS.**—Section 18(k)(4)(A)(ii)(III) of the Federal Deposit Insurance Act (12 U.S.C. 1828(k)(4)(A)(ii)(III)) is amended—

- (1) by striking “institution’s”;
- (2) by inserting “or covered company” after “insured depository institution”; and
- (3) by inserting before the semicolon: “, except that the Corporation may define and make a determination of troubled condition for any covered company that does not have an appropriate Federal banking agency”.

SEC. 6. CROSS-BORDER CLAIMS.

(a) **PURPOSE AND SCOPE.**—

(1) **PURPOSE.**—The purpose of this section is to provide effective mechanisms for dealing with cases of cross-border insolvency, with the objectives of—

(A) facilitating cooperation between the Corporation, acting in its capacity as receiver of a covered depository institution holding company or covered affiliate or subsidiary of an insured depository institution and the courts and other authorities of foreign countries involved in cross-border insolvency cases; and

(B) facilitating the orderly resolution of insured depository institutions, covered depository institution holding companies, or covered affiliates or subsidiaries, in receivership.

(2) **SCOPE.**—This section applies in any case in which—

(A) the Corporation seeks assistance from a foreign court, foreign representative, or foreign regulatory or supervisory authority in connection with the resolution of a depository institution holding company, or covered affiliate or subsidiary thereof;

(B) the assistance of the Corporation is sought by a foreign court, foreign representative, or foreign regulatory or supervisory authority in connection with a foreign proceeding or with a resolution under this Act; or

(C) a foreign proceeding and a case under this Act with respect to the same covered depository institution holding company, or covered affiliate or subsidiary, are pending concurrently.

(b) **COORDINATION AND COOPERATION.**—In regard to matters of insolvency and insolvency proceedings, the Corporation may—

(1) cooperate and coordinate with foreign courts, foreign representatives, and foreign regulatory or supervisory authorities, either directly or through a designated representative, as the Corporation deems appropriate; and

(2) communicate directly with, or to request information or assistance directly from, foreign courts, foreign representatives, and foreign regulatory or supervisory authorities.

(c) **CLAIMS BY FOREIGN REPRESENTATIVES.**—The Corporation, in its capacity as receiver of a covered depository institution holding company, or covered affiliate or subsidiary, may allow a foreign administrator or representative to file claims.

(d) **COORDINATION OF PAYMENTS.**—

(1) **LIMITATION.**—Notwithstanding any other provision of Federal law, a creditor who has received payment with respect to a claim in a foreign insolvency proceeding may not receive a payment for the same claim brought in a United States insolvency proceeding under this Act against the same depository institution, depository institution holding company, or covered affiliate or subsidiary.

(2) **SUBROGATION.**—A claimant in an insolvency proceeding under this Act that has received payment on its claim shall agree to the subrogation of the Corporation, to the extent of such payment, to any claim or right of claim, arising from the same loss.

(e) **PUBLIC POLICY EXEMPTION.**—Nothing in this section prevents the Corporation from refusing to take an action governed by this section if the action would be contrary to the public policy of the United States or if it would increase losses to the Deposit Insurance Fund.

SEC. 7. MISCELLANEOUS PROVISIONS.

(a) **BANKRUPTCY CODE AMENDMENTS.**—Section 109(b)(2) of title 11, United States Code, is amended by inserting before “homestead association” the following: “covered depository institution holding company and covered affiliate or subsidiary, as those terms are defined in section 51(b) of the Federal Deposit Insurance Act (except if the Federal Deposit Insurance Corporation exercises its authority under section 52(c) of that Act),”.

(b) **AUTHORITY TO APPOINT RECEIVER.**—

(1) **FEDERAL RESERVE ACT.**—Section 11(o) of the Federal Reserve Act (12 U.S.C. 248(o)) is amended—

(A) by striking “The Board” and inserting the following:

“(1) **STATE MEMBER BANKS.**—The Board”; and

(B) by adding at the end the following:

“(2) **COVERED DEPOSITORY INSTITUTION HOLDING COMPANIES.**—The Board may appoint the Federal Deposit Insurance Corporation

as receiver for a covered depository institution holding company (as those terms are defined in section 51(b) of the Federal Deposit Insurance Act) under section 52 of the Federal Deposit Insurance Act.”.

(2) **HOME OWNERS’ LOAN ACT.**—Section 10 of the Home Owners’ Loan Act (12 U.S.C. 1467a) is amended—

(A) by redesignating subsection (t) as subsection (u); and

(B) by inserting after subsection (s) the following:

“(t) **APPOINTMENT OF FDIC AS RECEIVER.**—The Director may appoint the Federal Deposit Insurance Corporation as receiver for a covered depository institution holding company (as those terms are defined in section 51(b) of the Federal Deposit Insurance Act) under section 52 of the Federal Deposit Insurance Act.”.

By Mr. DODD (for himself, Mr. KENNEDY, Mrs. MURRAY, and Mr. LIEBERMAN):

S. 1543. A bill to amend the Family and Medical Leave Act of 1993 and title 5, United States Code, to provide leave for family members of members of regular components of the Armed Forces, and leave to care for covered veterans, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

Mr. DODD. Mr. President, I rise today to introduce The Supporting Military Families Act of 2009.

The sacrifices made by our soldiers, sailors, airmen, Marines, and Coast Guard are matched only by those made by their families. When a loved one is serving abroad, and in cases where he or she returns wounded, it can take an immense emotional toll on a family.

But it does not have to take an equally staggering economic toll.

The bill I introduce today clarifies and improves upon provisions included in the National Defense Authorization Act of 2008, which provided important benefits for family members of our brave service men and women.

More than 20 years ago, I began the effort to bring job protection to hard-working Americans so they wouldn’t have to choose between the family they love and the job they need. This effort, after more than seven years, three presidents, and two vetoes, eventually led to the enactment of the Family Medical Leave Act, FMLA, which provides 12 weeks of unpaid leave for eligible employees so they may care for a newborn or adopted child, their own serious illness, or that of a loved one. Since its passage, I have worked to expand this Act to cover more workers and to provide for paid leave, so that more employees can afford to take leave when necessary.

We must also ensure that we care for the health and well-being of our war heroes, many of whom return from deployment with serious injuries and illnesses. Two years ago, I introduced legislation to provide up to 6 months of FMLA leave for primary caregivers of servicemembers who suffer from a combat-related injury or illness. The

FMLA currently provides three months of unpaid leave to a spouse, parent, or child acting as a caregiver for a person with a serious illness. However, some of those injured in service to our country rely on other family members or friends to care for them as they recover, and many of these injuries take longer than 3 months to heal from. That is why, following a recommendation of the President's Commission on Care for America's Returning Wounded Warriors, headed by former Senator Bob Dole and former Secretary of Health and Human Services Donna Shalala, I offered this legislation. It was included in the 2008 National Defense Authorization Act, along with another provision providing exigency leave for servicemembers' families, which allows the families of deployed servicemembers to take leave to manage their family or personal affairs.

These two provisions were important steps toward giving our servicemembers and their families the support they need during extremely challenging times. The legislation I introduce today builds on those efforts and will accomplish three things. First, a number of service-related illnesses and injuries may not manifest themselves until after a servicemember has left the military, including traumatic brain injury and post traumatic stress disorder. This bill extends the annual 26 weeks of unpaid leave to family members of veterans for up to five years after a veteran leaves service, if the veteran develops a service-related serious injury or illness that he or she needs time to recover from. Second, this legislation extends eligibility for exigency leave to those deployed to a foreign country, and not only in support of a contingency operation, in order to provide the benefit to all of those families who struggle with the challenges of a deployment. Finally, the DOL regulations limited access to exigency leave to Reserve and National Guard members only. This was not the intent of the initial legislation, and this bill extends exigency leave to cover all active duty members who are deployed to a foreign country.

I am pleased that my colleagues Senators KENNEDY, LIEBERMAN, and MURRAY are joining me in introducing the Supporting Military Families Act of 2009.

By Mr. REED (for himself, Mr. BOND, Mrs. MURRAY, Mr. JOHNSON, Mr. KERRY, and Mr. DURBIN):

S. 1547. A bill to amend title 38, United States Code, and the United States Housing Act of 1937 to enhance and expand the assistance provided by the Department of Veterans Affairs and the Department of Housing and Urban Development to homeless veterans and veterans at risk of homelessness, and for other purposes; to the

Committee on Banking, Housing, and Urban Affairs.

Mr. REED. Mr. President, today I introduce the Zero Tolerance for Veteran Homelessness Act. This comprehensive bill enhances and expands the assistance provided by the Department of Veterans Affairs and the Department of Housing and Urban Development to homeless veterans and veterans at risk of becoming homeless.

It is one of our Nation's great tragedies that on any given night, 131,000 veterans are homeless. The Department of Veterans Affairs estimates that more than 200,000 veterans experience homelessness each year and that nearly 1/5 of all homeless people in the United States are veterans. These numbers are expected to climb as our servicemembers fighting in Iraq and Afghanistan return home to face tough economic conditions.

We know that veterans are often at greater risk of becoming homeless. Some return from deployments to discover that the skills they have honed in their military service can be difficult to transfer to jobs in the private sector. Others struggle with physical or mental wounds of war. Still others return to communities that lack safe, affordable housing.

Our veterans have made great sacrifices to serve our country, and it is especially important to honor our commitment to them. The Department of Veterans Affairs is certainly a part of that commitment, providing benefits, medical care, support, and a sense of community to homeless veterans. However, a number of other federal agencies provide service to veterans, including the Department of Housing and Urban Development, and this legislation builds on that existing infrastructure.

Many programs through HUD and the VA are already helping homeless veterans with transitional housing, health care and rehabilitation services, and employment assistance. However, a more comprehensive and coordinated approach would strengthen these programs and prevent more at-risk veterans from becoming homeless.

That is why I have joined with my colleagues Senators BOND, MURRAY, and JOHNSON to introduce this much-needed legislation. The Zero Tolerance for Veterans Homelessness Act seeks to merge housing programs and support services for veterans from the start so that there is an integrated approach to address their risk of homelessness.

First, this bill would create a new Homelessness Prevention program that would enable the VA to keep at-risk veterans in stable housing and offer increased assistance to veterans who have fallen into homelessness. Specifically, the VA could provide short-term rental assistance, housing relocation and stabilization services, services to resolve personal credit issues, pay-

ments for security deposits or utility costs, and assistance for moving costs. These up-front expenses can be the major obstacle that puts low-income or unemployed veterans at risk of becoming homeless. These homelessness prevention and rapid re-housing techniques have been successfully used in numerous communities to significantly reduce family homelessness, and this bill would give the VA resources to put these strategies into practice.

Second, this bill would authorize additional housing vouchers through the HUD-Veterans Affairs Supportive Housing, VASH, program. This collaborative program provides homeless veterans with vouchers to rent apartments in the private rental market, as well as case management and clinical services at local VA medical centers. In this way, veterans receive the supportive housing they need to recover and thrive.

The HUD-VASH program has grown in recent years. Twenty thousand vouchers were funded in the last two appropriations cycles, and 10,000 more will likely be funded in Fiscal Year 2010. However, more homeless veterans could benefit from this important resource. As such, the Zero Tolerance for Veterans Homelessness bill authorizes up to 10,000 additional vouchers each year to reach a maximum of 60,000 vouchers by 2013.

Third, this legislation would make it easier for non-profits to apply for capital grants through the VA's grants and per diem program to build transitional housing and other facilities for veterans. This would streamline the process for non-profit organizations to be able to use financing from other sources to break ground on new housing construction. This is particularly important in the current economy, when non-profits are stretched and have to be more creative than ever to fund new capital projects.

The Zero Tolerance for Veterans Homelessness Act would also create a Special Assistant for Veterans Affairs within HUD. The Special Assistant would ensure that veterans have access to HUD's existing programs and work to remove any barriers. The Special Assistant would also serve as a liaison between HUD and the VA, helping to connect and coordinate the services the two departments provide.

Additionally, this legislation recognizes the need to measure progress of efforts to combat homelessness. It establishes a new Homeless Veterans Management Information System, to be developed by the VA, in consultation with HUD and the United States Interagency Council on Homelessness. This data collection system will be used to provide annual reports to Congress on the number of homeless veterans and the types of assistance they receive. This information will help illustrate how programs are performing and inform future policy.

Finally, the bill would require the Secretary of Veterans Affairs, in consultation with other agencies, to analyze existing programs and develop a comprehensive plan with recommendations on how to end homelessness among veterans. Establishing a plan with appropriate benchmarks will enable the VA to more easily track progress towards this important goal.

This bipartisan bill also complements a bill that I am cosponsoring with Senator MURRAY to enable programs at the VA and the Department of Labor to better serve homeless women veterans and homeless veterans with children.

Only by working together, across the federal government and in partnership with non-profits and local housing authorities, will we be able to comprehensively help homeless veterans and reach those in danger of becoming homeless. We owe it to our veterans to ensure that they and their families have safe, affordable places to live and to provide the services and benefits they have earned. The nation's brave veterans deserve nothing less.

I hope my colleagues will join in supporting this important, bipartisan legislation.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 1547

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Zero Tolerance for Veterans Homelessness Act of 2009".

SEC. 2. FINDINGS.

Congress finds that—

(1) veterans are at a greater risk of becoming homeless than other people in the United States, because of characteristics that include—

(A) having employment-related skills that are unique to military service and that can be difficult to transfer to the civilian sector;

(B) combat-related health issues;

(C) earning minimal income or being unemployed; and

(D) a shortage of safe, affordable housing;

(2) the Department of Veterans Affairs estimates that—

(A) 131,000 veterans are homeless on any given night;

(B) more than 200,000 veterans experience homelessness each year; and

(C) veterans account for nearly 1/3 of all homeless people in the United States;

(3) approximately 1,500,000 veterans, nearly 6.3 percent of the veterans in the United States, have an income that falls below the Federal poverty level, and approximately 634,000 veterans have an income below 50 percent of the Federal poverty level;

(4) the Department of Veterans Affairs is only adequately funded to respond to the health, housing, and supportive services needs of approximately 1/3 of the veterans in the United States; and

(5) it is expected that significant increases in services will be needed to serve the aging

veterans of the Vietnam war and members of the Armed Forces returning from Operation Iraqi Freedom and Operation Enduring Freedom.

SEC. 3. PROGRAM ON PREVENTION OF VETERAN HOMELESSNESS.

(a) PROGRAM ON PREVENTION OF VETERAN HOMELESSNESS.—

(1) IN GENERAL.—Subchapter VII of chapter 20 of title 38, United States Code, is amended by adding at the end the following new section:

"§ 2067. Prevention of veteran homelessness

"(a) PREVENTION OF VETERAN HOMELESSNESS.—Not later than 180 days after the date of the enactment of this section, the Secretary shall establish a program within the Veterans Benefits Administration to prevent veteran homelessness by—

"(1) identifying in a timely fashion any veteran who is homeless or at imminent risk of becoming homeless; and

"(2) providing assistance sufficient to ensure that each veteran identified under paragraph (1) does not become or remain homeless.

"(b) TYPES OF ASSISTANCE.—The assistance provided under subsection (a)(2) may include the following:

"(1) The provision of short-term or medium-term rental assistance.

"(2) Housing relocation and stabilization services, including housing search, mediation, and outreach to property owners.

"(3) Services to resolve personal credit issues that have led to negative credit reports.

"(4) Assistance with paying security or utility deposits and utility payments.

"(5) Assistance with covering costs associated with moving.

"(6) A referral to a program of another department or agency of the Federal Government.

"(7) Such other activities as the Secretary considers appropriate to prevent veterans homelessness.

"(c) NO DUPLICATION OF SERVICES.—The Secretary may provide assistance under subsection (a)(2) to a veteran receiving supportive services from an eligible entity receiving financial assistance under section 2044 of this title only to the extent that the assistance provided under subsection (a)(2) does not duplicate the supportive services provided to such veteran by such entity.

"(d) STAFFING.—The Secretary shall assign such employees at such locations as the Secretary considers necessary to carry out this section.

"(e) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section \$50,000,000 for each of fiscal years 2010 through 2014."

(2) CLERICAL AMENDMENT.—The table of sections at the beginning of chapter 20 of such title is amended by adding at the end the following new item:

"2067. Prevention of veteran homelessness."

(b) RESPONSIBILITIES OF HOMELESS VETERANS PROGRAM COORDINATORS.—Section 2003(a) of such title is amended—

(1) in paragraph (3), by striking "The housing" and inserting "Any housing";

(2) by redesignating paragraph (7) as paragraph (8); and

(3) by inserting after paragraph (6) the following new paragraph (7):

"(7) The program under section 2067 of this title."

(c) REPORT.—Not later than 180 days after the date of the establishment of the program required by section 2067 of title 38, United

States Code, as added by paragraph (1), the Secretary of Veterans Affairs shall submit to Congress a report on the operation of such program.

SEC. 4. ENHANCEMENT OF COMPREHENSIVE SERVICE PROGRAMS.

(a) ENHANCEMENT OF GRANTS.—Section 2011 of title 38, United States Code, is amended—

(1) in subsection (a), by striking "Subject to the availability of appropriations provided for such purpose, the" and inserting "The";

(2) in subsection (b)(1)(A), by inserting "new construction," before "expansion"; and

(3) in subsection (c)—

(A) in the first sentence, by striking "A grant" and inserting "(1) A grant";

(B) in the second sentence of paragraph (1), as designated by subparagraph (A), by striking "The amount" and inserting the following:

"(2) The amount"; and

(C) by adding at the end the following new paragraph:

"(3)(A) The Secretary may not deny an application from an entity that seeks a grant under this section to carry out a project described in subsection (b)(1)(A) solely on the basis that the entity proposes to use funding from other private or public sources, if the entity demonstrates that a private nonprofit organization will provide oversight and site control for the project.

"(B) In this paragraph, the term 'private nonprofit organization' means the following:

"(i) An incorporated private institution, organization, or foundation—

"(I) that has received, or has temporary clearance to receive, tax-exempt status under paragraphs (2), (3), or (19) of section 501(c) of the Internal Revenue Code of 1986;

"(II) for which no part of the net earnings of the institution or foundation inures to the benefit of any member, founder, or contributor of the institution or foundation; and

"(III) that the Secretary determines is financially responsible.

"(ii) A for-profit limited partnership or limited liability company, the sole general partner of which is an organization that is described by subclauses (I) through (III) of clause (i).

"(iii) A corporation wholly owned and controlled by an organization that is described by subclauses (I) through (III) of clause (i)."

(b) STUDY AND REPORT ON PER DIEM PAYMENTS.—

(1) STUDY AND DEVELOPMENT OF PAYMENT METHOD.—Not later than one year after the date of the enactment of this Act, the Secretary of Veterans Affairs shall—

(A) complete a study of all matters relating to the method used by the Secretary to make per diem payments under section 2012(a) of title 38, United States Code; and

(B) develop an improved method for adequately reimbursing recipients of grants under section 2011 of such title for services furnished to homeless veterans.

(2) CONSIDERATION.—In developing the method required by paragraph (1)(B), the Secretary may consider payments and grants received by recipients of grants described in such paragraph from other departments and agencies of Federal and local governments and from private entities.

(3) REPORT.—Not later than one year after the date of the enactment of this Act, the Secretary of Veterans Affairs shall submit to Congress a report on—

(A) the findings of the Secretary with respect to the study required by subparagraph (A) of paragraph (1);

(B) the method developed under subparagraph (B) of such paragraph; and

(C) any recommendations of the Secretary for revising the method described in subparagraph (A) of such paragraph and any legislative action the Secretary considers necessary to implement such method.

(c) AUTHORIZATION OF APPROPRIATIONS.—Section 2013 of such title is amended by striking “subchapter \$150,000,000” and all that follow through the period and inserting the following: “subchapter—

“(1) \$200,000,000 for fiscal year 2010; and

“(2) such sums as may be necessary for each of fiscal years 2011 through 2014.”.

SEC. 5. HUD VETERANS AFFAIRS SUPPORTIVE HOUSING VOUCHERS.

Section 8(o)(19) of the United States Housing Act of 1937 (42 U.S.C. 1437f(o)(19)) is amended to read as follows:

“(19) RENTAL VOUCHERS FOR VETERANS AFFAIRS SUPPORTED HOUSING PROGRAM.—

“(A) RENTAL VOUCHERS.—The Secretary shall make available to public housing agencies described in subparagraph (C) the amounts described in subparagraph (B), to provide rental assistance through a supported housing program administered in conjunction with the Department of Veterans Affairs.

“(B) AMOUNT.—The amounts specified in this subparagraph are the amounts necessary to ensure that—

“(i) not more than 30,000 vouchers for rental assistance under this paragraph are outstanding at any one time during fiscal year 2010;

“(ii) not more than 40,000 vouchers for rental assistance under this paragraph are outstanding at any one time during fiscal year 2011;

“(iii) not more than 50,000 vouchers for rental assistance under this paragraph are outstanding at any one time during fiscal year 2012; and

“(iv) not more than 60,000 vouchers for rental assistance under this paragraph are outstanding at any one time during fiscal year 2013 and each fiscal year thereafter.

“(C) PUBLIC HOUSING AGENCIES.—A public housing agency described in this subparagraph is a public housing agency that—

“(i) has a partnership with a Department of Veterans Affairs medical center or an entity determined to be appropriate by the Secretary of Veterans Affairs;

“(ii) is located in an area that the Secretary of Veterans Affairs determines has a high concentration of veterans in need of assistance;

“(iii) has demonstrated expertise in providing housing for homeless individuals; and

“(iv) meets any other criteria that the Secretary, in consultation with the Secretary of Veterans Affairs may prescribe.

“(D) CASE MANAGEMENT.—The Secretary of Veterans Affairs shall ensure that the case managers described in section 2003(b) of title 38, United States Code, provide appropriate case management for each veteran who receives rental assistance under this paragraph that—

“(i) assists the veteran in—

“(I) locating available housing;

“(II) working with the appropriate public housing agency;

“(III) accessing benefits and health services provided by the Department of Veterans Affairs and other departments and agencies of the Federal Government;

“(IV) negotiating with landlords; and

“(V) other areas, as the Secretary determines is necessary to help the veteran maintain housing or avoid homelessness; and

“(ii) ensures that a veteran with a severe disability, including a veteran that has been

homeless for a substantial period of time, is referred to sufficient supportive services to provide the veteran with stable housing, including—

“(I) mental health services, including treatment and recovery support services;

“(II) substance abuse treatment and recovery support services, including counseling, treatment planning, recovery coaching, and relapse prevention;

“(III) integrated, coordinated treatment and recovery support services for co-occurring disorders;

“(IV) health education, including referrals for medical and dental care;

“(V) services designed to help individuals make progress toward self-sufficiency and recovery, including job training, assistance in seeking employment, benefits advocacy, money management, life-skills training, self-help programs, and engagement and motivational interventions;

“(VI) parental skills and family support; and

“(VII) other supportive services that promote an end to chronic homelessness.”.

SEC. 6. SPECIAL ASSISTANT FOR VETERANS AFFAIRS IN OFFICE OF SECRETARY OF HOUSING AND URBAN DEVELOPMENT.

Section 4 of the Department of Housing and Urban Development Act (42 U.S.C. 3533) is amended by adding at the end the following new subsection:

“(g) SPECIAL ASSISTANT FOR VETERANS AFFAIRS.—

“(1) ESTABLISHMENT.—There shall be in the Department a Special Assistant for Veterans Affairs, who shall be in the Office of the Secretary.

“(2) APPOINTMENT.—The Special Assistant for Veterans Affairs shall be appointed by the Secretary, based solely on merit and shall be covered under the provisions of title 5, United States Code, governing appointments in the competitive service.

“(3) RESPONSIBILITIES.—The Special Assistant for Veterans Affairs shall be responsible for—

“(A) ensuring that veterans have access to housing and homeless assistance under each program of the Department providing such assistance;

“(B) coordinating all programs and activities of the Department relating to veterans; and

“(C) carrying out such other duties as may be assigned to the Special Assistant by the Secretary or by law.”.

SEC. 7. HOMELESS VETERANS MANAGEMENT INFORMATION SYSTEM.

(a) IN GENERAL.—Subchapter VII of chapter 20 of title 38, United States Code, as amended by section 3(b), is further amended by adding at the end the following new section:

“§ 2068. Homeless Veterans Management Information System

“(a) METHOD FOR DATA COLLECTION AND AGGREGATION.—(1) Not later than one year after the date of the enactment of this section, the Secretary shall, in consultation with the Special Assistant for Veterans Affairs of the Department of Housing and Urban Development and the United States Interagency Council on Homelessness established under section 201 of the McKinney-Vento Homeless Assistance Act (42 U.S.C. 11311), establish a method for the collection and aggregation of data on homeless veterans participating in programs of the Department of Veterans Affairs and the Department of Housing and Urban Development, including the following:

“(A) The age, race, sex, disability status, marital status of the veteran, income, em-

ployment history, and whether the veteran is a parent.

“(B) If the veteran received housing assistance, the number of days that the veteran resided in such housing, and the type of housing in which the veteran resided.

“(C) If the veteran is no longer participating in a program, the reason the veteran left the program.

“(2) The method required by paragraph (1) shall be established in a manner that ensures that each veteran is counted only once.

“(b) ANNUAL DATA COLLECTION AND AGGREGATION.—Not later than one year after the method is established under subsection (a), and annually thereafter, the Secretary shall collect and aggregate data using the method established under subsection (a).

“(c) ANNUAL REPORTS.—Not later than two years after the date of enactment of this section and annually thereafter, the Secretary shall submit to Congress a report on the data collected and aggregated under subsection (b).

“(d) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section—

“(1) \$10,000,000 for fiscal year 2010; and

“(2) such sums as may be necessary for fiscal years 2011 through 2014.”.

(b) CLERICAL AMENDMENT.—The table of sections at the beginning of chapter 20 of such title is amended by adding at the end the following new item:

“2068. Homeless Veterans Management Information System.”.

SEC. 8. PLAN TO END VETERAN HOMELESSNESS.

(a) IN GENERAL.—Not later than 1 year after the date of enactment of this Act, the Secretary of Veterans Affairs shall submit to Congress a comprehensive plan to end homelessness among veterans that includes—

(1) an analysis of programs of the Department of Veterans Affairs and other departments and agencies of the Federal Government that are designed to prevent homelessness among veterans and assist veterans who are homeless;

(2) an evaluation of whether and how partnerships between the programs described in paragraph (1) would contribute to ending homelessness among veterans;

(3) recommendations for improving the programs described in paragraph (1), creating partnerships between such programs, or eliminating programs that are no longer effective;

(4) recommendations for new programs to prevent and end homelessness among veterans, including an estimation of the cost of such programs;

(5) a timeline for implementing the plan; and

(6) such other information as the Secretary determines necessary.

(b) CONSIDERATION OF VETERANS LOCATED IN RURAL AREAS.—The analysis, evaluation, and recommendations included in the report required by subsection (a) shall include consideration of the circumstances and requirements that are unique to veterans located in rural areas.

By Mr. SPECTER (for himself,
Mr. REED, and Mr. KAUFMAN):

S. 1551. A bill to amend section 20 of the Securities Exchange Act of 1934 to allow for a private civil action against a person that provides substantial assistance in violation of such Act; to the Committee on the Judiciary.

Mr. SPECTER. Mr. President. I have sought recognition to urge support for

the legislation I just introduced, the Liability for Aiding and Abetting Securities Violations Act of 2009. My legislation would overturn two errant decisions of the Supreme Court—*Central Bank of Denver v. First Interstate Bank of Denver*, 511 U.S. 164, 1994, and *Stoneridge Investment Partners, LLC v. Scientific-Atlanta, Inc.*, 522 U.S. 148, 2008, by amending the Securities Exchange Act of 1934 to authorize a private right of action for aiding-and-abetting liability.

The Act's main anti-fraud provision, §10(b), makes it "unlawful for any person, directly or indirectly," to commit acts of fraud "in connection with the purchase or sale of any security." Nearly fifty years ago the Court implied a private right of action under §10(b). The result was that investors could recover financial losses caused by violations of 10(b) and the companion regulation issued by the SEC commonly known as "Rule 10b-5."

Until *Central Bank*, every circuit of the Federal Court of Appeals had concluded that §10(b)'s private right of action allowed recovery not only against the person who directly undertook a fraudulent act—the so-called primary violator—but also anyone who aided and abetted him. A five-Justice majority in *Central Bank*, intent on narrowing §10(b)'s scope, held that its private right of action extended only to primary violators.

When Congress debated the legislation that became the Private Securities Litigation Reform Act of 1995, PSLRA, then-SEC chairman Arthur Levitt and others urged Congress to overturn *Central Bank*. Congress declined to do so. The PSLRA authorized only the Securities and Exchange Commission, SEC, to bring aiding-and-abetting enforcement litigation.

It is time for us to revisit that judgment. The massive frauds involving Enron, Refco, Tyco, Worldcom, and countless other lesser-known companies during the last decade have taught us that a stock issuer's auditors, bankers, business affiliates, and lawyers—sometimes called "secondary actors"—all too often actively participate in and enable the issuer's fraud. Federal Judge Gerald Lynch recently observed in a decision calling on Congress to re-examine *Central Bank* that secondary actors are sometimes "deeply and indispensably implicated in wrongful conduct." In re *Refco, Inc. Sec. Litig.*, 609 F. Supp. 2d 304, 318 n.15, S.D.N.Y. 2009. Professor John Coffee of Columbia Law School, a renowned expert on the regulation of the securities markets, has even laid much of the blame for the major corporate frauds of this decade on the "acquiescence" of the "outside professionals"—especially accountants, securities analysts, and corporate lawyers—responsible for "preparing, verifying, or certifying corporate disclosures to the securities markets."

Coffee, "Gatekeeper Failure and Reform: The Challenge of Fashioning Relevant Reforms," 84 *Boston University Law Review* 301, 304, 2004.

The immunity from suit that *Central Bank* confers on secondary actors has removed much-needed incentives for them to avoid complicity in and even help prevent securities fraud, and all too often left the victims of fraud uncompensated for their losses. Enforcement actions by the SEC have proved to be no substitute for suits by private plaintiffs. The SEC's litigating resources are too limited for the SEC to bring suit except in a small number of cases, and even when the SEC does bring suit, it cannot recover damages for the victims of fraud.

Last year's decision in *Stoneridge* made matters still worse for defrauded investors. *Central Bank* had at least held open the possibility that secondary actors who themselves undertake fraudulent activities prescribed by §10(b) could be "held liable as . . . primary violator[s]." *Stoneridge* has largely foreclosed that possibility. A divided Court held that §10(b)'s private right of action did not "reach" two vendors of a cable company that entered into sham transactions with the company knowing that it would publicly report the transactions in order to inflate its stock price. The Court conceded that the suppliers engaged in fraudulent conduct prescribed by §10(b), but held that they were not liable in a private action because only the issuer, not they, communicated the transaction to the public. That remarkable conclusion put the Court at odds with even the Republican Chairman of the SEC.

My legislative response would take the limited, but important, step amending of the Exchange Act to authorize a private right of action under §10(b) (and other, less commonly invoked, provisions of the Act) against a secondary actor who provides "substantial assistance" to a person who violates §10(b). Any suit brought under my proposed amendment would, of course, be subject to the heightened pleading standards, discovery-stay procedures, and other defendant-protective features of the PSLRA.

By Mr. LIEBERMAN (for himself, Ms. COLLINS, Mrs. FEINSTEIN, Mr. VOINOVICH, Mr. BYRD, and Mr. ENSIGN):

S. 1552. A bill to reauthorize the DC opportunity scholarship program, and for other purposes; read the first time.

Mr. LIEBERMAN. Mr. President, I rise along with my colleagues, Senators COLLINS, FEINSTEIN, VOINOVICH, BYRD and ENSIGN to introduce the Scholarships for Opportunity and Results Act, SOAR, which seeks to reauthorize the DC Opportunity Scholarship Program, OSP, also known as the DC voucher program. This important

initiative offers scholarships to low-income students, especially those from failing schools, to attend better private schools. In doing so, the program gives parents of economically disadvantaged children a choice that's available to the more affluent, including many of us in Congress and in the White House. This program offers DC students a choice that has improved the quality of their education and lives; it is a program that works. I urge my colleagues in the Senate to support the reauthorization of this important program.

Since 2003, Congress has supported a tri-sector approach to improving education in the District of Columbia. This has included funding the DC Opportunity Scholarship Program, which provides low income students in the District with scholarships of up to \$7,500 to attend private schools, as well as new funding for ongoing efforts to reform and improve public schools and public charter schools in the District.

Critics of this program argue that it takes away funds from public schools. This is simply not the case. I remind my colleagues that we intentionally designed the scholarship program to ensure that any funding for opportunity scholarships would not reduce funding for public schools. We provided additional new money for the DC Public Schools and for DC Public Charter Schools. We have not changed the three part-funding design of the initiative. The tri-partite funding is central to the compromise approach that originally brought Democrats and Republicans together in support of the Opportunity Scholarship Program. This bill preserves that important requirement. It is our intent that any funding for DC Opportunity Scholarships will result in continued additional new money in support of public charter and public schools.

This funding mechanism is an important point as it reflects the goal of the Opportunity Scholarship Program: to be supportive of the reforms that are helping to improve education in the District of Columbia. There is absolutely no intention to undermine the public schools—quite to the contrary. But as Ronald Holassie, one of the students receiving a scholarship, told us at a recent hearing on the program before the Homeland Security and Governmental Affairs Committee: "public schools in the District did not go bad over night and they won't get better over night." That's the point: despite having amongst the highest per pupil expenditure for public school districts in the country, the public school students in the District score at the bottom on national tests. Ronald and others cannot wait for reforms to take effect in the worst of DC's public schools. They deserve a good education today and the Opportunity Scholarships respond to that need.

Much progress has been made in improving DC schools over the years but

even school Chancellor Michelle Rhee admits that much remains to be done. According to the Washington Post, Chancellor Rhee was asked recently to give herself a grade for her efforts. She said she would give herself a failing grade as long as any children were in schools that were not providing a quality education. That's a modest answer that obscures the progress she has made. DC test scores are up in the most recent study of academic performance. Undoubtedly, we will see additional improvements in the years to come. Chancellor Rhee will continue to have my full support and I am confident that Ms. Rhee will soon be able to claim the "A" grade that I believe she already deserves. In the new bill, we have made the connection between the scholarship program and the ongoing reform effort more explicit. Our bill acknowledges an intent to reexamine the program when DC public school students are testing at the national average in reading and math.

The bill also responds to early criticisms of the Opportunity Scholarships with some important changes. It requires all participating schools to have a valid certificate of occupancy and to ensure that teachers in core subjects have an appropriate college degree. It continues to target students from lower income families who are attending those DC schools most in need of improvement but it increases the tuition amounts slightly to levels consistent with the tuition charged at a typical participating school, and adds an inflation adjustment. The new amounts are still well below the per pupil cost of educating a child in the DC public schools. While we have kept the income ceiling for entry into the program unchanged, we have increased slightly the income ceiling for those already participating in the program to ensure that parents are not forced to choose between a modest raise in their income and the scholarship, or marriage and the scholarship.

It is very important to recognize that the Opportunity Scholarship schools are producing impressive results. Opportunity Scholarship students attending private schools showed a five month advantage in reading levels compared to students attending public schools who applied but did not receive the scholarship, in the most recent study of the program conducted by the Department of Education's Institute of Education Sciences. The study showed significantly higher levels of parental satisfaction with regards to safety and the quality of the school for those in the program. The study has not yet even looked at the effect of the program on graduation rates and attrition though studies of other voucher programs indicate this impact could very well be significant. We will see those results in next year's study.

It is also imperative to put the results of the program in context. Rarely

are there statistically significant results with any educational innovations, particularly those targeted at low income students. Of the eleven recent educational innovations studied under the auspices of the Department of Education using the same rigorous testing designs, only three showed any statistically significant achievement results. The Opportunity Scholarship was one of the three. Dr. Patrick Wolf, an education specialist and the lead researcher in the IES study, testified at a recent hearing on the scholarship program that in his professional opinion the results were exceptional and warranted continued study of the program. According to Dr. Wolf, "by demonstrating statistically significant impacts overall in reading based on an experimental evaluation, the DC OSP has met a tough standard for efficacy in serving low-income inner-city students."

Academic programs should be evaluated in terms of their impact on students' progress and achievement. In his speech before the Hispanic Chamber of Commerce earlier this year, President Obama laid down that marker as a guideline for considering which education programs should be funded. On that basis, it is clear that we should continue to fund the DC Opportunity Scholarship Program—a program that has been good for students, good for parents and even good for public and charter schools in the District. Let us do the right thing for kids in DC and reauthorize the DC Opportunity Scholarship Program.

Mrs. FEINSTEIN. Mr. President, I am pleased to join Senator LIEBERMAN and my Senate colleagues in introducing legislation to reauthorize the District of Columbia's pilot scholarship program for 5 more years.

This important program currently provides scholarships to 1,700 low-income children who attend 49 private schools in the District. The scholarships of up to \$7,500 help these students pay for tuition and transportation expenses to school.

However, if the program is not extended soon, children will not be able to continue their education at the schools of their choice.

This legislation would:

Extend the life of the District of Columbia's pilot scholarship program for five more years.

Increase the program's funding to \$20 million for fiscal year 2010 and as may be necessary the following four years to allow new students to participate in the program and provide a higher scholarship.

Increase the scholarship amount to \$9,000 for children in kindergarten through 8th grade, and \$11,000 for youngsters in high school—this amount is still lower than the \$15,500 cost of educating a public school student in the District and will help low-

income families afford the high cost of private school tuition.

Protect low-income families whose children are already in the program from "earning out" of it by setting the maximum income level for them at 300 percent of the Federal poverty level, about \$63,000 for a family of four.

However, it maintains the current income eligibility requirement for students to enter the program of 185 percent of poverty, \$41,000 for a family of four.

It would improve evaluation by assessing students' college admission rates, school safety, and the reasons why parents choose to participate in program to better learn about its impact on children's lives and their families.

It would give priority for awarding scholarships also to students whose household includes a sibling or other child already participating in the program.

When students entered the program 5 years ago, they were performing in the bottom third on reading and math tests.

Students are now improving academically—despite the many challenges that these children face outside the classroom living in some of the District's toughest neighborhoods.

The most recent evaluation from this past April by the Education Department's Institute of Education Sciences found that although math test scores have not increased so far, there are significant gains being made in reading test scores.

Specifically, pilot program students scored 4.5 points higher in reading on the SAT-9 national standardized test with a total score of 635.4 when compared to the District's public school students' score of 630.9.

This means students are making gains in reading test scores by the equivalent of 3 months of additional schooling, and moved to the 35th percentile on the SAT-9 from the 33rd percentile where they were before entering the program.

These youngsters still have much more catching up to do, but they are improving and this is important.

I believe the results of the more comprehensive evaluation of student performance that will be released next spring are critical.

Next year's evaluation will also include important data on the program's impact on students' college enrollment and how the District's public schools are changing in response to the pilot program.

I would like to share two examples of how the program has helped to change the lives of the District's most disadvantaged youngsters and give them a chance to succeed.

Shirley-Ann Tomdio is the 8th grade Valedictorian at Sacred Heart Middle School, located in the District's neighborhood of Columbia Heights.

The scholarship allowed Shirley-Ann to attend Sacred Heart School for the past four years since 5th grade.

She will be attending Georgetown Visitation in September for high school.

She wants to go to college and become a surgeon.

Shirley-Ann said at her 8th grade graduation speech this past June:

The D.C. OSP [Opportunity Scholarship Program] is important to me because without it I wouldn't be able to receive the best education possible. It should continue so that my brother, sister, and other students get the same chance. Every child should get the chance to go to a good school.

Oscar Machado is a graduate of Archbishop Carroll High School where he was on Honor Roll.

Oscar is attending Mount Saint Mary's University in Maryland in the fall and plans to major in biology. He received three college scholarships that will cover nearly all of this tuition.

He was in the pilot program for 4 years.

At Archbishop Carroll High, he was President of the Robotics Team where he used pre-engineering skills to build robots, and also played the saxophone in the school band.

When speaking of his experience as a D.C. Opportunity Scholarship recipient Oscar said:

The scholarship was great. It gave me the opportunity to attend a school I otherwise couldn't have attended.

Oscar hopes that the same opportunity should be available to other students.

We should listen to students like Oscar and Shirley-Ann, and continue to provide this important program to the District's neediest children.

I look forward to working with my Senate colleagues to pass this legislation.

SUBMITTED RESOLUTIONS

SENATE RESOLUTION 231—EXPRESSING THE SENSE OF THE SENATE THAT ANY HEALTH CARE REFORM PROPOSAL SHOULD SLOW THE LONG-TERM GROWTH OF HEALTH COSTS AND REDUCE THE GROWTH RATE OF FEDERAL HEALTH CARE SPENDING

Mr. BENNETT (for himself, Mr. WYDEN, Mr. WICKER, Mr. JOHANNES, Mr. COBURN, and Mr. CRAPO) submitted the following resolution; which was referred to the Committee on Finance:

S. RES. 231

Whereas health care spending has risen close to 2.4 percentage points faster than gross domestic product (GDP) since 1970; and

Whereas the Centers for Medicare & Medicaid Services projects health care spending to be 17.6 percent of GDP in 2009 and 20.4 percent of GDP by 2018: Now, therefore, be it

Resolved, That it is the sense of the Senate that—

(1) any health care reform proposal should reduce total spending on health care in the United States during the next decade to below current projections by the Centers for Medicare & Medicaid Services; and

(2) any health care reform proposal should reduce the growth rate of Federal health care spending.

Mr. President, today I am submitting a resolution on the future of health care spending. It is both simple and straightforward. It states that health care reform shouldn't cost the Federal Government more money. As health care proposals have received their scores from the Congressional Budget Office, we have seen figures ranging from \$597 billion to over \$1 trillion. In fact, when asked point blank in a Senate Budget Committee hearing if the current reform proposals would help bend the cost-curve of health care spending in this country, CBO Director Elmendorf replied that it would worsen an already bleak budget outlook, increase deficit projections and drive the nation further into debt. It would raise, instead of lower, the cost-curve of health care spending and, simply iterated, this nation cannot afford it.

Already this year Congress has spent \$787 billion on a stimulus package with diminutive effects, passed an omnibus appropriations package and an emergency supplemental appropriations with a price tag of \$105.9 billion. We cannot continue to spend as if there is an endless supply of resources and as if this spending doesn't affect American families.

I am an advocate for health reform. I have cosponsored the Healthy Americans Act with Senator WYDEN because we need to reform our country's health care system. However, I believe we need to do it in a way that does not significantly increase the federal responsibility for health care costs.

This resolution expresses the Sense of the Senate that health care reform proposals should reduce total spending on health care in the United States during the next decade to levels below current projections by the Centers for Medicare & Medicaid Services and reduce the growth rate of Federal health care spending. Not only is this feasible, but it should be our goal. Health care reform at the expense of our economy is not reform we should support.

SENATE RESOLUTION 232—CELEBRATING THE 100TH ANNIVERSARY OF THE TILLAMOOK COUNTY CREAMERY ASSOCIATION

Mr. WYDEN (for himself and Mr. MERKLEY) submitted the following resolution; which was referred to the Committee on the Judiciary:

S. RES. 232

Whereas the Tillamook County Creamery Association is celebrating its 100th anniversary as a world-famous, farmer-owned coop-

erative dedicated to producing the highest quality cheeses and other products from local dairies;

Whereas the members of the Tillamook County Creamery Association are great supporters of the local and State dairy industries and are committed stewards of the environment;

Whereas the Tillamook County Creamery Association has won hundreds of awards, including 6 awards at the 2009 Oregon Dairy Industries products contest and 6 awards at the 2008 National Milk Producers Federation annual cheese contest;

Whereas for the third year in a row, the Tillamook County Creamery Association was recognized by the Portland Business Journal as one of Oregon's "Most Admired Companies";

Whereas the Tillamook County Creamery Association has earned a reputation as one of the Nation's premier makers of cheese; and

Whereas for these reasons, the Tillamook County Creamery Association, known throughout the world for its Tillamook cheddar cheese, is an Oregon icon: Now, therefore, be it

Resolved, That the Senate supports the 100th anniversary celebration of the Tillamook County Creamery Association.

SENATE RESOLUTION 233—COMMENDING RUSS MEYER ON HIS INDUCTION INTO THE NATIONAL AVIATION HALL OF FAME

Mr. BROWNBACK submitted the following resolution; which was referred to the Committee on the Judiciary:

S. RES. 233

Whereas the leadership of Russ Meyer, former chairman and chief executive officer of Cessna Aircraft Company and a leading proponent of general aviation, has had a dramatic impact on the continued growth of the aviation industry in Kansas and throughout the United States;

Whereas Russ Meyer was one of the principal architects of the General Aviation Revitalization Act of 1994 (Public Law 103-298; 108 Stat. 1552);

Whereas Russ Meyer was instrumental in the development of the "Be A Pilot Program", which has resulted in tens of thousands of new pilots and contributed more than \$200,000,000 to the United States economy through general aviation operations;

Whereas Russ Meyer was the originator of the Citation Special Olympics Airlift, in which hundreds of owners of Citation aircrafts transport athletes from around the country to the Special Olympics National Games; and

Whereas Russ Meyer will join fellow residents of Kansas Olive Beech and Walter Beech, Lloyd Stearman, Clyde Cessna, Amelia Earhart, and Joe Engle in the National Aviation Hall of Fame: Now, therefore, be it

Resolved, That the Senate—

(1) commends Russ Meyer for being inducted into the National Aviation Hall of Fame;

(2) recognizes the achievements of Russ Meyer during his lifetime of service to the aviation industry; and

(3) directs the Secretary of the Senate to transmit a copy of this resolution to Russ Meyer.

SA 2231. Mr. ENZI (for himself and Mr. BARRASSO) submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2232. Mr. ENZI (for himself and Mr. BARRASSO) submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra; which was ordered to lie on the table.

TEXT OF AMENDMENTS

SA 1908. Mr. KOHL (for himself and Mr. BROWNBAC) submitted an amendment intended to be proposed by him to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; as follows:

Strike all after the enacting clause and insert the following:

That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes, namely:

TITLE I

AGRICULTURAL PROGRAMS

PRODUCTION, PROCESSING AND MARKETING

OFFICE OF THE SECRETARY

For necessary expenses of the Office of the Secretary of Agriculture, \$5,285,000: *Provided*, That not to exceed \$11,000 of this amount shall be available for official reception and representation expenses, not otherwise provided for, as determined by the Secretary.

OFFICE OF TRIBAL RELATIONS

For necessary expenses of the Office of Tribal Relations, \$1,000,000, to support communication and consultation activities with Federally Recognized Tribes, as well as other requirements established by law.

EXECUTIVE OPERATIONS

OFFICE OF THE CHIEF ECONOMIST

For necessary expenses of the Office of the Chief Economist, \$13,032,000.

NATIONAL APPEALS DIVISION

For necessary expenses of the National Appeals Division, \$15,219,000.

OFFICE OF BUDGET AND PROGRAM ANALYSIS

For necessary expenses of the Office of Budget and Program Analysis, \$9,436,000.

OFFICE OF HOMELAND SECURITY

For necessary expenses of the Office of Homeland Security, \$1,859,000.

OFFICE OF THE CHIEF INFORMATION OFFICER

For necessary expenses of the Office of the Chief Information Officer, \$63,579,000.

OFFICE OF THE CHIEF FINANCIAL OFFICER

For necessary expenses of the Office of the Chief Financial Officer, \$6,566,000: *Provided*, That no funds made available by this appropriation may be obligated for FAIR Act or Circular A-76 activities until the Secretary has submitted to the Committees on Appropriations of both Houses of Congress and the Committee on Oversight and Government Reform of the House of Representatives a report on the Department's contracting out policies, including agency budgets for contracting out.

OFFICE OF THE ASSISTANT SECRETARY FOR CIVIL RIGHTS

For necessary expenses of the Office of the Assistant Secretary for Civil Rights, \$895,000.

OFFICE OF CIVIL RIGHTS

For necessary expenses of the Office of Civil Rights, \$23,422,000.

OFFICE OF THE ASSISTANT SECRETARY FOR ADMINISTRATION

For necessary expenses of the Office of the Assistant Secretary for Administration, \$806,000.

AGRICULTURE BUILDINGS AND FACILITIES AND RENTAL PAYMENTS

(INCLUDING TRANSFERS OF FUNDS)

For payment of space rental and related costs pursuant to Public Law 92-313, including authorities pursuant to the 1984 delegation of authority from the Administrator of General Services to the Department of Agriculture under 40 U.S.C. 486, for programs and activities of the Department which are included in this Act, and for alterations and other actions needed for the Department and its agencies to consolidate unneeded space into configurations suitable for release to the Administrator of General Services, and for the operation, maintenance, improvement, and repair of Agriculture buildings and facilities, and for related costs, \$274,482,000, to remain available until expended, of which \$168,901,000 shall be available for payments to the General Services Administration for rent; of which \$13,500,000 for payment to the Department of Homeland Security for building security activities; and of which \$92,081,000 for buildings operations and maintenance expenses: *Provided*, That the Secretary is authorized to transfer funds from a Departmental agency to this account to recover the full cost of the space and security expenses of that agency that are funded by this account when the actual costs exceed the agency estimate which will be available for the activities and payments described herein.

HAZARDOUS MATERIALS MANAGEMENT

(INCLUDING TRANSFERS OF FUNDS)

For necessary expenses of the Department of Agriculture, to comply with the Comprehensive Environmental Response, Compensation, and Liability Act (42 U.S.C. 9601 et seq.) and the Resource Conservation and Recovery Act (42 U.S.C. 6901 et seq.), \$5,125,000, to remain available until expended: *Provided*, That appropriations and funds available herein to the Department for Hazardous Materials Management may be transferred to any agency of the Department for its use in meeting all requirements pursuant to the above Acts on Federal and non-Federal lands.

DEPARTMENTAL ADMINISTRATION

(INCLUDING TRANSFERS OF FUNDS)

For Departmental Administration, \$41,319,000, to provide for necessary expenses for management support services to offices of the Department and for general administration, security, repairs and alterations, and other miscellaneous supplies and expenses not otherwise provided for and necessary for the practical and efficient work of the Department: *Provided*, That this appropriation shall be reimbursed from applicable appropriations in this Act for travel expenses incident to the holding of hearings as required by 5 U.S.C. 551-558: *Provided further*, That of the amount appropriated, \$13,000,000 is for stabilization and developmental activities to be carried out under the authority provided by title XIV of the Food and Agriculture Act of 1977 (7 U.S.C. 3101 et seq.) and other applicable laws.

OFFICE OF THE ASSISTANT SECRETARY FOR CONGRESSIONAL RELATIONS

(INCLUDING TRANSFERS OF FUNDS)

For necessary expenses of the Office of the Assistant Secretary for Congressional Relations to carry out the programs funded by this Act, including programs involving intergovernmental affairs and liaison within the executive branch, \$3,968,000: *Provided*, That these funds may be transferred to agencies of the Department of Agriculture funded by

this Act to maintain personnel at the agency level: *Provided further*, That no funds made available by this appropriation may be obligated after 30 days from the date of enactment of this Act, unless the Secretary has notified the Committees on Appropriations of both Houses of Congress on the allocation of these funds by USDA agency: *Provided further*, That no other funds appropriated to the Department by this Act shall be available to the Department for support of activities of congressional relations.

OFFICE OF COMMUNICATIONS

For necessary expenses of the Office of Communications, \$9,722,000.

OFFICE OF INSPECTOR GENERAL

For necessary expenses of the Office of Inspector General, including employment pursuant to the Inspector General Act of 1978, \$88,025,000, including such sums as may be necessary for contracting and other arrangements with public agencies and private persons pursuant to section 6(a)(9) of the Inspector General Act of 1978, and including not to exceed \$125,000 for certain confidential operational expenses, including the payment of informants, to be expended under the direction of the Inspector General pursuant to Public Law 95-452 and section 1337 of Public Law 97-98.

OFFICE OF THE GENERAL COUNSEL

For necessary expenses of the Office of the General Counsel, \$43,551,000.

OFFICE OF THE UNDER SECRETARY FOR RESEARCH, EDUCATION AND ECONOMICS

For necessary expenses of the Office of the Under Secretary for Research, Education and Economics, \$895,000.

ECONOMIC RESEARCH SERVICE

For necessary expenses of the Economic Research Service, \$82,078,000.

NATIONAL AGRICULTURAL STATISTICS SERVICE

For necessary expenses of the National Agricultural Statistics Service, \$161,830,000, of which up to \$37,908,000 shall be available until expended for the Census of Agriculture.

AGRICULTURAL RESEARCH SERVICE

SALARIES AND EXPENSES

For necessary expenses of the Agricultural Research Service and for acquisition of lands by donation, exchange, or purchase at a nominal cost not to exceed \$100, and for land exchanges where the lands exchanged shall be of equal value or shall be equalized by a payment of money to the grantor which shall not exceed 25 percent of the total value of the land or interests transferred out of Federal ownership, \$1,181,632,000, of which \$35,512,000 shall be for the purposes, and in the amounts, specified in the table titled "Congressionally Designated Projects" in the report to accompany this Act: *Provided*, That appropriations hereunder shall be available for the operation and maintenance of aircraft and the purchase of not to exceed one for replacement only: *Provided further*, That appropriations hereunder shall be available pursuant to 7 U.S.C. 2250 for the construction, alteration, and repair of buildings and improvements, but unless otherwise provided, the cost of constructing any one building shall not exceed \$375,000, except for greenhouses or greenhouses which shall each be limited to \$1,200,000, and except for 10 buildings to be constructed or improved at a cost not to exceed \$750,000 each, and the cost of altering any one building during the fiscal year shall not exceed 10 percent of the current replacement value of the building or \$375,000, whichever is greater: *Provided further*, That the limitations on alterations con-

tained in this Act shall not apply to modernization or replacement of existing facilities at Beltsville, Maryland: *Provided further*, That appropriations hereunder shall be available for granting easements at the Beltsville Agricultural Research Center: *Provided further*, That the foregoing limitations shall not apply to replacement of buildings needed to carry out the Act of April 24, 1948 (21 U.S.C. 113a): *Provided further*, That funds may be received from any State, other political subdivision, organization, or individual for the purpose of establishing or operating any research facility or research project of the Agricultural Research Service, as authorized by law.

BUILDINGS AND FACILITIES

For acquisition of land, construction, repair, improvement, extension, alteration, and purchase of fixed equipment or facilities as necessary to carry out the agricultural research programs of the Department of Agriculture, where not otherwise provided, \$47,027,000, of which \$47,027,000 shall be for the purposes, and in the amounts, specified in the table titled "Congressionally Designated Projects" in the report to accompany this Act, to remain available until expended.

NATIONAL INSTITUTE OF FOOD AND AGRICULTURE

RESEARCH AND EDUCATION ACTIVITIES

For payments to agricultural experiment stations, for cooperative forestry and other research, for facilities, and for other expenses, \$757,821,000, of which \$61,406,000 shall be for the purposes, and in the amounts, specified in the table titled "Congressionally Designated Projects" in the report to accompany this Act, as follows: to carry out the provisions of the Hatch Act of 1887 (7 U.S.C. 361a-i), \$215,000,000; for grants for cooperative forestry research (16 U.S.C. 582a through a-7), \$30,000,000; for payments to eligible institutions (7 U.S.C. 3222), \$49,000,000, provided that each institution receives no less than \$1,000,000; for special grants (7 U.S.C. 450i(c)), \$50,456,000; for competitive grants on improved pest control (7 U.S.C. 450i(c)), \$16,423,000; for competitive grants (7 U.S.C. 450i(b)), \$295,181,000, to remain available until expended; for the support of animal health and disease programs (7 U.S.C. 3195), \$1,000,000; for supplemental and alternative crops and products (7 U.S.C. 3319d), \$850,000; for grants for research pursuant to the Critical Agricultural Materials Act (7 U.S.C. 178 et seq.), \$1,083,000, to remain available until expended; for the 1994 research grants program for 1994 institutions pursuant to section 536 of Public Law 103-382 (7 U.S.C. 301 note), \$2,000,000, to remain available until expended; for rangeland research grants (7 U.S.C. 3333), \$983,000; for higher education graduate fellowship grants (7 U.S.C. 3152(b)(6)), \$3,859,000, to remain available until expended (7 U.S.C. 2209b); for a program pursuant to section 1415A of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3151a), \$5,000,000, to remain available until expended; for higher education challenge grants (7 U.S.C. 3152(b)(1)), \$5,654,000; for a higher education multicultural scholars program (7 U.S.C. 3152(b)(5)), \$981,000, to remain available until expended (7 U.S.C. 2209b); for an education grants program for Hispanic-serving Institutions (7 U.S.C. 3241), \$7,737,000; for competitive grants for the purpose of carrying out all provisions of 7 U.S.C. 3156 to individual eligible institutions or consortia of eligible institutions in Alaska and in Hawaii, with funds awarded equally to each of the

States of Alaska and Hawaii, \$3,200,000; for a secondary agriculture education program and 2-year post-secondary education (7 U.S.C. 3152(j)), \$983,000; for aquaculture grants (7 U.S.C. 3322), \$3,928,000; for sustainable agriculture research and education (7 U.S.C. 5811), \$14,500,000; for a program of capacity building grants (7 U.S.C. 3152(b)(4)) to institutions eligible to receive funds under 7 U.S.C. 3221 and 3222, \$16,500,000, to remain available until expended (7 U.S.C. 2209b); for payments to the 1994 Institutions pursuant to section 534(a)(1) of Public Law 103-382, \$3,342,000; for resident instruction grants for insular areas under section 1491 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3363), \$800,000; for a new era rural technology program pursuant to section 1473E of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3319e), \$750,000; for a competitive grants program for farm business management and benchmarking (7 U.S.C. 5925f), \$2,000,000; for a competitive grants program regarding biobased energy (7 U.S.C. 8114), \$1,500,000; and for necessary expenses of Research and Education Activities, \$25,111,000, of which \$2,704,000 for the Research, Education, and Economics Information System and \$2,136,000 for the Electronic Grants Information System, are to remain available until expended.

NATIVE AMERICAN INSTITUTIONS ENDOWMENT FUND

For the Native American Institutions Endowment Fund authorized by Public Law 103-382 (7 U.S.C. 301 note), \$11,880,000, to remain available until expended.

EXTENSION ACTIVITIES

For payments to States, the District of Columbia, Puerto Rico, Guam, the Virgin Islands, Micronesia, the Northern Marianas, and American Samoa, \$491,292,000, of which \$7,898,000 shall be for the purposes, and in the amounts, specified in the table titled "Congressionally Designated Projects" in the report to accompany this Act, as follows: payments for cooperative extension work under the Smith-Lever Act to be distributed under sections 3(b) and 3(c) of said Act, and under section 208(c) of Public Law 93-471, for retirement and employees' compensation costs for extension agents, \$300,000,000; payments for extension work at the 1994 Institutions under the Smith-Lever Act (7 U.S.C. 343(b)(3)), \$4,000,000; payments for the nutrition and family education program for low-income areas under section 3(d) of the Act, \$68,139,000; payments for the pest management program under section 3(d) of the Act, \$10,085,000; payments for the farm safety program under section 3(d) of the Act, \$4,863,000; payments for New Technologies for Ag Extension under section 3(d) of the Act, \$2,000,000; payments to upgrade research, extension, and teaching facilities at institutions eligible to receive funds under 7 U.S.C. 3221 and 3222, \$18,540,000, to remain available until expended; payments for youth-at-risk programs under section 3(d) of the Smith-Lever Act, \$8,427,000; for youth farm safety education and certification extension grants, to be awarded competitively under section 3(d) of the Act, \$493,000; payments for carrying out the provisions of the Renewable Resources Extension Act of 1978 (16 U.S.C. 1671 et seq.), \$4,128,000; payments for the federally-recognized Tribes Extension Program under section 3(d) of the Smith-Lever Act, \$3,090,000; payments for sustainable agriculture programs under section 3(d) of the Act, \$4,705,000; payments for rural health and safety education as authorized by section

502(i) of Public Law 92-419 (7 U.S.C. 2662(i)), \$1,738,000; payments for cooperative extension work by eligible institutions (7 U.S.C. 3221), \$41,354,000, provided that each institution receives no less than \$1,000,000; for grants to youth organizations pursuant to 7 U.S.C. 7630, \$1,767,000; payments to carry out the food animal residue avoidance database program as authorized by 7 U.S.C. 7642, \$1,000,000; payments to carry out section 1672(e)(49) of the Food, Agriculture, Conservation, and Trade Act of 1990 (7 U.S.C. 5925), as amended, \$500,000; and for necessary expenses of Extension Activities, \$16,463,000.

INTEGRATED ACTIVITIES

For the integrated research, education, and extension grants programs, including necessary administrative expenses, \$56,864,000, as follows: for competitive grants programs authorized under section 406 of the Agricultural Research, Extension, and Education Reform Act of 1998 (7 U.S.C. 7626), \$41,990,000, including \$12,649,000 for the water quality program, \$14,596,000 for the food safety program, \$4,096,000 for the regional pest management centers program, \$4,388,000 for the Food Quality Protection Act risk mitigation program for major food crop systems, \$1,365,000 for the crops affected by Food Quality Protection Act implementation, \$3,054,000 for the methyl bromide transition program, and \$1,842,000 for the organic transition program; for a competitive international science and education grants program authorized under section 1459A of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3292b), to remain available until expended, \$3,000,000; for grants programs authorized under section 2(c)(1)(B) of Public Law 89-106, as amended, \$732,000, to remain available until September 30, 2011, for the critical issues program; \$1,312,000 for the regional rural development centers program; and \$9,830,000 for the Food and Agriculture Defense Initiative authorized under section 1484 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, to remain available until September 30, 2011.

OFFICE OF THE UNDER SECRETARY FOR MARKETING AND REGULATORY PROGRAMS

For necessary expenses of the Office of the Under Secretary for Marketing and Regulatory Programs, \$895,000.

ANIMAL AND PLANT HEALTH INSPECTION SERVICE

SALARIES AND EXPENSES

(INCLUDING TRANSFERS OF FUNDS)

For necessary expenses of the Animal and Plant Health Inspection Service, including up to \$30,000 for representation allowances and for expenses pursuant to the Foreign Service Act of 1980 (22 U.S.C. 4085), \$911,394,000, of which \$18,059,000 shall be for the purposes, and in the amounts, specified in the table titled "Congressionally Designated Projects" in the report to accompany this Act, of which \$2,058,000 shall be available for the control of outbreaks of insects, plant diseases, animal diseases and for control of pest animals and birds to the extent necessary to meet emergency conditions; of which \$23,390,000 shall be used for the cotton pests program for cost share purposes or for debt retirement for active eradication zones; of which \$14,607,000 shall be for a National Animal Identification program; of which \$60,243,000 shall be used to prevent and control avian influenza and shall remain available until expended: *Provided*, That funds provided for the contingency fund to meet emergency conditions, information

technology infrastructure, fruit fly program, emerging plant pests, cotton pests program, grasshopper and mormon cricket program, the plum pox program, the National Veterinary Stockpile, the National Animal Identification System, up to \$1,500,000 in the scrapie program for indemnities, up to \$1,000,000 for wildlife services methods development, up to \$1,000,000 of the wildlife services operations program for aviation safety, and up to 25 percent of the screwworm program shall remain available until expended: *Provided further*, That no funds shall be used to formulate or administer a brucellosis eradication program for the current fiscal year that does not require minimum matching by the States of at least 40 percent: *Provided further*, That this appropriation shall be available for the operation and maintenance of aircraft and the purchase of not to exceed four, of which two shall be for replacement only: *Provided further*, That, in addition, in emergencies which threaten any segment of the agricultural production industry of this country, the Secretary may transfer from other appropriations or funds available to the agencies or corporations of the Department such sums as may be deemed necessary, to be available only in such emergencies for the arrest and eradication of contagious or infectious disease or pests of animals, poultry, or plants, and for expenses in accordance with sections 10411 and 10417 of the Animal Health Protection Act (7 U.S.C. 8310 and 8316) and sections 431 and 442 of the Plant Protection Act (7 U.S.C. 7751 and 7772), and any unexpended balances of funds transferred for such emergency purposes in the preceding fiscal year shall be merged with such transferred amounts: *Provided further*, That appropriations hereunder shall be available pursuant to law (7 U.S.C. 2250) for the repair and alteration of leased buildings and improvements, but unless otherwise provided the cost of altering any one building during the fiscal year shall not exceed 10 percent of the current replacement value of the building.

In fiscal year 2010, the agency is authorized to collect fees to cover the total costs of providing technical assistance, goods, or services requested by States, other political subdivisions, domestic and international organizations, foreign governments, or individuals, provided that such fees are structured such that any entity's liability for such fees is reasonably based on the technical assistance, goods, or services provided to the entity by the agency, and such fees shall be credited to this account, to remain available until expended, without further appropriation, for providing such assistance, goods, or services.

BUILDINGS AND FACILITIES

For plans, construction, repair, preventive maintenance, environmental support, improvement, extension, alteration, and purchase of fixed equipment or facilities, as authorized by 7 U.S.C. 2250, and acquisition of land as authorized by 7 U.S.C. 428a, \$4,712,000, to remain available until expended.

AGRICULTURAL MARKETING SERVICE

MARKETING SERVICES

For necessary expenses of the Agricultural Marketing Service, \$90,848,000: *Provided*, That this appropriation shall be available pursuant to law (7 U.S.C. 2250) for the alteration and repair of buildings and improvements, but the cost of altering any one building during the fiscal year shall not exceed 10 percent of the current replacement value of the building.

Fees may be collected for the cost of standardization activities, as established by regulation pursuant to law (31 U.S.C. 9701).

LIMITATION ON ADMINISTRATIVE EXPENSES

Not to exceed \$64,583,000 (from fees collected) shall be obligated during the current fiscal year for administrative expenses: *Provided*, That if crop size is understated and/or other uncontrollable events occur, the agency may exceed this limitation by up to 10 percent with notification to the Committees on Appropriations of both Houses of Congress.

FUNDS FOR STRENGTHENING MARKETS, INCOME, AND SUPPLY (SECTION 32)

(INCLUDING TRANSFERS OF FUNDS)

Funds available under section 32 of the Act of August 24, 1935 (7 U.S.C. 612c), shall be used only for commodity program expenses as authorized therein, and other related operating expenses, including not less than \$20,000,000 for replacement of a system to support commodity purchases, except for: (1) transfers to the Department of Commerce as authorized by the Fish and Wildlife Act of August 8, 1956; (2) transfers otherwise provided in this Act; and (3) not more than \$20,056,000 for formulation and administration of marketing agreements and orders pursuant to the Agricultural Marketing Agreement Act of 1937 and the Agricultural Act of 1961.

PAYMENTS TO STATES AND POSSESSIONS

For payments to departments of agriculture, bureaus and departments of markets, and similar agencies for marketing activities under section 204(b) of the Agricultural Marketing Act of 1946 (7 U.S.C. 1623(b)), \$1,334,000.

GRAIN INSPECTION, PACKERS AND STOCKYARDS ADMINISTRATION

SALARIES AND EXPENSES

For necessary expenses of the Grain Inspection, Packers and Stockyards Administration, \$41,564,000: *Provided*, That this appropriation shall be available pursuant to law (7 U.S.C. 2250) for the alteration and repair of buildings and improvements, but the cost of altering any one building during the fiscal year shall not exceed 10 percent of the current replacement value of the building.

LIMITATION ON INSPECTION AND WEIGHING SERVICES EXPENSES

Not to exceed \$42,463,000 (from fees collected) shall be obligated during the current fiscal year for inspection and weighing services: *Provided*, That if grain export activities require additional supervision and oversight, or other uncontrollable factors occur, this limitation may be exceeded by up to 10 percent with notification to the Committees on Appropriations of both Houses of Congress.

OFFICE OF THE UNDER SECRETARY FOR FOOD SAFETY

For necessary expenses of the Office of the Under Secretary for Food Safety, \$813,000.

FOOD SAFETY AND INSPECTION SERVICE

For necessary expenses to carry out services authorized by the Federal Meat Inspection Act, the Poultry Products Inspection Act, and the Egg Products Inspection Act, including not to exceed \$50,000 for representation allowances and for expenses pursuant to section 8 of the Act approved August 3, 1956 (7 U.S.C. 1766), \$1,018,520,000; and in addition, \$1,000,000 may be credited to this account from fees collected for the cost of laboratory accreditation as authorized by section 1327 of the Food, Agriculture, Conservation and Trade Act of 1990 (7 U.S.C. 138f): *Provided*, That funds provided for the Public Health Data Communication Infrastructure system shall remain available until expended: *Provided further*, That no fewer than

150 full-time equivalent positions shall be employed during fiscal year 2010 for purposes dedicated solely to inspections and enforcement related to the Humane Methods of Slaughter Act: *Provided further*, That of the amount available under this heading, \$3,000,000 shall be obligated to maintain the Humane Animal Tracking System as part of the Public Health Data Communication Infrastructure System: *Provided further*, That this appropriation shall be available pursuant to law (7 U.S.C. 2250) for the alteration and repair of buildings and improvements, but the cost of altering any one building during the fiscal year shall not exceed 10 percent of the current replacement value of the building.

OFFICE OF THE UNDER SECRETARY FOR FARM AND FOREIGN AGRICULTURAL SERVICES

For necessary expenses of the Office of the Under Secretary for Farm and Foreign Agricultural Services, \$895,000.

FARM SERVICE AGENCY
SALARIES AND EXPENSES

(INCLUDING TRANSFERS OF FUNDS)

For necessary expenses of the Farm Service Agency, \$1,253,777,000: *Provided*, That the Secretary is authorized to use the services, facilities, and authorities (but not the funds) of the Commodity Credit Corporation to make program payments for all programs administered by the Agency: *Provided further*, That other funds made available to the Agency for authorized activities may be advanced to and merged with this account: *Provided further*, That funds made available to county committees shall remain available until expended.

STATE MEDIATION GRANTS

For grants pursuant to section 502(b) of the Agricultural Credit Act of 1987, as amended (7 U.S.C. 5101-5106), \$4,369,000.

GRASSROOTS SOURCE WATER PROTECTION PROGRAM

For necessary expenses to carry out well-head or groundwater protection activities under section 12400 of the Food Security Act of 1985 (16 U.S.C. 3839bb-2), \$5,000,000, to remain available until expended.

DAIRY INDEMNITY PROGRAM

(INCLUDING TRANSFER OF FUNDS)

For necessary expenses involved in making indemnity payments to dairy farmers and manufacturers of dairy products under a dairy indemnity program, such sums as may be necessary, to remain available until expended: *Provided*, That such program is carried out by the Secretary in the same manner as the dairy indemnity program described in the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2001 (Public Law 106-387, 114 Stat. 1549A-12).

AGRICULTURAL CREDIT INSURANCE FUND PROGRAM ACCOUNT

(INCLUDING TRANSFERS OF FUNDS)

For gross obligations for the principal amount of direct and guaranteed farm ownership (7 U.S.C. 1922 et seq.) and operating (7 U.S.C. 1941 et seq.) loans, Indian tribe land acquisition loans (25 U.S.C. 488), boll weevil loans (7 U.S.C. 1989), direct and guaranteed conservation loans (7 U.S.C. 1924 et seq.) and Indian highly fractionated land loans (25 U.S.C. 488), to be available from funds in the Agricultural Credit Insurance Fund, as follows: farm ownership loans, \$1,892,990,000, of which \$1,500,000,000 shall be for unsubsidized guaranteed loans and \$392,990,000 shall be for direct loans; operating loans, \$1,994,467,000, of

which \$1,150,000,000 shall be for unsubsidized guaranteed loans, \$144,467,000 shall be for subsidized guaranteed loans and \$700,000,000 shall be for direct loans; Indian tribe land acquisition loans, \$2,000,000; conservation loans, \$150,000,000, of which \$75,000,000 shall be for guaranteed loans and \$75,000,000 shall be for direct loans; Indian highly fractionated land loans, \$10,000,000; and for boll weevil eradication program loans, \$100,000,000: *Provided*, That the Secretary shall deem the pink bollworm to be a boll weevil for the purpose of boll weevil eradication program loans.

For the cost of direct and guaranteed loans, including the cost of modifying loans as defined in section 502 of the Congressional Budget Act of 1974, as follows: farm ownership loans, \$21,584,000, of which \$5,550,000 shall be for unsubsidized guaranteed loans, and \$16,034,000 shall be for direct loans; operating loans, \$80,402,000, of which \$26,910,000 shall be for unsubsidized guaranteed loans, \$20,312,000 shall be for subsidized guaranteed loans, and \$33,180,000 shall be for direct loans; conservation loans, \$1,343,000, of which \$278,000 shall be for guaranteed loans, and \$1,065,000 shall be for direct loans; and Indian highly fractionated land loans, \$793,000.

In addition, for administrative expenses necessary to carry out the direct and guaranteed loan programs, \$321,093,000, of which \$313,173,000 shall be transferred to and merged with the appropriation for "Farm Service Agency, Salaries and Expenses".

Funds appropriated by this Act to the Agricultural Credit Insurance Program Account for farm ownership, operating, and conservation direct loans and guaranteed loans may be transferred among these programs: *Provided*, That the Committees on Appropriations of both Houses of Congress are notified at least 15 days in advance of any transfer.

RISK MANAGEMENT AGENCY

For necessary expenses of the Risk Management Agency, \$79,425,000: *Provided*, That the funds made available under section 522(e) of the Federal Crop Insurance Act (7 U.S.C. 1522(e)) may be used for the Common Information Management System: *Provided further*, That not to exceed \$1,000 shall be available for official reception and representation expenses, as authorized by 7 U.S.C. 1506(i).

CORPORATIONS

The following corporations and agencies are hereby authorized to make expenditures, within the limits of funds and borrowing authority available to each such corporation or agency and in accord with law, and to make contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act as may be necessary in carrying out the programs set forth in the budget for the current fiscal year for such corporation or agency, except as hereinafter provided.

FEDERAL CROP INSURANCE CORPORATION FUND

For payments as authorized by section 516 of the Federal Crop Insurance Act (7 U.S.C. 1516), such sums as may be necessary, to remain available until expended.

COMMODITY CREDIT CORPORATION FUND
REIMBURSEMENT FOR NET REALIZED LOSSES
(INCLUDING TRANSFERS OF FUNDS)

For the current fiscal year, such sums as may be necessary to reimburse the Commodity Credit Corporation for net realized losses sustained, but not previously reimbursed, pursuant to section 2 of the Act of August 17, 1961 (15 U.S.C. 713a-11): *Provided*, That of the funds available to the Commodity Credit Corporation under section 11

of the Commodity Credit Corporation Charter Act (15 U.S.C. 7141) for the conduct of its business with the Foreign Agricultural Service, up to \$5,000,000 may be transferred to and used by the Foreign Agricultural Service for information resource management activities of the Foreign Agricultural Service that are not related to Commodity Credit Corporation business.

HAZARDOUS WASTE MANAGEMENT (LIMITATION ON EXPENSES)

For the current fiscal year, the Commodity Credit Corporation shall not expend more than \$5,000,000 for site investigation and cleanup expenses, and operations and maintenance expenses to comply with the requirement of section 107(g) of the Comprehensive Environmental Response, Compensation, and Liability Act (42 U.S.C. 9607(g)), and section 6001 of the Resource Conservation and Recovery Act (42 U.S.C. 6961).

TITLE II CONSERVATION PROGRAMS

OFFICE OF THE UNDER SECRETARY FOR NATURAL RESOURCES AND ENVIRONMENT

For necessary expenses of the Office of the Under Secretary for Natural Resources and Environment, \$895,000.

NATURAL RESOURCES CONSERVATION SERVICE CONSERVATION OPERATIONS

For necessary expenses for carrying out the provisions of the Act of April 27, 1935 (16 U.S.C. 590a-f), including preparation of conservation plans and establishment of measures to conserve soil and water (including farm irrigation and land drainage and such special measures for soil and water management as may be necessary to prevent floods and the siltation of reservoirs and to control agricultural related pollutants); operation of conservation plant materials centers; classification and mapping of soil; dissemination of information; acquisition of lands, water, and interests therein for use in the plant materials program by donation, exchange, or purchase at a nominal cost not to exceed \$100 pursuant to the Act of August 3, 1956 (7 U.S.C. 428a); purchase and erection or alteration or improvement of permanent and temporary buildings; and operation and maintenance of aircraft, \$949,577,000, to remain available until September 30, 2011, of which up to \$50,730,000 may be used in planning and carrying out projects for resource conservation and development and for sound land use pursuant to the provisions of sections 31 and 32 of the Bankhead-Jones Farm Tenant Act (7 U.S.C. 1010-1011; 76 Stat. 607); the Act of April 27, 1935 (16 U.S.C. 590a-590f); and subtitle H of title XV of the Agriculture and Food Act of 1981 (16 U.S.C. 3451-3461), and of which \$21,511,000 shall be for the purposes, and in the amounts, specified in the table titled "Congressionally Designated Projects" in the report to accompany this Act: *Provided*, That appropriations hereunder shall be available pursuant to 7 U.S.C. 2250 for construction and improvement of buildings and public improvements at plant materials centers, except that the cost of alterations and improvements to other buildings and other public improvements shall not exceed \$250,000: *Provided further*, That the Secretary is authorized to transfer ownership of all land, buildings, and related improvements of the Natural Resources Conservation Service facilities located in Medicine Bow, Wyoming, to the Medicine Bow Conservation District: *Provided further*, That when buildings or other structures are erected on non-Federal land, that the right to use such land is obtained as provided in 7 U.S.C. 2250a.

WATERSHED AND FLOOD PREVENTION OPERATIONS

For necessary expenses to carry out preventive measures, including but not limited to research, engineering operations, methods of cultivation, the growing of vegetation, rehabilitation of existing works and changes in use of land, in accordance with the Watershed Protection and Flood Prevention Act (16 U.S.C. 1001-1005 and 1007-1009), the provisions of the Act of April 27, 1935 (16 U.S.C. 590a-f), and in accordance with the provisions of laws relating to the activities of the Department, \$24,394,000, to remain available until expended, of which \$16,750,000 shall be for the purposes, and in the amounts, specified in the table titled "Congressionally Designated Projects" in the report to accompany this Act: *Provided*, That not to exceed \$15,000,000 of this appropriation shall be available for technical assistance.

WATERSHED REHABILITATION PROGRAM

For necessary expenses to carry out rehabilitation of structural measures, in accordance with section 14 of the Watershed Protection and Flood Prevention Act (16 U.S.C. 1012), and in accordance with the provisions of laws relating to the activities of the Department, \$40,161,000, to remain available until expended.

TITLE III RURAL DEVELOPMENT PROGRAMS OFFICE OF THE UNDER SECRETARY FOR RURAL DEVELOPMENT

For necessary expenses of the Office of the Under Secretary for Rural Development, \$895,000.

RURAL DEVELOPMENT SALARIES AND EXPENSES

(INCLUDING TRANSFERS OF FUNDS)

For necessary expenses for carrying out the administration and implementation of programs in the Rural Development mission area, including activities with institutions concerning the development and operation of agricultural cooperatives; and for cooperative agreements; \$207,237,000: *Provided*, That notwithstanding any other provision of law, funds appropriated under this section may be used for advertising and promotional activities that support the Rural Development mission area: *Provided further*, That not more than \$10,000 may be expended to provide modest nonmonetary awards to non-USA employees: *Provided further*, That any balances available from prior years for the Rural Utilities Service, Rural Housing Service, and the Rural Business-Cooperative Service salaries and expenses accounts shall be transferred to and merged with this appropriation.

RURAL HOUSING SERVICE RURAL HOUSING INSURANCE FUND PROGRAM ACCOUNT

(INCLUDING TRANSFERS OF FUNDS)

For gross obligations for the principal amount of direct and guaranteed loans as authorized by title V of the Housing Act of 1949, to be available from funds in the rural housing insurance fund, as follows: \$13,226,501,000 for loans to section 502 borrowers, of which \$1,226,501,000 shall be for direct loans, and of which \$12,000,000,000 shall be for unsubsidized guaranteed loans; \$34,412,000 for section 504 housing repair loans; \$69,512,000 for section 515 rental housing; \$129,090,000 for section 538 guaranteed multi-family housing loans; \$5,045,000 for section 524 site loans; \$11,448,000 for credit sales of acquired property, of which up to \$1,448,000 may be for multi-family credit sales; and

\$4,970,000 for section 523 self-help housing land development loans.

For the cost of direct and guaranteed loans, including the cost of modifying loans, as defined in section 502 of the Congressional Budget Act of 1974, as follows: section 502 loans, \$217,322,000, of which \$44,522,000 shall be for direct loans, and of which \$172,800,000, to remain available until expended, shall be for unsubsidized guaranteed loans; section 504 housing repair loans, \$4,422,000; repair, rehabilitation, and new construction of section 515 rental housing, \$18,935,000; section 538 multi-family housing guaranteed loans, \$1,485,000; and credit sales of acquired property, \$556,000: *Provided*, That section 538 multi-family housing guaranteed loans funded pursuant to this paragraph shall not be subject to a guarantee fee and the interest on such loans may not be subsidized: *Provided further*, That any balances for a demonstration program for the preservation and revitalization of the section 515 multi-family rental housing properties as authorized by Public Law 109-97 and Public Law 110-5 shall be transferred to and merged with the "Rural Housing Service, Multi-family Housing Revitalization Program Account".

In addition, for administrative expenses necessary to carry out the direct and guaranteed loan programs, \$468,593,000, which shall be transferred to and merged with the appropriation for "Rural Development, Salaries and Expenses".

RENTAL ASSISTANCE PROGRAM

For rental assistance agreements entered into or renewed pursuant to the authority under section 521(a)(2) or agreements entered into in lieu of debt forgiveness or payments for eligible households as authorized by section 502(c)(5)(D) of the Housing Act of 1949, \$980,000,000; and, in addition, such sums as may be necessary, as authorized by section 521(c) of the Act, to liquidate debt incurred prior to fiscal year 1992 to carry out the rental assistance program under section 521(a)(2) of the Act: *Provided*, That of this amount, up to \$5,958,000 may be available for debt forgiveness or payments for eligible households as authorized by section 502(c)(5)(D) of the Act, and not to exceed \$50,000 per project for advances to nonprofit organizations or public agencies to cover direct costs (other than purchase price) incurred in purchasing projects pursuant to section 502(c)(5)(C) of the Act: *Provided further*, That of this amount not less than \$2,030,000 is available for newly constructed units financed by section 515 of the Housing Act of 1949, and not less than \$3,400,000 is for newly constructed units financed under sections 514 and 516 of the Housing Act of 1949: *Provided further*, That rental assistance agreements entered into or renewed during the current fiscal year shall be funded for a one-year period: *Provided further*, That any unexpended balances remaining at the end of such one-year agreements may be transferred and used for the purposes of any debt reduction; maintenance, repair, or rehabilitation of any existing projects; preservation; and rental assistance activities authorized under title V of the Act: *Provided further*, That rental assistance provided under agreements entered into prior to fiscal year 2010 for a farm labor multi-family housing project financed under section 514 or 516 of the Act may not be recaptured for use in another project until such assistance has remained unused for a period of 12 consecutive months, if such project has a waiting list of tenants seeking such assistance or the project has rental assistance eligible tenants who are not receiving such assistance: *Provided further*, That

such recaptured rental assistance shall, to the extent practicable, be applied to another farm labor multi-family housing project financed under section 514 or 516 of the Act.

MULTI-FAMILY HOUSING REVITALIZATION PROGRAM ACCOUNT

For the rural housing voucher program as authorized under section 542 of the Housing Act of 1949, but notwithstanding subsection (b) of such section, for the cost to conduct a housing demonstration program to provide revolving loans for the preservation of low-income multi-family housing projects, and for additional costs to conduct a demonstration program for the preservation and revitalization of multi-family rental housing properties described in this paragraph, \$39,651,000, to remain available until expended: *Provided*, That of the funds made available under this heading, \$18,000,000 shall be available for rural housing vouchers to any low-income household (including those not receiving rental assistance) residing in a property financed with a section 515 loan which has been prepaid after September 30, 2005: *Provided further*, That the amount of such voucher shall be the difference between comparable market rent for the section 515 unit and the tenant paid rent for such unit: *Provided further*, That funds made available for such vouchers shall be subject to the availability of annual appropriations: *Provided further*, That the Secretary shall, to the maximum extent practicable, administer such vouchers with current regulations and administrative guidance applicable to section 8 housing vouchers administered by the Secretary of the Department of Housing and Urban Development (including the ability to pay administrative costs related to delivery of the voucher funds): *Provided further*, That if the Secretary determines that the amount made available for vouchers in this or any other Act is not needed for vouchers, the Secretary may use such funds for the demonstration programs for the preservation and revitalization of multi-family rental housing properties described in this paragraph: *Provided further*, That of the funds made available under this heading, \$1,791,000 shall be available for the cost of loans to private nonprofit organizations, or such nonprofit organizations' affiliate loan funds and State and local housing finance agencies, to carry out a housing demonstration program to provide revolving loans for the preservation of low-income multi-family housing projects: *Provided further*, That loans under such demonstration program shall have an interest rate of not more than 1 percent direct loan to the recipient: *Provided further*, That the Secretary may defer the interest and principal payment to the Rural Housing Service for up to 3 years and the term of such loans shall not exceed 30 years: *Provided further*, That of the funds made available under this heading, \$19,860,000 shall be available for a demonstration program for the preservation and revitalization of the section 514, 515, and 516 multi-family rental housing properties to restructure existing USDA multi-family housing loans, as the Secretary deems appropriate, expressly for the purposes of ensuring the project has sufficient resources to preserve the project for the purpose of providing safe and affordable housing for low-income residents and farm laborers including reducing or eliminating interest; deferring loan payments, subordinating, reducing or re-amortizing loan debt; and other financial assistance including advances, payments and incentives (including the ability of owners to obtain reasonable returns on investment) required by the Secretary: *Provided further*,

That the Secretary shall as part of the preservation and revitalization agreement obtain a restrictive use agreement consistent with the terms of the restructuring: *Provided further*, That if the Secretary determines that additional funds for vouchers described in this paragraph are needed, funds for the preservation and revitalization demonstration program may be used for such vouchers: *Provided further*, That the Secretary may use any unobligated funds appropriated for the rural housing voucher program in a prior fiscal year to support information technology activities of the Rural Housing Service to the extent the Secretary determines that additional funds are not needed for this fiscal year to provide vouchers described in this paragraph: *Provided further*, That if Congress enacts legislation to permanently authorize a multi-family rental housing loan restructuring program similar to the demonstration program described herein, the Secretary may use funds made available for the demonstration program under this heading to carry out such legislation with the prior notification of the Committees on Appropriations of both Houses of Congress.

MUTUAL AND SELF-HELP HOUSING GRANTS

For grants and contracts pursuant to section 523(b)(1)(A) of the Housing Act of 1949 (42 U.S.C. 1490c), \$38,727,000, to remain available until expended.

RURAL HOUSING ASSISTANCE GRANTS (INCLUDING TRANSFER OF FUNDS)

For grants and contracts for very low-income housing repair, supervisory and technical assistance, compensation for construction defects, and rural housing preservation made by the Rural Housing Service, as authorized by 42 U.S.C. 1474, 1479(c), 1490e, and 1490m, \$41,500,000, to remain available until expended: *Provided*, That any balances to carry out a housing demonstration program to provide revolving loans for the preservation of low-income multi-family housing projects as authorized in Public Law 108-447 and Public Law 109-97 shall be transferred to and merged with the "Rural Housing Service, Multi-family Housing Revitalization Program Account".

FARM LABOR PROGRAM ACCOUNT

For the cost of direct loans, grants, and contracts, as authorized by 42 U.S.C. 1484 and 1486, \$16,968,000, to remain available until expended, for direct farm labor housing loans and domestic farm labor housing grants and contracts.

RURAL COMMUNITY FACILITIES PROGRAM ACCOUNT (INCLUDING TRANSFERS OF FUNDS)

For the cost of direct loans, loan guarantees, and grants for rural community facilities programs as authorized by section 306 and described in section 381E(d)(1) of the Consolidated Farm and Rural Development Act, \$54,993,000, to remain available until expended: *Provided*, That \$6,256,000 of the amount appropriated under this heading shall be available for a Rural Community Development Initiative: *Provided further*, That such funds shall be used solely to develop the capacity and ability of private, nonprofit community-based housing and community development organizations, low-income rural communities, and Federally Recognized Native American Tribes to undertake projects to improve housing, community facilities, community and economic development projects in rural areas: *Provided further*, That such funds shall be made available to qualified private, nonprofit and public intermediary organizations proposing to

carry out a program of financial and technical assistance: *Provided further*, That such intermediary organizations shall provide matching funds from other sources, including Federal funds for related activities, in an amount not less than funds provided: *Provided further*, That \$13,902,000 of the amount appropriated under this heading shall be to provide grants for facilities in rural communities with extreme unemployment and severe economic depression (Public Law 106-387), with up to 5 percent for administration and capacity building in the State rural development offices: *Provided further*, That \$3,972,000 of the amount appropriated under this heading shall be available for community facilities grants to tribal colleges, as authorized by section 306(a)(19) of such Act: *Provided further*, That sections 381E-H and 381N of the Consolidated Farm and Rural Development Act are not applicable to the funds made available under this heading: *Provided further*, That any prior balances in the Rural Development, Rural Community Advancement Program account for programs authorized by section 306 and described in section 381E(d)(1) of such Act be transferred and merged with this account and any other prior balances from the Rural Development, Rural Community Advancement Program account that the Secretary determines is appropriate to transfer.

RURAL BUSINESS—COOPERATIVE SERVICE RURAL BUSINESS PROGRAM ACCOUNT (INCLUDING TRANSFERS OF FUNDS)

For the cost of loan guarantees and grants, for the rural business development programs authorized by sections 306 and 310B and described in sections 310B(f) and 381E(d)(3) of the Consolidated Farm and Rural Development Act, \$97,116,000, to remain available until expended: *Provided*, That of the amount appropriated under this heading, not to exceed \$500,000 shall be made available for a grant to a qualified national organization to provide technical assistance for rural transportation in order to promote economic development and \$2,979,000 shall be for grants to the Delta Regional Authority (7 U.S.C. 2009aa et seq.) for any Rural Community Advancement Program purpose as described in section 381E(d) of the Consolidated Farm and Rural Development Act, of which not more than 5 percent may be used for administrative expenses: *Provided further*, That \$4,000,000 of the amount appropriated under this heading shall be for business grants to benefit Federally Recognized Native American Tribes, including \$250,000 for a grant to a qualified national organization to provide technical assistance for rural transportation in order to promote economic development: *Provided further*, That sections 381E-H and 381N of the Consolidated Farm and Rural Development Act are not applicable to funds made available under this heading: *Provided further*, That any prior balances in the Rural Development, Rural Community Advancement Program account for programs authorized by sections 306 and 310B and described in sections 310B(f) and 381E(d)(3) of such Act be transferred and merged with this account and any other prior balances from the Rural Development, Rural Community Advancement Program account that the Secretary determines is appropriate to transfer.

RURAL DEVELOPMENT LOAN FUND PROGRAM ACCOUNT (INCLUDING TRANSFER OF FUNDS)

For the principal amount of direct loans, as authorized by the Rural Development Loan Fund (42 U.S.C. 9812(a)), \$33,536,000.

For the cost of direct loans, \$8,464,000, as authorized by the Rural Development Loan

Fund (42 U.S.C. 9812(a)), of which \$1,035,000 shall be available through June 30, 2010, for Federally Recognized Native American Tribes and of which \$2,070,000 shall be available through June 30, 2010, for Mississippi Delta Region counties (as determined in accordance with Public Law 100-460): *Provided*, That such costs, including the cost of modifying such loans, shall be as defined in section 502 of the Congressional Budget Act of 1974.

In addition, for administrative expenses to carry out the direct loan programs, \$4,941,000 shall be transferred to and merged with the appropriation for "Rural Development, Salaries and Expenses".

RURAL ECONOMIC DEVELOPMENT LOANS PROGRAM ACCOUNT

(INCLUDING RESCISSION OF FUNDS)

For the principal amount of direct loans, as authorized under section 313 of the Rural Electrification Act, for the purpose of promoting rural economic development and job creation projects, \$33,077,000.

Of the funds derived from interest on the cushion of credit payments, as authorized by section 313 of the Rural Electrification Act of 1936, \$43,000,000 shall not be obligated and \$43,000,000 are rescinded.

RURAL COOPERATIVE DEVELOPMENT GRANTS

For rural cooperative development grants authorized under section 310B(e) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1932(i)), \$38,854,000, of which \$300,000 shall be for a cooperative research agreement with a qualified academic institution to conduct research on the national economic impact of all types of cooperatives; and of which \$2,800,000 shall be for cooperative agreements for the appropriate technology transfer for rural areas program: *Provided*, That not to exceed \$3,463,000 shall be for cooperatives or associations of cooperatives whose primary focus is to provide assistance to small, socially disadvantaged producers and whose governing board and/or membership is comprised of at least 75 percent socially disadvantaged members; and of which \$21,867,000, to remain available until expended, shall be for value-added agricultural product market development grants, as authorized by section 231 of the Agricultural Risk Protection Act of 2000 (7 U.S.C. 1621 note).

RURAL MICROENTERPRISE INVESTMENT PROGRAM ACCOUNT

For the cost of loans and grants, \$22,000,000 as authorized by section 379E of the Consolidated Farm and Rural Development Act (7 U.S.C. 1981 et seq.): *Provided*, That such costs of loans, including the cost of modifying such loans, shall be as defined in section 502 of the Congressional Budget Act of 1974.

RURAL ENERGY FOR AMERICA PROGRAM

For the cost of a program of loan guarantees and grants, under the same terms and conditions as authorized by section 9007 of the Farm Security and Rural Investment Act of 2002 (7 U.S.C. 8107), \$68,130,000: *Provided*, That the cost of loan guarantees, including the cost of modifying such loans, shall be as defined in section 502 of the Congressional Budget Act of 1974.

BIOREFINERY ASSISTANCE PROGRAM ACCOUNT

For the cost of guaranteed loans, \$17,339,000, as authorized by section 9003 of the Farm Security and Rural Investment Act of 2002 (7 U.S.C. 8107): *Provided*, That such costs, including the cost of modifying such loans, shall be as defined in section 502 of the Congressional Budget Act of 1974.

RURAL UTILITIES SERVICE

RURAL WATER AND WASTE DISPOSAL PROGRAM ACCOUNT

(INCLUDING TRANSFERS OF FUNDS)

For the cost of direct loans, loan guarantees, and grants for the rural water, waste water, waste disposal, and solid waste management programs authorized by sections 306, 306A, 306C, 306D, 306E, and 310B and described in sections 306C(a)(2), 306D, 306E, and 381E(d)(2) of the Consolidated Farm and Rural Development Act, \$568,730,000, to remain available until expended, of which not to exceed \$497,000 shall be available for the rural utilities program described in section 306(a)(2)(B) of such Act, and of which not to exceed \$993,000 shall be available for the rural utilities program described in section 306E of such Act: *Provided*, That \$70,000,000 of the amount appropriated under this heading shall be for loans and grants including water and waste disposal systems grants authorized by 306C(a)(2)(B) and 306D of the Consolidated Farm and Rural Development Act, Federally-recognized Native American Tribes authorized by 306C(a)(1), and the Department of Hawaiian Home Lands (of the State of Hawaii): *Provided further*, That such loans and grants shall not be subject to any matching requirements: *Provided further*, That not to exceed \$19,000,000 of the amount appropriated under this heading shall be for technical assistance grants for rural water and waste systems pursuant to section 306(a)(14) of such Act, unless the Secretary makes a determination of extreme need, of which \$5,600,000 shall be made available for a grant to a qualified non-profit multi-state regional technical assistance organization, with experience in working with small communities on water and waste water problems, the principal purpose of such grant shall be to assist rural communities with populations of 3,300 or less, in improving the planning, financing, development, operation, and management of water and waste water systems, and of which not less than \$800,000 shall be for a qualified national Native American organization to provide technical assistance for rural water systems for tribal communities: *Provided further*, That not to exceed \$14,000,000 of the amount appropriated under this heading shall be for contracting with qualified national organizations for a circuit rider program to provide technical assistance for rural water systems: *Provided further*, That \$17,500,000 of the amount appropriated under this heading shall be transferred to, and merged with, the Rural Utilities Service, High Energy Cost Grants Account to provide grants authorized under section 19 of the Rural Electrification Act of 1936 (7 U.S.C. 918a): *Provided further*, That any prior year balances for high cost energy grants authorized by section 19 of the Rural Electrification Act of 1936 (7 U.S.C. 918a) shall be transferred to and merged with the Rural Utilities Service, High Energy Costs Grants Account: *Provided further*, That sections 381E-H and 381N of the Consolidated Farm and Rural Development Act are not applicable to the funds made available under this heading: *Provided further*, That any prior balances in the Rural Development, Rural Community Advancement Program account programs authorized by sections 306, 306A, 306C, 306D, 306E, and 310B and described in sections 306C(a)(2), 306D, 306E, and 381E(d)(2) of such Act be transferred to and merged with this account and any other prior balances from the Rural Development, Rural Community Advancement Program account that the Secretary determines is appropriate to transfer.

RURAL ELECTRIFICATION AND TELECOMMUNICATIONS LOANS PROGRAM ACCOUNT

(INCLUDING TRANSFER OF FUNDS)

The principal amount of direct and guaranteed loans as authorized by sections 305 and 306 of the Rural Electrification Act of 1936 (7 U.S.C. 935 and 936) shall be made as follows: 5 percent rural electrification loans, \$100,000,000; loans made pursuant to section 306 of that Act, rural electric, \$6,500,000,000; guaranteed underwriting loans pursuant to section 313A, \$500,000,000; 5 percent rural telecommunications loans, \$145,000,000; cost of money rural telecommunications loans, \$250,000,000; and for loans made pursuant to section 306 of that Act, rural telecommunications loans, \$295,000,000.

In addition, for administrative expenses necessary to carry out the direct and guaranteed loan programs, \$39,959,000, which shall be transferred to and merged with the appropriation for "Rural Development, Salaries and Expenses".

DISTANCE LEARNING, TELEMEDICINE, AND BROADBAND PROGRAM

For the principal amount of broadband telecommunication loans, \$531,699,000.

For grants for telemedicine and distance learning services in rural areas, as authorized by 7 U.S.C. 950aaa et seq., \$37,755,000, to remain available until expended: *Provided*, That \$3,000,000 shall be made available for grants authorized by 379G of the Consolidated Farm and Rural Development Act: *Provided further*, That \$4,965,000 shall be made available to those noncommercial educational television broadcast stations that serve rural areas and are qualified for Community Service Grants by the Corporation for Public Broadcasting under section 396(k) of the Communications Act of 1934, including associated translators and repeaters, regardless of the location of their main transmitter, studio-to-transmitter links, and equipment to allow local control over digital content and programming through the use of high-definition broadcast, multi-casting and datacasting technologies.

For the cost of broadband loans, as authorized by section 601 of the Rural Electrification Act, \$38,495,000, to remain available until expended: *Provided*, That the cost of direct loans shall be as defined in section 502 of the Congressional Budget Act of 1974.

In addition, \$13,406,000, to remain available until expended, for a grant program to finance broadband transmission in rural areas eligible for Distance Learning and Telemedicine Program benefits authorized by 7 U.S.C. 950aaa.

TITLE IV

DOMESTIC FOOD PROGRAMS

OFFICE OF THE UNDER SECRETARY FOR FOOD, NUTRITION AND CONSUMER SERVICES

For necessary expenses of the Office of the Under Secretary for Food, Nutrition and Consumer Services, \$813,000.

FOOD AND NUTRITION SERVICE

CHILD NUTRITION PROGRAMS

(INCLUDING TRANSFERS OF FUNDS)

In lieu of the amounts made available in section 14222(b) of the Food, Conservation, and Energy Act of 2008, for necessary expenses to carry out the Richard B. Russell National School Lunch Act (42 U.S.C. 1751 et seq.), except section 21, and the Child Nutrition Act of 1966 (42 U.S.C. 1771 et seq.), except sections 17 and 21; \$16,799,584,000, to remain available through September 30, 2011, of which \$10,051,707,000 is hereby appropriated and \$6,747,877,000 shall be derived by transfer

from funds available under section 32 of the Act of August 24, 1935 (7 U.S.C. 612c): *Provided*, That of the total amount available, \$5,000,000 shall be available to be awarded as competitive grants to implement section 4405 of the Food, Conservation, and Energy Act of 2008 (Public Law 110-246), and may be awarded notwithstanding the limitations imposed by sections 4405(b)(1)(A) and 4405(c)(1)(A).

**SPECIAL SUPPLEMENTAL NUTRITION PROGRAM
FOR WOMEN, INFANTS, AND CHILDREN (WIC)**

For necessary expenses to carry out the WIC Program as authorized by section 17 of the Child Nutrition Act of 1966 (42 U.S.C. 1786), \$7,552,000,000, to remain available through September 30, 2011: *Provided*, That none of the funds provided in this account shall be available for the purchase of infant formula except in accordance with the cost containment and competitive bidding requirements specified in section 17 of such Act; *Provided further*, That none of the funds provided shall be available for activities that are not fully reimbursed by other Federal Government departments or agencies unless authorized by section 17 of such Act.

**SUPPLEMENTAL NUTRITION ASSISTANCE
PROGRAM**

For necessary expenses to carry out the Food and Nutrition Act of 2008 (7 U.S.C. 2011 et seq.), \$61,351,846,000, of which \$3,000,000,000, to remain available through September 30, 2011, shall be placed in reserve for use only in such amounts and at such times as may become necessary to carry out program operations: *Provided*, That funds provided herein shall be expended in accordance with section 16 of the Food and Nutrition Act of 2008: *Provided further*, That this appropriation shall be subject to any work registration or workfare requirements as may be required by law: *Provided further*, That funds made available for Employment and Training under this heading shall remain available until expended, notwithstanding section 16(h)(1) of the Food and Nutrition Act of 2008: *Provided further*, That funds made available under this heading may be used to enter into contracts and employ staff to conduct studies, evaluations, or to conduct activities related to program integrity provided that such activities are authorized by the Food and Nutrition Act of 2008.

COMMODITY ASSISTANCE PROGRAM

For necessary expenses to carry out disaster assistance and the Commodity Supplemental Food Program as authorized by section 4(a) of the Agriculture and Consumer Protection Act of 1973 (7 U.S.C. 612c note); the Emergency Food Assistance Act of 1983; special assistance for the nuclear affected islands, as authorized by section 103(f)(2) of the Compact of Free Association Amendments Act of 2003 (Public Law 108-188); and the Farmers' Market Nutrition Program, as authorized by section 17(m) of the Child Nutrition Act of 1966, \$233,388,000, to remain available through September 30, 2011: *Provided*, That none of these funds shall be available to reimburse the Commodity Credit Corporation for commodities donated to the program: *Provided further*, That notwithstanding any other provision of law, effective with funds made available in fiscal year 2010 to support the Seniors Farmers' Market Nutrition Program, as authorized by section 4402 of the Farm Security and Rural Investment Act of 2002, such funds shall remain available through September 30, 2011: *Provided further*, That of the funds made available under section 27(a) of the Food and Nutrition Act of 2008 (7 U.S.C. 2036(a)), the Secretary may use

up to 10 percent for costs associated with the distribution of commodities.

NUTRITION PROGRAMS ADMINISTRATION

For necessary administrative expenses of the Food and Nutrition Service for carrying out any domestic nutrition assistance program, \$147,801,000.

TITLE V

**FOREIGN ASSISTANCE AND RELATED
PROGRAMS**

FOREIGN AGRICULTURAL SERVICE

SALARIES AND EXPENSES

(INCLUDING TRANSFERS OF FUNDS)

For necessary expenses of the Foreign Agricultural Service, including not to exceed \$158,000 for representation allowances and for expenses pursuant to section 8 of the Act approved August 3, 1956 (7 U.S.C. 1766), \$180,367,000: *Provided*, That the Service may utilize advances of funds, or reimburse this appropriation for expenditures made on behalf of Federal agencies, public and private organizations and institutions under agreements executed pursuant to the agricultural food production assistance programs (7 U.S.C. 1737) and the foreign assistance programs of the United States Agency for International Development: *Provided further*, That funds made available for middle-income country training programs and up to \$2,000,000 of the Foreign Agricultural Service appropriation solely for the purpose of offsetting fluctuations in international currency exchange rates, subject to documentation by the Foreign Agricultural Service, shall remain available until expended.

**FOOD FOR PEACE TITLE I DIRECT CREDIT AND
FOOD FOR PROGRESS PROGRAM ACCOUNT**

(INCLUDING TRANSFERS OF FUNDS)

For administrative expenses to carry out the credit program of title I, Public Law 83-480 and the Food for Progress Act of 1985, \$2,812,000, shall be transferred to and merged with the appropriation for "Farm Service Agency, Salaries and Expenses": *Provided*, That funds made available for the cost of agreements under title I of the Agricultural Trade Development and Assistance Act of 1954 and for title I ocean freight differential may be used interchangeably between the two accounts with prior notice to the Committees on Appropriations of both Houses of Congress.

FOOD FOR PEACE TITLE II GRANTS

For expenses during the current fiscal year, not otherwise recoverable, and unrecovered prior years' costs, including interest thereon, under the Food for Peace Act (Public Law 83-480, as amended), for commodities supplied in connection with dispositions abroad under title II of said Act, \$1,690,000,000, to remain available until expended.

**COMMODITY CREDIT CORPORATION EXPORT
LOANS PROGRAM ACCOUNT**

(INCLUDING TRANSFERS OF FUNDS)

For administrative expenses to carry out the Commodity Credit Corporation's export guarantee program, GSM 102 and GSM 103, \$6,820,000; to cover common overhead expenses as permitted by section 11 of the Commodity Credit Corporation Charter Act and in conformity with the Federal Credit Reform Act of 1990, of which \$6,465,000 shall be transferred to and merged with the appropriation for "Foreign Agricultural Service, Salaries and Expenses", and of which \$355,000 shall be transferred to and merged with the appropriation for "Foreign Agricultural Service, Salaries and Expenses".

**MCGOVERN-DOLE INTERNATIONAL FOOD FOR
EDUCATION AND CHILD NUTRITION PROGRAM
GRANTS**

For necessary expenses to carry out the provisions of section 3107 of the Farm Security and Rural Investment Act of 2002 (7 U.S.C. 1736o-1), \$199,500,000, to remain available until expended: *Provided*, That of this amount, the Secretary shall use up to \$10,000,000 to conduct pilot projects to field test new and improved micronutrient fortified food products designed to meet energy and nutrient needs of program participants: *Provided further*, That the Commodity Credit Corporation is authorized to provide the services, facilities, and authorities for the purpose of implementing such section, subject to reimbursement from amounts provided herein.

TITLE VI

**RELATED AGENCY AND FOOD AND DRUG
ADMINISTRATION**

**DEPARTMENT OF HEALTH AND HUMAN
SERVICES**

FOOD AND DRUG ADMINISTRATION

SALARIES AND EXPENSES

For necessary expenses of the Food and Drug Administration, including hire and purchase of passenger motor vehicles; for payment of space rental and related costs pursuant to Public Law 92-313 for programs and activities of the Food and Drug Administration which are included in this Act; for rental of special purpose space in the District of Columbia or elsewhere; for miscellaneous and emergency expenses of enforcement activities, authorized and approved by the Secretary and to be accounted for solely on the Secretary's certificate, not to exceed \$25,000; and notwithstanding section 521 of Public Law 107-188; \$2,995,218,000: *Provided*, That of the amount provided under this heading, \$578,162,000 shall be derived from prescription drug user fees authorized by 21 U.S.C. 379h shall be credited to this account and remain available until expended, and shall not include any fees pursuant to 21 U.S.C. 379h(a)(2) and (a)(3) assessed for fiscal year 2011 but collected in fiscal year 2010; \$57,014,000 shall be derived from medical device user fees authorized by 21 U.S.C. 379j, and shall be credited to this account and remain available until expended; \$17,280,000 shall be derived from animal drug user fees authorized by 21 U.S.C. 379j, and shall be credited to this account and remain available until expended; and \$5,106,000 shall be derived from animal generic drug user fees authorized by 21 U.S.C. 379f, and shall be credited to this account and shall remain available until expended: *Provided further*, That fees derived from prescription drug, medical device, animal drug, and animal generic drug assessments for fiscal year 2010 received during fiscal year 2010, including any such fees assessed prior to fiscal year 2010 but credited for fiscal year 2010, shall be subject to the fiscal year 2010 limitations: *Provided further*, That none of these funds shall be used to develop, establish, or operate any program of user fees authorized by 31 U.S.C. 9701: *Provided further*, That of the total amount appropriated: (1) \$782,915,000 shall be for the Center for Food Safety and Applied Nutrition and related field activities in the Office of Regulatory Affairs; (2) \$873,104,000 shall be for the Center for Drug Evaluation and Research and related field activities in the Office of Regulatory Affairs, of which no less than \$51,545,000 shall be available for the Office of Generic Drugs; (3) \$305,249,000 shall be for the Center for Biologics Evaluation and Research and for related field activities

in the Office of Regulatory Affairs; (4) \$155,540,000 shall be for the Center for Veterinary Medicine and for related field activities in the Office of Regulatory Affairs; (5) \$349,262,000 shall be for the Center for Devices and Radiological Health and for related field activities in the Office of Regulatory Affairs; (6) \$58,745,000 shall be for the National Center for Toxicological Research; (7) not to exceed \$115,882,000 shall be for Rent and Related activities, of which \$41,496,000 is for White Oak Consolidation, other than the amounts paid to the General Services Administration for rent; (8) not to exceed \$168,728,000 shall be for payments to the General Services Administration for rent; and (9) \$185,793,000 shall be for other activities, including the Office of the Commissioner; the Office of Scientific and Medical Programs; the Office of Policy, Planning and Preparedness; the Office of International and Special Programs; the Office of Operations; and central services for these offices: *Provided further*, That funds may be transferred from one specified activity to another with the prior notification of the Committees on Appropriations of both Houses of Congress.

In addition, mammography user fees authorized by 42 U.S.C. 263b, export certification user fees authorized by 21 U.S.C. 381, and priority review user fees authorized by 21 U.S.C. 360n may be credited to this account, to remain available until expended.

BUILDINGS AND FACILITIES

For plans, construction, repair, improvement, extension, alteration, and purchase of fixed equipment or facilities of or used by the Food and Drug Administration, where not otherwise provided, \$12,433,000, to remain available until expended.

INDEPENDENT AGENCY

FARM CREDIT ADMINISTRATION

LIMITATION ON ADMINISTRATIVE EXPENSES

Not to exceed \$54,500,000 (from assessments collected from farm credit institutions, including the Federal Agricultural Mortgage Corporation) shall be obligated during the current fiscal year for administrative expenses as authorized under 12 U.S.C. 2249: *Provided*, That this limitation shall not apply to expenses associated with receiverships.

TITLE VII

GENERAL PROVISIONS

(INCLUDING RESCISSION)

SEC. 701. Within the unit limit of cost fixed by law, appropriations and authorizations made for the Department of Agriculture for the current fiscal year under this Act shall be available for the purchase, in addition to those specifically provided for, of not to exceed 204 passenger motor vehicles, of which 170 shall be for replacement only, and for the hire of such vehicles.

SEC. 702. Section 10101 of division B of the Consolidated Security, Disaster Assistance, and Continuing Appropriations Act, 2009, (Public Law 110-329) is amended in subsection (b) by inserting at the end the following: "In carrying out this section, the Secretary may transfer funds into existing or new accounts as determined by the Secretary."

SEC. 703. The Secretary of Agriculture may transfer unobligated balances of discretionary funds appropriated by this Act or other available unobligated discretionary balances of the Department of Agriculture to the Working Capital Fund for the acquisition of plant and capital equipment necessary for the delivery of financial, administrative, and information technology services of primary

benefit to the agencies of the Department of Agriculture: *Provided*, That none of the funds made available by this Act or any other Act shall be transferred to the Working Capital Fund without the prior notification of the agency administrator: *Provided further*, That none of the funds transferred to the Working Capital Fund pursuant to this section shall be available for obligation without the prior notification of the Committees on Appropriations of both Houses of Congress: *Provided further*, That none of the funds appropriated by this Act or made available to the Department's Working Capital Fund shall be available for obligation or expenditure to make any changes to the Department's National Finance Center without prior approval of the Committees on Appropriations of both Houses of Congress as required by section 712 of this Act: *Provided further*, That of annual income amounts in the Working Capital Fund of the Department of Agriculture allocated for the National Finance Center, the Secretary may reserve not more than 4 percent for the replacement or acquisition of capital equipment, including equipment for the improvement and implementation of a financial management plan, information technology, and other systems of the National Finance Center or to pay any unforeseen, extraordinary cost of the National Finance Center: *Provided further*, That none of the amounts reserved shall be available for obligation unless the Secretary submits notification of the obligation to the Committees on Appropriations of the House of Representatives and the Senate: *Provided further*, That the limitation on the obligation of funds pending notification to Congressional Committees shall not apply to any obligation that, as determined by the Secretary, is necessary to respond to a declared state of emergency that significantly impacts the operations of the National Finance Center; or to evacuate employees of the National Finance Center to a safe haven to continue operations of the National Finance Center.

SEC. 704. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 705. No funds appropriated by this Act may be used to pay negotiated indirect cost rates on cooperative agreements or similar arrangements between the United States Department of Agriculture and nonprofit institutions in excess of 10 percent of the total direct cost of the agreement when the purpose of such cooperative arrangements is to carry out programs of mutual interest between the two parties: *Provided*, That this does not preclude appropriate payment of indirect costs on grants and contracts with such institutions when such indirect costs are computed on a similar basis for all agencies for which appropriations are provided in this Act.

SEC. 706. Appropriations to the Department of Agriculture for the cost of direct and guaranteed loans made available in the current fiscal year shall remain available until expended to disburse obligations made in the current fiscal year for the following accounts: the Rural Development Loan Fund program account, the Rural Electrification and Telecommunication Loans program account, and the Rural Housing Insurance Fund program account.

SEC. 707. Of the funds made available by this Act, not more than \$1,800,000 shall be used to cover necessary expenses of activities related to all advisory committees, panels, commissions, and task forces of the Department of Agriculture, except for panels used to comply with negotiated rule makings

and panels used to evaluate competitively awarded grants.

SEC. 708. Hereafter, none of the funds appropriated by this Act or any other Act may be used to carry out section 410 of the Federal Meat Inspection Act (21 U.S.C. 679a) or section 30 of the Poultry Products Inspection Act (21 U.S.C. 471).

SEC. 709. No employee of the Department of Agriculture may be detailed or assigned from an agency or office funded by this Act or any other Act to any other agency or office of the Department for more than 30 days unless the individual's employing agency or office is fully reimbursed by the receiving agency or office for the salary and expenses of the employee for the period of assignment.

SEC. 710. None of the funds appropriated or otherwise made available to the Department of Agriculture or the Food and Drug Administration shall be used to transmit or otherwise make available to any non-Department of Agriculture or non-Department of Health and Human Services employee questions or responses to questions that are a result of information requested for the appropriations hearing process.

SEC. 711. None of the funds made available to the Department of Agriculture by this Act may be used to acquire new information technology systems or significant upgrades, as determined by the Office of the Chief Information Officer, without the approval of the Chief Information Officer and the concurrence of the Executive Information Technology Investment Review Board: *Provided*, That notwithstanding any other provision of law, none of the funds appropriated or otherwise made available by this Act may be transferred to the Office of the Chief Information Officer unless prior notification has been transmitted to the Committees on Appropriations of both Houses of Congress: *Provided further*, That none of the funds available to the Department of Agriculture for information technology shall be obligated for projects over \$25,000 prior to receipt of written approval by the Chief Information Officer.

SEC. 712. (a) None of the funds provided by this Act, or provided by previous Appropriations Acts to the agencies funded by this Act that remain available for obligation or expenditure in the current fiscal year, or provided from any accounts in the Treasury of the United States derived by the collection of fees available to the agencies funded by this Act, shall be available for obligation or expenditure through a reprogramming of funds which—

- (1) creates new programs;
- (2) eliminates a program, project, or activity;
- (3) increases funds or personnel by any means for any project or activity for which funds have been denied or restricted;
- (4) relocates an office or employees;
- (5) reorganizes offices, programs, or activities; or
- (6) contracts out or privatizes any functions or activities presently performed by Federal employees; unless the Committees on Appropriations of both Houses of Congress are notified 15 days in advance of such reprogramming of funds.

(b) None of the funds provided by this Act, or provided by previous Appropriations Acts to the agencies funded by this Act that remain available for obligation or expenditure in the current fiscal year, or provided from any accounts in the Treasury of the United States derived by the collection of fees available to the agencies funded by this Act, shall be available for obligation or expenditure for

activities, programs, or projects through a reprogramming of funds in excess of \$500,000 or 10 percent, whichever is less, that: (1) augments existing programs, projects, or activities; (2) reduces by 10 percent funding for any existing program, project, or activity, or numbers of personnel by 10 percent as approved by Congress; or (3) results from any general savings from a reduction in personnel which would result in a change in existing programs, activities, or projects as approved by Congress; unless the Committees on Appropriations of both Houses of Congress are notified 15 days in advance of such reprogramming of funds.

(c) The Secretary of Agriculture or the Secretary of Health and Human Services shall notify the Committees on Appropriations of both Houses of Congress before implementing a program or activity not carried out during the previous fiscal year unless the program or activity is funded by this Act or specifically funded by any other Act.

SEC. 713. None of the funds appropriated by this or any other Act shall be used to pay the salaries and expenses of personnel who prepare or submit appropriations language as part of the President's Budget submission to the Congress of the United States for programs under the jurisdiction of the Appropriations Subcommittees on Agriculture, Rural Development, Food and Drug Administration, and Related Agencies that assumes revenues or reflects a reduction from the previous year due to user fees proposals that have not been enacted into law prior to the submission of the Budget unless such Budget submission identifies which additional spending reductions should occur in the event the user fees proposals are not enacted prior to the date of the convening of a committee of conference for the fiscal year 2011 appropriations Act.

SEC. 714. None of the funds made available by this or any other Act may be used to close or relocate a Rural Development office unless or until the Secretary of Agriculture determines the cost effectiveness and/or enhancement of program delivery: *Provided*, That not later than 120 days before the date of the proposed closure or relocation, the Secretary notifies the Committees on Appropriation of the House and Senate, and the members of Congress from the State in which the office is located of the proposed closure or relocation and provides a report that describes the justifications for such closures and relocations.

SEC. 715. None of the funds made available to the Food and Drug Administration by this Act shall be used to close or relocate, or to plan to close or relocate, the Food and Drug Administration Division of Pharmaceutical Analysis in St. Louis, Missouri, outside the city or county limits of St. Louis, Missouri.

SEC. 716. There is hereby appropriated \$499,000 for any authorized Rural Development program purpose, in communities suffering from extreme outmigration and situated in areas that were designated as part of an Empowerment Zone pursuant to section 111 of the Community Renewal Tax Relief Act of 2000 (as contained in appendix G of Public Law 106-554).

SEC. 717. None of the funds made available in fiscal year 2010 or preceding fiscal years for programs authorized under the Food for Peace Act (7 U.S.C. 1691 et seq.) in excess of \$20,000,000 shall be used to reimburse the Commodity Credit Corporation for the release of eligible commodities under section 302(f)(2)(A) of the Bill Emerson Humanitarian Trust Act (7 U.S.C. 1736f-1): *Provided*, That any such funds made available to reim-

burse the Commodity Credit Corporation shall only be used pursuant to section 302(b)(2)(B)(i) of the Bill Emerson Humanitarian Trust Act.

SEC. 718. There is hereby appropriated \$3,497,000, to remain available until expended, for a grant to the National Center for Natural Products Research for construction or renovation to carry out the research objectives of the natural products research grant issued by the Food and Drug Administration.

SEC. 719. Funds made available under section 1240I and section 1241(a) of the Food Security Act of 1985 and section 524(b) of the Federal Crop Insurance Act (7 U.S.C. 1524(b)) in the current fiscal year shall remain available until expended to disburse obligations made in the current fiscal year.

SEC. 720. None of the funds appropriated or otherwise made available by this or any other Act shall be used to pay the salaries and expenses of personnel to carry out the following:

(1) An Environmental Quality Incentives Program as authorized by sections 1241-240H of the Food Security Act of 1985, as amended (16 U.S.C. 3839aa-3839aa(8)), in excess of \$1,180,000,000.

(2) a program authorized by section 14(h)(1) of the Watershed Protection and Flood Prevention Act (16 U.S.C. 1012(h)(1)).

(3) a program under subsection (b)(2)(A)(ii) of section 14222 of Public Law 110-246 in excess of \$1,123,000,000: *Provided*, That none of the funds made available in this Act or any other Act shall be used for salaries and expenses to carry out section 19(i)(1)(C) of the Richard B. Russell National School Lunch Act as amended by section 4304 of Public Law 110-246 in excess of \$25,000,000 until October 1, 2010: *Provided further*, That the unobligated balances under section 32 of the Act of August 24, 1935, \$52,000,000 are hereby rescinded.

SEC. 721. Hereafter, notwithstanding any other provision of law, any former RUS borrower that has repaid or prepaid an insured, direct or guaranteed loan under the Rural Electrification Act, or any not-for-profit utility that is eligible to receive an insured or direct loan under such Act, shall be eligible for assistance under section 313(b)(2)(B) of such Act in the same manner as a borrower under such Act.

SEC. 722. There is hereby appropriated \$2,600,000, to remain available until expended, for the planning and design of construction of an agricultural pest facility in the State of Hawaii.

SEC. 723. There is hereby appropriated \$4,000,000 to the Secretary of Agriculture to award grant(s) to develop and field test new food products designed to improve the nutritional delivery of humanitarian food assistance provided through the McGovern-Dole (section 3107 of the Farm Security and Rural Investment Act of 2002 (7 U.S.C. 1736o-1)) and the Food for Peace title II (7 U.S.C. 1691 et seq.) programs: *Provided*, That the Secretary shall use the authorities provided under the Research, Education, and Economics mission area of the Department in awarding such grant(s), with priority given to proposals that demonstrate partnering with and in-kind support from the private sector.

SEC. 724. The Rural Utilities Service, Rural Housing Service, and Rural Business and Cooperative Service shall permit an applicant to solicit and procure professional services and have prepared all environmental reviews, assessments, and impact statements: *Provided*, That such professional services will be funded by the applicants and selected by

the agencies from procurement schedules of contractors determined qualified to perform said services: *Provided further*, That the Agencies shall establish the scope of work and procedures for such services as well as procedures to assure contractors have no financial or other conflicts of interest in the outcome of the action and the documentation meets the needs of the Agencies: *Provided further*, That nothing herein shall affect the responsibility of the Agencies to comply with the National Environmental Policy Act.

SEC. 725. Notwithstanding any other provision of law, and until receipt of the decennial Census for the year 2010, the Secretary of Agriculture shall consider—

(1) The unincorporated community of Los Osos, in the County of San Luis Obispo, California, to be a rural area for the purposes of eligibility for Rural Utilities Service water and waste disposal loans and grants; and

(2) The unincorporated community of Thermalito in Butte County, California, (including individuals and entities with projects within the community) eligible for loans and grants funded under the housing programs of the Rural Housing Service.

SEC. 726. There is hereby appropriated \$3,000,000 for section 4404 of Public Law 107-171.

SEC. 727. Notwithstanding any other provision of law, there is hereby appropriated:

(1) \$3,000,000 of which \$2,000,000 shall be for a grant to the Wisconsin Department of Agriculture, Trade, and Consumer Protection, and \$1,000,000 shall be for a grant to the Vermont Agency of Agriculture, Foods, and Markets, as authorized by section 6402 of the Farm Security and Rural Investment Act of 2002 (7 U.S.C. 1621 note); and

(2) \$350,000 for a grant to the Wisconsin Department of Agriculture, Trade and Consumer Protection.

SEC. 728. Notwithstanding any other provision of law, the Natural Resources Conservation Service shall provide financial and technical assistance—

(1) through the Watershed and Flood Prevention Operations program for the Pocasset River Floodplain Management Project in the State of Rhode Island;

(2) through the Watershed and Flood Prevention Operations program to carry out the East Locust Creek Watershed Plan Revision in Missouri, including up to 100 percent of the engineering assistance and 75 percent cost share for construction cost of site RW1;

(3) through the Watershed and Flood Prevention Operations program to carry out the Little Otter Creek Watershed project in Missouri. The sponsoring local organization may obtain land rights by perpetual easements;

(4) through the Watershed and Flood Prevention Operations program to carry out the DuPage County Watershed project in the State of Illinois;

(5) through the Watershed and Flood Prevention Operations program to carry out the Dunloup Creek Watershed Project in Fayette and Raleigh Counties, West Virginia;

(6) through the Watershed and Flood Prevention Operations program to carry out the Dry Creek Watershed project in the State of California; and

(7) through the Watershed and Flood Prevention Operations program to carry out the Upper Clark Fork Watershed project in the State of Montana.

SEC. 729. Section 17(r)(5) of the Richard B. Russell National School Lunch Act (42 U.S.C. 1766(r)(5)) is amended—

(1) by striking “ten” and inserting “eleven”;

(2) by striking “eight” and inserting “nine”; and
 (3) by inserting “Wisconsin,” after the first instance of “States shall be”.

SEC. 730. Notwithstanding any other provision of law, for the purposes of a grant under section 412 of the Agricultural Research, Extension, and Education Reform Act of 1998, none of the funds in this or any other Act may be used to prohibit the provision of in-kind support from non-Federal sources under section 412(e)(3) in the form of unrecovered indirect costs not otherwise charged against the grant, consistent with the indirect rate of cost approved for a recipient.

SEC. 731. Except as otherwise specifically provided by law, unobligated balances remaining available at the end of the fiscal year from appropriations made available for salaries and expenses in this Act for the Farm Service Agency and the Rural Development mission area, shall remain available through September 30, 2011, for information technology expenses.

SEC. 732. (a) CHILD NUTRITION PROGRAMS.—Section 9(b) of the Richard B. Russell National School Lunch Act (42 U.S.C. 1758(b)) is amended by adding at the end the following:

“(14) COMBAT PAY.—

“(A) DEFINITION OF COMBAT PAY.—In this paragraph, the term ‘combat pay’ means any additional payment under chapter 5 of title 37, United States Code, or otherwise designated by the Secretary to be appropriate for exclusion under this paragraph, that is received by or from a member of the United States Armed Forces deployed to a designated combat zone, if the additional pay—

“(i) is the result of deployment to or service in a combat zone; and

“(ii) was not received immediately prior to serving in a combat zone.

“(B) EXCLUSION.—Combat pay shall not be considered to be income for the purpose of determining the eligibility for free or reduced price meals of a child who is a member of the household of a member of the United States Armed Forces.”.

(b) SPECIAL SUPPLEMENTAL NUTRITION PROGRAM FOR WOMEN, INFANTS, AND CHILDREN.—Section 17(d)(2) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(d)(2)) is amended—

(1) by redesignating subparagraph (C) as subparagraph (D); and

(2) by inserting after subparagraph (B) the following:

“(C) COMBAT PAY.—For the purpose of determining income eligibility under this section, a State agency shall exclude from income any additional payment under chapter 5 of title 37, United States Code, or otherwise designated by the Secretary to be appropriate for exclusion under this subparagraph, that is received by or from a member of the United States Armed Forces deployed to a designated combat zone, if the additional pay—

“(i) is the result of deployment to or service in a combat zone; and

“(ii) was not received immediately prior to serving in a combat zone.”.

SEC. 733. (a) Section 531(g)(7)(F) of the Federal Crop Insurance Act (7 U.S.C. 1531(g)(7)(F)) is amended—

(1) in the matter preceding clause (i), by inserting “(including multiyear assistance)” after “assistance”; and

(2) in clause (i), by inserting “or multiyear production losses” after “a production loss”.

(b) Section 901(g)(7)(F) of the Trade Act of 1974 (19 U.S.C. 2497(g)(7)(F)) is amended—

(1) in the matter preceding clause (i), by inserting “(including multiyear assistance)” after “assistance”; and

(2) in clause (i), by inserting “or multiyear production losses” after “a production loss”.

SEC. 734. Notwithstanding section 17(g)(5) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(g)(5)), not more than \$15,000,000 of funds provided in this Act may be used for the purpose of evaluating program performance in the Special Supplemental Nutrition Program for Women, Infants and Children.

SEC. 735. Notwithstanding section 17(h)(10)(A) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(h)(10)(A)), \$154,000,000 of funds provided in this Act shall be used for infrastructure, management information systems and breastfeeding peer counseling support: *Provided*, That of the \$154,000,000, not less than \$14,000,000 shall be used for infrastructure, not less than \$60,000,000 shall be used for management information systems, and not less than \$80,000,000 shall be used for breastfeeding peer counselors and other related activities.

SEC. 736. Agencies with jurisdiction for carrying out international food assistance programs under the jurisdiction of this Act, including title II of the Food for Peace Act and the McGovern-Dole International Food for Education Program, shall—

(1) provide to the Committees on Appropriations of the House and the Senate no later than March 1, 2010, the following:

(A) estimates on cost-savings and programmatic efficiencies that would result from increased use of pre-positioning of food aid commodities and processes to ensure such cargoes are appropriately maintained to prevent spoilage;

(B) estimates on cost-savings and programmatic efficiencies that would result from the use of longer-term commodity procurement contracts, the proportional distribution of commodity purchases throughout the fiscal year, longer-term shipping contracts, contracts which include shared-risk principles, and adoptions of other commercially acceptable contracting practices;

(C) estimates on costs of domestic procurement of commodities, domestic inland transportation of food aid commodities, domestic storage (including loading and unloading), foreign storage (including loading and unloading), foreign inland transportation, and ocean freight (including ocean freight as adjusted by the ocean freight differential reimbursement provided by the Secretary of Transportation), and costs relating to allocation and distribution of commodities in recipient countries;

(D) information on the frequency of delays in transporting food aid commodities, the cause or purpose of any delays (including how those delays are tracked, monitored and resolved), missed schedules by carriers and non-carriers (and resulting program costs due to such delays, including impacts to program beneficiaries);

(E) information on the methodologies to improve interagency coordination between host governments, the World Food Program, and non-governmental organization to develop more consistent estimates of food aid needs and the number of intended recipients to appropriately inform the purchases of commodities and in order to appropriately plan for commodity procurement for food aid programs;

(2) provide the matter described under subsection (1) of this section in the form of a consensus report under the signatures of the Secretaries of Agriculture, State, and Transportation; and

(3) estimates and cost savings analysis for this section shall be derived from periods representative of normal program operations.

SEC. 737. There is hereby appropriated \$7,000,000 to carry out section 4202 of Public Law 110-246.

SEC. 738. There is hereby appropriated \$2,600,000 to carry out section 1621 of Public Law 110-246.

SEC. 739. There is hereby appropriated \$4,000,000 to carry out section 1613 of Public Law 110-246.

SEC. 740. There is hereby appropriated \$250,000, to remain available until expended, for a grant to the Kansas Farm Bureau Foundation for work-force development initiatives to address out-migration in rural areas.

SEC. 741. There is hereby appropriated \$800,000 to the Farm Service Agency to carry out a pilot program to demonstrate the use of new technologies that increase the rate of growth of re-forested hardwood trees on private non-industrial forests lands, enrolling lands on the coast of the Gulf of Mexico that were damaged by Hurricane Katrina in 2005.

SEC. 742. Applicants with very low, low, and moderate incomes shall be eligible for the program established in section 791 of Public Law 109-97.

SEC. 743. The Secretary of Agriculture may authorize a State agency to use funds provided in this Act to exceed the maximum amount of reconstituted infant formula specified in 7 C.F.R. 246.10 when issuing infant formula to participants. Such authorizations shall not otherwise impact the eligibility of manufacturers to remain eligible under the Special Supplemental Nutrition Program for Women, Infants and Children authorized by section 17 of the Child Nutrition Act of 1966.

SEC. 744. None of the funds made available by this Act may be used to establish or implement a rule allowing poultry products to be imported into the United States from the People's Republic of China unless the Secretary of Agriculture formally commits in advance to conduct audits of inspection systems, on-site reviews of slaughter and processing facilities, laboratories and other control operations before any Chinese facilities are certified as eligible to ship fully cooked poultry products to the United States, and at least once annually in subsequent years: *Provided*, That the Secretary commits in advance to implement a significantly increased level of port of entry re-inspection: *Provided further*, That the Secretary commits in advance to conduct information sharing with other countries importing poultry products from China that have conducted audits and plant inspections.

This Act may be cited as the “Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2010”.

SA 1909. Mr. McCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) and intended to be proposed to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

SEC. 7____. None of the funds made available under this Act may be used for the Council for Agriculture Science and Technology, Ames, IA.

SA 2052. Mr. McCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7____. None of the funds made available under this Act may be used for ethnobotanics, Frostburg State University, MD.

SA 2053. Mr. McCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7____. None of the funds made available under this Act may be used for farmland preservation, The Ohio State University.

SA 2054. Mr. McCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010,

and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for the Florida Biomass to Biofuels Conversion Program, University of Central Florida.

SA 2055. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for the International Center for Food Technology Development to Expand Markets, Purdue University.

SA 2056. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for the Kansas Biobased Polymer Initiative, Kansas Bioscience Authority.

SA 2057. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for medicinal and bioactive crops, Stephen S. Austin State University.

SA 2058. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for the Mid-

west Agribusiness Trade and Information Center (MATRIC), Iowa State University.

SA 2059. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for Mississippi Valley State University.

SA 2060. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for the New England Center for Invasive Plants, the University of Connecticut, the University of Vermont, and the University of Maine.

SA 2061. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for a PM-10 air quality study, Washington State University.

SA 2062. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for polymer research, Pittsburg State University, Kansas.

SA 2063. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr.

KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for rural systems, Jackson State University, Mississippi.

SA 2064. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for shrimp aquaculture, University of Southern Mississippi.

SA 2065. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for viral hemorrhagic septicemia, Michigan Department of Natural Resources.

SA 2066. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for viral hemorrhagic septicemia, University of Toledo, Ohio.

SA 2067. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010,

and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for water pollutants, Marshall University, West Virginia.

SA 2068. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for advanced genetic technologies, University of Kentucky Research Foundation.

SA 2069. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for advancing biofuel production, Baylor University, Texas.

SA 2070. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for *Aegilops cylindrica*/biomass (jointed goatgrass), Washington State University.

SA 2071. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for agricultural diversification, University of Hawaii.

SA 2072. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for agricultural entrepreneurial alternatives, Pennsylvania State University.

SA 2073. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for agricultural science, The Ohio State University.

SA 2074. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for air quality, Kansas State University; Texas AgriLife Research, College Station, Texas.

SA 2075. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for the Animal Science Food Safety Consortium, University of Arkansas Division of Agriculture, Iowa State University, Kansas State University.

SA 2076. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropria-

tions for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for aquaculture product and marketing development, West Virginia University.

SA 2077. On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for efficient irrigation, New Mexico State University, Texas AgriLife Extension Service and Texas AgriLife Research, College Station, TX.

SA 2100. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for emerald ash borer, the Ohio State University.

SA 2101. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for environmentally safe products, University of Vermont College of Agriculture and Life Sciences.

SA 2102. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the

fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for floriculture, University of Hawaii.

SA 2103. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for the Food and Fuel Initiative, Iowa State University.

SA 2104. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for the Food and Agriculture Policy Institute.

SA 2105. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for forages for advancing livestock production, University of Kentucky.

SA 2106. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for fresh produce food safety, University of California.

SA 2107. Mr. MCCAIN submitted an amendment intended to be proposed to

amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for Genetically Enhanced Plants for Micro-nutrients and Genomics for Southern Crop Stress and Disease, Mississippi State University.

SA 2108. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for grain sorghum, Kansas State University.

SA 2109. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for grass seed cropping systems for sustainable agriculture, Oregon State University, Washington State University.

SA 2110. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for high performance computing, Utah State University.

SA 2111. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the

fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for human nutrition, Pennington Biomedical Research Center, Baton Rouge, LA.

SA 2112. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for infectious disease research, Colorado State University.

SA 2113. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for inland marine aquaculture, Virginia Tech University.

SA 2114. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for the Institute for Food Science and Engineering, University of Arkansas.

SA 2115. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for the inte-

grated economic, environmental, and technical analysis of sustainable biomass energy systems, Purdue University.

SA 2116. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for invasive plant management, Montana State University.

SA 2117. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for Joint U.S. China Biotechnology Research and Extension, Utah State University.

SA 2118. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for the Leopold Center hypoxia project, Iowa State University.

SA 2119. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for livestock and dairy policy, Cornell University, NY.

SA 2120. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr.

KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for maple research at the University of Vermont College of Agriculture and Life Sciences.

SA 2121. SEC. 7 _____. None of the funds made available under this Act may be used for Wailuku-Alenaio, NRCS Hawaii.

SA 2221. Mr. MCCAIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC)

to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used for Appropriate Technology Transfer for Rural Areas, National Center for Appropriate Technology.

SA 2222. Mr. JOHANNIS submitted an amendment intended to be proposed by him to the bill S. 1023, to establish a non-profit corporation to communicate United States entry policies and otherwise promote leisure, business, and scholarly travel to the United States; which was ordered to lie on the table; as follows:

On page 26, after line 20, add the following:

SEC. 9. SENSE OF THE SENATE ON MEDICARE AND MEDICAID SAVINGS AND MEDICAID EXPANSION.

(a) FINDINGS.—The Senate finds that—

(1) the Federal Hospital Insurance Trust Fund established under section 1817 of the Social Security Act (42 U.S.C. 1395i) is projected to be insolvent by 2017; and

(2) the Medicaid program under title XIX of the Social Security Act (42 U.S.C. 1396 et seq.) is currently the largest source of general revenue spending on health care for both the Federal government and the States.

(b) SENSE OF THE SENATE.—It is the sense of the Senate that—

(1) any savings under the Medicare program under title XVIII of the Social Security Act (42 U.S.C. 1395 et seq.) should be invested back into the Medicare program, rather than creating new entitlement programs; and

(2) the Federal Government should not expand the Medicaid program under title XIX of the Social Security Act (42 U.S.C. 1396 et seq.) in a manner that imposes an unfunded mandate on States when State budgets are already heavily burdened by federally imposed requirements that force those budgets into the red.

SA 2223. Mr. SESSIONS proposed an amendment to the bill H.R. 3357, to restore sums to the Highway Trust Fund, and for other purposes; as follows:

Strike all after the enacting clause and replace:

SECTION 1. FUNDING OF THE HIGHWAY TRUST FUND.

Subsection (f) of section 9503 of the Internal Revenue Code of 1986 (relating to determination of trust fund balances after September 30, 1998) is amended—

(1) by striking paragraph (2), and

(2) by adding at the end of the following new paragraph:

“(2) INCREASE IN FUND BALANCE.—Out of money in the Treasury not otherwise appropriated, there is hereby appropriated (without fiscal year limitation) to the Highway Trust Fund \$7,000,000,000.”.

SEC. 2. ADVANCES TO THE UNEMPLOYMENT TRUST FUND AND OTHER FUNDS.

The item relating to “Department of Labor—Employment and Training Administration—Advances to the Unemployment Trust Fund and Other Funds” in title I of division F of the Omnibus Appropriations Act,

2009 (Public Law 111-8; 123 Stat. 754) is amended by striking “to remain available through September 30, 2010” and all that follows (before the heading for the following item) and inserting “such sums as may be necessary”.

SEC. 3. FHA MORTGAGE INSURANCE COMMITMENT AUTHORITY.

The item relating to “Federal Housing Administration—Mutual Mortgage Insurance Program Account” in title II of division I of the Omnibus Appropriations Act, 2009 (Public Law 111-8; 123 Stat. 966) is amended by striking “\$315,000,000,000” and inserting “\$400,000,000,000”.

SEC. 4. GNMA MORTGAGE-BACKED SECURITIES GUARANTEE COMMITMENT AUTHORITY

The item relating to “Government National Mortgage Association—Guarantees of Mortgage-Backed Securities Loan Guarantee Program Account” in title II of division I of the Omnibus Appropriations Act, 2009 (Public Law 111-8; 123 Stat. 967) is amended by striking “\$300,000,000,000” and inserting “\$400,000,000,000”.

SEC. 5. USE OF STIMULUS FUNDS TO OFFSET APPROPRIATION OF FUNDS.

The unobligated balance of each amount appropriated or made available under the American Recovery and Reinvestment Act of 2009 (Public Law 111-5) is rescinded pro rata such that the aggregate amount of such rescissions equals the aggregate amount appropriated under the amendments made by this Act. The Director of the Office of Management and Budget shall report to each congressional committee the amounts so rescinded within the jurisdiction of such committee.

SA 2224. Mr. DODD (for himself and Mr. LIEBERMAN) submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 75, between lines 13 and 14, insert the following:

(3) The unincorporated community of Bolton Lakes Regional Water Pollution Control Authority Area in Vernon and Bolton, Connecticut, to be a rural area for the purposes of eligibility for water or waste disposal grants and direct or guaranteed loans described in section 381E(d)(2) of the Consolidated Farm and Rural Development Act (7 U.S.C. 2009d(d)(2)).

SA 2225. Mrs. MURRAY (for herself and Mr. BAUCUS) submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7. Section 1001(f)(6)(A) of the Food Security Act of 1985 (7 U.S.C. 1308(f)(6)(A)) is

amended by inserting “(other than the conservation reserve program established under subchapter B of chapter 1 of subtitle D of title XII of this Act)” before the period at the end.

SA 2226. Mr. NELSON of Florida (for himself, Mr. REID, and Mr. MARTINEZ) submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 745. No agency or department of the United States may use funds made available under this Act to enforce a travel or conference policy that prohibits an event from being held in a certain location based on a perception that the location is a resort or vacation destination.

SA 2227. Mr. HARKIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7. (a) Section 384E of the Consolidated Farm and Rural Development Act (7 U.S.C. 2009cc-4) is amended by adding at the end the following:

“(e) INVESTMENT LIMITATIONS.—A rural business investment company participating in the program established under this subtitle may not issue debentures guaranteed by the Secretary for any 1 company in an aggregate amount that is more than 10 percent of the sum of—

“(1) the regulatory capital of the rural business investment company; and

“(2) the total amount of financial assistance provided to the rural business investment company by the Secretary through purchase or guarantee of the debentures of the rural business investment company as of the date on which the Secretary granted final approval to the rural business investment company to participate in the program under this subtitle.”.

(b) Section 384E(d) of the Consolidated Farm and Rural Development Act (7 U.S.C. 2009cc-4(d)) is amended by striking “Under” and inserting “Subject to subsection (e), under”.

SA 2228. Mr. NELSON of Florida (for himself, Mr. REID, Mr. MARTINEZ, Mr. AKAKA and Mr. ENSIGN) submitted an amendment intended to be proposed by him to the bill S. 1023, to establish a non-profit corporation to communicate United States entry policies and otherwise promote leisure, business, and scholarly travel to the United States; which was ordered to lie on the table; as follows:

At the end, add the following:

SEC. . LIMITATION ON CERTAIN TRAVEL AND CONFERENCES POLICIES.

No agency or department of the United States may establish a travel or conference policy that takes into account the perception of a location as a resort or vacation destination in determining the location for an event.

SA 2229. Mr. BROWNBAC submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7. (a) The Commissioner of Food and Drugs shall establish within the Food and Drug Administration a review group which shall recommend to the Commissioner of Food and Drugs appropriate preclinical, trial design, and regulatory paradigms and optimal solutions for the prevention, diagnosis, and treatment of rare diseases: *Provided*, That the Commissioner of Food and Drugs shall appoint 8 individuals employed by the Food and Drug Administration to serve on the review group: *Provided further*, That members of the review group shall have specific expertise relating to the development of articles for use in the prevention, diagnosis, or treatment of rare diseases, including specific expertise in developing or carrying out clinical trials.

(b) The Commissioner of Food and Drugs shall establish within the Food and Drug Administration a review group which shall recommend to the Commissioner of Food and Drugs appropriate preclinical, trial design, and regulatory paradigms and optimal solutions for the prevention, diagnosis, and treatment of neglected diseases of the developing world: *Provided*, That the Commissioner of Food and Drugs shall appoint 8 individuals employed by the Food and Drug Administration to serve on the review group: *Provided further*, That members of the review group shall have specific expertise relating to the development of articles for use in the prevention, diagnosis, or treatment of neglected diseases of the developing world, including specific expertise in developing or carrying out clinical trials: *Provided further*, That for the purposes of this section the term “neglected disease of the developing world” means a tropical disease, as defined in section 524(a)(3) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360m(a)(3)).

(c) The Commissioner of Food and Drugs shall—

(1) submit, not later than 1 year after the date of the enactment of this Act, a report to Congress that describes both the findings and recommendations made by the review groups under subsections (a) and (b);

(2) issue, not later than 180 days after submission of the report to Congress under paragraph (1), guidance based on such recommendations for articles for use in the prevention, diagnosis, and treatment of rare diseases and for such uses in neglected diseases of the developing world; and

(3) develop, not later than 180 days after submission of the report to Congress under paragraph (1), internal review standards based on such recommendations for articles

for use in the prevention, diagnosis, and treatment of rare diseases and for such uses in neglected diseases of the developing world.

SA 2230. Mr. KOHL (for Mr. TESTER) proposed an amendment to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; as follows:

On page 17, beginning on line 17, strike “\$14,607,000” and all that follows through “program” on line 18 and insert the following: “\$7,300,000 shall be for a National Animal Identification program and may only be used for ongoing activities and purposes (as of the date of enactment of this Act) relating to proposed rulemaking for that program under subchapter II of chapter 5, and chapter 7, of title 5, United States Code (commonly known as the ‘Administrative Procedure Act’)”.

SA 2231. Mr. ENZI (for himself and Mr. BARRASSO) submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used to relocate the Arthropod-Borne Animal Diseases Research Laboratory from the location of the laboratory as of the date of enactment of this Act.

SA 2232. Mr. ENZI (for himself and Mr. BARRASSO) submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available under this Act may be used to relocate the Arthropod-Borne Animal Diseases Research Laboratory from the location of the laboratory as of the date of enactment of this Act.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ARMED SERVICES

Mr. DURBIN. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet during the session of the

Senate on Thursday, July 30, 2009, at 9:30 a.m.

SUBCOMMITTEE ON THE CONSTITUTION

Mr. DURBIN. Mr. President, I ask unanimous consent that the Com-

mittee on the Judiciary Subcommittee on the Constitution, be authorized to meet during the session of the Senate, on July 30, 2009, at 2 p.m. in SD-226 of the Dirksen Senate Office Building, to conduct an executive business meeting.

The PRESIDING OFFICER. Without objection, it is so ordered.

NOTICE OF HEARING

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. BINGAMAN. Mr. President, I would like to announce for the information of the Senate and the public that a hearing has been scheduled before the Senate Committee on Energy and Natural Resources. The hearing will be held on Thursday, August 6, 2009, at 10 a.m., in room SD-366 of the Dirksen Senate Office Building.

The purpose of the hearing is to consider the nominations of John R. Norris, to be a Member of the Federal Energy Regulatory Commission, Jose Antonio Garcia, to be Director of the Office of Minority Economic Impact, Department of Energy, and Joseph G. Pizarchik, to be Director of the Office of Surface Mining Reclamation and Enforcement, Department of the Interior.

Because of the limited time available for the hearing, witnesses may testify by invitation only. However, those wishing to submit written testimony for the hearing record may do so by sending it to the Committee on Energy and Natural Resources, United States Senate, Washington, DC 20510-6150.

For further information, please contact Sam Fowler or Amanda Kelly.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. BINGAMAN. Mr. President, I would like to announce for the information of the Senate and the public that a business meeting has been scheduled before the Committee on Energy and Natural Resources. The business meeting will be held on Tuesday, August 4, 2009, at 2:45 p.m., in room SD-366 of the Dirksen Senate Office Building.

The purpose of the business meeting is to consider pending nominations and legislation.

For further information, please contact Sam Fowler or Amanda Kelly.

PRIVILEGES OF THE FLOOR

Mr. BROWN. Mr. President, on behalf of Senator BINGAMAN I ask unanimous consent that Paul Stauder, Lindsey Frick, Lauren Harding, Conor Sanchez, Jose Campos, and Laura Stayman be granted the privilege of the floor during the pendency of H.R. 3357 and all amendments thereto.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BROWNBACK. Mr. President, I ask unanimous consent that Landon Fulmer, Andrew Lustig, Rachana

Chhin, Sara Foley, Carrie Pennewell, Luis Chimbo, May Davis, and Hannah Robinow be granted the privilege of the floor for the duration of the debate on the Agriculture appropriations bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that Greg Deschler of my Finance Committee staff be given the privilege of the floor during the remainder of July 2009.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DODD. Mr. President, I ask unanimous consent that Andrea Harris and Andrew Garrett, staff in Senator KENNEDY's office, be granted floor privileges for today's session.

The PRESIDING OFFICER. Without objection, it is so ordered.

ENERGY AND WATER DEVELOPMENT AND RELATED AGENCIES APPROPRIATIONS ACT, 2010

On Wednesday, July 29, 2009, the Senate passed H.R. 3183, as amended, as follows:

H.R. 3183

Resolved, That the bill from the House of Representatives (H.R. 3183) entitled "An Act making appropriations for energy and water development and related agencies for the fiscal year ending September 30, 2010, and for other purposes.", do pass with the following amendment:

Strike out all after the enacting clause and insert:

That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the fiscal year ending September 30, 2010, and for other purposes, namely:

TITLE I

CORPS OF ENGINEERS—CIVIL DEPARTMENT OF THE ARMY CORPS OF ENGINEERS—CIVIL

The following appropriations shall be expended under the direction of the Secretary of the Army and the supervision of the Chief of Engineers for authorized civil functions of the Department of the Army pertaining to rivers and harbors, flood and storm damage reduction, shore protection, aquatic ecosystem restoration, and related efforts.

GENERAL INVESTIGATIONS

For expenses necessary where authorized by law for the collection and study of basic information pertaining to river and harbor, flood and storm damage reduction, shore protection, aquatic ecosystem restoration, and related needs; for surveys and detailed studies, and plans and specifications of proposed river and harbor, flood and storm damage reduction, shore protection, and aquatic ecosystem restoration projects and related efforts prior to construction; for restudy of authorized projects; and for miscellaneous investigations and, when authorized by law, surveys and detailed studies, and plans and specifications of projects prior to construction, \$170,000,000, to remain available until expended.

CONSTRUCTION, GENERAL

For expenses necessary for the construction of river and harbor, flood and storm damage reduction, shore protection, aquatic ecosystem restoration, and related projects authorized by law; for conducting detailed studies, and plans and

specifications, of such projects (including those involving participation by States, local governments, or private groups) authorized or made eligible for selection by law (but such detailed studies, and plans and specifications, shall not constitute a commitment of the Government to construction); \$1,924,000,000, to remain available until expended; of which such sums as are necessary to cover the Federal share of construction costs for facilities under the Dredged Material Disposal Facilities program shall be derived from the Harbor Maintenance Trust Fund as authorized by Public Law 104-303; and of which such sums as are necessary pursuant to Public Law 99-662 shall be derived from the Inland Waterways Trust Fund, to cover one-half of the costs of construction, replacement, rehabilitation, and expansion of inland waterways projects (including only Chickamauga Lock, Tennessee; Kentucky Lock and Dam, Tennessee River, Kentucky; Lock and Dams 2, 3, and 4 Monongahela River, Pennsylvania; Markland Locks and Dam, Kentucky and Indiana; Olmsted Lock and Dam, Illinois and Kentucky; and Emsworth Locks and Dam, Ohio River, Pennsylvania) shall be derived from the Inland Waterways Trust Fund: Provided, That the Chief of Engineers is directed to use \$18,000,000 of the funds appropriated herein for the Dallas Floodway Extension, Texas, project, including the Cadillac Heights feature, generally in accordance with the Chief of Engineers report dated December 7, 1999: Provided further, That the Chief of Engineers is directed to use \$1,500,000 of funds available for the Greenbrier Basin, Marlinton, West Virginia, Local Protection Project to continue engineering and design efforts, execute a project partnership agreement, and initiate construction of the project substantially in accordance with Alternative 1 as described in the Corps of Engineers Final Detailed Project Report and Environmental Impact Statement for Marlinton, West Virginia Local Protection Project dated September 2008: Provided further, That the Federal and non-Federal shares shall be determined in accordance with the ability-to-pay provisions prescribed in section 103(m) of the Water Resources Development Act of 1986, as amended: Provided further, That the Chief of Engineers is directed to use \$2,750,000 of the funds appropriated herein for planning, engineering, design or construction of the Grundy, Buchanan County, and Dickenson County, Virginia, elements of the Levisa and Tug Forks of the Big Sandy River and Upper Cumberland River Project: Provided further, That the Chief of Engineers is directed to use \$4,000,000 of the funds appropriated herein to continue planning, engineering, design or construction of the Lower Mingo County, Upper Mingo County, Wayne County, McDowell County, West Virginia, elements of the Levisa and Tug Forks of the Big Sandy River and Upper Cumberland River Project: Provided further, That none of the funds made available by this Act may be used to carry out any portion of the Delaware River Main Channel Deepening Project identified in the committee report accompanying this Act that is located in the State of Delaware until the date on which the government of the State of Delaware issues an applicable project permit for the Delaware River Main Channel Deepening Project.

MISSISSIPPI RIVER AND TRIBUTARIES

For expenses necessary for flood damage reduction projects and related efforts in the Mississippi River alluvial valley below Cape Girardeau, Missouri, as authorized by law, \$340,000,000, to remain available until expended, of which such sums as are necessary to cover the Federal share of eligible operation and maintenance costs for inland harbors shall be derived from the Harbor Maintenance Trust Fund: Provided, That the Secretary of the

Army, acting through the Chief of Engineers is directed to use \$10,000,000 appropriated herein for construction of water withdrawal features of the Grand Prairie, Arkansas, project.

OPERATION AND MAINTENANCE

For expenses necessary for the operation, maintenance, and care of existing river and harbor, flood and storm damage reduction, aquatic ecosystem restoration, and related projects authorized by law; providing security for infrastructure owned or operated by the Corps, including administrative buildings and laboratories; maintaining harbor channels provided by a State, municipality, or other public agency that serve essential navigation needs of general commerce, where authorized by law; surveying and charting northern and northwestern lakes and connecting waters; clearing and straightening channels; and removing obstructions to navigation, \$2,450,000,000, to remain available until expended, of which such sums as are necessary to cover the Federal share of eligible operation and maintenance costs for coastal harbors and channels, and for inland harbors shall be derived from the Harbor Maintenance Trust Fund; of which such sums as become available from the special account for the Corps established by the Land and Water Conservation Act of 1965, as amended (16 U.S.C. 460l-6a(i)), shall be derived from that account for resource protection, research, interpretation, and maintenance activities related to resource protection in the areas at which outdoor recreation is available; and of which such sums as become available from fees collected under section 217 of the Water Resources Development Act of 1996 (Public Law 104-303), shall be used to cover the cost of operation and maintenance of the dredged material disposal facilities for which such fees have been collected: Provided, That 1 percent of the total amount of funds provided for each of the programs, projects or activities funded under this heading shall not be allocated to a field operating activity prior to the beginning of the fourth quarter of the fiscal year and shall be available for use by the Chief of Engineers to fund such emergency activities as the Chief of Engineers determines to be necessary and appropriate; and that the Chief of Engineers shall allocate during the fourth quarter any remaining funds which have not been used for emergency activities proportionally in accordance with the amounts provided for the programs, projects or activities.

REGULATORY PROGRAM

For expenses necessary for administration of laws pertaining to regulation of navigable waters and wetlands, \$190,000,000, to remain available until expended.

FORMERLY UTILIZED SITES REMEDIAL ACTION PROGRAM

For expenses necessary to clean up contamination from sites in the United States resulting from work performed as part of the Nation's early atomic energy program, \$140,000,000, to remain available until expended.

GENERAL EXPENSES

For expenses necessary for the supervision and general administration of the civil works program in the headquarters of the United States Army Corps of Engineers, and the offices of the Division Engineers; and for the management and operation of the Humphreys Engineer Center Support Activity, the Institute for Water Resources, the United States Army Engineer Research and Development Center, and the United States Army Corps of Engineers Finance Center, \$186,000,000, to remain available until expended, of which not to exceed \$5,000 may be used for official reception and representation purposes and only during the current fiscal year: Provided, That no part of any other appropriation provided in title I of this Act shall be available to

fund the civil works activities of the Office of the Chief of Engineers or the civil works executive direction and management activities of the division offices: Provided further, That any Flood Control and Coastal Emergencies appropriation may be used to fund the supervision and general administration of emergency operations, repairs, and other activities in response to any flood, hurricane, or other natural disaster.

OFFICE OF ASSISTANT SECRETARY OF THE ARMY
(CIVIL WORKS)

For the Office of Assistant Secretary of the Army (Civil Works) as authorized by 10 U.S.C. 3016(b)(3), \$5,000,000, to remain available until expended.

ADMINISTRATIVE PROVISION

The Revolving Fund, Corps of Engineers, shall be available during the current fiscal year for purchase (not to exceed 100 for replacement only) and hire of passenger motor vehicles for the civil works program.

GENERAL PROVISIONS, CORPS OF ENGINEERS—
CIVIL

SEC. 101. (a) None of the funds provided in title I of this Act, or provided by previous appropriations Acts to the agencies or entities funded in title I of this Act that remain available for obligation or expenditure in fiscal year 2010, shall be available for obligation or expenditure through a reprogramming of funds that:

(1) creates or initiates a new program, project, or activity;

(2) eliminates a program, project, or activity;

(3) increases funds or personnel for any program, project, or activity for which funds have been denied or restricted by this Act, unless prior approval is received from the House and Senate Committees on Appropriations;

(4) proposes to use funds directed for a specific activity for a different purpose, unless prior approval is received from the House and Senate Committees on Appropriations;

(5) augments or reduces existing programs, projects or activities in excess of the amounts contained in subsections 6 through 10, unless prior approval is received from the House and Senate Committees on Appropriations;

(6) INVESTIGATIONS.—For a base level over \$100,000, reprogramming of 25 percent of the base amount up to a limit of \$150,000 per project, study or activity is allowed: Provided, That for a base level less than \$100,000, the reprogramming limit is \$25,000: Provided further, That up to \$25,000 may be reprogrammed into any continuing study or activity that did not receive an appropriation for existing obligations and concomitant administrative expenses;

(7) CONSTRUCTION.—For a base level over \$2,000,000, reprogramming of 15 percent of the base amount up to a limit of \$3,000,000 per project, study or activity is allowed: Provided, That for a base level less than \$2,000,000, the reprogramming limit is \$300,000: Provided further, That up to \$3,000,000 may be reprogrammed for settled contractor claims, changed conditions, or real estate deficiency judgments: Provided further, That up to \$300,000 may be reprogrammed into any continuing study or activity that did not receive an appropriation for existing obligations and concomitant administrative expenses;

(8) OPERATION AND MAINTENANCE.—Unlimited reprogramming authority is granted in order for the Corps to be able to respond to emergencies: Provided, That the Chief of Engineers must notify the House and Senate Committees on Appropriations of these emergency actions as soon thereafter as practicable: Provided further, That for a base level over \$1,000,000, reprogramming of 15 percent of the base amount a limit of \$5,000,000 per project, study or activity is allowed: Provided further, That for a base level less than \$1,000,000, the reprogramming limit is

\$150,000: Provided further, That \$150,000 may be reprogrammed into any continuing study or activity that did not receive an appropriation;

(9) MISSISSIPPI RIVER AND TRIBUTARIES.—The same reprogramming guidelines for the Investigations, Construction, and Operation and Maintenance portions of the Mississippi River and Tributaries Account as listed above; and

(10) FORMERLY UTILIZED SITES REMEDIAL ACTION PROGRAM.—Reprogramming of up to 15 percent of the base of the receiving project is permitted.

(b) CONTINUING AUTHORITIES PROGRAM.—Subsection (a)(1) shall not apply to any project or activity funded under the continuing authorities program.

(c) Not later than 60 days after the date of enactment of this Act, the Corps of Engineers shall submit a report to the House and Senate Committees on Appropriations to establish the baseline for application of reprogramming and transfer authorities for the current fiscal year: Provided, That the report shall include:

(1) A table for each appropriation with a separate column to display the President's budget request, adjustments made by Congress, adjustments due to enacted rescissions, if appropriate, and the fiscal year enacted level;

(2) A delineation in the table for each appropriation both by object class and program, project and activity as detailed in the budget appendix for the respective appropriations; and

(3) An identification of items of special congressional interest.

SEC. 102. None of the funds in this Act, or previous Acts, making funds available for Energy and Water Development, shall be used to implement any pending or future competitive sourcing actions under OMB Circular A-76 or High Performing Organizations for the U.S. Army Corps of Engineers.

SEC. 103. Within 90 days of the date of the Chief of Engineers Report on a water resource matter, the Assistant Secretary of the Army (Civil Works) shall submit the report to the appropriate authorizing and appropriating committees of the Congress.

WATER REALLOCATION, LAKE CUMBERLAND,
KENTUCKY

SEC. 104. (a) IN GENERAL.—Subject to subsection (b), none of the funds made available by this Act may be used to carry out any water reallocation project or component under the Wolf Creek Project, Lake Cumberland, Kentucky, authorized under the Act of June 28, 1938 (52 Stat. 1215, ch. 795) and the Act of July 24, 1946 (60 Stat. 636, ch. 595).

(b) EXISTING REALLOCATIONS.—Subsection (a) shall not apply to any water reallocation for Lake Cumberland, Kentucky, that is carried out subject to an agreement or payment schedule in effect on the date of enactment of this Act.

SEC. 105. None of the funds in this Act, or previous Acts, making funds available for Energy and Water Development shall be used to award any continuing contract that commits additional funding from the Inland Waterway Trust Fund unless or until such time that a permanent solution long-term mechanism to enhance revenues in the fund is enacted.

SEC. 106. Section 592(g) of Public Law 106-53 (113 Stat. 380), as amended by section 120 of Public Law 108-137 (117 Stat. 1837) and section 5097 of Public Law 110-114 (121 Stat. 1233), is further amended by striking “\$110,000,000” and inserting “\$200,000,000” in lieu thereof.

SEC. 107. The project for flood control, Big Sioux River and Skunk Creek, Sioux Falls, South Dakota authorized by section 101(a)(28) of the Water Resources Development Act of 1996 (Public Law 104-303; 110 Stat. 3666), is modified to authorize the Secretary to construct the project at an estimated total cost of \$53,500,000, with an estimated Federal cost of \$37,700,000

and an estimated non-Federal cost of \$15,800,000.

SEC. 108. Section 595(h) of Public Law 106-53 (113 Stat. 384), as amended by section 5067 of Public Law 110-114 (121 Stat. 1219), is further amended by—

(1) striking the phrase “\$25,000,000 for each of Montana and New Mexico” and inserting the following language in lieu thereof: “\$75,000,000 for Montana, \$25,000,000 for New Mexico”; and

(2) striking “\$50,000,000” and inserting “\$100,000,000” in lieu thereof.

SEC. 109. The project for flood damage reduction, Des Moines and Raccoon Rivers, Des Moines Iowa, authorized by section 1001(21) of the Water Resources Development Act of 2007 (121 Stat. 1053), is modified to authorize the Secretary to construct the project at a total cost of \$16,500,000 with an estimated Federal cost of \$10,725,000 and an estimated non-Federal cost of \$5,775,000.

SEC. 110. The project for flood damage reduction, Breckenridge, Minnesota, authorized by section 320 of the Water Resources Development Act of 2000 (Public Law 106-541; 114 Stat. 2605), is modified to authorize the Secretary to construct the project at a total cost of \$39,360,000 with an estimated Federal cost of \$25,000,000 and an estimated non-Federal cost of \$14,360,000.

SEC. 111. Section 122 of title I of division D of the Consolidated Appropriations Resolution, 2003 (Public Law 108-7; 117 Stat. 141) is amended by striking “\$10,000,000” and inserting “\$27,000,000” in lieu thereof.

SEC. 112. The Secretary of the Army is authorized to carry out structural and non-structural projects for storm damage prevention and reduction, coastal erosion, and ice and glacial damage in Alaska, including relocation of affected communities and construction of replacement facilities: Provided, That the non-Federal share of any project carried out pursuant to this section shall be no more than 35 percent of the total cost of the project and shall be subject to the ability of the non-Federal interest to pay, as determined in accordance with 33 U.S.C. 2213(m).

SEC. 113. Section 3111(1) of the Water Resources Development Act, 2007 (Public Law 110-114; 121 Stat. 1041) is amended by inserting after the word “before”, the following: “, on and after”.

SEC. 114. The flood control project for West Sacramento, California, authorized by section 101(4), Water Resources Development Act, 1992, Public Law 102-580; Energy and Water Development Appropriations Act, 1999, Public Law 105-245, is modified to authorize the Secretary of Army, acting through the Chief of Engineers, to construct the project at a total cost of \$53,040,000 with an estimated first Federal cost of \$38,355,000 and an estimated non-Federal first cost of \$14,685,000.

(RESCISSION)

SEC. 115. The amount of \$2,100,000 made available in division C, of Public Law 111-8, under the heading “Mississippi River and Tributaries” for site restoration of the St. Johns Bayou-New Madrid Floodway, Missouri, project less any funds needed for contract termination, are hereby rescinded and \$2,100,000 is appropriated under the heading “Mississippi River and Tributaries” for the Mississippi Channel Improvement, Arkansas, Illinois, Kentucky, Louisiana, Mississippi, Missouri, and Tennessee construction project.

(RESCISSION)

SEC. 116. The amount of \$1,800,000 made available in division C, of Public Law 111-8, under the heading “Construction, General” for site restoration of the St. Johns Bayou-New Madrid Floodway, Missouri, project less any funds

needed for contract termination, and are hereby rescinded and \$1,800,000 is appropriated under the heading "Construction, General" for section 206 (Public Law 104-303), Aquatic Ecosystem Restoration, as amended.

PROJECT FOR PERMANENT PUMPS AND CLOSURE STRUCTURES, LAKE PONTCHARTRAIN, LOUISIANA

SEC. 117. (a) DEFINITIONS.—In this section:

(1) **PROJECT.**—The term "project" means the project for permanent pumps and closure structures at or near the lakefront at Lake Pontchartrain and modifications to the 17th Street, Orleans Avenue, and London Avenue canals in and near the city of New Orleans that is—

(A) authorized by the matter under the heading "GENERAL PROJECTS" in section 204 of the Flood Control Act of 1965 (Public Law 89-298; 79 Stat. 1077); and

(B) modified by—

(i) the matter under the heading "FLOOD CONTROL AND COASTAL EMERGENCIES (INCLUDING RESCISSION OF FUNDS)" under the heading "CORPS OF ENGINEERS—CIVIL" under the heading "DEPARTMENT OF THE ARMY" under the heading "DEPARTMENT OF DEFENSE—CIVIL" of chapter 3 of title II of the Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery, 2006 (Public Law 109-234; 120 Stat. 454);

(ii) section 7012(a)(2) of the Water Resources Development Act of 2007 (Public Law 110-114; 121 Stat. 1279); and

(iii) the matter under the heading "FLOOD CONTROL AND COASTAL EMERGENCIES" under the heading "CORPS OF ENGINEERS—CIVIL" under the heading "DEPARTMENT OF THE ARMY" under the heading "DEPARTMENT OF DEFENSE—CIVIL" of chapter 3 of title III of the Supplemental Appropriations Act, 2008 (Public Law 110-252; 122 Stat. 2349).

(2) **PUMPING STATION REPORT.**—The term "pumping station report" means the report—

(A) prepared by the Secretary that contains the results of the investigation required under section 4303 of the U.S. Troop Readiness, Veterans' Care, Katrina Recovery, and Iraq Accountability Appropriations Act, 2007 (Public Law 110-28; 121 Stat. 154); and

(B) dated August 30, 2007.

(3) **SECRETARY.**—The term "Secretary" means the Secretary of the Army, acting through the Chief of Engineers.

(b) **STUDY.**—

(1) **IN GENERAL.**—In implementing the project, not later than 1 year after the date of enactment of this Act, the Secretary shall complete a study of the residual risks associated with the options identified as "Option 1", "Option 2", and "Option 2a", as described in the pumping station report.

(2) **REQUIREMENTS.**—In carrying out the study under paragraph (1), the Secretary shall identify which option described in that paragraph—

(A) is most technically advantageous;

(B) is most effective from an operational perspective in providing the greatest long-term reliability in reducing the risk of flooding to the New Orleans area;

(C) is most advantageous considering the engineering challenges and construction complexities of each option; and

(D) is most cost-effective.

(3) **INDEPENDENT EXTERNAL PEER REVIEW.**—

(A) **DUTY OF SECRETARY.**—In accordance with Section 2034 of the Water Resource Development Act of 2007, the Chief shall carry out an independent external peer review of—

(i) the results of the study under paragraph (1); and

(ii) each cost estimate completed for each option described in paragraph (1).

(B) **REPORT.**—

(i) **IN GENERAL.**—Not later than 90 days after the date of completion of the independent exter-

nal peer review under subparagraph (A), in accordance with clause (ii), the Secretary shall submit a report to—

(I) the Committee on Environment and Public Works of the Senate;

(II) the Committee on Appropriations of the Senate;

(III) the Committee on Transportation and Infrastructure of the House of Representatives; and

(IV) the Committee on Appropriations of the House of Representatives.

(ii) **CONTENTS.**—The report described in clause (i) shall contain—

(I) the results of the study described in paragraph (1);

(II) a description of the findings of the independent external peer review carried out under subparagraph (A); and

(III) a written response for any recommendations adopted or not adopted from the peer review.

(4) **SUSPENSION OF CERTAIN ACTIVITIES.**—The Secretary shall suspend each activity of the Secretary that would result in the design and construction of any pumping station covered by the pumping station report unless the activity is consistent with each option described in paragraph (1).

(5) **FEASIBILITY REPORT.**—Within 18 months of enactment of this Act, the Secretary shall submit to the Committee on Environment and Public Works of the Senate and the Committee on Transportation and Infrastructure of the House of Representatives a report that contains a feasibility level of analysis (including a cost estimate) for the project, as modified under this subsection.

(6) **FUNDING.**—In carrying out this subsection, the Secretary shall use amounts made available to modify the 17th Street, Orleans Avenue, and London Avenue drainage canals and install pumps and closure structures at or near the lakefront in the first proviso in the matter under the heading "FLOOD CONTROL AND COASTAL EMERGENCIES (INCLUDING RESCISSION OF FUNDS)" under the heading "CORPS OF ENGINEERS—CIVIL" under the heading "DEPARTMENT OF THE ARMY" under the heading "DEPARTMENT OF DEFENSE—CIVIL" of chapter 3 of title II of the Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Hurricane Recovery, 2006 (Public Law 109-234; 120 Stat. 454).

TEN MILE CREEK WATER PRESERVE AREA

SEC. 118. Section 528(b)(3)(C)(ii) of the Water Resources Development Act of 1996 (110 Stat. 3769; 121 Stat. 1270) is amended—

(1) in subclause (I), by striking "subclause (II)" and inserting "subclauses (II) and (III)"; and

(2) by adding at the end the following:

"(III) **TEN MILE CREEK WATER PRESERVE AREA.**—The Federal share of the cost of the Ten Mile Creek Water Preserve Area may exceed \$25,000,000 by an amount equal to not more than \$3,500,000, which shall be used to pay the Federal share of the cost of—

"(aa) the completion of a post authorization change report; and

"(bb) the maintenance of the Ten Mile Creek Water Preserve Area in caretaker status through fiscal year 2013."

SEC. 119. As soon as practicable after the date of enactment of this Act, from funds made available before the date of enactment of this Act for the Tampa Harbor Big Bend Channel project, the Secretary of the Army may reimburse the non-Federal sponsor of the Tampa Harbor Big Bend Channel project for the Federal share of the dredging work carried out for the project.

TITLE II

DEPARTMENT OF THE INTERIOR

CENTRAL UTAH PROJECT

CENTRAL UTAH PROJECT COMPLETION ACCOUNT

For carrying out activities authorized by the Central Utah Project Completion Act, \$40,300,000, to remain available until expended, of which \$1,500,000 shall be deposited into the Utah Reclamation Mitigation and Conservation Account for use by the Utah Reclamation Mitigation and Conservation Commission. In addition, for necessary expenses incurred in carrying out related responsibilities of the Secretary of the Interior, \$1,704,000, to remain available until expended. For fiscal year 2010, the Commission may use an amount not to exceed \$1,500,000 for administrative expenses.

BUREAU OF RECLAMATION

The following appropriations shall be expended to execute authorized functions of the Bureau of Reclamation:

WATER AND RELATED RESOURCES

(INCLUDING TRANSFERS OF FUNDS)

For management, development, and restoration of water and related natural resources and for related activities, including the operation, maintenance, and rehabilitation of reclamation and other facilities, participation in fulfilling related Federal responsibilities to Native Americans, and related grants to, and cooperative and other agreements with, State and local governments, federally recognized Indian tribes, and others, \$993,125,000, to remain available until expended, of which \$53,240,000 shall be available for transfer to the Upper Colorado River Basin Fund and \$17,936,000 shall be available for transfer to the Lower Colorado River Basin Development Fund; of which such amounts as may be necessary may be advanced to the Colorado River Dam Fund; of which not more than \$500,000 is for high priority projects which shall be carried out by the Youth Conservation Corps, as authorized by 16 U.S.C. 1706: Provided, That such transfers may be increased or decreased within the overall appropriation under this heading: Provided further, That of the total appropriated, the amount for program activities that can be financed by the Reclamation Fund or the Bureau of Reclamation special fee account established by 16 U.S.C. 460l-6a(i) shall be derived from that Fund or account: Provided further, That funds contributed under 43 U.S.C. 395 are available until expended for the purposes for which contributed: Provided further, That funds advanced under 43 U.S.C. 397a shall be credited to this account and are available until expended for the same purposes as the sums appropriated under this heading: Provided further, That funds available for expenditure for the Departmental Irrigation Drainage Program may be expended by the Bureau of Reclamation for site remediation on a nonreimbursable basis.

CENTRAL VALLEY PROJECT RESTORATION FUND

For carrying out the programs, projects, plans, habitat restoration, improvement, and acquisition provisions of the Central Valley Project Improvement Act, \$35,358,000, to be derived from such sums as may be collected in the Central Valley Project Restoration Fund pursuant to sections 3407(d), 3404(c)(3), and 3405(f) of Public Law 102-575, to remain available until expended: Provided, That the Bureau of Reclamation is directed to assess and collect the full amount of the additional mitigation and restoration payments authorized by section 3407(d) of Public Law 102-575: Provided further, That none of the funds made available under this heading may be used for the acquisition or leasing of water for in-stream purposes if the water is already committed to in-stream purposes by a court adopted decree or order.

CALIFORNIA BAY-DELTA RESTORATION
(INCLUDING TRANSFERS OF FUNDS)

For carrying out activities authorized by the Water Supply, Reliability, and Environmental Improvement Act, consistent with plans to be approved by the Secretary of the Interior, \$41,000,000, to remain available until expended, of which such amounts as may be necessary to carry out such activities may be transferred to appropriate accounts of other participating Federal agencies to carry out authorized purposes: Provided, That funds appropriated herein may be used for the Federal share of the costs of CALFED Program management: Provided further, That the use of any funds provided to the California Bay-Delta Authority for program-wide management and oversight activities shall be subject to the approval of the Secretary of the Interior: Provided further, That CALFED implementation shall be carried out in a balanced manner with clear performance measures demonstrating concurrent progress in achieving the goals and objectives of the Program.

POLICY AND ADMINISTRATION

For necessary expenses of policy, administration, and related functions in the Office of the Commissioner, the Denver office, and offices in the five regions of the Bureau of Reclamation, to remain available until expended, \$61,200,000, to be derived from the Reclamation Fund and be nonreimbursable as provided in 43 U.S.C. 377: Provided, That no part of any other appropriation in this Act shall be available for activities or functions budgeted as policy and administration expenses.

ADMINISTRATIVE PROVISION

Appropriations for the Bureau of Reclamation shall be available for purchase of not to exceed seven passenger motor vehicles, which are for replacement only.

GENERAL PROVISIONS, DEPARTMENT OF THE
INTERIOR

SEC. 201. (a) None of the funds provided in title II of this Act for Water and Related Resources, or provided by previous appropriations Acts to the agencies or entities funded in title II of this Act for Water and Related Resources that remain available for obligation or expenditure in fiscal year 2010, shall be available for obligation or expenditure through a reprogramming of funds that—

- (1) initiates or creates a new program, project, or activity;
- (2) eliminates a program, project, or activity;
- (3) increases funds for any program, project, or activity for which funds have been denied or restricted by this Act, unless prior approval is received from the Committees on Appropriations of the House of Representatives and the Senate;
- (4) restarts or resumes any program, project or activity for which funds are not provided in this Act, unless prior approval is received from the Committees on Appropriations of the House of Representatives and the Senate;
- (5) transfers funds in excess of the following limits, unless prior approval is received from the Committees on Appropriations of the House of Representatives and the Senate:

(A) 15 percent for any program, project or activity for which \$2,000,000 or more is available at the beginning of the fiscal year; or

(B) \$300,000 for any program, project or activity for which less than \$2,000,000 is available at the beginning of the fiscal year;

(6) transfers more than \$500,000 from either the Facilities Operation, Maintenance, and Rehabilitation category or the Resources Management and Development category to any program, project, or activity in the other category, unless prior approval is received from the Committees on Appropriations of the House of Representatives and the Senate; or

(7) transfers, where necessary to discharge legal obligations of the Bureau of Reclamation, more than \$5,000,000 to provide adequate funds for settled contractor claims, increased contractor earnings due to accelerated rates of operations, and real estate deficiency judgments, unless prior approval is received from the Committees on Appropriations of the House of Representatives and the Senate.

(b) Subsection (a)(5) shall not apply to any transfer of funds within the Facilities Operation, Maintenance, and Rehabilitation category.

(c) For purposes of this section, the term “transfer” means any movement of funds into or out of a program, project, or activity.

(d) The Bureau of Reclamation shall submit reports on a quarterly basis to the Committees on Appropriations of the House of Representatives and the Senate detailing all the funds reprogrammed between programs, projects, activities, or categories of funding. The first quarterly report shall be submitted not later than 60 days after the date of enactment of this Act.

SEC. 202. (a) None of the funds appropriated or otherwise made available by this Act may be used to determine the final point of discharge for the interceptor drain for the San Luis Unit until development by the Secretary of the Interior and the State of California of a plan, which shall conform to the water quality standards of the State of California as approved by the Administrator of the Environmental Protection Agency, to minimize any detrimental effect of the San Luis drainage waters.

(b) The costs of the Kesterson Reservoir Cleanup Program and the costs of the San Joaquin Valley Drainage Program shall be classified by the Secretary of the Interior as reimbursable or nonreimbursable and collected until fully repaid pursuant to the “Cleanup Program-Alternative Repayment Plan” and the “SJVDP-Alternative Repayment Plan” described in the report entitled “Repayment Report, Kesterson Reservoir Cleanup Program and San Joaquin Valley Drainage Program, February 1995”, prepared by the Department of the Interior, Bureau of Reclamation. Any future obligations of funds by the United States relating to, or providing for, drainage service or drainage studies for the San Luis Unit shall be fully reimbursable by San Luis Unit beneficiaries of such service or studies pursuant to Federal reclamation law.

SEC. 203. None of the funds appropriated or otherwise made available by this or any other Act may be used to pay the salaries and expenses of personnel to purchase or lease water in the Middle Rio Grande or the Carlsbad Projects in New Mexico unless said purchase or lease is in compliance with the purchase requirements of section 202 of Public Law 106-60.

SEC. 204. Funds under this title for Drought Emergency Assistance shall be made available primarily for leasing of water for specified drought related purposes from willing lessors, in compliance with existing State laws and administered under State water priority allocation.

SEC. 205. Section 9 of the Fort Peck Reservation Rural Water System Act of 2000 (Public Law 106-382; 114 Stat. 1457) is amended by striking “over a period of 10 fiscal years” each place it appears in subsections (a)(1) and (b) and inserting “through fiscal year 2015”.

SEC. 206. Section 208(a) of the Energy and Water Development Appropriations Act, 2006 (Public Law 109-103; 119 Stat. 2268), is amended—

(1) in paragraph (1)—

(A) by redesignating clauses (i) through (iv) of subparagraph (B) as subclauses (I) through (IV), respectively, and indenting the subclauses appropriately;

(B) by redesignating subparagraphs (A) and (B) as clauses (i) and (ii), respectively, and indenting the clauses appropriately;

(C) by striking “(a)(1) Using” and inserting the following:

“(a) ACTION BY SECRETARY.—

“(1) PROVISION OF FUNDS.—

“(A) IN GENERAL.—Using”;

(D) in subparagraph (A) (as so redesignated)—

(i) in the matter preceding clause (i) (as so redesignated), by inserting “or the National Fish and Wildlife Foundation” after “University of Nevada”;

(ii) in clause (i) (as so redesignated), by striking “, Nevada; and” and inserting a semicolon;

(iii) in clause (ii)(IV) (as so redesignated), by striking the period at the end and inserting “; and”;

(iv) by adding at the end the following:

“(iii) to design and implement conservation and stewardship measures to address impacts from activities carried out—

“(I) under clause (i); and

“(II) in conjunction with willing landowners.”;

(E) by adding at the end the following:

“(B) NATIONAL FISH AND WILDLIFE FOUNDATION.—

“(i) DATE OF PROVISION.—The Secretary shall provide funds to the National Fish and Wildlife Foundation pursuant to subparagraph (A) in an advance payment of the available amount—

“(I) on the date of enactment of the Energy and Water Development and Related Agencies Appropriations Act, 2010; or

“(II) as soon as practicable after that date of enactment.

“(ii) REQUIREMENTS.—

“(I) IN GENERAL.—Except as provided in subparagraph (II), the funds provided under clause (i) shall be subject to the National Fish and Wildlife Foundation Establishment Act (16 U.S.C. 3701 et seq.), in accordance with section 10(b)(1) of that Act (16 U.S.C. 3709(b)(1)).

“(II) EXCEPTIONS.—Sections 4(e) and 10(b)(2) of the National Fish and Wildlife Foundation Establishment Act (16 U.S.C. 3703(e), 3709(b)(2)), and the provision of subsection (c)(2) of section 4 of that Act (16 U.S.C. 3703) relating to subsection (e) of that section, shall not apply to the funds provided under clause (i).”;

(2) in paragraph (2)—

(A) in the matter preceding subparagraph (A), by striking “paragraph (1)(A)” and all that follows through “beneficial to—” and inserting “paragraph (1)(A)(i), the University of Nevada or the National Fish and Wildlife Foundation shall make acquisitions that the University or the Foundation determines to be the most beneficial to—”;

(B) in subparagraph (A), by striking “paragraph (1)(B)” and inserting “paragraph (1)(A)(ii)”.

SEC. 207. Section 2507(b) of the Farm Security and Rural Investment Act of 2002 (43 U.S.C. 2211 note; Public Law 107-171) is amended—

(1) in paragraph (1), by striking “or” at the end;

(2) in paragraph (2), by striking the period at the end and inserting “; and”;

(3) by adding at the end the following:

“(3) for efforts consistent with researching, supporting, and conserving fish, wildlife, plant, and habitat resources in the Walker River Basin.”.

SEC. 208. (a) Of the amounts made available under section 2507 of the Farm Security and Rural Investment Act of 2002 (43 U.S.C. 2211 note; Public Law 107-171), the Secretary of the Interior, acting through the Commissioner of Reclamation, shall—

(1) provide, in accordance with section 208(a)(1)(A)(i) of the Energy and Water Development Appropriations Act, 2006 (Public Law 109-103; 119 Stat. 2268), and subject to subsection (b), \$66,200,000 to establish the Walker

Basin Restoration Program for the primary purpose of restoring and maintaining Walker Lake, a natural desert terminal lake in the State of Nevada, consistent with protection of the ecological health of the Walker River and the riparian and watershed resources of the West, East, and Main Walker Rivers; and

(2) allocate—

(A) acting through a nonprofit conservation organization that is acting in consultation with the Truckee Meadows Water Authority, \$2,000,000, to remain available until expended, for—

(i) the acquisition of land surrounding Independence Lake; and

(ii) protection of the native fishery and water quality of Independence Lake, as determined by the nonprofit conservation organization;

(B) \$5,000,000 to provide grants of equal amounts to the State of Nevada, the State of California, the Truckee Meadows Water Authority, the Pyramid Lake Paiute Tribe, and the Federal Watermaster of the Truckee River to implement the Truckee-Carson-Pyramid Lake Water Rights Settlement Act (Public Law 101-618; 104 Stat. 3289);

(C) \$1,500,000, to be divided equally by the city of Fernley, Nevada, and the Pyramid Lake Paiute Tribe, for joint planning and development activities for water, wastewater, and sewer facilities; and

(D) \$1,000,000 to the United States Geological Survey to design and implement, in consultation and cooperation with other Federal departments and agencies, State and tribal governments, and other water management and conservation organizations, a water monitoring program for the Walker River Basin.

(b)(1) The amount made available under subsection (a)(1) shall be—

(A) used, consistent with the primary purpose set forth in subsection (a)(1), to support efforts to preserve Walker Lake while protecting agricultural, environmental, and habitat interests in the Walker River Basin; and

(B) allocated as follows:

(i) \$25,000,000 to the Walker River Irrigation District, acting in accordance with an agreement between that District and the National Fish and Wildlife Foundation—

(I) to administer and manage a 3-year water leasing demonstration program in the Walker River Basin to increase Walker Lake inflows; and

(II) for use in obtaining information regarding the establishment, budget, and scope of a longer-term leasing program.

(ii) \$25,000,000 to advance the acquisition of water and related interests from willing sellers authorized by section 208(a)(1)(A)(i) of the Energy and Water Development Appropriations Act, 2006 (Public Law 109-103; 119 Stat. 2268).

(iii) \$1,000,000 for activities relating to the exercise of acquired option agreements and implementation of the water leasing demonstration program, including but not limited to the pursuit of change applications, approvals, and agreements pertaining to the exercise of water rights and leases acquired under the program.

(iv) \$10,000,000 for associated conservation and stewardship activities, including water conservation and management, watershed planning, land stewardship, habitat restoration, and the establishment of a local, nonprofit entity to hold and exercise water rights acquired by, and to achieve the purposes of, the Walker Basin Restoration Program.

(v) \$5,000,000 to the University of Nevada, Reno, and the Desert Research Institute—

(I) for additional research to supplement the water rights research conducted under section 208(a)(1)(A)(ii) of the Energy and Water Development Appropriations Act, 2006 (Public Law 109-103; 119 Stat. 2268);

(II) to conduct an annual evaluation of the results of the activities carried out under clauses (i) and (ii); and

(III) to support and provide information to the programs described in this subparagraph and related acquisition and stewardship initiatives to preserve Walker Lake and protect agricultural, environmental, and habitat interests in the Walker River Basin.

(vi) \$200,000 to support alternative crops and alternative agricultural cooperatives programs in Lyon County, Nevada, that promote water conservation in the Walker River Basin.

(2)(A) The amount made available under subsection (a)(1) shall be provided to the National Fish and Wildlife Foundation—

(i) in an advance payment of the entire amount—

(I) on the date of enactment of this Act; or

(II) as soon as practicable after that date of enactment; and

(ii) except as provided in subparagraph (B), subject to the National Fish and Wildlife Foundation Establishment Act (16 U.S.C. 3701 et seq.), in accordance with section 10(b)(1) of that Act (16 U.S.C. 3709(b)(1)).

(B) Sections 4(e) and 10(b)(2) of the National Fish and Wildlife Foundation Establishment Act (16 U.S.C. 3703(e), 3709(b)(2)), and the provision of subsection (c)(2) of section 4 of that Act (16 U.S.C. 3703) relating to subsection (e) of that section, shall not apply to the amount made available under subsection (a)(1).

SEC. 209. Notwithstanding the provisions of section 11(c) of Public Law 89-108, as amended by section 9 of Public Law 99-294, the Commissioner is directed to modify the April 9, 2002, Grant Agreement Between Bureau of Reclamation and North Dakota Natural Resources Trust to provide funding for the Trust to continue its investment program/Agreement No. 02FG601633 to authorize the North Dakota Natural Resources Trust Board of Directors to expend all or any portion of the funding allocation received pursuant to section 11(a)(2)(B) of the Dakota Water Resources Act of 2000 for the purpose of operations of the Natural Resource Trust whether such amounts are principal or received as investment income: Provided, That operational expenses that may be funded from the principal allocation shall not exceed 105 percent of the previous fiscal year's operating costs: Provided further, That the Commissioner of Reclamation is authorized to include in such modified agreement with the Trust authorized under this section appropriate provisions regarding the repayment of any funds that constitute principal from the Trust Funds.

SEC. 210. Title I of Public Law 108-361 is amended by striking “2010” wherever it appears and inserting “2015” in lieu thereof.

SEC. 211. (a) Section 3405(a)(1)(M) of Public Law 102-575 (106 Stat. 4709) is amended by striking “countries” and inserting “counties”.

(b) A transfer of water between a Friant Division contractor and a south-of-Delta CVP agricultural water service contractor, approved during a two-year period beginning on the date of enactment of this Act shall, be deemed to meet the conditions set forth in subparagraphs (A) and (I) of section 3405(a)(1) of Public Law 102-575 (106 Stat. 4709) if the transfer under this clause—

(I) does not interfere with the San Joaquin River Restoration Settlement Act (part I of subtitle A of title X of Public Law 111-11; 123 Stat. 1349) (including the priorities described in section 10004(a)(4)(B) of that Act relating to implementation of paragraph 16 of the Settlement), and the Settlement (as defined in section 10003 of that Act); and

(2) is completed by September 30, 2012.

(c) As soon as practicable after the date of enactment of this Act, the Secretary of the Inte-

rior, acting through the Director of the United States Fish and Wildlife Service, shall revise, finalize, and implement the applicable draft recovery plan for the Giant Garter Snake (*Thamnophis gigas*).

SEC. 212. Section 805(a)(2) of Public Law 106-541 (114 Stat. 2704) is amended by striking “2010” each place it appears and inserting “2013”.

TITLE III

DEPARTMENT OF ENERGY

ENERGY PROGRAMS

ENERGY EFFICIENCY AND RENEWABLE ENERGY

For Department of Energy expenses including the purchase, construction, and acquisition of plant and capital equipment, and other expenses necessary for energy efficiency and renewable energy activities in carrying out the purposes of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), including the acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction, or expansion, \$2,233,967,000, to remain available until expended: Provided, That, of the amount appropriated in this paragraph, \$148,075,000 shall be used for projects specified in the table that appears under the heading “Congressionally Directed Energy Efficiency and Renewable Energy Projects” in the report of the Committee on Appropriations of the United States Senate to accompany this Act: Provided further, That within existing funds for industrial technologies \$15,000,000 shall be used to make technical assistance grants under subsection (b) of section 399A of the Energy Policy and Conservation Act (42 U.S.C. 6371h-1(b)). Of the \$85,000,000 provided under the wind energy subaccount under the Energy Efficiency & Renewable Energy, up to \$8,000,000 shall be competitively awarded to universities for turbine and equipment purchases for the purposes of studying turbine to turbine wake interaction, wind farm interaction, and wind energy efficiencies, provided that such equipment shall not be used for merchant power production.

ELECTRICITY DELIVERY AND ENERGY RELIABILITY

For Department of Energy expenses including the purchase, construction, and acquisition of plant and capital equipment, and other expenses necessary for electricity delivery and energy reliability activities in carrying out the purposes of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), including the acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction, or expansion, \$179,483,000, to remain available until expended: Provided, That, within the funding available funding the Secretary shall establish an independent national energy sector cyber security organization to institute research, development and deployment priorities, including policies and protocol to ensure the effective deployment of tested and validated technology and software controls to protect the bulk power electric grid and integration of smart grid technology to enhance the security of the electricity grid: Provided further, That within 60 days of enactment, the Secretary shall invite applications from qualified entities for the purpose of forming and governing a national energy sector cyber organization that have the knowledge and capacity to focus cyber security research and development and to identify and disseminate best practices; organize the collection, analysis and dissemination of infrastructure vulnerabilities and threats; work cooperatively with the Department of Energy and other Federal agencies to identify areas where Federal agencies with jurisdiction may best support efforts to enhance security of the bulk power electric grid: Provided further, That, of

the amount appropriated in this paragraph, \$6,475,000 shall be used for projects specified in the table that appears under the heading "Congressionally Directed Electricity Delivery and Energy Reliability Projects" in the report of the Committee on Appropriations of the United States Senate to accompany this Act.

NUCLEAR ENERGY

(INCLUDING TRANSFER OF FUNDS)

For Department of Energy expenses including the purchase, construction, and acquisition of plant and capital equipment, and other expenses necessary for nuclear energy activities in carrying out the purposes of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), including the acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction, or expansion, and the purchase of not to exceed 36 passenger motor vehicles, including one ambulance, all for replacement only, \$761,274,000, to remain available until expended: Provided, That, of the amount appropriated in this paragraph, \$2,000,000 shall be used for projects specified in the table that appears under the heading "Congressionally Directed Nuclear Energy Projects" in the report of the Committee on Appropriations of the United States Senate to accompany this Act.

FOSSIL ENERGY RESEARCH AND DEVELOPMENT

For necessary expenses in carrying out fossil energy research and development activities, under the authority of the Department of Energy Organization Act (Public Law 95-91), including the acquisition of interest, including defensible and equitable interests in any real property or any facility or for plant or facility acquisition or expansion, and for conducting inquiries, technological investigations and research concerning the extraction, processing, use, and disposal of mineral substances without objectionable social and environmental costs (30 U.S.C. 3, 1602, and 1603), \$699,200,000, to remain available until expended: Provided, That for all programs funded under Fossil Energy appropriations in this Act or any other Act, the Secretary may vest fee title or other property interests acquired under projects in any entity, including the United States: Provided further, That, of the amount appropriated in this paragraph, \$27,300,000 shall be used for projects specified in the table that appears under the heading "Congressionally Directed Fossil Energy Projects" in the report of the Committee on Appropriations of the United States Senate to accompany this Act.

NAVAL PETROLEUM AND OIL SHALE RESERVES

For expenses necessary to carry out naval petroleum and oil shale reserve activities, including the hire of passenger motor vehicles, \$23,627,000, to remain available until expended: Provided, That, notwithstanding any other provision of law, unobligated funds remaining from prior years shall be available for all naval petroleum and oil shale reserve activities.

STRATEGIC PETROLEUM RESERVE

For necessary expenses for Strategic Petroleum Reserve facility development and operations and program management activities pursuant to the Energy Policy and Conservation Act of 1975, as amended (42 U.S.C. 6201 et seq.), \$259,073,000, to remain available until expended.

NORTHEAST HOME HEATING OIL RESERVE

For necessary expenses for Northeast Home Heating Oil Reserve storage, operation, and management activities pursuant to the Energy Policy and Conservation Act, \$11,300,000, to remain available until expended.

ENERGY INFORMATION ADMINISTRATION

For necessary expenses in carrying out the activities of the Energy Information Administra-

tion, \$110,595,000, to remain available until expended.

NON-DEFENSE ENVIRONMENTAL CLEANUP

For Department of Energy expenses, including the purchase, construction, and acquisition of plant and capital equipment and other expenses necessary for non-defense environmental clean-up activities in carrying out the purposes of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), including the acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction, or expansion, \$259,829,000, to remain available until expended.

URANIUM ENRICHMENT DECONTAMINATION AND DECOMMISSIONING FUND

For necessary expenses in carrying out uranium enrichment facility decontamination and decommissioning, remedial actions, and other activities of title II of the Atomic Energy Act of 1954, and title X, subtitle A, of the Energy Policy Act of 1992, \$588,322,000, to be derived from the Uranium Enrichment Decontamination and Decommissioning Fund, to remain available until expended.

SCIENCE

For Department of Energy expenses including the purchase, construction and acquisition of plant and capital equipment, and other expenses necessary for science activities in carrying out the purposes of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), including the acquisition or condemnation of any real property or facility or for plant or facility acquisition, construction, or expansion, and purchase of not to exceed 50 passenger motor vehicles for replacement only, including one law enforcement vehicle, two ambulances, and three buses, \$4,898,832,000, to remain available until expended: Provided, That, of the amount appropriated in this paragraph, \$41,150,000 shall be used for projects specified in the table that appears under the heading "Congressionally Directed Science Projects" in the report of the Committee on Appropriations of the United States Senate to accompany this Act.

NUCLEAR WASTE DISPOSAL

For nuclear waste disposal activities to carry out the purposes of the Nuclear Waste Policy Act of 1982, Public Law 97-425, as amended (the "NWPAA"), \$98,400,000, to remain available until expended, and to be derived from the Nuclear Waste Fund: Provided, That of the funds made available in this Act for nuclear waste disposal and defense nuclear waste disposal activities, 2.54 percent shall be provided to the Office of the Attorney General of the State of Nevada solely for expenditures, other than salaries and expenses of State employees, to conduct scientific oversight responsibilities and participate in licensing activities pursuant to the NWPAA: Provided further, That notwithstanding the lack of a written agreement with the State of Nevada under section 117(c) of the NWPAA, 0.51 percent shall be provided to Nye County, Nevada, for on-site oversight activities under section 117(d) of the NWPAA: Provided further, That of the funds made available in this Act for nuclear waste disposal and defense nuclear waste disposal activities, 4.57 percent shall be provided to affected units of local government, as defined in the NWPAA, to conduct appropriate activities and participate in licensing activities under Section 116(c) of the NWPAA: Provided further, That of the amounts provided to affected units of local government, 7.5 percent of the funds provided for the affected units of local government shall be made available to affected units of local government in California with the balance made available to affected units of local government in Nevada for distribution as determined by the Nevada affected units of local government: Pro-

vided further, That of the funds made available in this Act for nuclear waste disposal and defense nuclear waste disposal activities, 0.25 percent shall be provided to the affected Federally-recognized Indian tribes, as defined in the NWPAA, solely for expenditures, other than salaries and expenses of tribal employees, to conduct appropriate activities and participate in licensing activities under section 118(b) of the NWPAA: Provided further, That notwithstanding the provisions of chapters 65 and 75 of title 31, United States Code, the Department shall have no monitoring, auditing or other oversight rights or responsibilities over amounts provided to affected units of local government: Provided further, That the funds for the State of Nevada shall be made available solely to the Office of the Attorney General by direct payment and to units of local government by direct payment: Provided further, That 4.57 percent of the funds made available in this Act for nuclear waste disposal and defense nuclear waste disposal activities shall be provided to Nye County, Nevada, as payment equal to taxes under section 116(c)(3) of the NWPAA: Provided further, That within 90 days of the completion of each Federal fiscal year, the Office of the Attorney General of the State of Nevada, each affected Federally-recognized Indian tribe, and each of the affected units of local government shall provide certification to the Department of Energy that all funds expended from such payments have been expended for activities authorized by the NWPAA and this Act: Provided further, That failure to provide such certification shall cause such entity to be prohibited from any further funding provided for similar activities: Provided further, That none of the funds herein appropriated may be: (1) used directly or indirectly to influence legislative action, except for normal and recognized executive-legislative communications, on any matter pending before Congress or a State legislature or for lobbying activity as provided in 18 U.S.C. 1913; (2) used for litigation expenses; or (3) used to support multi-State efforts or other coalition building activities inconsistent with the restrictions contained in this Act: Provided further, That all proceeds and recoveries realized by the Secretary in carrying out activities authorized by the NWPAA, including but not limited to, any proceeds from the sale of assets, shall be available without further appropriation and shall remain available until expended: Provided further, That no funds provided in this Act or any previous Act may be used to pursue repayment or collection of funds provided in any fiscal year to affected units of local government for oversight activities that had been previously approved by the Department of Energy, or to withhold payment of any such funds.

TITLE 17 INNOVATIVE TECHNOLOGY LOAN GUARANTEE PROGRAM

Such sums as are derived from amounts received from borrowers pursuant to section 1702(b)(2) of the Energy Policy Act of 2005 under this heading in prior Acts, shall be collected in accordance with section 502(7) of the Congressional Budget Act of 1974: Provided, That for necessary administrative expenses to carry out this Loan Guarantee program, \$43,000,000 is appropriated, to remain available until expended: Provided further, That \$43,000,000 of the fees collected pursuant to section 1702(h) of the Energy Policy Act of 2005 shall be credited as offsetting collections to this account to cover administrative expenses and shall remain available until expended, so as to result in a final fiscal year 2010 appropriations from the general fund estimated at not more than \$0: Provided further, That, in administering amounts made available by prior Acts for projects covered by title XVII of the Energy Policy Act of 2005 (42 U.S.C. 16511 et seq.), the Secretary of Energy is required by that title to consider low-risk finance programs

that substantially reduce or eliminate upfront costs for building owners to renovate or retrofit existing buildings to install energy efficiency or renewable energy technologies as eligible for loan guarantees authorized under sections 1703 and 1705 of that Act (42 U.S.C. 16513, 16516).

ADVANCED TECHNOLOGY VEHICLES MANUFACTURING LOAN PROGRAM

For administrative expenses in carrying out the Advanced Technology Vehicles Manufacturing Loan Program, \$20,000,000, to remain available until expended.

DEPARTMENTAL ADMINISTRATION (INCLUDING TRANSFER OF FUNDS)

For salaries and expenses of the Department of Energy necessary for Departmental Administration in carrying out the purposes of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), including the hire of passenger motor vehicles and official reception and representation expenses not to exceed \$293,684,000, to remain available until expended, plus such additional amounts as necessary to cover increases in the estimated amount of cost of work for others notwithstanding the provisions of the Anti-Deficiency Act (31 U.S.C. 1511 et seq.): Provided, That such increases in cost of work are offset by revenue increases of the same or greater amount, to remain available until expended: Provided further, That moneys received by the Department for miscellaneous revenues estimated to total \$119,740,000 in fiscal year 2010 may be retained and used for operating expenses within this account, and may remain available until expended, as authorized by section 201 of Public Law 95–238, notwithstanding the provisions of 31 U.S.C. 3302: Provided further, That the sum herein appropriated shall be reduced by the amount of miscellaneous revenues received during 2010, and any related appropriated receipt account balances remaining from prior years' miscellaneous revenues, so as to result in a final fiscal year 2010 appropriation from the general fund estimated at not more than \$173,944,000.

OFFICE OF THE INSPECTOR GENERAL

For necessary expenses of the Office of the Inspector General in carrying out the provisions of the Inspector General Act of 1978, as amended, \$51,927,000, to remain available until expended.

ATOMIC ENERGY DEFENSE ACTIVITIES NATIONAL NUCLEAR SECURITY ADMINISTRATION WEAPONS ACTIVITIES

For Department of Energy expenses, including the purchase, construction, and acquisition of plant and capital equipment and other incidental expenses necessary for atomic energy defense weapons activities in carrying out the purposes of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), including the acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction, or expansion, the purchase of not to exceed one ambulance; \$6,468,267,000, to remain available until expended.

DEFENSE NUCLEAR NONPROLIFERATION

For Department of Energy expenses, including the purchase, construction, and acquisition of plant and capital equipment and other incidental expenses necessary for defense nuclear nonproliferation activities, in carrying out the purposes of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), including the acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction, or expansion, and the purchase of not to exceed one passenger motor vehicle for replacement only, \$2,136,709,000, to remain available until expended.

NAVAL REACTORS

For Department of Energy expenses necessary for naval reactors activities to carry out the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), including the acquisition (by purchase, condemnation, construction, or otherwise) of real property, plant, and capital equipment, facilities, and facility expansion, \$973,133,000, to remain available until expended.

OFFICE OF THE ADMINISTRATOR

For necessary expenses of the Office of the Administrator in the National Nuclear Security Administration, including official reception and representation expenses not to exceed \$12,000, \$420,754,000, to remain available until expended.

ENVIRONMENTAL AND OTHER DEFENSE ACTIVITIES

DEFENSE ENVIRONMENTAL CLEANUP (INCLUDING TRANSFER OF FUNDS)

For Department of Energy expenses, including the purchase, construction, and acquisition of plant and capital equipment and other expenses necessary for atomic energy defense environmental cleanup activities in carrying out the purposes of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), including the acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction, or expansion, and the purchase of not to exceed four ambulances and three passenger motor vehicles for replacement only, \$5,763,856,000, to remain available until expended, of which \$463,000,000 shall be transferred to the "Uranium Enrichment Decontamination and Decommissioning Fund": Provided, That, of the amount appropriated in this paragraph, \$4,000,000 shall be used for projects specified in the table that appears under the heading "Congressionally Directed Defense Environmental Cleanup Projects" in the report of the Committee on Appropriations of the United States Senate to accompany this Act.

OTHER DEFENSE ACTIVITIES

For Department of Energy expenses, including the purchase, construction, and acquisition of plant and capital equipment and other expenses, necessary for atomic energy defense, other defense activities, and classified activities, in carrying out the purposes of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), including the acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction, or expansion, and the purchase of not to exceed 12 passenger motor vehicles for replacement only, \$854,468,000, to remain available until expended: Provided, That of the amount appropriated in this paragraph, \$2,000,000 shall be used for projects specified in the table that appears under the heading "Congressionally Directed Other Defense Activities Projects" in the report of the Committee on Appropriations of the United States Senate to accompany this Act.

DEFENSE NUCLEAR WASTE DISPOSAL

For nuclear waste disposal activities to carry out the purposes of Public Law 97–425, as amended, including the acquisition of real property or facility construction or expansion, \$98,400,000, to remain available until expended.

POWER MARKETING ADMINISTRATIONS BONNEVILLE POWER ADMINISTRATION FUND

Expenditures from the Bonneville Power Administration Fund, established pursuant to Public Law 93–454, are approved for the Leaburg Fish Sorter, the Okanogan Basin Locally Adapted Steelhead Supplementation Program, and the Crystal Springs Hatchery Facilities, and, in addition, for official reception and representation expenses in an amount not to exceed \$1,500. During fiscal year 2010, no new direct loan obligations may be made.

OPERATION AND MAINTENANCE, SOUTHEASTERN POWER ADMINISTRATION

For necessary expenses of operation and maintenance of power transmission facilities and of marketing electric power and energy, including transmission wheeling and ancillary services pursuant to section 5 of the Flood Control Act of 1944 (16 U.S.C. 825s), as applied to the southeastern power area, \$7,638,000, to remain available until expended: Provided, That notwithstanding 31 U.S.C. 3302 and section 5 of the Flood Control Act of 1944, up to \$7,638,000 collected by the Southeastern Power Administration from the sale of power and related services shall be credited to this account as discretionary offsetting collections, to remain available until expended for the sole purpose of funding the annual expenses of the Southeastern Power Administration: Provided further, That the sum herein appropriated for annual expenses shall be reduced as collections are received during the fiscal year so as to result in a final fiscal year 2010 appropriation estimated at not more than \$0: Provided further, That, notwithstanding 31 U.S.C. 3302, up to \$70,806,000 collected by the Southeastern Power Administration pursuant to the Flood Control Act of 1944 to recover purchase power and wheeling expenses shall be credited to this account as offsetting collections, to remain available until expended for the sole purpose of making purchase power and wheeling expenditures: Provided further, That notwithstanding the provisions of 31 U.S.C. 3302 and section 5 of the Flood Control Act of 1944, all funds collected by the Southeastern Power Administration that are applicable to the repayment of the annual expenses of this account in this and subsequent fiscal years shall be credited to this account as discretionary offsetting collections for the sole purpose of funding such expenses, with such funds remaining available until expended: Provided further, That for purposes of this appropriation, annual expenses means expenditures that are generally recovered in the same year that they are incurred (excluding purchase power and wheeling expenses).

OPERATION AND MAINTENANCE, SOUTHWESTERN POWER ADMINISTRATION

For necessary expenses of operation and maintenance of power transmission facilities and of marketing electric power and energy, for construction and acquisition of transmission lines, substations and appurtenant facilities, and for administrative expenses, including official reception and representation expenses in an amount not to exceed in carrying out section 5 of the Flood Control Act of 1944 (16 U.S.C. 825s), as applied to the Southwestern Power Administration, \$44,944,000, to remain available until expended: Provided, That notwithstanding 31 U.S.C. 3302 and section 5 of the Flood Control Act of 1944 (16 U.S.C. 825s), up to \$31,868,000 collected by the Southwestern Power Administration from the sale of power and related services shall be credited to this account as discretionary offsetting collections, to remain available until expended, for the sole purpose of funding the annual expenses of the Southwestern Power Administration: Provided further, That the sum herein appropriated for annual expenses shall be reduced as collections are received during the fiscal year so as to result in a final fiscal year 2010 appropriation estimated at not more than \$13,076,000: Provided further, That, notwithstanding 31 U.S.C. 3302, up to \$38,000,000 collected by the Southwestern Power Administration pursuant to the Flood Control Act of 1944 to recover purchase power and wheeling expenses shall be credited to this account as offsetting collections, to remain available until expended for the sole purpose of making purchase power and wheeling expenditures: Provided further, That notwithstanding 31

U.S.C. 3302 and section 5 of the Flood Control Act of 1944, all funds collected by the Southwestern Power Administration that are applicable to the repayment of the annual expenses of this account in this and subsequent fiscal years shall be credited to this account as discretionary offsetting collections for the sole purpose of funding such expenses, with such funds remaining available until expended: Provided further, That for purposes of this appropriation, annual expenses means expenditures that are generally recovered in the same year that they are incurred (excluding purchase power and wheeling expenses).

CONSTRUCTION, REHABILITATION, OPERATION AND MAINTENANCE, WESTERN AREA POWER ADMINISTRATION

For carrying out the functions authorized by title III, section 302(a)(1)(E) of the Act of August 4, 1977 (42 U.S.C. 7152), and other related activities including conservation and renewable resources programs as authorized, including official reception and representation expenses in an amount not to exceed \$1,500,000; \$256,711,000 to remain available until expended, of which \$245,216,000 shall be derived from the Department of the Interior Reclamation Fund: Provided, That notwithstanding 31 U.S.C. 3302, section 5 of the Flood Control Act of 1944 (16 U.S.C. 825s), and section 1 of the Interior Department Appropriation Act, 1939 (43 U.S.C. 392a), up to \$147,530,000 collected by the Western Area Power Administration from the sale of power and related services shall be credited to this account as discretionary offsetting collections, to remain available until expended, for the sole purpose of funding the annual expenses of the Western Area Power Administration: Provided further, That the sum herein appropriated for annual expenses shall be reduced as collections are received during the fiscal year so as to result in a final fiscal year 2010 appropriation estimated at not more than \$109,181,000, of which \$97,686,000 is derived from the Reclamation Fund: Provided further, That of the amount herein appropriated, \$7,584,000 is for deposit into the Utah Reclamation Mitigation and Conservation Account pursuant to title IV of the Reclamation Projects Authorization and Adjustment Act of 1992: Provided further, That notwithstanding 31 U.S.C. 3302, up to \$349,807,000 collected by the Western Area Power Administration pursuant to the Flood Control Act of 1944 and the Reclamation Project Act of 1939 to recover purchase power and wheeling expenses shall be credited to this account as offsetting collections, to remain available until expended for the sole purpose of making purchase power and wheeling expenditures: Provided further, That of the amount herein appropriated, up to \$18,612,000 is provided on a nonreimbursable basis for environmental remediation at the Basic Substation site in Henderson, Nevada: Provided further, That notwithstanding 31 U.S.C. 3302, section 5 of the Flood Control Act of 1944 (16 U.S.C. 825s), and section 1 of the Interior Department Appropriation Act, 1939 (43 U.S.C. 392a), funds collected by the Western Area Power Administration from the sale of power and related services that are applicable to the repayment of the annual expenses of this account in this and subsequent fiscal years shall be credited to this account as discretionary offsetting collections for the sole purpose of funding such expenses, with such funds remaining available until expended: Provided further, That for purposes of this appropriation, annual expenses means expenditures that are generally recovered in the same year that they are incurred (excluding purchase power and wheeling expenses).

FALCON AND AMISTAD OPERATING AND MAINTENANCE FUND

For operation, maintenance, and emergency costs for the hydroelectric facilities at the Fal-

con and Amistad Dams, \$2,568,000, to remain available until expended, and to be derived from the Falcon and Amistad Operating and Maintenance Fund of the Western Area Power Administration, as provided in section 2 of the Act of June 18, 1954 (68 Stat. 255) as amended: Provided, That notwithstanding the provisions of that Act and of 31 U.S.C. 3302, up to \$2,348,000 collected by the Western Area Power Administration from the sale of power and related services from the Falcon and Amistad Dams shall be credited to this account as discretionary offsetting collections, to remain available until expended for the sole purpose of funding the annual expenses of the hydroelectric facilities of these Dams and associated Western Area Power Administration activities: Provided further, That the sum herein appropriated for annual expenses shall be reduced as collections are received during the fiscal year so as to result in a final fiscal year 2010 appropriation estimated at not more than \$220,000: Provided further, That notwithstanding the provisions of section 2 of the Act of June 18, 1954 (68 Stat. 255) as amended, and 31 U.S.C. 3302, all funds collected by the Western Area Power Administration from the sale of power and related services from the Falcon and Amistad Dams that are applicable to the repayment of the annual expenses of the hydroelectric facilities of these Dams and associated Western Area Power Administration activities in this and subsequent fiscal years shall be credited to this account as discretionary offsetting collections for the sole purpose of funding such expenses, with such funds remaining available until expended: Provided further, That for purposes of this appropriation, annual expenses means expenditures that are generally recovered in the same year that they are incurred.

FEDERAL ENERGY REGULATORY COMMISSION SALARIES AND EXPENSES

For necessary expenses of the Federal Energy Regulatory Commission to carry out the provisions of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), including services as authorized by 5 U.S.C. 3109, the hire of passenger motor vehicles, and official reception and representation expenses not to exceed \$3,000, \$298,000,000, to remain available until expended: Provided, That notwithstanding any other provision of law, not to exceed \$298,000,000 of revenues from fees and annual charges, and other services and collections in fiscal year 2010 shall be retained and used for necessary expenses in this account, and shall remain available until expended: Provided further, That the sum herein appropriated from the general fund shall be reduced as revenues are received during fiscal year 2010 so as to result in a final fiscal year 2010 appropriation from the general fund estimated at not more than \$0.

GENERAL PROVISIONS, DEPARTMENT OF ENERGY

SEC. 301. None of the funds appropriated by this Act may be used to prepare or initiate Requests For Proposals (RFPs) for a program if the program has not been funded by Congress.

SEC. 302. None of the funds appropriated by this Act may be used—

(1) to augment the funds made available for obligation by this Act for severance payments and other benefits and community assistance grants under section 4604 of the Atomic Energy Defense Act (50 U.S.C. 2704) unless the Department of Energy submits a reprogramming request to the appropriate congressional committees; or

(2) to provide enhanced severance payments or other benefits for employees of the Department of Energy under such section; or

(3) develop or implement a workforce restructuring plan that covers employees of the Department of Energy.

SEC. 303. The unexpended balances of prior appropriations provided for activities in this Act may be available to the same appropriation accounts for such activities established pursuant to this title. Available balances may be merged with funds in the applicable established accounts and thereafter may be accounted for as one fund for the same time period as originally enacted.

SEC. 304. None of the funds in this or any other Act for the Administrator of the Bonneville Power Administration may be used to enter into any agreement to perform energy efficiency services outside the legally defined Bonneville service territory, with the exception of services provided internationally, including services provided on a reimbursable basis, unless the Administrator certifies in advance that such services are not available from private sector businesses.

SEC. 305. When the Department of Energy makes a user facility available to universities or other potential users, or seeks input from universities or other potential users regarding significant characteristics or equipment in a user facility or a proposed user facility, the Department shall ensure broad public notice of such availability or such need for input to universities and other potential users. When the Department of Energy considers the participation of a university or other potential user as a formal partner in the establishment or operation of a user facility, the Department shall employ full and open competition in selecting such a partner. For purposes of this section, the term "user facility" includes, but is not limited to: (1) a user facility as described in section 2203(a)(2) of the Energy Policy Act of 1992 (42 U.S.C. 13503(a)(2)); (2) a National Nuclear Security Administration Defense Programs Technology Deployment Center/User Facility; and (3) any other Departmental facility designated by the Department as a user facility.

SEC. 306. Funds appropriated by this or any other Act, or made available by the transfer of funds in this Act, for intelligence activities are deemed to be specifically authorized by the Congress for purposes of section 504 of the National Security Act of 1947 (50 U.S.C. 414) during fiscal year 2010 until the enactment of the Intelligence Authorization Act for fiscal year 2010.

SEC. 307. Of the funds made available by the Department of Energy for activities at Government-owned, contractor-operated laboratories funded in this Act or subsequent Energy and Water Development Appropriations Acts, the Secretary may authorize a specific amount, not to exceed 8 percent of such funds, to be used by such laboratories for laboratory directed research and development: Provided, That the Secretary may also authorize a specific amount not to exceed 4 percent of such funds, to be used by the plant manager of a covered nuclear weapons production plant or the manager of the Nevada Site Office for plant or site directed research and development.

SEC. 308. Not to exceed 5 per centum, or \$100,000,000, of any appropriation, whichever is less, made available for Department of Energy activities funded in this Act or subsequent Energy and Water Development Appropriations Acts may hereafter be transferred between such appropriations, but no such appropriation, except as otherwise provided, shall be increased or decreased by more than 5 per centum by any such transfers, and request of such transfers shall be submitted promptly to the Committees on Appropriations of the House and Senate.

SEC. 309. (a) Subject to subsection (b), no funds appropriated or otherwise made available by this Act or any other Act may be used to record transactions relating to the increase in borrowing authority or bonds outstanding at any time under the Federal Columbia River

Transmission System Act (16 U.S.C. 838 et seq.) referred to in section 401 of division A of the American Recovery and Reinvestment Act of 2009 (Public Law 111-5; 123 Stat. 140) under a funding account, subaccount, or fund symbol other than the Bonneville Power Administration Fund Treasury account fund symbol.

(b) Funds appropriated or otherwise made available by this Act or any other Act may be used to ensure, for purposes of meeting any applicable reporting provisions of the American Recovery and Reinvestment Act of 2009 (Public Law 111-5; 123 Stat. 115), that the Bonneville Power Administration uses a fund symbol other than the Bonneville Power Administration Fund Treasury account fund symbol solely to report accrued expenditures of projects attributed by the Administrator of the Bonneville Power Administration to the increased borrowing authority.

(c) This section is effective for fiscal year 2010 and subsequent fiscal years.

SEC. 310. None of the funds made available by this Act may be used to make a grant allocation, discretionary grant award, discretionary contract award, Other Transaction Agreement, or to issue a letter of intent totaling in excess of \$1,000,000, or to announce publicly the intention to make such an award, including a contract covered by the Federal Acquisition Regulation, unless the Secretary of Energy notifies the Committees on Appropriations of the Senate and the House of Representatives at least 3 full business days in advance of making such an award or issuing such a letter: Provided, That if the Secretary of the Department of Energy determines that compliance with this section would pose a substantial risk to human life, health, or safety, an award may be made without notification and the Committees on Appropriations of the Senate and the House of Representatives shall be notified not later than 5 full business days after such an award is made or letter issued.

SEC. 311. (a) In any fiscal year in which the Secretary of Energy determines that additional funds are needed to reimburse the costs of defined benefit pension plans for contractor employees, the Secretary may transfer not more than 1 percent from each appropriation made available in this and subsequent Energy and Water Development Appropriation Acts to any other appropriation available to the Secretary in the same Act for such reimbursements.

(b) Where the Secretary recovers the costs of defined benefit pension plans for contractor employees through charges for the indirect costs of research and activities at facilities of the Department of Energy, if the indirect costs attributable to defined benefit pension plan costs in a fiscal year are more than charges in fiscal year 2008, the Secretary shall carry out a transfer of funds under this section.

(c) In carrying out a transfer under this section, the Secretary shall use each appropriation made available to the Department in that fiscal year as a source for the transfer, and shall reduce each appropriation by an equal percentage, except that appropriations for which the Secretary determines there exists a need for additional funds for pension plan costs in that fiscal year, as well as appropriations made available for the Power Marketing Administrations, the title XVII loan guarantee program, and the Federal Energy Regulatory Commission, shall not be subject to this requirement.

(d) Each January, the Secretary shall report to the Committees on Appropriations of the House of Representatives and the Senate on the state of defined benefit pension plan liabilities in the Department for the preceding year.

(e) This transfer authority does not apply to supplemental appropriations, and is in addition to any other transfer authority provided in this or any other Act. The authority provided under this section shall expire on September 30, 2015.

AUTHORITY OF NUCLEAR REGULATORY COMMISSION

SEC. 312. The Nuclear Regulatory Commission may use funds made available for the necessary expenses of the Nuclear Regulatory Commission for the acquisition and lease of additional office space provided by the General Services Administration in accordance with the fourth and fifth provisos in the matter under the heading "SALARIES AND EXPENSES" under the heading "NUCLEAR REGULATORY COMMISSION" under the heading "INDEPENDENT AGENCIES" of title IV of division C of the Omnibus Appropriations Act, 2009 (Public Law 111-8; 123 Stat. 629).

SEC. 313. None of the funds appropriated or otherwise made available by this Act may be used by the Department of Energy to enter into any federal contract unless such contract is entered into in accordance with the requirements of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 253) or Chapter 137 of title 10, United States Code, and the Federal Acquisition Regulation, unless such contract is otherwise authorized by statute to be entered into without regard to the above referenced statutes.

SEC. 314. (a) Except as provided in subsection (b), none of the funds appropriated or otherwise made available by this title for the Strategic Petroleum Reserve may be made available to any person that as of the enactment of this Act—

(1) is selling refined petroleum products valued at \$1,000,000 or more to the Islamic Republic of Iran;

(2) is engaged in an activity valued at \$1,000,000 or more that could contribute to enhancing the ability of the Islamic Republic of Iran to import refined petroleum products, including—

(A) providing ships or shipping services to deliver refined petroleum products to the Islamic Republic of Iran;

(B) underwriting or otherwise providing insurance or reinsurance for such an activity; or

(C) financing or brokering such an activity; or

(3) is selling, leasing, or otherwise providing to the Islamic Republic of Iran any goods, services, or technology valued at \$1,000,000 or more that could contribute to the maintenance or expansion of the capacity of the Islamic Republic of Iran to produce refined petroleum products.

(b) The prohibition on the use of funds under subsection (a) shall not apply with respect to any contract entered into by the United States Government before the date of the enactment of this Act.

(c) If the Secretary determines a person made ineligible by this section has ceased the activities enumerated in (a)(1)–(3), that person shall no longer be ineligible under this section.

TITLE IV

INDEPENDENT AGENCIES

APPALACHIAN REGIONAL COMMISSION

For expenses necessary to carry out the programs authorized by the Appalachian Regional Development Act of 1965, as amended, for necessary expenses for the Federal Co-Chairman and the Alternate on the Appalachian Regional Commission, for payment of the Federal share of the administrative expenses of the Commission, including services as authorized by 5 U.S.C. 3109, and hire of passenger motor vehicles, \$76,000,000, to remain available until expended: Provided, That any congressionally directed spending shall be taken from within that State's allocation in the fiscal year in which it is provided.

DEFENSE NUCLEAR FACILITIES SAFETY BOARD

SALARIES AND EXPENSES

For necessary expenses of the Defense Nuclear Facilities Safety Board in carrying out activities authorized by the Atomic Energy Act of 1954, as

amended by Public Law 100-456, section 1441, \$26,086,000, to remain available until expended.

DELTA REGIONAL AUTHORITY

SALARIES AND EXPENSES

For necessary expenses of the Delta Regional Authority and to carry out its activities, as authorized by the Delta Regional Authority Act of 2000, as amended, notwithstanding sections 382C(b)(2), 382F(d), 382M, and 382N of said Act, \$13,000,000, to remain available until expended.

DENALI COMMISSION

For expenses of the Denali Commission including the purchase, construction, and acquisition of plant and capital equipment as necessary and other expenses, \$11,965,000, to remain available until expended, notwithstanding the limitations contained in section 306(g) of the Denali Commission Act of 1998.

NUCLEAR REGULATORY COMMISSION

SALARIES AND EXPENSES

For necessary expenses of the Commission in carrying out the purposes of the Energy Reorganization Act of 1974, as amended, and the Atomic Energy Act of 1954, as amended, including official representation expenses (not to exceed \$25,000), \$1,061,000,000, to remain available until expended: Provided, That of the amount appropriated herein, \$29,000,000 shall be derived from the Nuclear Waste Fund: Provided further, That revenues from licensing fees, inspection services, and other services and collections estimated at \$902,402,000 in fiscal year 2010 shall be retained and used for necessary salaries and expenses in this account, notwithstanding 31 U.S.C. 3302, and shall remain available until expended: Provided further, That the sum herein appropriated shall be reduced by the amount of revenues received during fiscal year 2010 so as to result in a final fiscal year 2010 appropriation estimated at not more than \$158,598,000: Provided further, That of the amounts appropriated, \$10,000,000 is provided to support university research and development in areas relevant to their respective organization's mission, and \$5,000,000 is to support a Nuclear Science and Engineering Grant Program that will support multiyear projects that do not align with programmatic missions but are critical to maintaining the discipline of nuclear science and engineering.

OFFICE OF INSPECTOR GENERAL

For necessary expenses of the Office of Inspector General in carrying out the provisions of the Inspector General Act of 1978, as amended, \$10,860,000, to remain available until expended: Provided, That revenues from licensing fees, inspection services, and other services and collections estimated at \$9,774,000 in fiscal year 2010 shall be retained and be available until expended, for necessary salaries and expenses in this account, notwithstanding 31 U.S.C. 3302: Provided further, That the sum herein appropriated shall be reduced by the amount of revenues received during fiscal year 2010 so as to result in a final fiscal year 2010 appropriation estimated at not more than \$1,086,000.

NUCLEAR WASTE TECHNICAL REVIEW BOARD

SALARIES AND EXPENSES

For necessary expenses of the Nuclear Waste Technical Review Board, as authorized by Public Law 100-203, section 5051, \$3,891,000, to be derived from the Nuclear Waste Fund, and to remain available until expended.

OFFICE OF THE FEDERAL COORDINATOR FOR ALASKA NATURAL GAS TRANSPORTATION PROJECTS

For necessary expenses for the Office of the Federal Coordinator for Alaska Natural Gas Transportation Projects pursuant to the Alaska Natural Gas Pipeline Act of 2004, \$4,466,000 until expended: Provided, That any fees, charges, or commissions received pursuant to

section 802 of Public Law 110-140 in fiscal year 2010 in excess of \$4,683,000 shall not be available for obligation until appropriated in a subsequent Act of Congress.

GENERAL PROVISION

SEC. 401. Section 382B of the Delta Regional Authority Act of 2000 is amended by deleting (c)(1) and inserting in lieu thereof the following: “(1) IN GENERAL—VOTING.—A decision by the Authority shall require the affirmative vote of the Federal cochairperson and a majority of the State members (not including any member representing a State that is delinquent under subsection (g)(2)(C)) to be effective.”.

TITLE V

GENERAL PROVISIONS

SEC. 501. None of the funds appropriated by this Act may be used in any way, directly or indirectly, to influence congressional action on any legislation or appropriation matters pending before Congress, other than to communicate to Members of Congress as described in 18 U.S.C. 1913.

SEC. 502. None of the funds made available in this Act may be transferred to any department, agency, or instrumentality of the United States Government, except pursuant to a transfer made by, or transfer authority provided in this Act or any other appropriation Act.

SEC. 503. Title IV of division A of the American Recovery and Reinvestment Act of 2009 (Public Law 111-5) is amended by adding at the end of the title, the following new section 411:

“SEC. 411. Up to 0.5 percent of each amount appropriated to the Department of the Army and the Bureau of Reclamation in this title may be used for the expenses of management and oversight of the programs, grants, and activities funded by such appropriation, and may be transferred by the Head of the Federal Agency involved to any other appropriate account within the department for that purpose: Provided, That the Secretary will provide a report to the Committees on Appropriations of the House of Representatives and the Senate 30 days prior to the transfer: Provided further, That funds set aside under this section shall remain available for obligation until September 30, 2012.”.

AGENCY ADMINISTRATIVE EXPENSES

SEC. 504. (a) DEFINITIONS.—In this section: (1) ADMINISTRATIVE EXPENSES.—The term “administrative expenses” has the meaning as determined by the Director under subsection (b)(2).

(2) AGENCY.—The term “agency”—

(A) means an agency as defined under section 1101 of title 31, United States Code, that is established in the executive branch; and

(B) shall not include the District of Columbia government.

(3) DIRECTOR.—The term “Director” means the Director of the Office of Management and Budget.

(b) ADMINISTRATIVE EXPENSES.—

(1) IN GENERAL.—All agencies shall include a separate category for administrative expenses when submitting their appropriation requests to the Office of Management and Budget for fiscal year 2011 and each fiscal year thereafter.

(2) ADMINISTRATIVE EXPENSES DETERMINED.—In consultation with the agencies, the Director shall establish and revise as necessary a definition of administration expenses for the purposes of this section. All questions regarding the definition of administrative expenses shall be resolved by the Director.

(c) BUDGET SUBMISSION.—Each budget of the United States Government submitted under section 1105 of title 31, United States Code, for fiscal year 2011 and each fiscal year thereafter shall include the amount requested for each agency for administrative expenses.

SEC. 505. (a) Notwithstanding any other provision of this Act and except as provided in sub-

section (b), any report required to be submitted by a Federal agency or department to the Committee on Appropriations of either the Senate or the House of Representatives in an appropriations Act shall be posted on the public Website of that Agency upon receipt by the committee.

(b) Subsection (a) shall not apply to a report if—

(1) the public posting of the report compromises national security; or

(2) the report contains proprietary information.

This Act may be cited as the “Energy and Water Development and Related Agencies Appropriations Act, 2010”.

RECOGNIZING BISHOP MUSEUM

Mr. BROWN. Mr. President, I ask unanimous consent the Judiciary Committee be discharged from further consideration of S. Res. 195 and the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 195) recognizing Bishop Museum, the Nation’s premier showcase for Hawaiian culture and history, on the occasions of its 120th anniversary and the restoration and renovation of its Historic Hall.

There being no objection, the Senate proceeded to consider the resolution.

Mr. BROWN. Mr. President, I ask unanimous consent the resolution be agreed to, the preamble be agreed to, the motions to reconsider be laid upon the table, with no intervening action or debate, and any statements be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 195) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 195

Whereas Bishop Museum was founded in 1889 in Honolulu, Hawai’i by Charles Reed Bishop in memory of his beloved wife, Princess Bernice Pauahi Bishop, the great granddaughter of Kamehameha I, to house the personal legacies and bequests of the royal Kamehameha and Kalākaua families;

Whereas the mission of Bishop Museum since its inception has been to study, preserve, and tell the stories of the cultures and natural history of Hawai’i and the Pacific;

Whereas the collections of Bishop Museum include more than 24,000,000 objects, collectively the largest Hawai’i and Pacific area collection in the world, which includes more than 1,200,000 cultural objects representing Native Hawaiian, Pacific Island, and Hawai’i immigrant life, more than 125,000 historical publications (including many in the Hawaiian language), more than 1,000,000 historical photographs, films, works of art, audio recordings, and manuscripts, and more than 22,000,000 plant and animal specimens;

Whereas a primary goal of Bishop Museum is to serve and represent the interests of Native Hawaiians by advancing Native Hawaiian culture and education, protecting the collections and increasing access to them, and strengthening the museum’s connections with the schools of Hawai’i;

Whereas the national significance of Bishop Museum’s cultural collection lies in the Native Hawaiian collection, which collectively represents the largest public resource in the world documenting a way of life, and has been a source of knowledge and inspiration for numerous visitors, researchers, students, native craftsmen, teachers, and community and spiritual leaders over the years, especially since the cultural revival, which has been steadily growing and gaining in popularity;

Whereas more than 300,000 people visit Bishop Museum each year to learn about Hawaiian culture and experience Hawaiian Hall;

Whereas the desire to see Hawaiian Hall and to learn about Hawaiian culture is the primary reason 400,000 visitors each year give for visiting Bishop Museum;

Whereas Hawaiian Hall is the Nation’s only showcase of its size, proportion, design, and historic context that is devoted to the magnificent legacy of Hawai’i’s kings and queens, and the legacies of its Native Hawaiian people of all walks of life and ages;

Whereas Hawaiian Hall, constructed between 1889 and 1903 and 1 of 3 interconnected structures known as the Hawaiian Hall Complex, is considered a masterpiece of late Victorian museum design with its Kamehameha blue stone exterior quarried on site and extensive use of native koa wood, and is one of the few examples of Romanesque Richardsonian style museum buildings to have survived essentially unchanged;

Whereas Hawaiian Hall, designed by noted Hawai’i architects C.B. Ripley and C.W. Dickey in 1898, was placed on the National Register of Historic Places in 1982, based on its unique combination of architectural, cultural, scientific, educational, and historical significance;

Whereas the restoration and renovation of Hawaiian Hall and its exhibits by noted Hawai’i architect Glenn Mason and noted national and international museum exhibit designer Ralph Appelbaum are integral to the museum’s ability to fulfill its mission and achieve its primary goal of serving and representing the interests of Native Hawaiians;

Whereas the restoration and renovation of Hawaiian Hall, begun in 2005, included the building of a new gathering place in an enclosed, glass walled atrium, improved access to the hall through the installation of an elevator in the new atrium to all 3 floors of the hall and other buildings in the Hawaiian Hall Complex, improved collection preservation through the installation of new, state-of-the-art environmental controls, lighting, security, and fire suppression systems, and restored original woodwork and metalwork;

Whereas the restoration and renovation of the hall’s exhibits bring multiple voices and a Native Hawaiian perspective to bear on Bishop Museum’s treasures, by conveying the essential values, beliefs, complexity, and achievements of Hawaiian culture through exquisite and fragile artifacts in a setting that emphasizes their “mana” (power and essence) and the place in which they were created;

Whereas the new exhibit incorporates contemporary Native Hawaiian artwork illustrating traditional stories, legends, and practices, and contemporary Native Hawaiian voices interpreting the practices and traditions through multiple video presentations;

Whereas the new exhibit features more than 2,000 objects and images from the museum’s collections on the open floor, mezzanines, and the center space, conceptually organized to represent 3 traditional realms

or “wao” of the Hawaiian world—Kai Ākea, the expansive sea from which gods and people came, Wao Kānaka, the realm of people, and Wao Lani, the realm of gods and the “ali‘i” (chiefs) who descended from them;

Whereas the new exhibit’s ending display celebrates the strength, glory, and achievements of Native Hawaiians with a large 40-panel mural titled “Ho‘ohuli, To Cause An Overturning, A Change”, made by students of Native Hawaiian charter schools in collaboration with Native Hawaiian artists and other students, and interpreted by Native Hawaiian artists and teachers in a video presentation; and

Whereas the people of the United States wish to convey their sincerest appreciation to Bishop Museum for its service and devotion: Now, therefore, be it

Resolved, That the Senate—

(1) recognizes the reopening of historic Hawaiian Hall on the 120th anniversary of the founding of Bishop Museum in Honolulu, Hawai‘i; and

(2) on the occasions of the reopening and anniversary of the museum, honors and praises Bishop Museum for its work to ensure the preservation, study, education, and appreciation of Native Hawaiian culture and history.

ORDER FOR STAR PRINT—S. RES. 222

Mr. BROWN. Mr. President, I ask unanimous consent that S. Res. 222 be star printed with the changes that are at the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

MEASURE READ THE FIRST TIME—S. 1552

Mr. BROWN. Mr. President, I understand S. 1552, introduced earlier today by Senator LIEBERMAN, is at the desk. I ask for its first reading.

The PRESIDING OFFICER. The clerk will read the title of the bill for the first time.

The legislative clerk read as follows:

A bill (S. 1552) to reauthorize the DC opportunity scholarship program and for other purposes.

Mr. BROWN. I ask now for its second reading and object to my own request.

The PRESIDING OFFICER. Objection is heard. The bill will receive its second reading on the next legislative day.

ORDERS FOR FRIDAY, JULY 31, 2009

Mr. BROWN. Mr. President, I ask unanimous consent that when the Senate completes its business today, it adjourn until 9:30 a.m. tomorrow, Friday, July 31; that following the prayer and pledge, the Journal of proceedings be approved to date, the morning hour be deemed expired, the time for the two leaders be reserved for their use later in the day, and the Senate then resume consideration of Calendar No. 105, H.R. 2997, the Agriculture appropriations bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. BROWN. Mr. President, as previously announced, there will be no rollcall votes during tomorrow’s session of the Senate.

ADJOURNMENT UNTIL 9:30 A.M. TOMORROW

Mr. BROWN. Mr. President, if there is no further business to come before the Senate, I ask unanimous consent that it stand adjourned under the previous order.

There being no objection, the Senate, at 8:12 p.m., adjourned until Friday, July 31, 2009, at 9:30 a.m.

SENATE—Friday, July 31, 2009

The Senate met at 9:30 a.m. and was called to order by the Honorable MARK R. WARNER, a Senator from the Commonwealth of Virginia.

PRAYER

The Chaplain, Dr. Barry C. Black, offered the following prayer:

Let us pray.

Our Father God, author of liberty, who has made and preserved us as a nation, bless today our lawmakers who are called to serve the Republic by bringing order out of chaos and peace out of strife. May they lift the shield of their integrity against the enemies of justice and truth at this time when the world's hopes depend on character. Lord, guide them with Your providence until this Nation shall gleam undimmed by tears of want and woe. Make our lawmakers worthy of the sacrifices of those who, day by day, give their all to keep us free. Help them to forgive and forget any memories of strained relationships or debilitating differences.

We pray in Your loving Name. Amen.

PLEDGE OF ALLEGIANCE

The Honorable MARK R. WARNER led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. BYRD).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, July 31, 2009.

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable MARK R. WARNER, a Senator from the Commonwealth of Virginia, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mr. WARNER thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The majority leader is recognized.

SCHEDULE

Mr. REID. Mr. President, following leader remarks, if any, the Senate will resume consideration of the Agriculture appropriations bill. There will be no rollcall votes during today's session. However, the two managers, Senator KOHL and Senator BROWNBAC, will inform all Members that they will accept amendments, and people who have amendments should be ready to offer them today or on Monday.

MEASURE PLACED ON THE CALENDAR—S. 1552

Mr. REID. Mr. President, S. 1552 is at the desk and it is due for a second reading.

The ACTING PRESIDENT pro tempore. The clerk will read the bill by title for the second time.

The assistant legislative clerk read as follows:

A bill (S. 1552) to reauthorize the DC opportunity scholarship program, and for other purposes.

Mr. REID. Mr. President, I object to any further proceedings with respect to the bill.

The ACTING PRESIDENT pro tempore. Objection is heard.

The bill will be placed on the calendar.

Mr. REID. Mr. President, I have a cloture motion at the desk, but before it is read, we need to have the bill reported.

RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, the leadership time is reserved.

AGRICULTURE, RURAL DEVELOPMENT, FOOD AND DRUG ADMINISTRATION, AND RELATED AGENCIES APPROPRIATIONS ACT, 2010

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will resume consideration of H.R. 2997, which the clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 2997) making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes.

Pending:

Kohl/Brownback amendment No. 1908, in the nature of a substitute.

Kohl (for Tester) amendment No. 2230 (to amendment No. 1908), to clarify a provision

relating to funding for a National Animal Identification Program.

CLOTURE MOTION

Mr. REID. Mr. President, I would now ask that the cloture motion which is at the desk on the substitute amendment be stated.

The ACTING PRESIDENT pro tempore. The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The assistant legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on the substitute amendment No. 1908 to H.R. 2997, the Agriculture Appropriations Act for Fiscal Year 2010.

John D. Rockefeller, IV, Tom Udall, Mark L. Pryor, Edward E. Kaufman, Blanche L. Lincoln, Kent Conrad, Kay R. Hagan, Mark Begich, Byron L. Dorgan, Max Baucus, Ben Nelson, Herb Kohl, Daniel K. Inouye, Michael F. Bennet, Mary L. Landrieu, Charles E. Schumer.

CLOTURE MOTION

Mr. REID. Mr. President, I have a cloture motion at the desk on the bill itself.

The ACTING PRESIDENT pro tempore. The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The assistant legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on H.R. 2997, the Agriculture Appropriations Act for Fiscal Year 2010.

John D. Rockefeller, IV, Tom Udall, Mark L. Pryor, Edward E. Kaufman, Blanche L. Lincoln, Kent Conrad, Kay R. Hagan, Mark Begich, Byron L. Dorgan, Max Baucus, Ben Nelson, Herb Kohl, Daniel K. Inouye, Michael F. Bennet, Mary L. Landrieu, Jon Tester, Charles E. Schumer.

Mr. REID. Mr. President, I ask unanimous consent that the cloture vote on the substitute amendment occur at 5:30 p.m. on Monday, August 3; that if cloture is invoked, postcloture time be considered to have begun as if cloture had been invoked at 11 a.m.; further, that the mandatory quorums required be waived, and that first-degree amendments be filed at the desk by 3:30 p.m. on Monday.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The Senator from Wisconsin.

Mr. KOHL. Mr. President, as we wait for Members to come forward with

amendments, I wish to talk about something that is happening down at the USDA right now. This morning, Secretary Vilsack is announcing changes to the Dairy Product Price Support Program. I wish to commend him for his diligence and his willingness to keep pushing on this.

Wisconsin is home to more dairy farms than any other State in the Union. We produce 2.1 billion pounds of milk each month. About half the State's \$51 billion agriculture economy is directly tied to dairy. So when the dairy sector hurts, Wisconsin hurts. And I will say in no uncertain terms that the pain in dairy across America is very acute right now.

From January through April, the price of milk paid to dairy farmers has been about \$4.80 per hundredweight below the cost of production. Dairy producers have lost \$3.9 billion in equity in 5 months. At risk is the long-term stability of the industry, the Nation's milk production infrastructure, and thousands of rural communities.

With Senator LEAHY and a number of our colleagues, we have pushed to confront these challenges. In the last farm bill, we extended the basic safety net for dairy producers, and we strengthened it with something called a "feed cost adjuster." In the economic recovery bill we added credit to help producers survive.

At the same time, the Secretary has worked to boost exports and provide more dairy products for nutrition programs. All of these are critical steps. Together they reflect, literally, a billion-dollar effort to address a crisis that has hurt dairy producers in every corner of the country.

But over the past several weeks, in hearings and letters—and personal consultations I have been a part of—there is a growing appreciation that more needs to be done. Today the Secretary is taking the next step. For August through October, he is adjusting the Dairy Product Price Support Program in a way that will yield an estimated \$243 million in revenue increases for dairy producers.

I commend our Secretary of Agriculture for working with intensity and persistence. I commend our President for appointing a Secretary of Agriculture who works with intensity and persistence. And I want to reassure dairy farmers all across America that, although we do not have all the answers, we are committed to pressing forward on their behalf.

I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Kansas.

Mr. BROWNBACK. Mr. President, I urge my colleagues, particularly on my side of the aisle, to get their amendments and bring them forward, bring them forward this morning. It would be my hope we could get this bill done on Monday, early evening, so we can move

to the Sotomayor discussion and debate on the floor. I think most Members want to speak about Sotomayor, so it is going to take a lot of time next week, being the last week before we go on break. I hope we could start that as fast as possible and we could move through this bill expeditiously.

We worked very closely with the majority. I think we have a good bill. It certainly is not perfect; no bill is. But it is one for which we have done a lot of work, and I do not see the issues outstanding here to the degree that I think it would merit us putting off the discussion and debate on Sotomayor. So I am hopeful we can get those amendments coming forward.

AMENDMENT NO. 2229 TO AMENDMENT NO. 1908

Mr. President, I have discussed with the majority about bringing up an amendment to deal with the issue of neglected and rare diseases. The FDA funding is in this bill, and we have negotiated an amendment with the proper authorizing committee. So with that, I ask unanimous consent to set aside the pending amendment, to call up amendment No. 2229, and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. Without objection, the clerk will report.

The assistant legislative clerk read as follows:

The Senator from Kansas [Mr. BROWNBACK] proposes an amendment numbered 2229 to amendment No. 1908.

Mr. BROWNBACK. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To establish within the Food and Drug Administration 2 review groups to recommend solutions for the prevention, diagnosis, and treatment of rare diseases and neglected diseases of the developing world)

On page 85, between lines 16 and 17, insert the following:

SEC. 7. (a) The Commissioner of Food and Drugs shall establish within the Food and Drug Administration a review group which shall recommend to the Commissioner of Food and Drugs appropriate preclinical, trial design, and regulatory paradigms and optimal solutions for the prevention, diagnosis, and treatment of rare diseases: *Provided*, That the Commissioner of Food and Drugs shall appoint 8 individuals employed by the Food and Drug Administration to serve on the review group: *Provided further*, That members of the review group shall have specific expertise relating to the development of articles for use in the prevention, diagnosis, or treatment of rare diseases, including specific expertise in developing or carrying out clinical trials.

(b) The Commissioner of Food and Drugs shall establish within the Food and Drug Administration a review group which shall recommend to the Commissioner of Food and Drugs appropriate preclinical, trial design, and regulatory paradigms and optimal solutions for the prevention, diagnosis, and

treatment of neglected diseases of the developing world: *Provided*, That the Commissioner of Food and Drugs shall appoint 8 individuals employed by the Food and Drug Administration to serve on the review group: *Provided further*, That members of the review group shall have specific expertise relating to the development of articles for use in the prevention, diagnosis, or treatment of neglected diseases of the developing world, including specific expertise in developing or carrying out clinical trials: *Provided further*, That for the purposes of this section the term "neglected disease of the developing world" means a tropical disease, as defined in section 524(a)(3) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360n(a)(3)).

(c) The Commissioner of Food and Drugs shall—

(1) submit, not later than 1 year after the date of the enactment of this Act, a report to Congress that describes both the findings and recommendations made by the review groups under subsections (a) and (b);

(2) issue, not later than 180 days after submission of the report to Congress under paragraph (1), guidance based on such recommendations for articles for use in the prevention, diagnosis, and treatment of rare diseases and for such uses in neglected diseases of the developing world; and

(3) develop, not later than 180 days after submission of the report to Congress under paragraph (1), internal review standards based on such recommendations for articles for use in the prevention, diagnosis, and treatment of rare diseases and for such uses in neglected diseases of the developing world.

Mr. BROWNBACK. Mr. President and colleagues, this amendment goes at a critical problem in the world and one we hold the key to answering. There is a lot of work that needs to be done on disease treatment and drug development. Unfortunately, what we have seen taking place is that the cost of developing a pharmaceutical product to treat particular diseases continues to go up and up and up into, in some cases, billions of dollars to develop a particular drug for a treatment for individuals.

When you are looking at disease categories, now that we are getting into finer and finer groups, you may have a group of, say, 50,000 people who have a particular disease, or for a neglected disease that is in a Third World country, you can have millions, even more than that, who are affected by a disease, but there is not a large marketplace to support the research that is necessary to develop a cure.

What we have put forward in this amendment is a review process to try to establish a new system for neglected and rare diseases so that drug delivery can proceed, and it can proceed on an expedited basis and reduce the cost of doing it, so we can start to develop drug treatments for rare diseases and neglected diseases that happen in poorer parts of the world where the economy does not support that level of research.

The amendment establishes two review groups within the Food and Drug Administration that would recommend

solutions for the prevention, diagnosis, and treatment of both rare diseases and neglected diseases of the developing world.

According to the World Health Organization, more than 1 billion people—nearly one of every six people worldwide—are affected by at least one neglected disease. We have a billion people who are in this category of having a disease for which there is little to no research being done.

Examples of well-known neglected diseases include malaria, tuberculosis, and cholera. Africa certainly bears the brunt of this, as nearly 90 percent of the world's neglected diseases afflict people in this continent.

While this is the target category, it is my hope that what this will lead to is us developing systems and ways where we can reduce the cost and the time for drug delivery and development so we can use that in this country. We can use that on rare diseases where you do not have the population pool to support as much of the research.

Neglected diseases claim roughly 500,000 lives each year. They disproportionately affect very low-income populations in developing countries. Unfortunately, less than 1 percent of the roughly 1,400 drugs registered between 1975 and 1999 treated such diseases—1 percent of them.

Streamlining the FDA review process to treat these diseases is not only in our country's national interest, but it is consistent with our longstanding tradition of caring for those who are less fortunate around the world.

I might point out that as to the public opinion standing of the United States, the continent where we have the highest public opinion standing of the population is not even North America, it is Africa, where we are helping people with the PEPFAR program, with malaria, with food, and people like you if you are helping them stay alive. This continues in that, so it is good foreign policy as well and also helps us in drug delivery and development for our rare diseases.

This amendment also addresses rare diseases or those diseases for which little market exists since so few patients are affected. If this happens to be a person in your family, you do not care how many people are affected, you are affected, and you want somebody to be developing cures for it. Rare diseases can be especially lethal since few treatments may exist for individual patients and time is not on their side.

For these reasons, I strongly urge my colleagues to support this amendment No. 2229, which would allow experts to identify ways we can improve the Food and Drug Administration's ability to review treatments for rare and neglected diseases.

We worked carefully on this proposal with a number of individuals, including Dr. Francis Collins, who is nominated

to be the head of NIH and who had the Human Genome Project, one of the great scientific breakthroughs of the last 25 years; as well as with former FDA officials and a number of people interested and concerned about what is taking place here; about the expanded cost of developing drugs and the smaller economic category that they have to hit in. I think this is in the best traditions of the United States and is very helpful to us as a country to address.

I and my colleagues have traveled to some of the Third World areas. We know malaria hits 60 percent of the children in Sub-Saharan Africa—60 percent. Tuberculosis as well is rampant. We have other diseases that we haven't thought of here for a long time—sleeping sickness, river blindness—that affect a large cross-section of individuals with little to no effort going into it. To the degree we can help will be a massive good that we do. It is my fundamental belief that we are blessed to be a blessing, and this country has been blessed. We certainly have our difficulties; no question about that, but here is an area where we can help and it helps us too.

I hope my colleagues will see fit to support this amendment. I will ask at the proper time that it be supported and that we vote on it.

I yield the floor.

Mr. KOHL. Mr. President, as we said before this morning, we intend to complete action on this bill Monday. We are here today to work with Senators if they have amendments. We need to move this bill along so we can complete all our work as we know we wish to do before the August recess. So if any Senators have amendments to the bill, they should come to the floor so they can be offered, debated, and considered.

I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BROWNBACK. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BROWNBACK. Mr. President, while we are waiting on Members to come and present their amendments, I want to talk about something associated with agriculture in my State. It is an issue that will probably come up after the August break, and that is energy legislation. Energy, in our State, is inextricably linked to agriculture, where it is a big energy-using industry but also one that derives a lot of income for agriculture.

The industry itself moved from a food and fiber industry to a food, fiber, and fuels industry, with ethanol and biodiesel and increasingly—this is a bit of a sidebar but a connection—wind en-

ergy. Wind energy, in many of the rural areas of our State, is providing income to those regions.

I want to talk about the energy policy of this country, particularly as it is associated with agriculture. We need to look at the agricultural industry and what it can produce for a domestic fuel need. I am hopeful we can, over time, up the ethanol standard from 10 percent to a higher mixed blend. I would like to see us get to 15, 20 percent in the current vehicle fleet. I think this is doable and the technology is there and it is not harmful to anybody or any of the automobiles in the automobile industry.

A number of us signed a letter asking that fuel blend be upped and also that the refineries be held harmless in any up mixture of blending that might be considered. A number of refineries are sensitive about the MTBE problem, when they were pushed by Congress to put in MTBE, and later were held responsible for difficulties associated with that. I think we ought to hold the refinery industry harmless but allow the mixture to go up from 10 percent.

In my State, a number of ethanol plants have been built. They are cost effective and they continue to operate well. It is a dual-commodity business, where we are looking at the commodity price of oil and the commodity price of corn. We can do very well financially, but if they move against us, we can do poorly. We have the capacity to move the blend up to the 15 or 20 percent level.

It is my hope that down the road that will be something of consideration. That has been a big piece of the agricultural policy in this country—something that has been supported in the Agriculture appropriations bill, to increase research on ethanol and make the next generation out of cellulose or make everything a cellulosic stream, along with a grain stream of ethanol in the same ethanol plant, so we can mix those methods of making ethanol. That is an important endeavor that we can do.

On the Energy bill, there is a renewable energy standard put in it and not the cap-and-trade bill. I urge my colleagues, let's work on renewable energy where we can get good, strong bipartisan support and not a cap-and-trade system where it is going to hurt a number of States that are high energy using and producing States—particularly like my own State or others in the Midwest that are very dependent upon energy. This is a major tax on us. It taxes our electrical production that is coal based. Our State is in the 60 to 70 percent electric production. If we are taxing that, we are taxing people's utility bills. If we go with a renewable energy standard, we can seed and develop the growth of the wind energy business throughout a lot of the country, or biomass, which is helpful to agriculture, and not raise utility rates

and not do it by taxing and regulating but, rather, by innovation and investment.

Earlier this week, I met with a number of people from the wind energy business, and they were saying we have had a good run, but it is not going very well now with this economy and without a renewable energy standard. The one we put forward in the Energy Committee has a 15-percent renewable energy standard; 4 percent of that can be met by conservation and 11 percent by renewable production, biomass, wind, and even things such as algae biofuel production, which is very much in the experimental stage, but it is a developing technology.

If we can consider that and do the renewable energy standard portfolio, separate and distinct, and not blend it with cap and trade, I think we can come forward with a good, bipartisan bill that moves us forward off of our energy reliance on foreign fuels and into a cleaner environment. The tax and regulatory structure of a cap-and-trade system would be very harmful on a State such as mine.

Senator BINGAMAN chairs the Energy Committee. He did a markup over a period of 4 weeks that was one of the most impressive markups I have seen, where he worked with everybody to get this bill together on a renewable energy standard. We came out with a bipartisan energy bill on a renewable energy standard. Not everybody got what they wanted; nobody ever does, but it was bipartisan, and it wasn't a cap-and-trade bill, which really sends the bells off for a lot of high energy using States. That is doable, and it is what we ought to do rather than what the House did on cap-and-trade legislation, which passed by the thinnest of margins.

It was basically done completely on Democratic votes, without Republican votes; whereas, the renewable energy standard we passed had a mixture of Republican and Democratic votes and even some Democrats voted against the bill in committee. It is a bipartisan process and one that we can move forward with—not to mention other things.

I just met with a refinery group doing petroleum products—pavement and other things—in the United States. They look to get hit with cap-and-trade legislation—to the point they will be driven out of business. But we are still going to need asphalt in this country.

They are saying: Do you know where it is going to come from? It will come from China and India; they will make the asphalt. Big plants are being planned and built there in anticipation that we will do cap-and-trade legislation and they won't. Their CO₂ emissions are not counted and ours will be and they will sell us the product. That completely defeats the purpose of any

type of CO₂ mitigation—just driving the industry overseas. It is going to be more polluting there than here, and the CO₂ emissions that go into the atmosphere affect everybody. It is a bad idea for us to cause that to happen in our own legislation.

Industries are planning on doing that now, just building and moving the industries to China and importing the products back to the United States. That hurts us. That hurts our people, our job formation, and it doesn't help the environment. We have another way. We have a way, through this renewable energy standard, that can actually work.

I ask, as we consider the Agriculture bill and others, that we keep an eye on energy because it is one of the key cost drivers within the industry. It is also one of the key possibilities for us to grow it in the future and grow it for our country. That is why we put some provisions in this Agriculture appropriations bill that are supporting the energy industry in agriculture. But personally—and I know others have different opinions on this—I ask that we don't then hurt it with legislation later on that is not complementary toward it.

Mr. President, I yield the floor and suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BROWNBACK. I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

DR. ROBERT KELEHER

Mr. BROWNBACK. Mr. President, while we have time waiting to clear some amendments, I am also ranking member on the Joint Economic Committee. Today is the last day serving on that committee staff of Dr. Robert Keleher. I rise to recognize him briefly.

He is retiring after many years of valuable service in the Congress. Congressman Jim Saxton, when he was chairman, persuaded Bob to join the committee staff back in 1996, as chief macroeconomist after an already distinguished career. Bob's insightful mind, high standard, and extensive knowledge of economics made him a critical component of the staff for many years.

Before joining the committee staff, Bob's career, including serving as the senior macroeconomist of President Reagan's Council of Economic Advisers in 1985 and 1986, The head of Macro and International Economics at the Federal Reserve Bank of Atlanta, and as a special monetary and economic adviser to the Federal Reserve Board of Governors Vice Chairman Manuel Johnson. I think under anybody's standard, that is a very successful career as an economist.

Bob's contribution to the committee was broad based and valuable. In particular, his early and prolific work on the issue of inflation targeting represents almost the entire body of congressional analysis in this area from 1997 to 2006.

During his career, Bob also conducted research applying the classical principles of economics to tax policy. His research emphasized the important effects that marginal tax rates have on economic behavior, in particular the positive effects that reducing personal marginal rates have on creating incentives for healthy economic growth. We would be wise to take Bob's research findings to heart.

Yet a person's work career is not the only thing that defines him. Bob's work was first rate, relevant, and valuable to members of the committee. But Bob's character as a man, his judgment, and integrity only add to the reasons he will be missed.

Mr. President, I know my colleagues on the committee, from both the Senate and the House, join me in extending a heartfelt thanks to Bob for his years of service and in congratulating him upon his retirement.

Thank you, Bob. We wish you and your family the best. You have earned it. Godspeed.

Mr. President, I yield the floor.

I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. KOHL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

AMENDMENTS NOS. 2234, 2225, AND 2226 TO
AMENDMENT NO. 1908

Mr. KOHL. Mr. President, I ask unanimous consent to set aside the pending amendment to call up the following amendments which are at the desk: Leahy No. 2234, Murray No. 2225, and Bill Nelson of Florida No. 2226.

The ACTING PRESIDENT pro tempore. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Wisconsin [Mr. KOHL] proposes amendments en bloc numbered 2234, 2225, and 2226 to amendment No. 1908.

Mr. KOHL. Mr. President, I ask unanimous consent that reading of the amendments be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendments are as follows:

AMENDMENT NO. 2234

(Purpose: To provide funding for the Office of Inspector General to conduct inspections of the national organic program)

On page 8, line 2, before the period, insert the following: “: *Provided*, That of the amount made available for the Office of Inspector General to conduct investigations

such sums as are necessary shall be made available for the inspection of the national organic program established under the Organic Foods Production Act of 1990 (7 U.S.C. 6501 et seq.)."

AMENDMENT NO. 2225

(Purpose: To allow State and local governments to participate in the conservation reserve program)

On page 85, between lines 16 and 17, insert the following:

SEC. 7. Section 1001(f)(6)(A) of the Food Security Act of 1985 (7 U.S.C. 1308(f)(6)(A)) is amended by inserting "(other than the conservation reserve program established under subchapter B of chapter 1 of subtitle D of title XII of this Act)" before the period at the end.

AMENDMENT NO. 2226

(Purpose: To prohibit funds made available under this Act from being used to enforce a travel or conference policy that prohibits an event from being held in a location based on a perception that the location is a resort or vacation destination)

On page 85, between lines 16 and 17, insert the following:

SEC. 745. No agency or department of the United States may use funds made available under this Act to enforce a travel or conference policy that prohibits an event from being held in a certain location based on a perception that the location is a resort or vacation destination.

Mr. KOHL. I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. KOHL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

AMENDMENT NO. 2234

Mr. KOHL. Mr. President, the Leahy amendment No. 2234 has been approved on both sides, and I urge its adoption.

The ACTING PRESIDENT pro tempore. Is there further debate on the amendment?

If not, the question is on agreeing to the amendment.

The amendment (No. 2234) was agreed to.

Mr. KOHL. Mr. President, I move to reconsider the vote.

Mr. BROWNBACK. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

BOVINE TUBERCULOSIS

Ms. KLOBUCHAR. Mr. President, I seek to clarify with the chairman an effort across two States to address the growing issue of bovine tuberculosis.

I have asked the subcommittee to provide funds for a joint effort between the University of Minnesota and Michigan State University in support of research to prevent the spread of bovine tuberculosis and ultimately eradicate the disease from cattle, deer, and other wildlife. My colleagues from Michigan and I understand the negative economic

impacts bovine tuberculosis impose on our States' agricultural industries. In fact, agriculture is the second largest industry in both States, and this research is key to protecting our economies.

However, it is my understanding that this research effort may have been mistakenly associated with Michigan's ongoing eradication efforts.

Mr. KOHL. I thank the Senator from Minnesota for bringing to my attention this issue. I understand the importance of the joint research effort on bovine tuberculosis taking place at the University of Minnesota and Michigan State University.

I will work with Senator KLOBUCHAR to ensure that the bovine tuberculosis joint university research program is addressed as the fiscal year 2010 Agriculture appropriations bill moves through the legislative process.

Ms. KLOBUCHAR. Mr. President, I congratulate the chairman for crafting a strong fiscal year 2010 Agriculture appropriations bill and thank him for his efforts to assist me on this important initiative.

Mr. CONRAD. Mr. President, I rise to offer for the RECORD, the Budget Committee's official scoring of S. 1406, the Agriculture, Rural Development, Food and Drug Administration and Related Agencies Appropriations Act for fiscal year 2010.

The bill, as reported by the Senate Committee on Appropriations, provides \$23.1 billion in discretionary budget authority for fiscal year 2010, which will result in new outlays of \$17.7 billion. When outlays from prior-year budget authority are taken into account, non-emergency discretionary outlays for the bill will total \$24.9 billion.

The Senate-reported bill matches its section 302(b) allocation for budget authority and for outlays.

The bill is not subject to any budget points of order.

I ask unanimous consent that the table displaying the Budget Committee scoring of the bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1406, Agriculture, Rural Development, Food and Drug Administration and Related Agencies Appropriations Act, 2010

[Spending comparisons—Senate-Reported Bill (in millions of dollars)]

General purpose

Senate-Reported Bill:	
Budget Authority	23,050
Outlays	24,886
Senate 302(b) Allocation:	
Budget Authority	23,050
Outlays	24,886
House-Passed Bill:	
Budget Authority	22,900
Outlays	24,686
President's Request:	
Budget Authority	22,819
Outlays	24,743

Senate-Reported Bill Compared

To:	
Senate 302(b) allocation:	
Budget Authority	—
Outlays	—
House-Passed Bill:	
Budget Authority	150
Outlays	200
President's Request:	
Budget Authority	231
Outlays	143

Note: Table does not include 2010 outlays stemming from emergency budget authority provided in the 2009 Supplemental Appropriations Act (P. 1102).

Mr. KOHL. I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. KOHL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

MORNING BUSINESS

Mr. KOHL. Mr. President, I ask unanimous consent that the Senate proceed to a period of morning business, with Senators permitted to speak for up to 10 minutes each.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. KOHL. I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. CASEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. BEGICH). Without objection, it is so ordered.

HEALTH CARE REFORM

Mr. CASEY. Mr. President, I rise today to address a topic we have been debating for many weeks and months but especially the last couple of weeks, and that is health care. We have spent a good deal of time in Washington talking about the details of various provisions, the different ideas that have been introduced in bills and through the work of the committee.

I happen to be a member of the Health, Education, Labor, and Pensions Committee, known by the acronym "HELP." In our committee, we spent about 60 hours in hearings and 25 hours or so in discussions with our Democratic and Republican colleagues, working through some ideas. We accepted about 160 Republican amendments before our bill came out of committee. As you might know, the vote in committee was 13 Democrats voted for it, 10 Republicans voted against it. But despite that divide in the vote, there

was a good exchange on important issues.

Mr. President, you know as well as I do some of the issues with which we are wrestling. We want to try to provide the President a bill that, first of all, in a general sense, provides stability—stability with regard to cost, lowering the cost and also controlling cost, and stability with regard to choices. I believe what we are going to send to the President this fall will allow people to keep the health care they want to keep if they like what they have and are happy with it. But if you don't have any health care or you have a plan that costs too much or is of poor quality, you can choose another option. I hope the options will be both private plans and a public option, but that is a point of contention we will be talking a lot about as well.

Finally, we want to make sure there is quality, at long last that we reach a point where we are introducing quality measures into our health care system. Theories and proposals and strategies have been talked about too much and not enacted or put into the law. There are a lot of good examples by private companies across the country that have wellness policies, that invest in keeping people healthy so they do not have to spend money from our health care system treating a disease—getting out ahead of a problem, so to speak. And there is prevention, with all kinds of ways to save lives, to improve quality, and to save money as well.

I wanted to walk through some provisions in some detail, not to take too much time because I know we are at the end of our week.

First is the fundamental urgency of where we are now. I believe we cannot wait. We have talked this issue to death for the last 15 years especially, since the early 1990s. But even if you look at it beyond that, for about 60 years or so since President Truman introduced this idea of doing something substantial on health care, we have talked about it. The time for action is now. In my judgment, this is no longer just a nice thing to do. It is a necessity for our economy. We cannot even begin to imagine a strong economy over the next decade or longer without health care reform. More American families are unable to get the coverage they need. So where we are now, the status quo, is not just unacceptable, it is economically unsustainable as we debate this issue today.

Let me go to the second chart with that same concept about it being unsustainable, the status quo, staying on the road we are on. Premiums have doubled over the last 9 years, three times faster than wages. If we do nothing in the next 30 years, a third of our economy will be spent on health care. That is unsustainable. Health care spending will increase from \$2.5 trillion to \$7 trillion in the period between now and 2025.

This might be the most stunning set of numbers of all. Every week, 44,230 people lose their health insurance. We cannot say that enough. We cannot repeat that number enough. How can we build an economy, how can we be a successful, vibrant, growing economy when every single week 44,230 people lose their health insurance? We could chart this just from the time our committee voted the bill out of committee a couple weeks ago in the HELP Committee. Every week since then, more than 44,000 are losing their health insurance.

This is a Pennsylvania number, roughly a 3-year number. From January 2008 to December 2010, the projection is that 178,520 people will lose their coverage. For our State, the Commonwealth of Pennsylvania, that is unsustainable. We cannot grow an economy with those numbers.

Without reform—this is a State of Pennsylvania number—family coverage would cost \$26,679 in 2016, consuming 51.7 percent of projected Pennsylvania family median income. I don't know of any family in America, even a very wealthy family, who can pay half their income to health care, certainly not a middle-income family. But that is the road we are on. That is going to happen if we stay where we are and stay with the status quo. And that is 7 years away, that is not 25 or 30 or 50 years. In 7 years, staying on the road we are on means the average family in Pennsylvania is going to have to pay more than half their income to health care. To say that is unsustainable is something that is an assertion of an understatement by a mile.

Here are some of the themes I talked about before—stable costs, secure choices, and quality care. These are some of the themes we have to keep mentioning.

On the lower cost issue, preventing illness and disease, as I said before, does have a cost implication. It is not all the savings, but we know from research and experience that we will have savings.

Uncompensated care. This is a factor we can consider today. People think: I have health care. There are uninsured people out there, maybe 50 million people uninsured. Someone who has health care might think: I wish they could get coverage, but I am afraid if they get coverage, I am going to be paying more. That is a lot of the debate. But what we fail to realize sometimes in the debate is people are paying right now for the uninsured. Having uninsured Americans is not free. We all pay for that, and by one estimate, \$1,000 per year for every American who has health insurance.

One of the things we are trying to do in this legislation is to cover 97 percent, or one bill might have it at 95 percent, but above 90 percent of Americans is the goal for coverage.

I go to the next chart on reducing waste, fraud, and abuse. One estimate is we could save \$60 billion per year. Some say that is an estimate and that is just what one group said. Let's say it is wrong. Let's say it is not quite \$60 billion. What if it is off by a little? What if it is \$40 billion? That is still a lot of savings. What if it is \$30 billion? What if they are way off? That is a lot of savings every year. But we are not doing that today, preventing that kind of fraud, waste, and abuse.

Capping out-of-pocket limits. Even when they have the benefit of health care delivery, the out-of-pocket costs keep going up and up. So many small businesses worry about this when they are forced, if they want to employ people, to pay more and more, and forcing people to pay more out of their own pockets.

Small businesses and individuals join purchasing pools for lower rates. The reason that is important is because all the desks in this Chamber—every one of us has health care, really good health care, if you are a Federal employee. Thank goodness. I am blessed by that health care. My wife and my four daughters and I all benefit from that, just like every Member of the Senate and every Member of the House and everyone who works in the Federal Government. That is good. Guess what. The reason we have health care and choice of lots of options and plans is because we pool all those people, millions of Americans who happen to be connected in some way to the Federal Government pool. They are in one pool, and that keeps costs down. Why is that good enough for Senators and Congressmen, why is that available to them but small businesses don't have the same plan or the same option available to them? I think every small business in America should have the benefit—the cost-reduction benefit, at a minimum—that comes from pooling their resources and their individuals. That is part of the reform we are talking about. It is not a concept, it is in the bill. And that is important to emphasize.

Finally, if you like what you have, you can keep it. I said that earlier. We should keep saying that because it is important.

Ensuring coverage even when families move, lose a job, or have an illness—why in America, if we can figure out so many complicated things, can't we guarantee when someone loses their job they will not lose their health care? It does not make sense that we have accepted that, tolerated that inequity for so long.

“Gateway” is a word about which we have been hearing a lot. What does that mean? It is really a marketplace. It allows people to go to a Web site and find out what they want in their health care plan, not having to read hundreds

of pages of fine print that the best lawyers in America sometimes do not understand.

A marketplace is a gateway that allows families and businesses to compare rates, benefits, plans, both private and, we hope—we hope—a public option. Why can you go online and learn about a car or some other major purchase in your life and you can't do the same thing for health care? It is ridiculous, in a word. That is what this would allow—giving people the ability to do just that, just as they do for every other major purchase in their life.

Secure choices is important. Individuals will have their choice of doctors and individualized care. Government and insurance will not interfere in the doctor-patient treatment decisions. I know there is a lot of talk about government getting in the middle. It is just not true, and people know it is not true. We have to make sure people understand that is a fundamental building block of what we are talking about. We want people to be empowered, we want them to have more choices, and we want them to have the choice of both the public option and private plans as well.

I am almost done, Mr. President. My colleague from Arizona is here, and I want to make sure he has his time on Friday to speak.

This is bill language. Sometimes we talk about concepts, and the American people never get to the point of seeing in front of them language from a bill that is actually understandable and is focused on the real problem.

One of the biggest problems people in our State and a lot of States run up against is a preexisting condition prevents them from getting treatment. It is unbelievable that we have tolerated that for so long as well. Why can't we say we are going to pass a law that at long last says a preexisting condition will not prevent you, your son, daughter, spouse, or loved one from getting the care they deserve? We should not have to do it. Insurance companies have forced us to legislate, to make this the law.

Here is the language. It is not complicated. It is not mysterious. It is not lawyer language:

A group health plan and a health insurance issuer offering group or individual health insurance coverage may not impose any preexisting condition exclusion . . .

Let me read that again:

. . . may not impose any preexisting condition exclusion with respect to such plan or coverage.

That is in the bill. It is not a fuzzy concept, it is very specific.

One of the reasons I and so many others are saying we cannot stay on the path we are on, we cannot accept again and again the status quo, is because of that—because the status quo means “may not impose any preexisting condition exclusion” does not become part

of the law and we have to continue to deal with the horrific and inexcusable nightmare of a preexisting condition preventing someone in America, someone who might be very sick in America, from getting treatment, from getting the benefit of health care they ought to have a right to expect.

So when we pass this bill, we have to make sure people understand that is in the bill, and that is very specific and it is very pointed and focused on a real problem for families.

Finally, children. One of the goals here, obviously, is to make sure that no child, especially poor children and those with special needs, is worse off as a result of this bill. Children are different from adults. They can't be treated the same way. They need strategies and treatments that adults don't have. They have different health care needs. It is critical that children, especially those who are disadvantaged, who happen to be poor, who have special needs, get the highest quality care, which they deserve. That is why I have a resolution as part of that which I have introduced.

Finally, with regard to children—no child worse off. Because we want them to grow into healthy and productive adults, they need to get the highest quality care throughout their childhood. We want them to get from this picture in a crib to that picture getting a diploma. So we want them to have the kind of quality health care that will allow us to prevent disease and illness in a child early enough which will allow them to lead a productive life and get ready to contribute to our great economy and to our great country.

There is a lot to do. There is still more work to do, but we need to continue to talk about what is in these bills and to have a vigorous debate. We are a long way from getting this done, but I believe we are on the right track. I believe it is not only important, but unless we do this, I think we are heading down a path that is unsustainable for our economy, for our country, and especially for our families.

Mr. President, I yield the floor, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. McCAIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

HOUSE DEFENSE BILL AND EARMARKS

Mr. McCAIN. Mr. President, I rise to talk for a few minutes about the actions taken by the House of Representatives yesterday when they passed the Defense appropriations bill. It is not a

small piece of legislation. It provides \$636 billion for defense, and it avoided one veto fight by stripping out funding for advanced procurement of the F-22 fighter jet, but it chose to ignore veto threats over funding for an alternative engine for the F-35 Joint Strike Fighter and the VH-71—incredibly, the VH-71 Presidential helicopter. The House bill provides \$560 million to continue pursuing an alternative engine and \$485 million for continuation of the VH-71 helicopter. The VH-71 helicopter is the Presidential helicopter, which Secretary Gates has, I think very accurately, derided as one of the most outrageous examples of overspending for any system the Defense Department has ever acquired. The bill also provides \$674 million for three C-17 cargo aircraft, not requested in the administration's budget. It has been determined time after time that there is no need for additional C-17 aircraft.

So what did they do in return for continuation of things like a Presidential helicopter that costs more than a 747 and all of these other porkbarrel projects? Well, the House bill reduces funding by \$1.9 billion for our request for MRAPs—for MRAPs, the vehicles that are protecting young men and women who are fighting in Iraq and Afghanistan. They reduce the number from what the administration thinks we need—5,244—to 2,000. It is remarkable.

But what I really wanted to talk about for a minute is the 1,100 earmarks totaling \$2.8 billion. Of those, 540, totaling \$1.3 billion, are slated to go to specific private companies without competition. Remarkable—\$1.3 billion. You know, the bill may have language saying funding should be competed, but in reality it is not the case when a specific company is identified in report language.

Also incredibly, there are 70 earmarks in the bill for former clients of the PMA Group—the people whose offices have been raided and shut down. It is currently under investigation by both the Justice Department and the House ethics committee.

Concerning earmark reform, President Obama said:

Earmarks must have a legitimate and worthy public purpose. Earmarks that Members do seek must be aired on those Members' web sites in advance, so the public and press can examine them and judge their merits for themselves. Each earmark must be open to scrutiny at public hearings, where Members will have to justify their expense to the taxpayer.

None of that has happened. The earmarks in the House fail woefully in meeting scrutiny at public hearings. As Representative JEFF FLAKE—a man of great courage and of incredible integrity—so rightfully pointed out when he addressed the earmarks in the bill:

These earmarks receive scant scrutiny by the House Appropriations Committee. The committee's markup of the bill lasted all of

18 minutes. Given the way this bill has been earmarked, you'd never know that serious ethical questions have been raised about this process. Simply put, Members of Congress should not have the ability to award no-bid contracts. Even worse, many times the recipients of these earmarks are campaign contributors. The practice has created an ethical cloud over Congress, and it needs to end.

Congressman FLAKE talked about the ethical cloud over Congress. We know about PMA. Every day, there is a new story about one of these earmarks. I would like to cite two quick examples.

Mr. President, I ask unanimous consent to have printed in the RECORD an article headlined "nextgov," entitled "Software company won earmarked funds for work on military health records," and the other article from Politico entitled "Exclusive: Earmark critic steered cash to blimp research."

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From NextGov, July 29, 2009]

SOFTWARE COMPANY WON EARMARKED FUNDS
FOR WORK ON MILITARY HEALTH RECORDS
(By Bob Brewin)

Adara Networks, the company that is the subject of a Defense Department employee's allegations that it received important software code in advance of winning a sole-source contract to provide hardware and software for a new military electronic health record system, has only between 20 and 50 employees and revenues of \$8 million a year, according to online records. But the company has powerful friends in Washington.

Sen. Thad Cochran, R-Miss., inserted earmarks in the fiscal 2008 and 2009 Defense appropriations measures funding work by Adara on Defense health record systems. He also has a pending earmark for Adara in the 2010 Defense appropriations bill.

According to the Center for Responsive Politics, Adara has paid \$240,000 in lobbying fees to Gage LLC, a consulting and government affairs firm whose partners include former Sen. Conrad Burns, R-Mont. The firm is headed by Burns' former chief of staff, Leo A. Giacometto.

The bulk of the fees, \$160,000, went to Gage last year, making Adara one of the company's biggest sources of revenue in 2008. The Adara lobbying tab from Gage last year matched the fee paid to the lobbying firm by VeriSign, an Internet security company that had revenues of \$255 million in the first quarter of this year.

According to a database of federal contract awards, Adara won Defense contracts valued at \$7.2 million in 2007 and \$13.7 million in 2008.

Cochran's earmarks steered \$4 million to Adara last year for work on what was described as a "next-generation networking electronic medical records project" and \$1.1 million in 2009 for the Strategic/Tactical Resource Interoperability Kinetic Environment (STRIKE) project. Cochran has sought \$10 million in Adara funding for the STRIKE project in the 2010 Defense appropriations bill, which is pending in the Senate.

The STRIKE project, according to Cochran's office, is designed to help the Defense Department solve problems of interoperability, scalability, performance and security in its medical information technology systems.

Internal Military Health System briefings show that Adara's NPX routers, which the company says are capable of moving data around faster than rival products, sit at the heart of the new Military Health System electronic record architecture. The routers serve as a bridge between Defense's AHLTA electronic health record system, the Clinical Data Repository that stores more than 9 million military health records, and VA's electronic health record system.

An internal e-mail NextGov obtained shows that the Military Health System tapped Adara to provide software as well as hardware for a new enterprise architecture, including a means of exchanging data and a graphical user interface to view medical records.

In that e-mail, Maj. Frank Tucker, chief of product development for the Defense Health Information Management System at MHS, charged he was directed to provide Adara with software source code and documentation, which he viewed as unethical, because this would give the company a leg-up in any competition.

Tucker alleged Adara was awarded a sole-source contract by the Military Health System, but did not specify the contract's value.

Adara has not returned calls seeking comment from NextGov for the past three days. Cochran's office did not respond to a request for comment placed Wednesday.

[From Politico, July 30, 2009]

EXCLUSIVE: EARMARK CRITIC STEERED CASH
TO BLIMP RESEARCH
(By John Bresnahan)

Rep. Pete Sessions—the chief of the Republicans' campaign arm in the House—says on his website that earmarks have become "a symbol of a broken Washington to the American people."

Yet in 2008, Sessions himself steered a \$1.6 million earmark for dirigible research to an Illinois company whose president acknowledges having no experience in government contracting, let alone in building blimps.

What the company did have: the help of Adrian Plesha, a former Sessions aide with a criminal record who has made more than \$446,000 lobbying on its behalf.

Sessions spokeswoman Emily Davis defends the airship project as a worthwhile use of federal funds and says it could eventually lead to thousands of new jobs in Sessions's Dallas-area district.

But the company that received the earmarked funds, Jim G. Ferguson & Associates, is based in the suburbs of Chicago, with another office in San Antonio—nearly 300 miles from Dallas. And while Sessions used a Dallas address for the company when he submitted his earmark request to the House Appropriations Committee last year, one of the two men who control the company says that address is merely the home of one of his close friends.

Jim G. Ferguson IV—the younger half of the father-son team behind Jim G. Ferguson & Associates—told POLITICO that he and his father are trying to build an airship with a "high fineness ratio" that can be used in both military and civilian applications.

Fineness ratio is the technical term for the relationship between an airship's length and its diameter; the higher the fineness ratio, the longer and more slender the airship is. A blimp with a very high fineness ratio could fly faster and be able to stay aloft longer—the holy grail for airship designers during the past century.

Yet Ferguson acknowledged that neither he nor his father has a background in the de-

fense or aviation industries, nor any engineering or research expertise.

A search of publicly available records shows no history of the Fergusons ever being involved with the airship industry other than their attendance at a February 2005 Pentagon conference on the subject.

Jim G. Ferguson IV said in an interview that he and his father "were business people" and had acquired the patents for building an advanced airship prototype. He said that the two men are playing a supervisory role in the project and "have obtained world-class experts to work for us."

According to a statement that Sessions included in the Congressional Record last September, slightly more than half of the \$1.6 million earmark was to go toward research and engineering costs. The remainder was for overhead and administrative costs.

"This particular project is focused on study and analysis of the high fineness ratio multimission airship for implementation and deployment in support of the persistent [Defense Department] wide shortfall in intelligence, surveillance and reconnaissance capability," Ferguson said in a statement.

The elder Ferguson declined to talk with POLITICO. His son would not provide details on his professional career but did say that he first came to Washington in 1991 to work in the Transportation Department under Secretary Samuel Skinner. He then did advance work for the White House when Skinner became White House chief of staff under President George H. W. Bush.

On Federal Election Commission forms, Ferguson's occupation has been listed at various times as lobbyist, rancher or self-employed investor. When asked about his activities since the first Bush administration, Ferguson said he was "just working, doing a bunch of different stuff."

He has also donated money to Sessions and other Republicans. FEC records show that Ferguson contributed \$5,000 to Sessions's leadership PAC in October 2007. Overall, Ferguson and his father have given \$18,500 to GOP lawmakers over the past six years.

Ferguson declined to describe his relationship with Plesha.

"I've known him for a long time," Ferguson said. "As you know, [Washington] is a small town."

Likewise, Plesha would not comment about his work with the Fergusons or about any interactions he may have had with Sessions or his office concerning the earmark.

"As a policy, I never discuss anything regarding my clients other than what is already publicly available or required to be disclosed by law—especially for a client such as this where their technology is very much sought after by the larger defense and corporate shipping firms," Plesha said in a statement provided to POLITICO.

In 1997—before going to work for Sessions—Plesha was arrested for illegal possession of a handgun in Washington, after he shot a man who was burglarizing his apartment, according to court documents. Plesha claimed he had acted in self-defense, but the burglar said Plesha shot him three times in the back as he was running away. Plesha pled guilty to the handgun charge, was sentenced to 18 months' probation and ordered to do 120 hours of community service.

Within a year, he was working as a campaign manager for Republican House candidate Charles Ball, who was running against then-Rep. Ellen Tauscher (D-Calif.).

In that campaign, the FEC has said that Plesha created a fake Democratic committee to attack Tauscher. The FEC said the committee sent out 40,000 letters and made 10,000

phone calls to Democratic voters in Tauscher's district just prior to the 1998 midterm elections suggesting that Democratic Rep. George Miller was opposing Tauscher's reelection.

But Miller was, in fact, backing Tauscher. The FEC launched an investigation. And in a 2004 news release, the FEC said that Plesha had not only "authorized and distributed the fabricated letters and calls" but also "knowingly made false statements to the FEC" about them, "denying involvement in or knowledge of this scheme."

According to the FEC and court documents, Plesha pled guilty to lying to investigators in the case. He was fined \$5,000, placed on three years' probation and ordered to do an additional 160 hours of community service, according to federal court documents. He also entered into a "conciliation agreement," under which he was to pay a \$60,000 civil penalty, the FEC said.

Lobbying disclosure records show that, beginning in November 2005, Ferguson and Plesha lobbied on behalf of Sphere Communications, a division of NEC Corp., the Japanese telecommunications giant. Plesha also worked for a time for a San Francisco-based defense contractor whose employees, FEC records show, had contributed heavily to Sessions and his PAC.

By 2006, lobbying disclosure forms show that Plesha was working for the Fergusons. The records show that he collected \$51,400 in fees from the Fergusons during the last six months of 2006; nearly \$292,000 more in 2007; and \$64,500 in 2008.

The records show that the Fergusons are, by far, Plesha's most lucrative lobbying clients.

Sessions's office said Plesha wasn't given any special access to his former boss.

"His role is clear: He and his client presented a position (i.e., briefing) to the congressman and his staff," said a Sessions aide. "As with any project request, Congressman Sessions evaluates the merits of the project and accordingly makes a decision to either support or decline the request. Based on the project's represented merits, . . . Sessions decided to submit the request to the Appropriations Committee for its review and determination."

And the Texas Republican still believes in the project, his staff said.

"Based on briefings that Congressman Sessions and his staff have received, projected applications of the technology include military surveillance, fuel-efficient military cargo transportation (especially into areas without adequate infrastructure) and missile defense," Davis, the congressman's spokeswoman, said in a statement.

Davis also noted that Sessions has supported a moratorium on all earmarks since the start of the 111th Congress, after the earmark for the Fergusons was approved.

MR. MCCAIN. Quoting from the first article:

Adara Networks, the company that is the subject of a Defense Department employee's allegations that it received important software code in advance of winning the sole-source contract to provide hardware and software for a new military electronic health record system, has only between 20 and 50 employees and revenues of \$8 million a year. But the company has powerful friends in Washington. Senator Thad Cochran . . . inserted earmarks in the fiscal 2008 and 2009 Defense appropriations measures funding work by Adara on Defense health record systems. He also has a pending earmark for Adara in the 2010 Defense appropriations bill.

According to the Center for Responsive Politics, Adara has paid \$240,000 in lobbying fees to Gage LLC, a consulting and government affairs firm whose partners include former Senator Conrad Burns, R-Montana. The firm is headed by Burns' former Chief of Staff, Leo A. Giacometto. The bulk of the fees, \$160,000, went to Gage last year, making Adara one of the company's biggest sources of revenue in 2008. The Adara lobbying tab from Gage last year matched the fee paid to the lobbying firm by VeriSign, an Internet security company that had revenues of \$255 million in the first quarter of this year.

According to a database of Federal contract awards, Adara won defense contracts valued at \$7.2 million in 2007 and \$13.7 million in 2008. Cochran's earmarks steered \$4 million to Adara last year for work on what was described as a "next-generation networked electronic medical records project" and \$1.1 million in 2009 for the Strategic/Tactical Resource Interoperability Kinetic Environment Project. Cochran has sought \$10 million in Adara funding for the STRIKE project in 2010.

An internal e-mail NextGov obtained shows that the military health system tapped Adara to provide software as well as hardware for a new enterprise architecture, including a means of exchanging data and a graphical user interface to view medical records. In that e-mail, Major Frank Tucker, chief of product development for the Defense Health Information Management System at MHS, charged he was directed to provide Adara with software source code and documentation, which he viewed as unethical because this would give the company a leg up in any competition. Tucker alleged Adara was awarded a sole-source contract by the Military Health System, but did not specify the contract's value.

There should be a full investigation of that.

Quoting from the Politico story:

Representative Pete Sessions, the chief of the Republicans' campaign arm in the House, says on his Web site that earmarks have become "a symbol of a broken Washington to the American people." Yet in 2008, Sessions himself steered a \$1.6 million earmark for dirigible research to an Illinois company whose president acknowledges having no experience in government contracting, let alone in building blimps. What the company did have: the help of Adrian Plesha, a former Sessions aide with a criminal record who has made more than \$446,000 lobbying on its behalf.

But the company that received the earmarked funds, Jim G. Ferguson & Associates, is based in the suburbs of Chicago, with another office in San Antonio—nearly 300 miles from Dallas. And while Sessions used a Dallas address for the company when he submitted his earmark request to the House Appropriations Committee last year, one of the two men who control the company says that address is merely the home of one of his close friends.

. . . Ferguson acknowledged that neither he nor his father has a background in the defense or aviation industries, nor any engineering or research expertise.

Finally, it goes on:

. . . more than half of the \$1.6 million earmark was to go toward research and engineering costs. The remainder was for overhead and administrative costs.

This is the result—and there are myriad examples—of this earmarking

which goes on and on in this year's Defense appropriations bill from the House, and there will be more from the Senate. There are 1,102 earmarks. We can't do that. We have to stop. The American people are very tired of it.

Let me remind my colleagues again about PMA, of which there are some 70 earmarks. The PMA Group was a DC lobbying firm with deep ties to Capitol Hill and a reputation for securing lucrative earmarks for its clients, especially defense earmarks. It boasted more than \$15 million in revenue last year. PMA Group clients reportedly received \$300 million in defense earmarks for fiscal year 2008 and \$317 million for fiscal year 2009. PMA Group and its clients spread around a lot of campaign contributions in an attempt to curry favor with lawmakers. According to one report, the firm had been credited with \$1.8 million in contributions since 2001, and that is just the members of the Defense Appropriations Committee.

Last November, the Federal Bureau of Investigation raided PMA's offices and the home of its founder, Paul Magliocchetti. According to news reports, prosecutors were initially focused on whether Mr. Magliocchetti used a Florida wine steward and a golf club executive as a front to funnel illegal donations to lawmakers. The Washington Post examined campaign contributions reportedly given by employees of the PMA Group and found listed in donor records "several people who were not registered lobbyists and did not work for the lobbying firm," including a 75-year-old California man who had never even heard of the firm.

Since then the Department of Justice has raided the offices of a number of PMA clients and their business partners. One former PMA client is accused of giving kickbacks to an ex-Air Force contracting official. A Federal grand jury reportedly subpoenaed records from one U.S. Representative's congressional and campaign offices, and the FBI is interviewing his staffers.

It upsets my colleagues when I talk about corruption in earmarking. I know it is very painful. I do not question the integrity of any of my colleagues. But when something like this PMA situation goes on, the stories are myriad of this influence of special interests at a time where we have nearly 10 percent unemployment in the United States of America, people not able to stay in their homes, people not being able to keep their jobs. If it was ever unacceptable, which it always was, it certainly is unacceptable now.

At some point, the Defense appropriations bill will come to the floor of the Senate. If it is anything like the Defense appropriations bill the House of Representatives passed yesterday, we are going to have a long process because we have to bring this practice to an end.

During the campaign, the President of the United States said we would review every appropriation line by line and do away with those that were unnecessary and unwanted and a waste of the taxpayers' dollars. There is no greater opportunity than there is now.

I appreciate the President's involvement in ending production of the F-22, his involvement in saying the alternate engine is unsustainable for the F-35—continued billions of dollars of funding. But the earmarks are also billions of dollars of waste of the taxpayers' dollars. The earmarks are what bred corruption and the reason we have former Members of Congress residing in Federal prison. It has to be stopped. No contract should be allowed on a non-competitive basis to be appropriated by the Congress of the United States.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, it is my understanding we are in a period of morning business.

The PRESIDING OFFICER. That is correct.

SMALL BUSINESS/SBIR

Mr. DORGAN. Mr. President, I applaud the Small Business and Entrepreneurship Committee for their efforts in putting together a thoughtful, balanced reauthorization of the Small Business Innovations Research—SBIR—and Small Business Technology Transfer—STTR—programs.

I know the committee is in negotiations with the House trying to reach a good reconciliation with the right parameters. I hope they do, so that we have these programs in place for years to come instead of another short-term extension.

SBIR was set up in 1982 and requires 11 Federal departments and agencies like the Department of Defense, the National Institutes of Health and the National Science Foundation to set aside 2.5 percent of their research and development budgets for small businesses, which is over \$2 billion per year. STTR sets aside another 0.3 percent of R&D for small businesses to work in partnership with university and institutional researchers. Both programs have been highly successful, helping propel small business growth, and develop and commercialize the innovations that are the backbone of our economy.

I wanted to share a few facts about small business for the record.

According to the Small Business Administration, small businesses annu-

ally create between 60 and 80 percent of the net new jobs in America.

Small businesses produce on average 13 to 14 times more patents per employee than large patenting firms.

Small business employs about 38 percent of the scientists and engineers in America, up from only 6 percent in 1978.

Despite all this growth and stellar track record, small business receives only about 4 percent of Federal extramural research dollars. That needs to change. Small business has proven they can do Federal R&D as well as or better than large business, and they deserve more space at the table.

Small business is going to be the engine that pulls the country out of this recession, like it has so many times in the past. Looking beyond the recession, small business will again develop the innovative technologies in which America consistently leads the world. The Senate bill wisely supports and extends our support for small business's role in growing a vibrant national economy.

In my own State of North Dakota, SBIR has helped fund a number of innovations, and I wanted to mention a few of them.

The Technology Applications Group of Grand Forks, located in the Red River Valley Research Corridor, invented the Tagnite coating system through Army and Navy SBIR funds. The technology allows the military to coat magnesium alloys for parts, ships, helicopters and airplanes in a way that is much less toxic than old processes, cuts down on corrosion, and saves on maintenance.

Agsco of Grand Forks received an SBIR grant that led to development of the SCOIL and SUN-IT II products that enhance crop herbicide effectiveness. Agsco turned their SBIR grants into two products with a great deal of commercial impact.

Dakota Technologies of Fargo has received multiple SBIR grants, including two that led to development of BEAM, or ballast exchange assurance meter, which measures ballast water in ships to make sure they don't contain harmful species or contaminants. BEAM is currently in a pilot program with the Coast Guard.

Back in 2002, I secured funding to develop telepharmacy technology to connect pharmacists directly with patients and pharmacy technicians regardless of their location. Technologies like this have been a boon to rural communities because they allow them to compete on a level playing field with urban areas.

The USDA just awarded Telepharmacy Concepts of Dickinson, ND, with an \$80,000 Phase I SBIR award that will allow them to research whether telepharmacy technology could be used for medication therapy management, which is a way to provide patient edu-

cation, increase medication compliance and improve health care outcomes.

Praxis Strategy Group of Grand Forks has received SBIR awards nine times, including grants from the USDA to develop strategic processes like the High Performance Community Initiative and the Enterprise Homesteading Program that help communities, especially small communities, attract entrepreneurs, develop dynamic economies, and market themselves.

While I am happy with the Senate reauthorization, I am concerned about some of the provisions in the House version we are trying to reconcile it with.

First, the House bill opens participation in SBIR to companies that are majority-owned by venture capital firms. I have nothing against venture capital companies, but the small businesses that they own have already shown they can successfully attract capital in the private market.

SBIR was intended to help small businesses without the connections available to do that. I think the House bill is trying to fix something that isn't broken.

Second, given the long-term success of SBIR and STTR, I think it only makes sense to increase the share of agency funds set aside for small business as the Senate's bill gradually does.

American business has changed dramatically since SBIR was created. Since 1978, the share of scientists and engineers working for small businesses has, as I said, increased from 6 to 38 percent. Funding for SBIR and STTR needs to increase to reflect that reality. I am concerned that the House bill keeps their allocations where they have been for 27 years, despite the successful track record of the programs. Given the figures I have quoted previously, increasing the set-aside from 2.5 to 3.5 percent is the very least we should do.

Small business is the core of our country's economy, and we have here a program that has a strong track record of encouraging growth and innovation in that area. I urge the program's reauthorization with the principles of Senate bill S. 1233.

ZERO TOLERANCE FOR VETERANS HOMELESSNESS ACT

Mr. BOND. Mr. President, I wish to speak on the introduction of S. 1547—the Zero Tolerance for Veterans Homelessness Act. I am very proud to be an original cosponsor of this legislation and to join my good friend, Senator JACK REED, along with Senators TIM JOHNSON and PATTY MURRAY, on addressing the tragedy of homelessness among our Nation's veterans. My three colleagues have been steadfast in their resolve to address the needs of veterans, including the tragedy of homelessness, and I commend them.

Senator REED has been a strong and committed leader on affordable housing and homeless issues and his leadership played a strong role in the recent enactment of the historic Homeless Emergency Assistance and Rapid Transition to Housing Act or HEARTH Act. I am honored to join him again.

Like the HEARTH Act, the Zero Tolerance for Veterans Homelessness Act builds on our work over the past several years by focusing on the importance of permanent supportive housing. Further, it takes important steps to break down the barriers between the Departments of Veterans Affairs, VA, and Housing and Urban Development, HUD, to ensure that veterans receive the quality services and housing they deserve and need.

The most notable element of the legislation is the authorization of HUD-VA Supportive Housing or HUD-VASH rental-assistance vouchers. Working with Senator PATTY MURRAY, new HUD-VASH vouchers have been funded over the past 2 years. While other HUD homeless-assistance programs serve veterans, HUD-VASH is the only permanent housing program that is specifically targeted to veterans and tied to veteran-specific supportive services from the VA.

We have been fortunate to fund 10,000 new vouchers each year but with over 130,000 homeless veterans on any given night and thousands more who are at risk of becoming homeless, we must do more and this bill does exactly that.

As I noted, there are over 130,000 homeless veterans in America. Sadly, veterans make up a significant and disproportionate amount—over 20 percent—of the country's homeless population. Many of these veterans are from the Vietnam war. Even more sad and stunning is the fact that the number of homeless Vietnam-era veterans is greater than the number of service persons who died during that war.

But the face of homeless veterans is changing and is not limited to those who fought in Vietnam. We also are seeing homelessness increase among Desert Storm veterans and veterans returning from the ongoing conflicts in Iraq and Afghanistan.

In addition, recent reports are finding a troubling trend of homelessness among female veterans. The VA estimates that the number of homeless veterans who are female has doubled over the past decade. And many homeless female veterans carry the burden of being single parents.

This bill that I cosponsor sends a loud and clear message that homelessness among our veterans is unacceptable and intolerable.

As I have stated in previous speeches, homelessness is thankfully no longer a hopeless situation. We have learned that permanent housing tied to supportive services, such as mental health care and job training, was the antidote

to homelessness. Nevertheless, we must continually adjust our programs to meet the changing composition of homelessness.

Before closing, I comment on a couple of other items that will help to prevent and end homelessness among our Nation's veterans.

First, we must improve the coordination between the Department of Defense, DOD, and the VA. Specifically, DOD, and VA can prevent homelessness among veterans by improving discharge planning and coordination of the medical programs between the two Departments.

Second, we must find ways to improve the integration of HUD-VASH programs with services that deliver job training, employment, education, and health care. Specifically, we need to integrate fully the Department of Labor's Homeless Veterans' Reintegration Program and programs run by the Department of Health and Human Services' Substance Abuse and Mental Health Services Administration.

The U.S. Interagency Council on Homelessness was reactivated to address the coordination between Federal agencies. It is my hope that the ICH will work within existing authorities to address the DOD and other service integration issues that I have raised, and come forward with specific recommendations for the Congress to consider. I also look forward to working with Senator REED and others to address these issues as we move this bill through the legislative process.

Again, I thank Senator JACK REED for his leadership and commitment on issues related to housing, veterans, and national security. I strongly urge my colleagues to support this bipartisan legislation.

TRIBUTE TO COMMAND SERGEANT MAJOR MICHAEL W. GLAZE

Mr. GRAHAM. Mr. President, I rise today to recognize and pay tribute to Command Sergeant Major Michael W. Glaze, the Regimental Command Sergeant Major of the Judge Advocate General's Corps, United States Army, for his many years of exceptionally meritorious service to our country. Command Sergeant Major Glaze will retire from the United States Army on September 1, 2009, having completed a distinguished 32-year military career. We owe him a debt of gratitude for his many contributions to our Nation and the legal profession, particularly during operations in support of the Global War on Terror.

He was born in Frankfurt, Germany in 1960, where his father was stationed at the time, his father retired from the U.S. Army with the rank of Sergeant Major. He enlisted in November 1977, completed Basic Training at Fort Knox, Kentucky, Advanced Individual Training at Fort Benjamin Harrison,

Indiana and Airborne School at Fort Benning, Georgia. His initial assignments as a Legal Specialist were at Fort Bragg, North Carolina, and Schofield Barracks, Hawaii. He then returned to Fort Bragg as a Legal Noncommissioned Officer. Recognized for his superior performance, he then served in the Office of the Chief of Staff of the Army, where he deployed to Kuwait. Following redeployment, he served as the Chief Paralegal at the Fort Belvoir legal office and at the United States Army Special Operations Command at Fort Bragg. In July 1998, Command Sergeant Major Glaze was selected as the Chief Paralegal for XVIII Airborne Corps at Fort Bragg, North Carolina, where he deployed on several occasions to Iraq and Afghanistan to check on the welfare of his Soldiers.

Command Sergeant Major Glaze was selected to be the 10th Regimental Sergeant Major for the Judge Advocate General's Corps in 2004. On the 2nd day of October 2006, he was appointed to Command Sergeant Major, the first Command Sergeant Major in the 234-year history of the United States Army Judge Advocate General's Corps. As the Command Sergeant Major of the Judge Advocate General's Corps from March 2004 to September 2009, he was the principal advisor to the Judge Advocate General of the Army and the Deputy Judge Advocate General regarding all enlisted matters for a multi-component force. Additionally, he expertly managed the final stages of the Noncommissioned Officers Academy at the Judge Advocate General's Legal Center and School, and directed the final process for professional accreditation.

Command Sergeant Major Glaze's military awards and decorations include: Meritorious Service Medal, Army Commendation Medal, Army Achievement Medal, Good Conduct Medal, National Defense Service Medal, Southwest Asia Service Medal, Armed Forces Service Medal, Humanitarian Service Medal, Military Outstanding Volunteer Service Medal, Noncommissioned Officer Professional Development Ribbon, Army Service Ribbon, Overseas Service Ribbon, the Kuwait Liberation Medal and he is also authorized to wear the Parachutist Badge.

A Soldier who embodies the very best of Army Values and the Noncommissioned Officer's Creed, Command Sergeant Major Glaze trained and mentored a Noncommissioned Officer Corps that truly is the backbone of the Judge Advocate General's Corps. His integrity is impeccable, his counsel is widely sought, and he remains deeply committed to his Soldiers and their families. He is a leader whose honor and candor were the hallmark of a career spent in selfless service to the Judge Advocate General's Corps, and

the United States Army. I know all my colleagues join me in saluting Command Sergeant Major Michael W. Glaze and his wife, Debbie, for their many years of truly outstanding service to the Judge Advocate General's Corps, the United States Army, and our great Nation.

CAP AND TRADE

Mr. BARRASSO. Mr. President, I rise today to highlight the impact of cap and trade legislation on American agriculture.

Mr. President, the House and Senate Western Caucuses yesterday hosted a hearing entitled, Cap and Trade: Impact on Jobs in the West and the Nation. Jim Magagna, the Executive Vice President of the Wyoming Stock Growers Association testified at the Hearing.

I want to thank Jim for all he has done for agriculture in Wyoming. I also ask unanimous consent that his statement from yesterday's hearing be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

TESTIMONY OF JAMES H. MAGAGNA, EXECUTIVE VICE PRESIDENT, WYOMING STOCK GROWERS ASSOCIATION

Co-Chairmen and Members of the Senate Western Caucus and House Western Caucus:

I am Jim Magagna, Executive Vice President of the Wyoming Stock Growers Association (WSGA), the 137 year old voice of the Wyoming cattle industry. I am also a life-long sheep producer and former president of the American Sheep Industry Association and the National Public Lands Council. I appreciate the opportunity to appear before you today to share my perspective on the impacts of cap and trade legislation on jobs in the agricultural sector, particularly in the West.

My comments today will focus on four primary areas of cap and trade impacts on agriculture: 1) Input costs; 2) Prices received; 3) International trade and competition; and 4) unintended environmental consequences. I will also briefly discuss the role of proposed agricultural offsets. In addition to providing an analytical overview, I will attempt to put a personal face on these issues by introducing comments provided to me by Wyoming agricultural producers.

JOBS

It is difficult to ascertain actual numbers of potential lost jobs and lost new employment opportunities due to the impact that cap and trade legislation would have on agriculture. As smaller agricultural production enterprises succumb to the cost-price squeeze exacerbated by the impacts of cap and trade, farmers and ranchers will be forced to enter the non-agricultural job market in increasing numbers. This will particularly impact our young producers—those who represent a bright future for American agriculture. In the United States agricultural jobs are "green jobs" contributing to the sustainable management of our natural resources.

A decline in the number and size of agricultural enterprises has a direct impact on jobs in supporting industries. These include

animal pharmaceuticals, fertilizers, feeds, farm equipment, fencing and tack. While many of these jobs are located in manufacturing centers, a significant number are sales and support positions in the field.

As agriculture declines so do our small western communities. In many small towns in Wyoming the survival of local businesses—the tire shop, repair service, bank, grocery store—is dependent on the economic strength of the agricultural sector. I am confident that this is true in many of your states as well. These losses in turn affect the public sector—schools, senior centers, hospitals and clinics. The result is both a loss of jobs and a loss of a culture and way of life.

INPUT COSTS

Agriculture is heavily energy dependent. While the energy needs of cultivated crop production are generally acknowledged and serve as the basis for most studies, the energy costs of those engaged in livestock production, in particular range sheep and cattle operations, are seldom analyzed. Livestock production and native hay production are the primary agricultural enterprise in many of our western states. In Wyoming livestock production accounts for over 82% of total cash receipts from agriculture.

The overwhelming prices of diesel, gasoline and propane in 2008 provide us with a preview of the impacts of high energy costs. Many of my members who had already taken all feasible steps to drastically reduce their input costs began to plan their exit from production agriculture. Fortunately, the relief in energy prices in 2009 has given them some renewed optimism. The primary energy focused input costs for agriculture include: direct purchases of fuels and electricity (13%); fertilizer & pesticide costs (7%); feed costs (25%); and transportation/storage costs (1%). According to the latest available USDA NASS data these components constituted over 45% of total purchased inputs excluding seed and livestock. As one WSGA member recently noted, "These costs are already stifling growth and regular, necessary maintenance items. Any additional costs imposed by government are obviously another blow to any size business."

The EPA analysis of HR 2454 conservatively projects the impact of cap and trade legislation on energy prices for the period from 2015 to 2050. Price increases for electricity range from 10.7% in 2015 to 35.2% in 2050. For natural gas the corresponding increases are 7.4% and 30.9% while impacts on petroleum prices are projected at 3.2% and 14.6%. Agriculture simply cannot absorb these incremental increases to already rising production costs in the light of current flat to declining prices for many commodities.

Western open-range livestock operations are typically overlooked by analysts studying overall agricultural impacts. This is true for both EPA and USDA analysis of the impacts of cap and trade legislation. While per acre energy costs may be almost negligible, several factors contribute to high overall costs. Ranchers must often travel long distances with 4-wheel drive vehicles pulling trailers to check their livestock, pastures and waters. Winter feeding requires heavy duty tractors and equipment. Federal land grazing permittees face increasing energy related costs as they implement intense rotational grazing systems requiring frequent movement of livestock and increased sources of water. In addition, livestock must often be moved from one allotment to another using either rancher owned or contract trucks. Similarly, hay and supplemental feeds are often trucked very long distances.

PRICES RECEIVED

The cliché that agricultural producers are price takers has a solid foundation in market analysis. While some inroads have been made in recent years in vertical integration through retained ownership, the use of cooperatives and marketing affiliations, livestock in particular are most often sold to the highest bidder. Thus, while some of the added energy costs of processing and transporting agricultural products will flow to the consumer, much of this cost increase will be reflected in prices received by producers. The recently released analysis of the agricultural impacts of cap and trade by USDA fails to even address the prices received side of the equation. ("A Preliminary Analysis of the Effects of HR 2454 on U.S. Agriculture", USDA, Economic Research Service, July 22, 2009).

Western cow/calf producers typically sell either calves or yearlings which eventually move to a feedlot. While we have seen growing demand for "grass fed beef", grain fed products remains the preference of most consumers. Thus, corn prices drive fed cattle prices. The dramatic increase in corn prices fueled by the ill-advised government mandates and subsidies for ethanol production have resulted in losses to cattle feeders ranging from \$100 to \$140 per head. Feeders are facing increased costs from EPA regulatory mandates under the Clean Water Act and Clean Air Act. As feeders seek to recover from this blow, feeder cattle prices may reach five-year lows this fall. Proposed cap and trade legislation will only fuel this trend.

A analysis of crop production costs under 2008 Senate energy legislation (S. 2191) using scenarios from an EPA study demonstrates that the cost of producing an acre of corn could be expected to rise from \$40 per acre to \$80 per acre. ("An Analysis of the Relationship Between Energy Prices and Crop Production Costs", Doane Advisory Services, May 2008) The cost of transporting this corn to feedlots will increase proportionately.

Transportation of livestock, crops and food products is an inherent component of U.S. agriculture. A typical calf leaving a Wyoming ranch may travel to a calf lot in another state for the winter, return to a summer pasture in the West the following summer, then move to a feedlot before finally being shipped to a processing facility. The added costs of transportation projected to accrue from cap and trade will affect the value of this calf at every level.

INTERNATIONAL TRADE AND COMPETITION

Today most major agricultural products, both crops and livestock, produced in the United States are dependent on global markets. Market growth is expected to occur primarily in the export arena. U.S. food products are in great demand due to our high quality food safety standards and environmentally friendly production methods. However, U. S. agriculture struggles to remain price competitive. The cumulative added input costs at all levels that are inevitable under cap and trade will further erode our competitiveness.

If the U.S. is to remain committed to providing global market access for its agricultural production, we cannot make unilateral commitments to GHG reduction. To date China and India, key export markets, have explicitly declined to commit to a reduction in carbon emissions. Cap and trade legislation, if adopted by Congress, should be made contingent on Senate ratification of an international commitment that imposes comparable standards on all countries.

UNINTENDED ENVIRONMENTAL CONSEQUENCES

Cap and Trade is being offered as a response to climate change. Though the relationship remains tenuous and unproven, it is important to assess the broader environmental impacts of this legislation. As specifically related to agriculture, the economic costs of cap and trade will make it more difficult for some to continue and to enhance agricultural practices that have no proven environmental benefits. Two examples in the ranching field immediately come to mind. First, rotational grazing has been shown to improve forage production with benefits to the environment and wildlife, including endangered species. These management systems require more intense management, fencing, water development and regular movement of livestock. All of these activities will become significantly more costly under cap and trade. Second, ranchers currently spend \$5,000 to \$10,000 per well to convert from generators or undependable windmills to solar pumping. Environmental benefits accrue both from less use of gas engines and less need to visit the pumping sites. However, the cost of solar pumping conversions can be expected to rise significantly in response to cap and trade.

AGRICULTURAL OFFSETS

The agricultural and forestry related offsets incorporated in Title V of HR 2454 have the potential to benefit forestry and, to a lesser extent, crop production. The level of benefit and the practicality of administration of the program remain in question. However, there is little evidence to support the USDA analysis that, according to Secretary Vilsack, "opportunities for farmers and ranchers can potentially outpace—perhaps significantly—the costs from climate change legislation." Significantly, USDA's own analysis of carbon sequestration potential by region, based on a carbon price of \$34/metric ton demonstrates virtually no potential for offsets in the Mountain Region. While the greatest potential is shown for the Pacific Region, (over 150 million metric tons), nearly all of this is achieved through "afforestation from pasture". (Figure 4—Carbon Sequestration Potential by Region, "A Preliminary Analysis of the Effects of H.R. 2454 on U.S. Agriculture", USDA, Economic Research Service, July 22, 2009). This translates to thousands of acres removed from valuable pastureland for our livestock. It is clear to me that, in touting the benefits of agricultural offsets, our western states have been ignored.

A RETURN TO JOBS

In closing I would like to return to the issue that is the primary focus of today's hearing—jobs. Agricultural jobs range from basic manual labor to highly skilled crop and livestock production positions. For many individuals agricultural work is both a profession and a passion. According to the 2007 Ag Census there are nearly 10,000 hired agricultural workers in my state of Wyoming. Over one-half of these work less than 150 days per year days at their agricultural job. These part time jobs are essential to both Wyoming agriculture and to the families that they help to support. They are at the highest risk in the cost/price squeeze that will be exacerbated by cap and trade.

Wyoming's experience shows that there is a well-established progression in job losses related to diminishing agricultural profitability among small and medium sized operations. First the "hired help" is dismissed. This has already been occurring at a rapid rate in our ranching industry due to drought,

input costs and livestock prices. As the squeeze continues and the operation can no longer support two or more generations, the younger family leaves the farm or ranch to seek employment elsewhere. As a financial crisis approaches, the older generation "retires" and the land is sold to developers. I am sure that this scenario repeats itself in many of your states. Agriculture holds multigenerational families together. When the agricultural operation ceases, these generational ties are lost, communities disintegrate and a critical skill-set disappears. Our ability to feed ourselves as a nation is diminished. This is a price that our nation cannot afford to pay for a cap and trade system that is at best an uncertain response to unsubstantiated climate change concerns. In the words of one successful young south-eastern Wyoming crop and livestock producer, "Even though there may be some benefits, dad and I both agree that we don't have confidence in our government to successfully implement such a system."

I look forward to your questions.

COMMENDING DAVID LUSK

Mr. LEAHY. Mr. President, I am pleased to inform the Senate about a Vermonter whose work has been a unique and meaningful contribution to the Burlington International Waterfront Festival, a celebration of the 400th anniversary of French explorer Samuel de Champlain's arrival at Lake Champlain. Vermont poet David Lusk is using his craft to recreate experiences that are inspired by the surrounding Vermont communities, the lake's natural history, the more than 300 documented shipwrecks, and the rare prehistoric artifacts that lie on the lake's floor. Mr. Lusk's poems also draw from maritime literature and his visits to the shipwrecks that he has taken with guides from the Lake Champlain Maritime Museum. He intends to create a collection of poems called "Lake Studies: Meditations on Lake Champlain." Mr. Lusk says the poems strive to "reflect our mutual associations with these mysteries and to suggest something of our own psychological complexity in the process."

Below is a poem that Mr. Lusk shared with those attending the opening ceremony at the Burlington Waterfront on July 2, 2009, for the celebration of the 400th anniversary of Samuel de Champlain's explorations. I ask that the text of his poem be printed in the RECORD.

SUNSET ON MALLETT'S BAY

(By David Lusk)

For just an instant
as the sun reclines
between woolly clouds
and profound, lavender
pillows of the mountains
a flock of sheep
will appear to cross
the glimmering road
of iridescent silver
creasing the broad back
of the lake.

See—here they come,
the little sheep,

huddled together, afraid.

—for L.J. and Beth

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mrs. Neiman, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MEASURES PLACED ON THE CALENDAR

The following bill was read the second time, and placed on the calendar:

S. 1552. A bill to reauthorize the DC opportunity scholarship program, and for other purposes.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Mr. GRASSLEY (for himself, Mr. JOHANNES, Mr. BROWNBACK, Mr. LUGAR, and Mr. HARKIN):

S. 1553. A bill to require the Secretary of the Treasury to mint coins in commemoration of the National Future Farmers of America Organization and the 85th anniversary of the founding of the National Future Farmers of America Organization; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. HARKIN (for himself, Mr. FRANKEN, Mr. KERRY, and Mr. SCHUMER):

S. 1554. A bill to amend the Juvenile Justice and Delinquency Prevention Act of 1974 to prevent later delinquency and improve the health and well-being of maltreated infants and toddlers through the development of local Court Teams for Maltreated Infants and Toddlers and the creation of a National Court Teams Resource Center to assist such Court Teams, and for other purposes; to the Committee on the Judiciary.

By Mr. MARTINEZ (for himself, Mr. BAYH, Ms. COLLINS, Mr. BENNETT, Mr. FEINGOLD, and Mr. TESTER):

S. 1555. A bill to establish the Office of the National Alzheimer's Project; to the Committee on Health, Education, Labor, and Pensions.

ADDITIONAL COSPONSORS

S. 229

At the request of Mrs. BOXER, the name of the Senator from New Jersey (Mr. LAUTENBERG) was added as a cosponsor of S. 229, a bill to empower

women in Afghanistan, and for other purposes.

S. 423

At the request of Mr. REID, the name of the Senator from West Virginia (Mr. BYRD) was added as a cosponsor of S. 423, a bill to amend title 38, United States Code, to authorize advance appropriations for certain medical care accounts of the Department of Veterans Affairs by providing two-fiscal year budget authority, and for other purposes.

S. 585

At the request of Mr. AKAKA, the name of the Senator from Oregon (Mr. MERKLEY) was added as a cosponsor of S. 585, a bill to provide additional protections for recipients of the earned income tax credit.

S. 644

At the request of Mr. CHAMBLISS, the name of the Senator from Maine (Ms. SNOWE) was added as a cosponsor of S. 644, a bill to amend title 10, United States Code, to include service after September 11, 2001, as service qualifying for the determination of a reduced eligibility age for receipt of non-regular service retired pay.

S. 941

At the request of Mr. CRAPO, the name of the Senator from Montana (Mr. BAUCUS) was added as a cosponsor of S. 941, a bill to reform the Bureau of Alcohol, Tobacco, Firearms, and Explosives, modernize firearm laws and regulations, protect the community from criminals, and for other purposes.

S. 1038

At the request of Mrs. FEINSTEIN, the name of the Senator from Colorado (Mr. BENNET) was added as a cosponsor of S. 1038, a bill to improve agricultural job opportunities, benefits, and security for aliens in the United States and for other purposes.

S. 1065

At the request of Mr. BROWNBAC, the name of the Senator from Washington (Mrs. MURRAY) was added as a cosponsor of S. 1065, a bill to authorize State and local governments to direct divestiture from, and prevent investment in, companies with investments of \$20,000, 000 or more in Iran's energy sector, and for other purposes.

S. 1066

At the request of Mr. SCHUMER, the name of the Senator from Georgia (Mr. CHAMBLISS) was added as a cosponsor of S. 1066, a bill to amend title XVIII of the Social Security Act to preserve access to ambulance services under the Medicare program.

S. 1130

At the request of Ms. SNOWE, the name of the Senator from Georgia (Mr. ISAKSON) was added as a cosponsor of S. 1130, a bill to provide for a demonstration project regarding Medicaid reimbursements for stabilization of emergency medical conditions by non-pub-

licly owned or operated institutions for mental diseases.

S. 1155

At the request of Ms. COLLINS, the name of the Senator from Illinois (Mr. BURRIS) was added as a cosponsor of S. 1155, a bill to amend title 38, United States Code, to establish the position of Director of Physician Assistant Services within the office of the Under Secretary of Veterans Affairs for health.

S. 1304

At the request of Mr. GRASSLEY, the names of the Senator from North Dakota (Mr. DORGAN) and the Senator from Maine (Ms. COLLINS) were added as cosponsors of S. 1304, a bill to restore the economic rights of automobile dealers, and for other purposes.

S. 1428

At the request of Mr. WHITEHOUSE, the name of the Senator from Massachusetts (Mr. KERRY) was added as a cosponsor of S. 1428, a bill to amend the Toxic Substances Control Act to phase out the use of mercury in the manufacture of chlorine and caustic soda, and for other purposes.

AMENDMENT NO. 2226

At the request of Mr. NELSON of Nebraska, the names of the Senator from Hawaii (Mr. AKAKA) and the Senator from Nevada (Mr. ENSIGN) were added as cosponsors of amendment No. 2226 proposed to H.R. 2997, a bill making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes.

AMENDMENTS SUBMITTED AND PROPOSED

On page 61, line 17, strike “(9)” and insert “(10)”.

On page 61, line 18, strike “\$185,793,000” and insert “\$200,129,000”.

SA 2234. Mr. LEAHY proposed an amendment to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; as follows:

On page 8, line 2, before the period, insert the following: “: *Provided*, That of the amount made available for the Office of Inspector General to conduct investigations such sums as are necessary shall be made available for the inspection of the national organic program established under the Organic Foods Production Act of 1990 (7 U.S.C. 6501 et seq.)”.

SA 2235. Mr. ENSIGN submitted an amendment intended to be proposed to

amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACk) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. (a) In this section, the term "discretionary spending" means all amounts provided under this Act other than amounts provided for programs funded through direct spending (as defined in section 250(c) of the Balanced Budget and Emergency Deficit Control Act of 1985 (2 U.S.C. 900(c))).

(b) Notwithstanding any other provision of this Act, each discretionary spending amount provided by this Act is reduced by the pro rata percentage required to reduce the total discretionary spending amount provided by this Act to \$20,721,900,000.

SA 2236. Ms. SNOWE submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACk) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 31, line 19, strike "2250a." and insert the following:

2250a: *Provided further*, That, of the funds made available by this Act for the conduct of activities by the Natural Resources Conservation Service in the State of Maine, not less than \$1,500,000 shall be used to carry out irrigation activities.

SA 2237. Mr. DODD (for himself, Mr. KENNEDY, Mr. REED, Mr. LIEBERMAN, Mr. WHITEHOUSE, and Mr. KERRY) submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACk) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. (a) Notwithstanding any other provision of law, the Secretary of Agriculture shall consider the following communities and municipal districts to be rural areas for purposes of eligibility for water or waste disposal grants and direct or guaranteed loans described in section 381E(d)(2) of the Consolidated Farm and Rural Development Act (7 U.S.C. 2009d(d)(2)):

(1) The unincorporated community of Bourne, in Barnstable County, Massachusetts.

(2) The unincorporated community of Charlton, in Worcester County, Massachusetts.

(3) The unincorporated community of Dudley, in Worcester County, Massachusetts.

(4) The North Raynham Water District, in Bristol County, Massachusetts.

(5) The Bolton Lakes Regional Water Pollution Control Area, in Tolland County, Connecticut.

(6) The Cherry Valley/Rochdale District, in Worcester County, Connecticut.

(7) The North Tiverton Fire District, in Newport County, Rhode Island.

(8) The Harrisville Fire District, in Providence County, Rhode Island.

(b) Notwithstanding any other provision of law, the Secretary of Agriculture shall consider the following communities and municipal districts to be rural areas for purposes of eligibility for community facility direct and guaranteed loans and grants under section 306(a) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1926(a)):

(1) The town of North Kingstown, Rhode Island.

(2) The town of Newtown, in Fairfield County, Connecticut.

(3) The town of Windham, in Windham County, Connecticut.

SA 2238. Mrs. SHAHEEN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACk) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. Section 1506(e)(2) of the Food, Conservation, and Energy Act of 2008 (7 U.S.C. 8773(e)(2)) is amended by adding at the end the following:

"(C) MULTIGENERATIONAL DAIRY PRODUCERS.—In addition to the payment quantity limitation for all producers on a single dairy operation established under subparagraph (A), the Secretary shall establish a separate payment quantity limitation for each producer on a single dairy operation who, as determined by the Secretary—

"(i) is a lineal descendant of another producer who—

"(I) owns or operates the single dairy operation; and

"(II) is eligible to receive a payment subject to all or part of the payment quantity limitation for the single dairy operation established under subparagraph (A);

"(ii) is a producer with respect to the dairy operation, as determined by the Secretary in accordance with the standards described in subparagraph (B); and

"(iii) uses the income from the dairy operation to support the family of the producer."

SA 2239. Mr. VITTER submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACk) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds appropriated by this Act for the Food and Drug Administration may be used to prevent an individual

not in the business of importing a prescription drug (within the meaning of section 801(g) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 381(g))) from importing a prescription drug from Canada that complies with the Federal Food, Drug, and Cosmetic Act: *Provided*, That the prescription drug may not be—

(1) a controlled substance, as defined in section 102 of the Controlled Substances Act (21 U.S.C. 802); or

(2) a biological product, as defined in section 351 of the Public Health Service Act (42 U.S.C. 262).

SA 2240. Mr. BARRASSO (for himself, Mr. VITTER, Mr. HATCH, Mr. ROBERTS, Mr. ENZI, Mr. THUNE, and Mr. JOHANNES) submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACk) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. (a) Not later than 60 days after the date of enactment of this Act, the Secretary of Agriculture shall complete a State-by-State analysis of the impacts on agricultural producers of the American Clean Energy and Security Act of 2009 (H.R. 2452, as passed by the House of Representatives on June 26, 2009) (referred to in this section as "H.R. 2452").

(b) In conducting the analysis under subsection (a), the Secretary shall—

(1) use a range of peer-reviewed analyses of H.R. 2454 conducted by public and private entities, including land grant universities;

(2) consider a scenario in which the fertilizer industry does not receive any free allowances under H.R. 2454;

(3) consider the impacts of H.R. 2454 on a range of fishing, aquaculture, livestock, poultry, and swine production and a variety of crop production, including specialty crops; and

(4) analyze projected land use changes, afforestation patterns, and other market incentives created by H.R. 2454 that may impact food or agriculture commodity prices, including specific acreage estimates of parcels of land planted with trees in the United States.

PRIVILEGES OF THE FLOOR

Mr. BROWNBACk. Mr. President, I ask unanimous consent that Melanie Benning from my office be granted floor privileges during consideration of H.R. 2997.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

PROVIDING FOR A CONDITIONAL ADJOURNMENT OF THE HOUSE AND A CONDITIONAL RECESS OR ADJOURNMENT OF THE SENATE

Mr. REID. I ask unanimous consent the Senate proceed to H. Con. Res. 172.

The PRESIDING OFFICER. The clerk will report the concurrent resolution by title.

The legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 172) providing a conditional adjournment of the House of Representatives and a conditional recess or adjournment of the Senate.

There being no objection, the Senate proceeded to consider the concurrent resolution.

Mr. REID. I ask unanimous consent the concurrent resolution be agreed to and the motion to reconsider be laid on the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

The concurrent resolution (H. Con. Res. 172) was agreed to, as follows:

H. CON. RES. 172

Resolved by the House of Representatives (the Senate concurring), That, in consonance with section 132(a) of the Legislative Reorganization Act of 1946, when the House adjourns on the legislative day of Friday, July 31, 2009, Saturday, August 1, 2009, or Sunday, August 2, 2009, on a motion offered pursuant to this concurrent resolution by its Majority Leader or his designee, it stand adjourned until 2 p.m. on Tuesday, September 8, 2009, or until the time of any reassembly pursuant to section 2 of this concurrent resolution, whichever occurs first; and that when the Senate recesses or adjourns on any day from Thursday, August 6, 2009, through Tuesday, August 11, 2009, on a motion offered pursuant to this concurrent resolution by its Majority Leader or his designee, it stand recessed or adjourned until noon on Tuesday, September 8, 2009, or such other time on that day as may be specified in the motion to recess or adjourn, or until the time of any reassembly pursuant to section 2 of this concurrent resolution, whichever occurs first.

SEC. 2. The Speaker of the House and the Majority Leader of the Senate, or their respective designees, acting jointly after consultation with the Minority Leader of the House and the Minority Leader of the Senate, shall notify the Members of the House and the Senate, respectively, to reassemble at such place and time as they may designate if, in their opinion, the public interest shall warrant it.

EXECUTIVE SESSION

EXECUTIVE CALENDAR

Mr. REID. Mr. President, I ask unanimous consent that the Senate proceed to executive session to consider Calendar Nos. 265, 267, 319, 329, 330, 332, 334 to and including 367, 369, and all nominations on the Secretary's desk in the Air Force, Army, and Navy en bloc; that the nominations be confirmed en bloc and the motions to reconsider be laid on the table en bloc; that no further motions be in order and any statements relating thereto be printed in the RECORD; and the President be immediately notified of the Senate's action.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations considered and confirmed en bloc are as follows:

DEPARTMENT OF STATE

Capricia Penavic Marshall, of the District of Columbia, to be Chief of Protocol, and to have the rank of Ambassador during her tenure of service.

Nancy J. Powell, of Iowa, a Career Member of the Senior Foreign Service, Class of Career Minister, to be Director General of the Foreign Service.

NOMINATION DISCHARGED

Mr. REID. I ask unanimous consent that the Agriculture Committee be discharged from further consideration of PN386, and that the Senate then proceed to the consideration of the nomination; that the nomination be confirmed and the motion to reconsider be laid on the table en bloc; that no further motions be in order, and any statements relating to this matter be printed in the RECORD; that the President be immediately notified of the Senate's action and the Senate then resume legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nomination considered and confirmed is as follows:

DEPARTMENT OF AGRICULTURE

Kevin W. Concannon, of Maine, to be Under Secretary of Agriculture for Food, Nutrition, and Consumer Services.

LEGISLATIVE SESSION

The PRESIDING OFFICER. The Senate will resume legislative session.

ORDERS FOR MONDAY, AUGUST 3, 2009

Mr. REID. I ask unanimous consent that when the Senate completes its business today, it adjourn until 2 p.m. on Monday, August 3; that following the prayer and the pledge, the Journal of proceedings be approved to date, the morning hour be deemed expired, the time for the two leaders be reserved for their use later in the day, and there then be a period of morning business for 1 hour with Senators permitted to speak for up to 10 minutes each, with the time equally divided and controlled between the two leaders or their des-

ignees, with Senator BEGICH controlling the first 30 minutes and the Republicans controlling the final 30 minutes. Finally, I ask that following morning business, the Senate resume consideration of H.R. 2997, the Agriculture appropriations bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. REID. Mr. President, under a previous order, at 5:30 p.m. on Monday, the Senate will vote on cloture on the substitute amendment to the appropriations bill dealing with Agriculture.

VITIATION OF EXECUTIVE CALENDAR ACTION

Mr. REID. I ask unanimous consent that the action on executive Calendar No. 370 be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADJOURNMENT UNTIL MONDAY, AUGUST 3, 2009, AT 2 P.M.

Mr. REID. If there is no further business to come before the Senate today, I ask unanimous consent it stand adjourned under the previous order.

There being no objection, the Senate, at 12:54 p.m., adjourned until Monday, August 3, 2009, at 2 p.m.

HOUSE OF REPRESENTATIVES—Friday, July 31, 2009

The House met at 9 a.m. and was called to order by the Speaker.

PRAYER

Rev. Dr. Ivan Raley, First Baptist Church, Byrdstown, Tennessee, offered the following prayer:

Almighty and eternal Father, we humbly come before You in this hallowed place that we might seek Your wisdom for the work of these whom You have chosen to serve our Nation.

Father, there are many people in our land today who are hurting. There are people this morning who are afraid. They are confused, and they are fearful of the future and what it holds. Father, they need the help of this Congress.

God, accept this prayer as our confession of faith in You and total dependence on You. Forgive us where we have failed and fallen short. Father, You know the solution our Nation needs. Teach it to these who have been chosen to lead our Nation so that they can know Your will as well.

Father, may future generations call these who are now assembled the greatest generation. Let them be like those who came before them, who rose to their country's need and were thus called. May they say of these, they did their best. They are a great generation.

Father, God, we pray this in Your Son's name. God bless America.

Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House her approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER. Will the gentleman from South Carolina (Mr. WILSON) come forward and lead the House in the Pledge of Allegiance.

Mr. WILSON of South Carolina led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

MESSAGE FROM THE SENATE

A message from the Senate by Ms. Curtis, one of its clerks, announced that the Senate has passed without amendment a bill of the House of the following title:

H.R. 3357. An act to restore sums to the Highway Trust Fund and for other purposes.

WELCOMING REV. DR. IVAN RALEY

The SPEAKER. Without objection, the gentleman from Tennessee (Mr. DAVIS) is recognized for 1 minute.

There was no objection.

Mr. DAVIS of Tennessee. Madam Speaker, it's an honor to thank my friend and pastor, Dr. Ivan Raley of First Baptist Church in Byrdstown, for joining us here today. Pastor Raley has served our church at home since 2002, and is retired after 10 years of service as regional vice president of the Tennessee Baptist Children's Homes in Brentwood, Tennessee.

While serving as pastor, Dr. Raley has traveled on mission trips to Venezuela, Belize, Guatemala and Mexico, and in September of 2001, he went to New York to serve as a chaplain with the police and firemen involved in the 9/11 World Trade Center attack. He also served with the International Mission Board of the Southern Baptist Convention in Rwanda during the wars there in 1994.

I want to thank Ivan for being here today and for serving our church family for the past 7 years. I have looked to him for ministry as we continue our work in Congress to build a stronger America for our children and our grandchildren. Through the war in Iraq and Afghanistan, and now in the midst of a difficult economy, I appreciate Pastor Raley being there to join me in search of guidance and wisdom.

On behalf of my colleagues, I welcome Dr. Raley, and again, I thank him for delivering our invocation here this morning.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. PAS-
TOR of Arizona). The Chair will entertain up to five further requests for 1-minute speeches on each side of the aisle.

MEDICAL DEBT IN AMERICA

(Ms. KILROY asked and was given permission to address the House for 1 minute.)

Ms. KILROY. Mr. Speaker, in my district, as in many districts around the country, medical debt has been a contributing factor in bankruptcies and in foreclosures. In fact, 72 million Americans today are affected by the issue of medical debt.

Another more insidious but also serious issue that arises from medical debt, and one that costs our constituents a great deal of money, is the issue of medical debt that is paid late or is settled eventually, but paid nevertheless, but has gone to collections and is reported negatively on a credit report or a score.

Twenty-eight million Americans pay their medical debt off over a period of time. Some of those accrue debt only because of a dispute with an insurance company, some of them because of the high cost of medical care and high deductibles or caps that have been exceeded in the course of the year, some because of job loss. But that negative credit score stays with them for years to come.

□ 0915

RECOGNIZING THE 150TH ANNIVERSARY OF ST. COLUMBAN ROMAN CATHOLIC CHURCH

(Mrs. SCHMIDT asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHMIDT. Mr. Speaker, I rise this morning to recognize the 150th anniversary of my childhood parish, St. Columban Roman Catholic Church of Loveland, Ohio.

In 1859, Father John Baptist O'Donoghue, of St. Andrew's Parish in Milford, and 10 families worked together to raise enough money to purchase an old, one-room schoolhouse from the Village of Loveland on Broadway Avenue.

Like many budding parishes, the original rectory did not meet the needs of the local Catholic community for very long. In 1893, St. Columban built their second house of worship on that site. A few years later, the first school was built. This church will always hold a special place in my heart because my home was built from its bricks.

As the parish was celebrating its 100th anniversary, St. Columban was, once again, forced to expand to a new church at a different site. I was in attendance that day 50 years ago when Archbishop Karl J. Alter dedicated the new school building which housed the church in the cafeteria. Rapid growth twice required separate additions to be built to house the church. In 2002, the church finally moved out of the school and into its own building.

Each year, I have the privilege to host the St. Columban eighth-grade students to the Capitol. I am honored

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

to be their Congresswoman and tour guide.

Mr. Speaker, I ask you to join me in celebrating St. Columban's 150th anniversary and in wishing them continued success.

God bless them. God bless the United States of America.

COMMONSENSE LEGISLATION TO PROMOTE WELLNESS

(Mrs. DAHLKEMPER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. DAHLKEMPER. Mr. Speaker, during the upcoming August work period, my colleagues and I will travel back to our districts to talk about meaningful health care reform that fixes what is broken and that protects what works.

One of the things that does not work is the skyrocketing costs of medical treatment in the United States. If Congress is serious about tackling the issue, we must address the growing concern of chronic disease—preventable conditions that account for 85 percent of total health spending. Obesity alone cost \$147 billion last year.

Today, I am introducing legislation that will offer up to 20 percent discounted premiums to those who make the effort to live healthier lifestyles, such as not smoking, such as achieving and maintaining normal body mass index and working at lowering blood pressure and cholesterol levels. As a result, there will be an economic incentive to encourage personal responsibility for one's health, which will dramatically reduce overall costs.

As we look at health insurance reform, we need to make sure that we look at encouraging wellness. I urge my colleagues to join me in support of this commonsense legislation to promote wellness.

IN APPRECIATION OF ALLEN AIMAR

(Mr. WILSON of South Carolina asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILSON of South Carolina. Mr. Speaker, I rise today to wish a fond farewell to a member of the Second Congressional District staff, Allen Aimar.

Allen first served as a field representative in our Beaufort Lowcountry office before coming to Washington as military legislative assistant. Allen is leaving Washington behind for his law school career at Capital University in Columbus, Ohio. He will be joined by his wife, Amber, who previously served on the staff of the Second District and as staff to Dr. Phil Roe.

Allen has been vital in helping constituents, particularly on military

issues. He has brought his own experience and knowledge as a veteran of the Army National Guard in Iraq. He appreciates our servicemembers, their families and veterans.

Allen is the son of Allen and Deborah Aimar of Johnson City, Tennessee, and of Greg and Marian Erickson of Beaufort, South Carolina, and is brother to Adam Aimar.

We are all tremendously proud of Allen and Amber, and we wish them and their young son, Alexander Jacob Aimar, all the best in the years to come. Godspeed to the Aimar family.

In conclusion, God bless our troops, and we will never forget September the 11th in the global war on terrorism.

HEALTH CARE REFORM

(Mr. MCGOVERN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MCGOVERN. Mr. Speaker, as we debate health care reform legislation, my Republican friends say things are fine just the way they are. "Take two tax breaks and call me in the morning," is their prescription. This in spite of the fact that premiums have doubled in 9 years, growing three times faster than wages; this in spite of the fact that the average American family already pays an extra \$1,100 a year in premiums to support a broken system; this in spite of the fact that 46 million Americans are uninsured.

When my Republican friends say that the American people don't deserve health reform, my response is: Are you kidding?

KATRINA ANNIVERSARY

(Mr. CAO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CAO. Mr. Speaker, August 29, 2009 will mark the fourth anniversary of Hurricane Katrina. As I prepare to return to the Second District, I am reflective not so much of the unprecedented damage that wreaked havoc on the innocent but of the power of the human spirit that was so evident in every citizen as they've returned to New Orleans to rebuild their homes and to jump-start their communities.

I, too, lost everything in this storm. My wife and I, like so many others, were forced to start over after losing our home and business.

As Katrina became the byword for our Nation's social ills and failures, many even questioned the logic of rebuilding, but one only has to look around New Orleans and Jefferson Parish today to completely dispute that line of reasoning. New Orleans and Jefferson Parish are reemerging as the productive areas they once were. Tourism is back on the rise, and entre-

preneurs are returning to reintroduce commerce and to boost the job market. But there is still much work to do.

The Stafford Act must be redesigned to bring a systemic means of Federal natural disaster assistance for State and local governments to aid citizens, and there must be a fundamental change in FEMA's approach to catastrophic disasters.

A UNIQUELY AMERICAN HEALTH CARE PLAN

(Ms. EDWARDS of Maryland asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. EDWARDS of Maryland. Mr. Speaker, today, it is time for health care reform.

Now, there are some out there who like to claim that we don't need reform now because the private marketplace will take care of everything. Well, the private marketplace hasn't taken care of anything except to increase deductibles, to increase premiums, and to increase copays that cost the American people. Let me tell you what that means in my home State of Maryland.

In 2001, if you were paying on the average of \$600 a month for your health care, today, you're paying an average of \$1,000 a month for your health care. Well, I don't know about anybody else, but in my household, an extra \$400 a month is real money. It's groceries. It's an electric bill. It's daycare. I mean, this is an important cost to the American people.

It is time for us to enact a uniquely American plan that doesn't embrace the insurance industry, that doesn't close down the insurance industry, but that says to the insurers: you have to compete in the marketplace with a public plan that relies on Medicare rates, that ensures that we will have real competition, and that is real change for the American people.

It is time for us to educate the American people and to get this done for the public so that we can be competitive.

THE BRITISH HEALTH CARE SYSTEM IS UNHEALTHY

(Mr. POE of Texas asked and was given permission to address the House for 1 minute.)

Mr. POE of Texas. Mr. Speaker, government-run health care has been around in England for over 60 years. In those years, the government still hasn't gotten it right.

In March, Britain's Health Care Commission, which has ironically been renamed the Care Quality Commission, reported that 1,200 people have died needlessly at two British hospitals over the past 3 years.

The government report said that Stafford Hospital and Cannock Chase Hospital have filthy conditions and

unhygienic practices. The government report says government-run hospitals don't have enough doctors and nurses and the doctors and nurses are poorly trained. They don't know how to use the cardiac monitors, and the hospitals don't even have enough of the cardiac monitors that they don't know how to operate. The British Government report also says that these two government-run hospitals have left patients with no food, no water and no medicine for up to 4 days.

Mr. Speaker, this is just another example that government-run health care has not worked. Doctors and nurses are rationed; care is rationed; medicine, food and water are rationed. The British health care plan is: "Just don't get sick" because the government-run system can't help you.

And that's just the way it is.

AMERICANS WILL FINALLY BE GUARANTEED HEALTH CARE

(Mr. PALLONE asked and was given permission to address the House for 1 minute.)

Mr. PALLONE. Mr. Speaker, today is a great day.

My committee, the Energy and Commerce Committee, will report out the health care reform bill today. It is very exciting because what it means is that people will finally be guaranteed health care, and they'll know that they'll have health care regardless of what job they have. They won't lose it if they go from job to job.

Right now, we have a lot of people in this country who are uninsured. They will be provided with health insurance. We have a lot of other people who are afraid they're going to lose their jobs or who are afraid they're not going to be able to afford their health insurance.

Again, we'll address the affordability issue by bringing down costs for people who actually have insurance, and we'll guarantee that, whether or not you have a health condition and regardless of your gender, you'll be able to get the same health care; you'll be able to get the same insurance policy, and you won't be discriminated against.

This is a real opportunity for America to see that this Congress can actually do the job, that we can get the job done—that we can cover everyone and reduce costs—so that you'll finally have the peace of mind that you're guaranteed health insurance.

THE TRUTH ABOUT HOUSE DEMOCRATS' TAX INCREASES

(Mr. PENCE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PENCE. Mr. Speaker, the American people know we need health care reform in this country, but thanks to

House Republicans and a handful of Democrats in Congress, the American people have been given a reprieve on the Democrat plan to enact a government takeover of health care, paid for with more than \$800 billion in new taxes. Now, that tax increase number has been disputed in the past 24 hours, so I thought I'd pull the stats.

According to the Congressional Budget Office and the Joint Committee on Taxation, the House Democrat reform bill includes \$543 billion in a surtax on high-income filers, \$208 billion in increased taxes on businesses, an additional set of tax increases—international tax increases which they refer to—of \$37 billion, and more taxes on benefits of \$2 billion. Taxes on individuals who do not purchase bureaucrat-approved health insurance—\$29 billion. So the total amount of tax increases included in the Democrat bill, according to official estimates, is \$820.1 billion over 10 years.

The chance for the American people to know what's in this plan and to come back and to pass health care reform without more government and more taxes? Priceless.

Let the debate begin.

PROVIDING FOR CONSIDERATION OF H.R. 3269, CORPORATE AND FINANCIAL INSTITUTION COMPENSATION FAIRNESS ACT OF 2009

Mr. MCGOVERN. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 697 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 697

Resolved, That upon the adoption of this resolution it shall be in order to consider in the House the bill (H.R. 3269) to amend the Securities Exchange Act of 1934 to provide shareholders with an advisory vote on executive compensation and to prevent perverse incentives in the compensation practices of financial institutions. The first reading of the bill shall be dispensed with. All points of order against consideration of the bill are waived except those arising under clause 9 or 10 of rule XXI. The amendment in the nature of a substitute recommended by the Committee on Financial Services now printed in the bill shall be considered as adopted. The bill, as amended, shall be considered as read. All points of order against provisions of the bill, as amended, are waived. The previous question shall be considered as ordered on the bill, as amended, to final passage without intervening motion except: (1) one hour of debate equally divided and controlled by the chairman and ranking minority member of the Committee on the Financial Services; (2) the amendment printed in the report of the Committee on Rules accompanying this resolution, if offered by Representative Frank of Massachusetts or his designee, which shall be considered as read, shall be separately debatable for 10 minutes equally divided and controlled by the proponent and an opponent, and shall not be subject to a demand for division of the question; (3) the

amendment in the nature of a substitute printed in the report of the Committee on Rules, if offered by Representative Garrett of New Jersey or his designee, which shall be considered as read, and shall be separately debatable for 30 minutes equally divided and controlled by the proponent and an opponent; and (4) one motion to recommit with or without instructions.

SEC. 2. All points of order against amendments printed in the report of the Committee on Rules accompanying this resolution are waived except those arising under clause 9 or 10 of rule XXI.

SEC. 3. During consideration of an amendment printed in the report of the Committee on Rules accompanying this resolution, the Chair may postpone the question of adoption as though under clause 8 of rule XX.

SEC. 4. In the engrossment of H.R. 3269, the Clerk is authorized to make technical and conforming changes to amendatory instructions.

The SPEAKER pro tempore. The gentleman from Massachusetts is recognized for 1 hour.

Mr. MCGOVERN. Mr. Speaker, for the purposes of debate only, I yield the customary 30 minutes to the gentleman from Texas (Mr. SESSIONS). All time yielded during consideration of the rule is for debate only.

GENERAL LEAVE

Mr. MCGOVERN. Mr. Speaker, I ask unanimous consent that all Members may be given 5 legislative days in which to revise and extend their remarks on House Resolution 697.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. MCGOVERN. I yield myself such time as I may consume.

Mr. Speaker, House Resolution 697 provides for the consideration of H.R. 3269, the Corporate and Financial Institution Compensation Fairness Act of 2009, under a structured rule.

The rule provides 1 hour of general debate controlled by the Committee on Financial Services. The rule makes in order an amendment by Chairman FRANK, which is debatable for 10 minutes. It also makes in order an amendment in the nature of a substitute by Representative GARRETT, which is debatable for 30 minutes. The rule provides one motion to recommit with or without instructions.

Mr. Speaker, I rise today in support of H.R. 3269, the Corporate and Financial Institution Compensation Fairness Act. I would like to congratulate my good friend and my colleague from Massachusetts, Chairman BARNEY FRANK, for all of his hard work on this bill.

□ 0930

Mr. Speaker, if the last year has taught us anything, it's that the compensation practices of some of our largest corporations have gotten completely out of control. Middle class Americans on Main Street are struggling to hold on to their jobs, struggling to pay for health care and education and food and energy. They have

seen their wages stagnate while their costs have skyrocketed.

Meanwhile, over on Easy Street, things are great. Corporate executives are continuing to give themselves multi-million dollar pay packages; the golden parachutes are still flying. One of the most egregious cases of this came when American taxpayers watched as AIG, the American International Group, doled out lavish bonuses after being bailed out of the financial mess that they helped create.

Chairman FRANK is thoroughly committed to ensuring our financial system remains sound, and I am pleased to see this bill as the first piece of larger reforms by the House Financial Services Committee.

Mr. Speaker, I would also like to voice my support for the proposed Consumer Financial Protection Agency. I know there has been strong pushback from the industry, but I would like to commend my colleagues for their perseverance in putting these protections in place. The bill will help to give the owners of these corporations, the shareholders, a meaningful voice in how companies are run. Specifically, this bill grants shareholders a say on pay for top executives by guaranteeing them a non-binding advisory vote on their company's pay practices. Again this vote is nonbinding.

The board of directors and the compensation committees are free to ignore their shareholders' wishes, but those shareholders will at least have the opportunity to express their views.

The bill would also strengthen the ability of Federal regulators, namely, the Federal Reserve and Federal Deposit Insurance Corporation, to restrict pay structures that encourage inappropriate risk at financial companies. If regulators see a large company driving itself off a cliff by employing unstable pay practices for top executives, they should have the ability to act.

I'm pleased that the Financial Services Committee adopted a number of amendments. To note one in particular, Mr. HENSARLING, my Republican colleague from Texas, recognized the need to take the size of the institution into account. His amendment to exempt financial institutions with assets of less than \$1 billion from the bill's incentive base compensation disclosure requirements and related compensation structure oversight was adopted in committee.

I look forward to the debate on this bill and on the Republican substitute which is made in order under this rule.

I urge my colleagues to send a strong message that the misbehavior in corporate America must come to an end by supporting this bill.

I reserve my time.

Mr. SESSIONS. Mr. Speaker, I appreciate the gentleman from Massachusetts, my friend Mr. MCGOVERN, for yielding me the time this morning.

And I would yield myself such time as I may consume.

Mr. Speaker, I rise in opposition to this rule and to the underlying legislation. The structured rule does not call for the open and honest debate that we really had been promised years ago by our Democrat colleagues to have an open, honest debate on the issues that are before this country. But once again, time in and time out, here we are without an open rule.

Mr. Speaker, it's my intention today to discuss the dangerous precedent that this legislation sets forth on the future of business in America and the stranglehold that government will have over the free enterprise system.

Additionally, I offered two amendments in the Rules Committee last night, and I will discuss those here today. One would ensure this legislation would not create a bonanza for trial lawyers, and the other would provide for the necessary transparency and disclosure for shareholders. Both were rejected by the Democrats of the Rules Committee and eliminated from debate on the House floor today.

Mr. Speaker, government takeover of the free enterprise system seems to be a common theme with this Democrat Congress and with the Obama administration, a theme that has led to record deficits and record unemployment. This underlying legislation has masked itself as a bill to restrict CEO pay by giving shareholders a nonbinding vote on executive compensation. Yet in reality, it gives the government broad authority to review and determine appropriate compensation for every employee of a financial firm.

This legislation empowers the Federal Government to set unprecedented standards for annual shareholder votes while providing broad government authority for regulators who will have guidance to implement this and give authority to them over the free enterprise system.

We all agree that we need to curb abuses of the past and to promote responsible approaches to executive compensation. But this bill provides unprecedented government intervention in the free enterprise system. It is the wrong solution. The goal of regulatory reform should be to help, not hinder, our economy's ability to sustain economic growth and job creation.

This legislation does the opposite by legislating a one-size-fits-all rule for public companies that discourage private firms from going public. This will limit U.S. companies' access to the capital markets and undermine U.S. economic competitiveness. This legislation allows financial regulators the authority to determine wages for all employees, not just CEOs, officers, and bankers, but everyone.

The rank and file of community banks, minority banks, and credit unions could all have their compensa-

tion determined by unelected Washington bureaucrats. This perception undermines the confidence in corporate America and unfairly taints the vast majority of U.S. companies.

In an effort to provide the clarification necessary to ensure the intent of this legislation is not to create a bonanza for trial lawyers, I offered an amendment in the Rules Committee. The amendment would have clarified that this legislation simply creates no new private right of action in our courts, nor would its passage make a compensation committee's decisions to uphold its fiduciary responsibilities to shareholders subject to any existing private right of action.

Without this amendment, trial lawyers will be able to exploit a new opportunity to shake down companies for huge payments by challenging any action deemed non-compliant from this non-binding vote. This is a common-sense amendment that should have been considered on the House floor today, and it should be in the bill as law.

My second amendment would have provided sunshine and transparency for shareholders by requiring a full SEC disclosure about who is financing efforts to influence votes on this new congressionally mandated non-binding shareholder resolution. Put simply, this amendment would provide shareholders with access to information about who is spending money to influence that vote.

As Federal candidates, we're obligated to disclose to the Federal Election Commission the name, occupation, and amount given from each of our donors. We require this because the public interest is advanced by letting voters know who funds each candidate's campaign. My amendment asks the same disclosure so the shareholders know what people, what organization—whether they be labor unions, environmental groups, consumer advocates or simply a normal citizen of this country. We need to know who is spending money on influencing this new mandatory, non-binding vote.

Americans pride themselves on free enterprise choice and a marketplace that works for all of us; yet today Congress will pass legislation that increases government intervention in the financial markets, rations resources, limits consumer choices, and dictates wages and prices. In a time of economic recession with record unemployment and record deficits, Congress should be enacting legislation to assist our economy.

Mr. Speaker, the motives are clear. This administration and this Congress are using policy and regulation to force a government takeover of the free enterprise system.

Mr. Speaker, this Congress should be doing things to encourage employment, to encourage people to go back to

work, to encourage competitiveness, to encourage our country to be prepared tomorrow; not to have record unemployment, not to spend more money for record debts, but to give America and the free enterprise system the chance and opportunity it deserves to flourish in America.

Mr. Speaker, I encourage my colleagues to vote against this rule and the underlying legislation.

I reserve the balance of my time.

Mr. MCGOVERN. We have no further speakers at this time, and I reserve the balance of my time.

Mr. SESSIONS. Mr. Speaker, in closing, I would like to stress that while my friends on the other side of the aisle claim to be protecting consumers with this legislation, they refuse to protect all Americans in this legislation from trial lawyers benefiting from their tax dollars, and they also voted in the committee against transparency and accountability.

Mr. Speaker, as a Nation, we have many, many, many real problems to deal with that require leadership and dedication to ensure the future of this Nation. We need to provide for jobs, encourage economic growth and spur innovation and prosperity of this Nation, not to hamper the free enterprise system. This is, without question, further government control and muzzling of the free enterprise system. Some argue that this legislation is about executive compensation; but in reality, it continues to be the government takeover of the free enterprise system.

I encourage a "no" vote on this structured rule and a "no" vote on the underlying legislation.

I yield back the balance of my time.

Mr. MCGOVERN. Mr. Speaker, I yield myself the remaining time.

Mr. Speaker, as we're about to adjourn for the August recess, I think it's important to note that this is a Congress that accomplished a great deal.

We have passed 12 of our appropriations bills. We passed the historic Recovery and Reinvestment Act, which is keeping teachers and police officers employed, and stimulating economic growth throughout this country. We have passed an energy bill that, if signed into law, will create thousands and thousands of new green jobs as well as free us of our dependence on foreign oil. We have extended SCHIP, which means that more and more children have access to health care. We passed the Lilly Ledbetter Pay Equity Act bill to address the issue of discrimination of women in the workplace. Yesterday we passed a food safety bill.

So we did all of this in spite of resistance and in spite of obstructionism by many of my colleagues on the other side of the aisle. But I think it is an indication that this is a Congress that has accomplished a great deal.

Let me just say finally, Mr. Speaker, with regard to the underlying legisla-

tion, that if you like the status quo, if you want to embrace the same old, same old when it comes to corporate misbehavior, then vote against the rule and vote against the bill. If you want things to change, if you want to ensure corporate responsibility, then please support the underlying bill championed by Chairman FRANK.

With that Mr. Speaker, I urge a "yes" vote on the previous question and on the rule.

I yield back the balance of my time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

□ 0945

CORPORATE AND FINANCIAL INSTITUTION COMPENSATION FAIRNESS ACT OF 2009

Mr. FRANK of Massachusetts. Mr. Speaker, pursuant to H. Res. 697, I call up the bill (H.R. 3269) to amend the Securities Exchange Act of 1934 to provide shareholders with an advisory vote on executive compensation and to prevent perverse incentives in the compensation practices of financial institutions, and ask for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Pursuant to House Resolution 697, the amendment in the nature of a substitute recommended by the Committee on Financial Services, now printed in the bill is adopted and the bill, as amended, is considered read.

The text of the bill, as amended, is as follows:

H.R. 3269

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Corporate and Financial Institution Compensation Fairness Act of 2009".

SEC. 2. SHAREHOLDER VOTE ON EXECUTIVE COMPENSATION DISCLOSURES.

(a) AMENDMENT.—Section 14 of the Securities Exchange Act of 1934 (15 U.S.C. 78n) is amended by adding at the end the following new subsection:

"(i) ANNUAL SHAREHOLDER APPROVAL OF EXECUTIVE COMPENSATION.—

"(1) ANNUAL VOTE.—Any proxy or consent or authorization (the solicitation of which is subject to the rules of the Commission pursuant to subsection (a)) for an annual meeting of the shareholders to elect directors (or a special meeting in lieu of such meeting) where proxies are solicited in respect of any security registered under section 12 occurring on or after the date that is 6 months after the date on which final rules are issued under paragraph (4), shall provide for a separate shareholder vote to approve the compensation of executives as disclosed pursuant to the Commission's compensation disclosure rules for named executive officers (which disclosure shall include the compensation committee report, the compensation discussion and

analysis, the compensation tables, and any related materials, to the extent required by such rules). The shareholder vote shall not be binding on the issuer or the board of directors and shall not be construed as overruling a decision by such board, nor to create or imply any additional fiduciary duty by such board, nor shall such vote be construed to restrict or limit the ability of shareholders to make proposals for inclusion in such proxy materials related to executive compensation.

"(2) SHAREHOLDER APPROVAL OF GOLDEN PARACHUTE COMPENSATION.—

"(A) DISCLOSURE.—In any proxy or consent solicitation material (the solicitation of which is subject to the rules of the Commission pursuant to subsection (a)) for a meeting of the shareholders occurring on or after the date that is 6 months after the date on which final rules are issued under paragraph (4), at which shareholders are asked to approve an acquisition, merger, consolidation, or proposed sale or other disposition of all or substantially all the assets of an issuer, the person making such solicitation shall disclose in the proxy or consent solicitation material, in a clear and simple form in accordance with regulations to be promulgated by the Commission, any agreements or understandings that such person has with any named executive officers of such issuer (or of the acquiring issuer, if such issuer is not the acquiring issuer) concerning any type of compensation (whether present, deferred, or contingent) that is based on or otherwise relates to the acquisition, merger, consolidation, sale, or other disposition of all or substantially all of the assets of the issuer and the aggregate total of all such compensation that may (and the conditions upon which it may) be paid or become payable to or on behalf of such executive officer.

"(B) SHAREHOLDER APPROVAL.—Any proxy or consent or authorization relating to the proxy or consent solicitation material containing the disclosure required by subparagraph (A) shall provide for a separate shareholder vote to approve such agreements or understandings and compensation as disclosed, unless such agreements or understandings have been subject to a shareholder vote under paragraph (1). A vote by the shareholders shall not be binding on the issuer or the board of directors of the issuer or the person making the solicitation and shall not be construed as overruling a decision by any such person or issuer, nor to create or imply any additional fiduciary duty by any such person or issuer.

"(3) DISCLOSURE OF VOTES.—Every institutional investment manager subject to section 13(f) shall report at least annually how it voted on any shareholder vote pursuant to paragraphs (1) or (2) of this section, unless such vote is otherwise required to be reported publicly by rule or regulation of the Commission.

"(4) RULEMAKING.—Not later than 6 months after the date of the enactment of the Corporate and Financial Institution Compensation Fairness Act of 2009, the Commission shall issue final rules to implement this subsection.

"(5) EXEMPTION AUTHORITY.—The Commission may exempt certain categories of issuers from the requirements of this subsection, where appropriate in view of the purpose of this subsection. In determining appropriate exemptions, the Commission shall take into account, among other considerations, the potential impact on smaller reporting issuers."

(b) PROHIBITION ON CLAWBACKS.—

(1) PROHIBITION.—No compensation of any executive of an issuer, having been approved by a majority of shareholders pursuant to section 14(i) of the Securities Exchange Act of 1934 (as added by subsection (a)), may be subject to any clawback except—

(A) in accordance with any contract of such executive providing for such a clawback; or

(B) in the case of fraud on the part of such executive, to the extent provided by Federal or State law.

(2) **REGULATIONS.**—The Securities and Exchange Commission shall promulgate rules necessary to implement and enforce paragraph (1).

SEC. 3. COMPENSATION COMMITTEE INDEPENDENCE.

(a) **STANDARDS RELATING TO COMPENSATION COMMITTEES.**—The Securities Exchange Act of 1934 (15 U.S.C. 78a et seq.) is amended by inserting after section 10A the following new section:

“SEC. 10B. STANDARDS RELATING TO COMPENSATION COMMITTEES.

“(a) **COMMISSION RULES.**—

“(1) **IN GENERAL.**—Effective not later than 9 months after the date of enactment of the Corporate and Financial Institution Compensation Fairness Act of 2009, the Commission shall, by rule, direct the national securities exchanges and national securities associations to prohibit the listing of any class of equity security of an issuer that is not in compliance with the requirements of any portion of subsections (b) through (f).

“(2) **OPPORTUNITY TO CURE DEFECTS.**—The rules of the Commission under paragraph (1) shall provide for appropriate procedures for an issuer to have an opportunity to cure any defects that would be the basis for a prohibition under paragraph (1) before the imposition of such prohibition.

“(3) **EXEMPTION AUTHORITY.**—The Commission may exempt certain categories of issuers from the requirements of subsections (b) through (f), where appropriate in view of the purpose of this section. In determining appropriate exemptions, the Commission shall take into account, among other considerations, the potential impact on smaller reporting issuers.

“(b) **INDEPENDENCE OF COMPENSATION COMMITTEES.**—

“(1) **IN GENERAL.**—Each member of the compensation committee of the board of directors of the issuer shall be independent.

“(2) **CRITERIA.**—In order to be considered to be independent for purposes of this subsection, a member of a compensation committee of an issuer may not, other than in his or her capacity as a member of the compensation committee, the board of directors, or any other board committee accept any consulting, advisory, or other compensatory fee from the issuer.

“(3) **EXEMPTION AUTHORITY.**—The Commission may exempt from the requirements of paragraph (2) a particular relationship with respect to compensation committee members, where appropriate in view of the purpose of this section.

“(4) **DEFINITION.**—As used in this section, the term ‘compensation committee’ means—

“(A) a committee (or equivalent body) established by and amongst the board of directors of an issuer for the purpose of determining and approving the compensation arrangements for the executive officers of the issuer; and

“(B) if no such committee exists with respect to an issuer, the independent members of the entire board of directors.

“(c) **INDEPENDENCE STANDARDS FOR COMPENSATION CONSULTANTS AND OTHER COMMITTEE ADVISORS.**—Any compensation consultant or other similar adviser to the compensation committee of any issuer shall meet standards for independence established by the Commission by regulation.

“(d) **COMPENSATION COMMITTEE AUTHORITY RELATING TO COMPENSATION CONSULTANTS.**—

“(1) **IN GENERAL.**—The compensation committee of each issuer, in its capacity as a committee of the board of directors, shall have the authority, in its sole discretion, to retain and obtain the advice of a compensation consultant meeting the standards for independence promulgated pursuant to subsection (c), and the com-

pensation committee shall be directly responsible for the appointment, compensation, and oversight of the work of such independent compensation consultant. This provision shall not be construed to require the compensation committee to implement or act consistently with the advice or recommendations of the compensation consultant, and shall not otherwise affect the compensation committee's ability or obligation to exercise its own judgment in fulfillment of its duties.

“(2) **DISCLOSURE.**—In any proxy or consent solicitation material for an annual meeting of the shareholders (or a special meeting in lieu of the annual meeting) occurring on or after the date that is 1 year after the date of enactment of the Corporate and Financial Institution Compensation Fairness Act of 2009, each issuer shall disclose in the proxy or consent material, in accordance with regulations to be promulgated by the Commission whether the compensation committee of the issuer retained and obtained the advice of a compensation consultant meeting the standards for independence promulgated pursuant to subsection (c).

“(3) **REGULATIONS.**—In promulgating regulations under this subsection or any other provision of law with respect to compensation consultants, the Commission shall ensure that such regulations are competitively neutral among categories of consultants and preserve the ability of compensation committees to retain the services of members of any such category.

“(e) **AUTHORITY TO ENGAGE INDEPENDENT COUNSEL AND OTHER ADVISORS.**—The compensation committee of each issuer, in its capacity as a committee of the board of directors, shall have the authority, in its sole discretion, to retain and obtain the advice of independent counsel and other advisers meeting the standards for independence promulgated pursuant to subsection (c), and the compensation committee shall be directly responsible for the appointment, compensation, and oversight of the work of such independent counsel and other advisers. This provision shall not be construed to require the compensation committee to implement or act consistently with the advice or recommendations of such independent counsel and other advisers, and shall not otherwise affect the compensation committee's ability or obligation to exercise its own judgment in fulfillment of its duties.

“(f) **FUNDING.**—Each issuer shall provide for appropriate funding, as determined by the compensation committee, in its capacity as a committee of the board of directors, for payment of compensation—

“(1) to any compensation consultant to the compensation committee that meets the standards for independence promulgated pursuant to subsection (c), and

“(2) to any independent counsel or other adviser to the compensation committee.”.

(b) **STUDY AND REVIEW REQUIRED.**—

(1) **IN GENERAL.**—The Securities and Exchange Commission shall conduct a study and review of the use of compensation consultants meeting the standards for independence promulgated pursuant to section 10B(c) of the Securities Exchange Act of 1934 (as added by subsection (a)), and the effects of such use.

(2) **REPORT TO CONGRESS.**—Not later than 2 years after the rules required by the amendment made by this section take effect, the Commission shall submit a report to the Congress on the results of the study and review required by this paragraph.

SEC. 4. ENHANCED COMPENSATION STRUCTURE REPORTING TO REDUCE PERVERSE INCENTIVES.

(a) **ENHANCED DISCLOSURE AND REPORTING OF COMPENSATION ARRANGEMENTS.**—

(1) **IN GENERAL.**—Not later than 9 months after the date of enactment of this Act, the ap-

propriate Federal regulators jointly shall prescribe regulations to require each covered financial institution to disclose to the appropriate Federal regulator the structures of all incentive-based compensation arrangements offered by such covered financial institutions sufficient to determine whether the compensation structure—

(A) is aligned with sound risk management;

(B) is structured to account for the time horizon of risks; and

(C) meets such other criteria as the appropriate Federal regulators jointly may determine to be appropriate to reduce unreasonable incentives offered by such institutions for employees to take undue risks that—

(i) could threaten the safety and soundness of covered financial institutions; or

(ii) could have serious adverse effects on economic conditions or financial stability.

(2) **RULES OF CONSTRUCTION.**—Nothing in this subsection shall be construed as requiring the reporting of the actual compensation of particular individuals. Nothing in this subsection shall be construed to require a covered financial institution that does not have an incentive-based payment arrangement to make the disclosures required under this subsection.

(b) **PROHIBITION ON CERTAIN COMPENSATION ARRANGEMENTS.**—Not later than 9 months after the date of enactment of this Act, and taking into account the factors described in subparagraphs (A), (B), and (C) of subsection (a)(1), the appropriate Federal regulators shall jointly prescribe regulations that prohibit any incentive-based payment arrangement, or any feature of any such arrangement, that the regulators determine encourages inappropriate risks by covered financial institutions that—

(1) could threaten the safety and soundness of covered financial institutions; or

(2) could have serious adverse effects on economic conditions or financial stability.

(c) **ENFORCEMENT.**—The provisions of this section shall be enforced under section 505 of the Gramm-Leach-Bliley Act and, for purposes of such section, a violation of this section shall be treated as a violation of subtitle A of title V of such Act.

(d) **DEFINITIONS.**—As used in this section—

(1) the term “appropriate Federal regulator” means—

(A) the Board of Governors of the Federal Reserve System;

(B) the Office of the Comptroller of the Currency;

(C) the Board of Directors of the Federal Deposit Insurance Corporation;

(D) the Director of the Office of Thrift Supervision;

(E) the National Credit Union Administration Board;

(F) the Securities and Exchange Commission; and

(G) the Federal Housing Finance Agency; and

(2) the term “covered financial institution” means—

(A) a depository institution or depository institution holding company, as such terms are defined in section 3 of the Federal Deposit Insurance Act (12 U.S.C. 1813);

(B) a broker-dealer registered under section 15 of the Securities Exchange Act of 1934 (15 U.S.C. 78o);

(C) a credit union, as described in section 19(b)(1)(A)(iv) of the Federal Reserve Act;

(D) an investment advisor, as such term is defined in section 202(a)(11) of the Investment Advisers Act of 1940 (15 U.S.C. 80b-2(a)(11));

(E) the Federal National Mortgage Association;

(F) the Federal Home Loan Mortgage Corporation; and

(G) any other financial institution that the appropriate Federal regulators, jointly, by rule,

determine should be treated as a covered financial institution for purposes of this section.

(e) **EXEMPTION FOR CERTAIN FINANCIAL INSTITUTIONS.**—The requirements of this section shall not apply to covered financial institutions with assets of less than \$1,000,000,000.

(f) **GAO STUDY.**—

(1) **STUDY REQUIRED.**—

(A) **IN GENERAL.**—The Comptroller General of the United States shall carry out a study to determine whether there is a correlation between compensation structures and excessive risk taking.

(B) **FACTORS TO CONSIDER.**—In carrying out the study required under subparagraph (A), the Comptroller General shall—

(i) consider compensation structures used by companies from 2000 to 2008; and

(ii) compare companies that failed, or nearly failed but for government assistance, to companies that remained viable throughout the housing and credit market crisis of 2007 and 2008, including the compensation practices of all such companies.

(C) **DETERMINING COMPANIES THAT FAILED OR NEARLY FAILED.**—In determining whether a company failed, or nearly failed but for government assistance, for purposes of subparagraph (B)(ii), the Comptroller General shall focus on—

(i) companies that received exceptional assistance under the Troubled Asset Relief Program under title I of the Emergency Economic Stabilization Act of 2009 (12 U.S.C. 5211 et seq.) or other forms of significant government assistance, including under the Automotive Industry Financing Program, the Targeted Investment Program, the Asset Guarantee Program, and the Systemically Significant Failing Institutions Program;

(ii) the Federal National Mortgage Association;

(iii) the Federal Home Loan Mortgage Corporation; and

(iv) companies that participated in the Security and Exchange Commission's Consolidated Supervised Entities Program as of January 2008.

(2) **REPORT.**—Not later than the end of the 1-year period beginning on the date of the enactment of this Act, the Comptroller General shall issue a report to the Congress containing the results of the study required under paragraph (1).

The SPEAKER pro tempore. After 1 hour of debate on the bill, as amended, the amendment printed in House Report 111-237, if offered by the gentleman from Massachusetts (Mr. FRANK) or his designee, shall be considered read, and shall be debatable for 10 minutes equally divided and controlled by the proponent and an opponent. Thereafter, the amendment in the nature of a substitute printed in the report, if offered by the gentleman from New Jersey (Mr. GARRETT) or his designee, shall be considered read and shall be debatable for 30 minutes equally divided and controlled by the proponent and an opponent.

The gentleman from Massachusetts (Mr. FRANK) and the gentleman from Alabama (Mr. BACHUS) each will control 30 minutes.

The Chair will recognize the gentleman from Massachusetts.

GENERAL LEAVE

Mr. FRANK of Massachusetts. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days on this bill to revise and extend their remarks and include therein extraneous material.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. FRANK of Massachusetts. Mr. Speaker, I recognize myself for such time as I may consume.

Mr. Speaker, I have encountered gaps between rhetoric and reality in this Chamber, never one as great as the wildly distorted description of this bill that we've got before us.

Let's be very clear. There are differences between the parties here on the whole, at least as reflected in the committee vote. I think it will probably be different on the floor. There is much less difference than there used to be about one piece of it, the say-on-pay.

When the say-on-pay bill came up previously in 2007—by the way, when the Republicans were in the majority prior to 2007, on this, as on many other issues, we Democrats tried to do some reforms, predatory lending being one—we got nowhere—credit cards being another. We did try, in our Committee on Financial Services, to bring this up. The Republicans used their majority not to allow it.

In 2007, when we were in the majority, we did bring it to the floor, and it passed over the objection of most Republicans, and I will introduce into the RECORD their comments denouncing say-on-pay. But 2 years later, they have moved some. So they are now for reform on say-on-pay, many of them, although a somewhat watered-down form.

I should say there is a stark difference between us remaining on whether or not any action should be taken whatsoever by the Federal Government to restrain compensation practices that inflict excessive risk on the economy. We should be very clear; this assertion that this amounts to control of all wages and prices is nonsense. There is, of course, nothing about prices at all in the bill. As to wages, what it says is that the SEC shall impose rules that prevent excessive risk-taking, and the reference to wages is only in that context.

The amount of wages is irrelevant to the SEC. What this bill explicitly aims at is the practice whereby people are given bonuses that pay off if the gamble or the risk pays off but don't lose you anything if it doesn't. That is, there is a wide consensus that this incentivizes excessive risk for you a shorter time. If you're the head of a financial institution or you're one of the decisionmakers or you take actions that are risky and 1 month later it looks like they paid off and you get your money and then 6 months later it turns out it blew up, you don't lose any of the money you got. And if at the outset you take a risk and it costs the company a lot of money, that doesn't cost you anything.

All we are saying is that there has to be some balance to the risk-taking. And people ask, What is excessive risk? Excessive risk is when the people who take the risk pay no penalty when it goes wrong; when they have a heads they win, tails they break even situation; when the company loses money and the economy may suffer, but the decision-makers do not.

Now, one of the sillier remarks we heard was this will cause us a problem with international competition. In fact, say-on-pay, when the Republican Party overwhelmingly opposed it 2 years ago, was already borrowed from Great Britain, the United Kingdom. And we were told during 2006 that we were losing a lot of business to Great Britain, that we should cut back on Sarbanes-Oxley, for instance, because people would go to England. But England had the very proposal that they were saying was going to drive people away.

In fact, today—I will read from an article from a couple weeks ago. The Prime Minister of England says they are going to adopt plans forcing banks to hold back half of all bonuses for up to 5 years to discourage excessive risk-taking. That's our major financial competitor. And the conservative opposition is critical because it's not mandatory.

We have been in conversations with the European Union, the United Kingdom, with Canada, and others. This will be done on a coordinated basis. In fact, American salaries, American compensation has been much higher.

So, no, there is no price control; no, there is no wage control; no, it is not a problem for international competition. And by the way, as to every institution, every credit union—you heard that rhetoric—the bill exempts any institution with less than \$1 billion in assets, and it gives the SEC the authority to even raise that so there's even less. But here's the nub of it: The Republican Party has reluctantly been dragged—reality sometimes has an impact—to supporting a watered-down version of say-on-pay.

Say-on-pay, by the way, says that the shareholders of the company can vote and express their opinion. The gentleman from Texas was upset that we don't have a Federal Election Commission mechanism for these votes. But why only these votes? Shareholders vote on everything. Apparently it's only when the shareholders tend to vote on pay that Republican sensibilities are trampled.

We do not, in this bill, talk about the amounts. We do say the shareholders should. We say, in consultation with all the advocacy groups who represent shareholders and pension funds and elsewhere, that the people who own the company, the shareholders, should be able to express their opinion on the compensation.

We go beyond that to say that we believe the Federal Government has interest—not in the level of compensation, that's up to the shareholders—in the structure. When you have, as we have seen, structures whereby companies lose lots of money, and they lose lots of money on particular deals, but the people who made those deals make money on them, that has a systemic negative impact on this society because it incentivizes much too much risk.

Now, what is the Republican approach to that? Nothing. They admit that these are problems. They regret that these things are happening, but their regrets won't stop the damage. In the Republican substitute there is a watering down of say on pay, but they at least acknowledge that reluctantly. But when it comes to the practice of large corporations in the financial area structuring bonuses that incentivize excessive risk, my Republican friends admit that that's the case and lament it and are adamant that we should do nothing about it. That's the big difference.

We believe that the SEC—and by the way, as to the form, it was a Republican former Member of this body, Christopher Cox, who was Chair of the SEC, proposed disclosure. He broached it first. He said we have an important public interest in knowing it.

So we are going to take the form of disclosure of compensation prescribed by a Republican Member of this House as Chairman of the SEC, with his colleagues, and let the shareholders say yes or no. We are going to go beyond that and say that the SEC should look at this and say, you know, you have a situation here where people making the decisions will have an incentive to take too much risk. If you tell people that if they take a risk and it pays off they are enriched, and if it fails miserably, they don't lose anything, they will take more risk than rationally should be taken.

You should not incentivize people to take risks where they can only benefit and never suffer a penalty. That's all this bill says. We will prevent that kind of thing from happening. We won't set amounts. We won't deal with wage controls. We won't do anything else, and we exempt institutions under \$1 billion.

So I await the Republican counter. Yes, they want to water down say-on-pay, but they reluctantly accept it, but they have zero to offer with regard to the situation of excessive bonuses. And yes, we did get some reluctant agreement that we put some limits on the people who are recipients of TARP funds, but one of those who received TARP funds prospered with those funds, paid back the funds, and are now engaging in the same risky bonus practices they had before.

The Republican position, at least in committee, was to do nothing about it,

zero. Ours is, have rules, not that set the limits, not that set wage controls, but simply say that you cannot structure it so that whatever level of compensation you have, you profit if the bonus pays off and you lose nothing if the bonus causes great damage to your company and the economy.

Mr. Speaker, I reserve the balance of my time.

Mr. BACHUS. Mr. Speaker, I rise in opposition to this legislation and yield myself 5 minutes.

Mr. Speaker, the American people are rightly disturbed by almost daily reports of so-called "too big to fail" corporations that have received billions of dollars in government assistance and have, at the same time, paid their employees billions of dollars in bonuses.

In response to those events, Republicans have introduced legislation which gets the American people out of the bailout business—that, Mr. Speaker, is our response—and prohibits the government from picking winners and losers. We believe that's the solution.

The legislation we have introduced clearly establishes a structure where failure is not rewarded and market discipline is reestablished by placing responsibility for those who engage in risky behavior squarely where it belongs, on the risk-taker, not the taxpayer. That is the Republican response.

The Obama administration takes a different approach. It continues to embrace the "too big to fail" doctrine. That's why we're here today. That's why we have to address executive compensation. It appoints a pay czar to oversee compensation at the growing list of companies receiving taxpayer-funded bailouts and guarantees.

Despite growing public outrage over these companies dishing out billions of dollars in government-enabled bonuses, the Obama administration and the Democratic congressional leadership steadfastly refuses to embrace Republican legislation or offer its own proposals prohibiting further taxpayer bailouts. Instead, it says that these same corporations are simply too significant to allow them to fail, which not only enables but encourages these same corporations to continue what the Obama administration concedes is more risky behavior.

One of the behaviors that the administration and Chairman FRANK identify as risky in these systematically significant corporations is executive compensation. Today we are presented with a fix, a legislative response to these bailout bonuses and the resulting public outrage. The cure-all solution bears the lofty and noble title Corporate and Financial Institution Compensation Fairness Act. It is in every way up to the challenge laid down by our former colleague, Mr. Emanuel, most recently of 1600 Pennsylvania Avenue, who said, "Never let a crisis go to waste."

□ 1000

It is also in many ways closely akin to the recently departed cap-and-tax legislation and the ever-looming government, or should I say public option, health plan. All three are sweeping power grabs into the private sector under the guise of the government's riding to the rescue. All three rely on the government to fix the problem. All three promise to fix the problem, which to a great extent was caused by guess who? That's right, the government and lack of regulation by the government. All three will create, or more accurately duplicate, large government bureaucracies. All three represent ill-advised and in many cases incompetent government intrusions.

Just 3 weeks or 4 weeks ago, Gene Sperling, legal counsel for our Secretary of Treasury, warned, Go slow. He said this is a very difficult subject. It needs testing. It has potential for unintended consequences. Just yesterday before the Senate, the White House press spokesman Robert Gibbs stated that the Obama administration is concerned that the chairman's legislation may give the government regulators too much say on incentive-based compensation. But as the chairman said to the Rules Committee, My legislation goes beyond what the Obama administration has proposed.

Now, if that doesn't take your breath away, nothing will.

In some ways this legislation borders on the classic "bait and switch." It's being sold as giving the owners of the corporation the right to set pay and compensation standards. That's the shareholders. Chairman FRANK just this week on CNBC said, Dollar amounts are for the shareholders to decide. It's up to the shareholders.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. BACHUS. I yield myself an additional 2 minutes.

At the markup of this bill, he said say-on-pay empowers the shareholders, and that's where questions about amounts would come in. True, the first 6 pages of the bill give the owners, the shareholders, a non-binding vote on the pay of top executives. But then come the next 8 pages, the switch, which gives the regulators the power to decide appropriate compensation for not only just top executives but for all employees of all financial institutions above \$1 billion in assets and all without regard for the shareholders' prior approval. So under the guise of empowering shareholders, it is, in fact, the government that is empowered.

One lesson we have learned from the government's arbitrary interventions over the past 18 months, and that is the converse of "too big to fail" is too small to save, which, of course, is the designation which applies to 99.9 percent of businesses, which have been deemed by this administration and the

regulators as “systemically unimportant or insignificant.” But not so unimportant, not so insignificant to be totally ignored. While not significant enough to receive a bailout, they are apparently worthy of increased regulation in the form of government-mandated pay regulations and new disclosure requirements in the chairman’s bill.

And, finally, on page 15, the bill designates those same government entities which are empowered to control compensation plans that would threaten the safety of financial institutions or adversely impact economic conditions or financial stability to oversee this riskiness. Look over the list and see if it inspires confidence.

The SPEAKER pro tempore. The time of the gentleman has again expired.

Mr. BACHUS. I yield myself 1 additional minute.

These are the same government agencies that regulated AIG, Countrywide, and collectively failed to prevent the worst financial calamity since the Great Depression. If it took them 30 years to catch Bernie Madoff, do you really think the SEC can do a better job of identifying inappropriate risk than the vast majority of financial institution executives whose businesses have remained solvent during these challenging times? Really, now, is there any question who is better qualified or, for that matter, who ought to be responsible for setting compensation within an American corporation?

In closing, Mr. Speaker, this bill continues the Democrat majority’s tendency to go to the default solution for every problem: create a government bureaucracy to make decisions better left to private citizens and private corporations. That’s what we did in cap-and-trade. That’s what we did in the health care proposals. And it’s this bill on executive compensation. Government bureaucrats do not know what’s best for America.

For those reasons, Mr. Speaker, I urge opposition to this legislation.

Mr. Speaker, I reserve the balance of my time.

Mr. FRANK of Massachusetts. Mr. Speaker, I yield myself 3 minutes to deal with some of these comments.

First of all, I am struck by the fact that the gentleman, as he indicated in our markup, is sufficiently nervous about the political implications of opposing this bill and having the House take no action whatsoever to deal with the problem of risk-incentivizing bonuses but he wants to debate cap-and-trade and health care. They’re not before us. What’s before us is this bill. And when Members debate the bills that aren’t there, it’s an indication that they’re a little shaky on the bills that are there.

Secondly, yes, it does say that they can deal with all wages but not in gen-

eral. The gentleman reads very selectively. The language about taking action is in this context: to determine whether the compensation structure is aligned with sound risk management, is structured to account for the time horizon of risks, and will reduce unreasonable incentives by such institutions for employees to take undue risks.

It is limited in its grant of authority only to structures that incentivize excessive risk. There is no mandate here to set wages for anybody. There is no mandate to say this percentage is bonuses and that percentage is pay. It is a mandate only to act where the structure incentivizes risk, as has been recognized as part of the problem, very broadly.

I will plead guilty to one issue, yes. We are not in this case taking orders from the Obama administration. And maybe having represented a party that took orders from the Bush administration, they now wish they didn’t, but that’s not an example I want to follow. I am not here as a Member of Congress or as chairman of a committee to do whatever the administration says. I am here for us to put our independent judgment on it.

The gentleman closed with the key difference between us: the Republican position, as he articulates it—and I don’t think it will be the unanimous position—is have the Federal Government take no action whatsoever to restrain the granting of bonuses that incentivize excessive risk. If they pay back that TARP money having benefited from it—and, by the way, on the bailout, every single bailout now underway happened under the Bush administration. But their position is, do nothing to deal with this. We take the opposite position.

Mr. Speaker, I reserve the balance of my time.

Mr. BACHUS. Mr. Speaker, I yield 2 minutes to the gentleman from South Carolina (Mr. BARRETT).

Mr. BARRETT of South Carolina. Mr. Speaker, I rise today in opposition of H.R. 3269, the Corporate and Financial Institution Compensation Fairness Act of 2009.

Restoring confidence in our financial markets is crucial, Mr. Speaker, a component in bringing about economic recovery. And I support efforts to responsibly address the issues that led to the financial crisis that we’re facing today.

However, H.R. 3269 does not do either. Instead of addressing the need for smarter regulation, this bill represents further government intrusion into the private sector that could ultimately hinder economic recovery. If this legislation is passed, it will put in place far-reaching and permanent government regulations on the compensation practices of financial institutions, crippling their ability to recruit top talent and remain competitive abroad and here at home.

Mr. Speaker, this bill goes too far by giving the Federal Government the authority to make compensation decisions for a wide range of employees in thousands of financial firms across the United States, which we can all agree is a far cry from just capping executive pay.

In tough economic times like these, we need to focus on ways to restore confidence in America’s financial markets and increase the ability of American businesses through responsible policies that restore market discipline and discourage excessive risk. I firmly believe that we cannot have a successful economic recovery with the permanent overreaching regulations that this puts in place by this legislation.

I therefore urge my colleagues to join me in voting “no” on this legislation.

Mr. FRANK of Massachusetts. Mr. Speaker, I yield 4 minutes to a member of the committee, the gentleman from Georgia (Mr. SCOTT).

Mr. SCOTT of Georgia. Mr. Speaker, let me just start out by saying this. We’re hearing complaints from the other side that we are taking over the private enterprise system; we are taking over the free enterprise system.

Let me remind them that it wasn’t us that went to the private enterprise system. It wasn’t the government that went to Wall Street. Wall Street came to the government to bail them out from their behaviors.

Now, Mr. Speaker, the American landscape is absolutely littered with company after company that has been driven into the ground by executives who were greedy, who were selfish, cared only about themselves, with these huge salaries, and these companies are left to wither on the vine after they have gotten their golden parachutes and have landed elsewhere.

Somebody needs to say something about the American people. This is a free enterprise system, but it’s not just free for top executives. It’s free for shareholders. It’s free for those men and women who have given their lives, their blood, their sweat, and their tears. And to see their companies in shambles because of excessive pay by executives who have abandoned those companies, what about their pensions? What about their retirements that have gone?

No, Mr. Speaker, this is not about taking over the private enterprise system. Mr. Speaker, this is about saving and protecting the free enterprise system so that we all can be free to participate in this system.

Mr. Speaker, what we have before us here is something because of the fact that financial firms put together compensation packages and bonuses that were based on incentives, that were laden with excessive risk, that caused our financial crisis and brought this economy to the edge of collapse and caused us here in Congress to go and

get over \$2 trillion of the American taxpayers' money to bail them out.

Now, the first order of business—and this is why this bill that Chairman FRANK has pushed, and I'm proud to say that we worked on this together over 3 years ago. Had we had that bill in place 3 years ago, we might not have had this financial crisis, because we would have been able to rein in the risky corporate behavior that brought about the collapse. So that's what we are doing. We're putting forward some reasonable means here.

What is more reasonable than giving the shareholders a simple say, a vote? It's nonbinding. We are not setting the salaries. Even the shareholders are not. But don't they have a right? Isn't it their company? They are the ones that are pumping the money into it.

The other feature about the bill, Mr. Speaker, that is very simple, very reasonable, is that we require these compensation committees that are on these boards to be independent. Right now it's a cozy relationship. The CEO refers to them as his board. They're handpicked. They are paid \$50,000, \$100,000, \$200,000 to come and sit.

They need to be independent. And we have rules and regulations in the bill that allow for the regulators to determine what these conditions will be to make sure they're independent. We make sure that the consultants who come in and help set up these compensation packages are there.

The other point that we do, Mr. Speaker, is this, which is very important: we also want to make sure that as we move forward in this, that risky behavior is disclosed so that we can prevent it.

It's a very good bill, Mr. Speaker, and I urge its passage.

Mr. BACHUS. Mr. Speaker, I yield 2 minutes to the gentleman from New Jersey (Mr. LANCE).

□ 1015

Mr. LANCE. Mr. Speaker, I rise out of concern for section 4 of this bill. We had an amendment in the Rules Committee that I offered with the distinguished gentleman from Georgia, and it was ruled out of order by the Rules Committee. We believe that the amendment was germane, drafted properly and submitted on time. The amendment dealt with section 4.

Regarding section 4, I believe that it is overly broad, and in particular I am concerned with the section that says, regarding incentive-based compensation, that Federal regulators can review that based upon other criteria as the appropriate Federal regulators jointly may determine to be appropriate to reduce unreasonable incentives for officers and employees to take undue risks.

In my judgment, that gives too much discretion to Federal regulators, and we should be specific as Members of

Congress in the statutory basis for compensation issues.

I am also concerned that if this becomes law, that there will be a tendency for capital to move away from the United States, particularly New York, and to places like London and Asia. This is a matter I have discussed previously in the committee, and I certainly believe that we should continue to be the place in the world where this type of activity occurs.

Our amendment in no way takes away the other provisions of this bill regarding say-on-pay and the independence of compensation boards. But I am sorry that our amendment was not considered favorably in the Rules Committee and therefore will not be considered favorable here on the floor.

This morning, a report from Bloomberg indicates that the White House press secretary, Mr. Gibbs, said yesterday the administration is concerned that the measure may give regulators too much say on incentive pay. I agree with that sentiment.

Mr. FRANK of Massachusetts. Mr. Speaker, I yield myself 30 seconds to say on behalf of the Obama administration, I welcome this very temporary expression of deference to their views. It will not last very long. As soon as it is politically convenient, it will disappear. So I urge them to enjoy that brief moment of graciousness.

Mr. Speaker, I yield 4 minutes to the gentleman from Texas (Mr. AL GREEN).

Mr. AL GREEN of Texas. Mr. Speaker, although they are not my words, we have heard that it takes an act of Congress to get many things done. I would only add to this what I have heard, it also takes a Congress willing to act. This is our opportunity to act. This is our opportunity to do what Dr. King called "bending the arc of the moral universe toward justice." This piece of legislation is just, given the circumstances that we have been coping with.

There is no dispute that many CEOs have had their pay structured such that no matter what the consequences of their actions, they were going to receive enormous bonuses. I think there are two good reasons to support this legislation: one, it deals with the safety and soundness of the banking institutions. It performs perfectly if it does just this, as far as I am concerned.

If it allows a banking regulator who sees that the structure of pay is impacting the safety and soundness of the institution, if it allows this regulator to take some affirmative action to protect the safety and soundness of the institution, this piece of legislation is working. That is what it is designed to do, not to structure the pay, but to prevent the pay from causing ordinary people to have to bail out big banks.

People are expecting us to do something to prevent this from happening again. If we are going to act, this is a

means by which we can act. Talking about that which we cannot do and will not do that is not on the agenda will not help us to do what we can do today. I never let what I cannot do prevent me from doing what I can do.

The second reason why I support this legislation: this legislation allows shareholders—by the way, I trust shareholders. I think people who have a vested interest in something ought to have some say. I think they ought to be able to know what the salary structure is and say something about it. And in this case it is nonbinding. There are many people who are of the opinion that nonbinding is not enough. But I trust the shareholders to have an opinion. They have but an opinion. They don't do anything to bind the corporation.

These two reasons, when combined, will help us with the safety and soundness of these institutions and give the shareholders an opportunity to know how the salaries are structured and have some say.

Finally, if we want to be a Congress that acts, we have got to have courage. These are trying times. These are difficult times. It is easy to stay with the status quo. Those who want change have got to be willing to take the risk of doing the right thing.

The arc of the moral universe bends towards justice, but it doesn't do so by itself. It does so because of people who are willing to do the right thing under unusual and extraordinary circumstances.

I am going to stand with the chairman. I believe the chairman is eminently correct. He has structured a great piece of legislation. Those who really want change will vote for this legislation. Those who want to see a better system so we don't end up with more headlines that read "bailed out banks gave millions in executive bonuses," notwithstanding the fact that these banks have not been managed properly and could have been managed a lot better, these kinds of headlines are going to cause problems for a lot of people.

I am going to vote with the chairman. I am voting for the bill. It is a good bill. It is a just bill.

Mr. BACHUS. Mr. Speaker, I yield 4 minutes to the gentleman from Texas (Mr. HENSARLING).

Mr. HENSARLING. Mr. Speaker, I thank the gentleman for yielding.

There are aspects of this legislation that I certainly appreciate. All Americans have been outraged—it is a word we use frequently, and we use justifiably—about some of the compensation packages we have seen from failed companies that come with tin cup in hand to the United States taxpayer looking for more.

This bill has some provisions that add increased transparency, some increased accountability; and that is

good. But, unfortunately, the bad in the bill way outshadows the good.

I have always said, Mr. Speaker, what you do with your money is your business. What you do with the taxpayer money is our business.

Mr. Speaker, unfortunately, you can't just read the bumper sticker slogan. You actually have to read the legislation. So we hear speech after speech about these failed institutions taking in all of this government money.

Well, I wonder then why in committee on a party-line vote did we vote down an amendment that I brought that would have ensured that the bailout recipients, that this legislation applied to them and them only. They are the poster children in this debate, yet the legislation extends potentially to every public company in America that somehow is defined as a "covered financial institution."

By the way, I would say to my friends on the other side of the aisle, the best way to deal with risky pay schemes is to quit bailing them out in the first place. My friends on the other side of the aisle are enshrining us as a bailout Nation. So you complain about the taxpayers picking up the tab. I have complained about the taxpayers picking up the tab. Quit bailing them out in the first place.

Again, we have to read the bill and not just read the slogan, because if you read the bill, what you find out is, number one, this isn't just pay restrictions that go to those in the troubled Wall Street firms. Again, it is almost every covered financial institution. And guess what? If you read further into the bill, it doesn't just cover the top officers, the top executives. Every single employee, every single employee who has an "incentive-based compensation plan" could be covered by this.

We have already learned that somehow, with a very interpretive approach to the English language, General Motors and Chrysler have been found to be financial institutions. This means that any employee, any employee who receives a tip, a sales commission, a Christmas bonus, could have a Federal bureaucrat take it away from them. Ho ho ho.

That is what this legislation is all about. Again, don't get sucked in by the bumper sticker slogan. Read the legislation. That was the problem here on the original bailout. Nobody read the legislation. The government stimulus, nobody read the legislation. Well, fortunately, this isn't a 1,000-page bill. I think it is about 15 or 20 pages. I actually took the time to read it.

And if this is just about class warfare, Mr. Speaker, why doesn't this do anything about Hollywood stars who make \$25 million for a movie, and yet the movie loses money? Why isn't it about a third baseman for the New York Yankees who gets \$21 million and ties his worst record for striking out in

the season? Why doesn't this have anything to do with the personal injury trial lawyers who make millions and millions, and their clients are doing good to make thousands?

The SPEAKER pro tempore. The time of the gentleman from Texas has expired.

Mr. BACHUS. I yield the gentleman 1 additional minute.

Mr. HENSARLING. So I hear the rhetoric from the other side of the aisle, which once again seems like a lot of recycled class warfare to me.

Another point I would make, Mr. Speaker, is we hear that we need this in order to somehow deal with safety and soundness. We need this legislation to somehow deal with systemic risk.

Well, number one, I listened very carefully to the testimony that was presented in our committee, and I am sure it is theoretically possible that there are pay structures that somehow may lend themselves to this. But, again, show me the evidence. Where is the evidence? When I look at pay structures among financial firms that failed versus those that didn't fail, I don't see the correlation.

Second of all, as we know, Mr. Speaker, the regulators have the power to regulate the liquidity and capital standards of these financial firms to make it commensurate with the risk. That is the remedy. That is the remedy, not to take Christmas bonuses away from employees.

Mr. FRANK of Massachusetts. Mr. Speaker, I yield myself such time as I may consume.

There is, of course, a contradiction here. When we are talking about a power, namely, to reduce excessive risk incentivizing bonuses that the Republicans want to defend, they talk about the unelected bureaucrats. The unelected bureaucrats can't be trusted. Except the gentleman from Texas, of course, just closed by saying don't worry, the unelected bureaucrats are out there to protect us.

The unelected bureaucrats in the Republican cosmology are like the Obama administration: they are either convenient whipping boys or great sources of wisdom, depending on where Republican ideology turns to them. But the gentleman from Texas just said we don't have to worry. We have those, as his colleagues called them, unelected bureaucrats to do it.

But I am interested, I have noticed a number of Members have said they don't like the bonuses. Is there a Republican proposal to deal with the bonuses that are being given?

Our proposal does not empower anybody to limit the amounts. The question is, is there a Republican proposal that would deal with what Paul Volcker and Ben Bernanke and the financial regulators in England and Warren Buffett and many others believe is a destabilizing tendency to give out bo-

nuses that give you an incentive to take excessive risks, excessive in the sense that you benefit if the risk pays off and you don't lose.

We want people to take risks, but we want them to take risks which balance the upside and the downside, not which just look only at the upside. And I continue to point out not in that committee, not in that 12 years they controlled this place, not during this debate today, not in the Rules Committee, we have not seen a single Republican proposal to deal with bonuses.

Their position apparently is however the financial industry wants to structure bonuses, no matter what they say, that you get a bonus if it pays off in the short term and it turns sour in the long term. You get a bonus if it pays off, but you don't lose a thing if it doesn't pay off. They would leave that entirely unchanged. I think that is very dangerous to the economy, and, yes, there is a consensus among financial regulators and others that this has contributed to risk-taking.

We all believe in the free-market system and the incentives. How can it be that you acknowledge that there is a system which says to people, take a risk, because it is risk-free for you?

□ 1030

It's risk-free for the individual. It's risky for the company; and when you accumulate all those risks for the company, it's risky for the economy. We're saying, if it's risky for the company and risky for the economy, it ought to be risky for the individual. We want an alignment of risks. We don't want risk-free individuals taking big risks on behalf of those who are going to have to suffer. We have a proposal to restrain that. The Republican position on that is, do nothing. Let them keep going exactly as they have been going.

Let us return, as I said the other day, to the thrilling days of yesteryear when the lone rangers will ride again, untrammelled by any set of rules. They will be able to continue to give themselves bonuses that allow them to be free of risk. That's the deal. The company will face risk. The economy will accumulate and face risk. But the decision-makers will be free of the risks' negative side; they will gain from the risks' positive side; and like rational people, they will take more risks.

I reserve the balance of my time.

Mr. BACHUS. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. CAMPBELL).

Mr. CAMPBELL. I thank the gentleman for yielding, and I hear the chairman's comments and remarks. There is no argument with anyone, I think, on this floor that executive pay has been an issue, that there have been excesses and that there have been problems that have been created in companies and the economy with executive compensation. I think I would argue

that rather than excessive risk taking, that it's more about short-term thinking instead of long-term thinking, which, by the way, is way bigger than just executive pay and is way bigger than the scope of this bill, and which this bill will not solve. But that's another issue.

The question for me is whether this is the right way to deal with it. I would argue no, because is the only problem out there in corporate governance? Is the only thing that has created problems for companies related to executive pay? No. Let's look at General Motors and Chrysler and their recent problems. Were their problems created because of executive pay? I'm not sure I've heard anybody argue that. But were their problems caused, in part at least, because of excessive union contracts? Yes. How about with retirement programs that were unfundable over time? Yes. What about other companies where perhaps there have been legal settlements that have created problems that have been fatal or resulted in companies going bankrupt? Those have occurred. How about mergers and acquisitions?

So what are we going to do? Are we going to have shareholders vote on pay, on mergers, on acquisitions, on union contracts, on retirement pay, on legal settlements, on fees to attorneys? Any of those arguably can bring a company down. Should the shareholders have a say on that? You know, obviously the shareholders are the ultimate owners of the company. If you want to give them a say on pay, fine. Then you'd better give them a say on the rest of that. But I'm not sure anybody on this floor thinks that that's the right thing to do. The best way for shareholders to express their displeasure with the management or operation of a company is through the board of directors. That's the way it has been done, and that's the way it should be done.

Mr. SCOTT of Georgia. Mr. Speaker, I yield 3 minutes to the gentleman from North Carolina (Mr. MILLER).

Mr. MILLER of North Carolina. I look forward to working with Mr. CAMPBELL on giving shareholders much more power over their own corporations. There is much more we need to do to reform corporate governance in this country. It has been one of many failings of our economy in the last year or so.

Mr. Speaker, I don't want to run corporations, but someone needs to set some rules. We need the law to set some rules. We need someone to provide some oversight. We need someone to be a watchdog of what they are doing because we have found out what happens when there are no rules, when there is no oversight, when there is no watchdog. We are now in the worst economic downturn since the Great Depression, and we have been perilously close to a financial collapse that would

have left the Great Depression in the shade. And we know what caused it. It's essentially the same things that went wrong in the 1920s. Corporate executives were looting the country with predatory lending practices to make as much money as they possibly could without any regard for the consequences; and then corporate executives, in turn, were looting their companies to make as much money for themselves as they could. They weren't doing right by the American consumers. They weren't doing right by their own shareholders. They were only looking after themselves. The idea that the corporate executives were acting in the best interests of their own shareholders is simply a farce. We saw compensation for executives and other top officials who were doing very little of any value to society. In fact, their predatory lending practices were doing much more harm than good, and it wasn't even to the benefit of their shareholders because of the risks that they were creating for the corporation, that the short-term profits would lead to great risk in a very short while.

This bill is part of what we need to do. It is only part of what we need to do. This just scratches the surface. We need to make sure the financial collapse that we have seen in the last year never happens again. This bill is only part of it.

Mr. BACHUS. Mr. Speaker, I yield 3 minutes to the gentleman from Delaware (Mr. CASTLE).

Mr. CASTLE. I thank the gentleman for yielding.

Mr. Speaker, I rise in strong opposition to H.R. 3269, the Corporate and Financial Institution Compensation Fairness Act. This overreaching bill, which is being sold as a response to the financial crisis, would, in effect, take away the rights of individual companies to conduct business as they see fit. It places government bureaucrats in charge of making key decisions about how businesses should be run. We can agree that some executives in this country are grossly overpaid; but allowing government to make such determinations is counter to everything that has made our country great. America has always been an economic powerhouse in the world, but this bill restricts competition through government intervention in a way that infringes on the entrepreneurial spirit of this Nation.

Section 4 of H.R. 3269 would actually allow the government to involve itself in the running of private businesses by empowering Federal regulators to prohibit compensation arrangements for all employees of all financial institutions, including banks, bank holding companies, broker dealers, credit unions and investment advisers. Even regulators under the current administration have testified that they do not intend to cap pay or set forth "precise

prescriptions for how companies should set compensation, which can often be counterproductive." However, the majority has ignored the administration's wishes by adding section 4 to H.R. 3269.

This bill is a vast overreach and an overreaction to the current financial crisis. Like many, I am concerned that executives at a handful of large companies, like AIG, have been awarded extravagant pay packages and bonuses even after the companies have faced failure and received assistance from the Federal Government to the tune of billions of taxpayer dollars. In these cases, when Federal assistance has been granted, I believe the Federal Government does have a right to mandate the pay structure of these firms, which is why I voted for an amendment during committee consideration of H.R. 3269 to only apply the provisions in the underlying bill to TARP recipients for the amount of time that the TARP money is outstanding. Unfortunately this amendment was rejected, leaving many financial institutions who did not contribute to the current crisis to pay for the mistakes of others.

Finally, this bill undermines the primacy of State corporate governance laws. Corporate law has typically been left up to the States, allowing this diversity to foster competition. Passing this bill would eliminate these traditions, which run against the American free market ideals we have always stood for. For this reason I support Mr. GARRETT's amendment to allow State law to preempt the underlying bill.

H.R. 3269 was introduced without a single legislative hearing to examine its far-reaching implications, despite numerous requests from myself and other Members of the Financial Services Committee. I believe this legislation may have unintended consequences on our Nation's businesses, and I urge my colleagues to vote "no" on the underlying bill.

Mr. FRANK of Massachusetts. Mr. Speaker, there is a little bit of an imbalance. I would ask if I could reserve for one more speaker while I work something out.

Mr. BACHUS. Mr. Speaker, I yield 2 minutes to the gentleman from Georgia (Mr. PRICE).

Mr. PRICE of Georgia. I thank my friend from Alabama for yielding me time and for leading on this issue. What we hear from the other side of the aisle is this famous old phrase "trust us," right? Now we know that folks on the other side don't have any real reluctance to have the government run things. We've seen it over and over and over again. In fact, we've just heard it from one of the speakers who said, We don't want to run private companies, and then he followed that up and said, But this is only part of what we need to do.

Mr. Speaker, the bill has language in it that would, in effect, allow the Federal Government to determine pay,

compensation for employees; and that might be all right if it was just companies that were receiving tax money. That might be okay. But in fact, it's not. It is so many other companies. Covered financial institutions, the definition in the bill would expose companies like CVS Caremark—that's right, drugstores—WellCare Health Plans, Value Line, Textron, McGraw-Hill Companies, Medco Health Solutions, Lowe's Corporation.

Mr. Speaker, this is another far reach by the Democrats in charge who believe that the government knows best, not just about automobile companies, not just about energy companies, not just about how to spend your money, not just about your health care—they're working on that government-run health care plan—but also private companies across this land. They believe that they ought to be able to come in and say, Okay, this is what you can make, and this is what you can't make.

If you don't believe it, just read the bill. Nobody is concerned about having shareholders give their opinions, have a say about what executives make when shareholders own part of that company. That makes a whole lot of sense. But what we do have concerns about, grave concerns, is the intervention of the Federal Government into one business after another after another. This is just another example of that. It's a terrible idea. It strikes at the very core of the free market principles that have made us the greatest Nation in the history of the world. Bad idea, Mr. Speaker. Vote "no".

Mr. FRANK of Massachusetts. Well, Mr. Speaker, I yield myself 15 seconds to say I welcome the gentleman from Georgia to the cause of say-on-pay. When we debated this on March 22, 2007, he was quite critical of it. So maybe 2 years from now, he will think we should do something about excessive, incentivizing bonuses.

I now yield for a question to the gentleman from California.

Ms. SPEIER. I thank the gentleman from Massachusetts.

In section 4 of the bill, it defines the term "covered financial institutions" to include depository institutions, broker dealers, credit unions and investment advisers but also authorizes the appropriate Federal regulators to designate jointly, by rule, other financial institutions that are covered. Because this authority is granted to appropriate Federal regulators, can we assume that entities not regulated by a Federal financial regulator are not intended to be "covered financial institutions"?

Mr. FRANK of Massachusetts. Yes. As to section 4, if they are public companies, they are covered by say-on-pay. And there may be companies not now federally regulated that may become so by decision. But as of now, if they're

not federally regulated, they're not covered. Of course AIG was federally regulated by the OTS, so they would have been covered. The gentlewoman is correct.

Mr. Speaker, I have no further requests for time, and I have only one more speaker. So I am going to reserve the balance of my time.

Mr. BACHUS. Mr. Speaker, let me tie up a few—what I consider loose ends about this legislation. One is the motivation. Of course we've heard that one of the motivations is that these pay schemes and arrangements could heighten risk; and then if one endorses the Obama administration approach, that would precipitate a bailout because the government would continually have to assure against some outsized risk. As I have said, the Republican approach is, simply don't bail these companies out, and then you don't have to be micromanaging every compensation decision by a company. I think there's another motivation, and I think it is a slippery slope. Chairman FRANK was on CNBC this past Tuesday, and he asked this question: is there some character defect with some people where they get hired, they give them a prestige job, but they really won't do it right unless you give them an extra bonus? Most of us don't need that.

So I'm wondering if one motivation for this legislation is so that the government can decide whether people need a bonus or don't need a bonus, whether they're deserving of a bonus. In fact, several pages of the bill does just that. Some people may not need that bonus. Other people may. That decision will be made by the list of government entities on page 15, not by the shareholders even though this bill is trotted out as a shareholder bill, not by the board of directors, not by the management who an important tool of management is to offer incentives and to incentivize performance and achievement. But apparently now it's the government who will decide whether you need a bonus or not. That, Mr. Speaker, is scary in my mind.

I reserve the balance of my time.

Mr. WATT. Mr. Speaker, I yield 1½ minutes to the gentleman from Maryland (Mr. VAN HOLLEN).

Mr. VAN HOLLEN. I thank my colleague from North Carolina for his leadership on this issue.

Mr. Speaker, in this country, we believe that hard work should be rewarded, and I think most people in this country believe in the concept of pay for performance. But what we've seen on Wall Street over the last many years is turning that concept of pay for performance on its head. We saw CEOs and the folks in the Wall Street boardrooms getting huge bonuses based on short-term gains for their companies, even while that excessive risk-taking put those institutions at risk.

□ 1045

Now, if it was just those institutions, I think we'd say, okay, let them take that risk. If they want to overpay their CEOs in the sense that the company's going to be put in jeopardy, and it was just that company at risk, okay. But what happened is this kind of excessive risk-taking went on at the biggest financial institutions of this country and put the entire economy at risk, put the financial system at risk, and at the end of the day, put all of the taxpayers in this country on the line.

So we all have a stake in changing the system. We all have a stake in making sure people get paid for performance, and not paid by putting taxpayers in the financial system at risk because, at the end of the day, we're all holding the line, not just the CEO and not just the shareholders.

So, Mr. Speaker, it's time to say, enough is enough. Let's pass this legislation to protect consumers, shareholders and the taxpayer.

Mr. BACHUS. Mr. Speaker, I yield 2 minutes to the gentleman from Illinois (Mr. ROSKAM).

Mr. ROSKAM. Mr. Speaker, I was minding my own business in my office, and I've been listening to this debate and felt like I needed to come and just point a couple of things out, some real weaknesses of this bill.

First of all, I'm hearing from manufacturers, Mr. Speaker, in my district who are particularly concerned about section 4 of the bill. They're making their concerns known through the National Association of Manufacturers, and they've said that they are concerned that this bill would give authority to government regulatory agencies to review and prohibit pay arrangements for a wide range of employees and, as a result, they strongly oppose the government intervention in the internal dynamics of companies.

Look, I'm the first to say that if you took bailout money, if you took TARP money, fine, be in this category, and those are entities that the taxpayers have a right and an expectation to regulate. But when we start to use ambiguous terms, terms that are not well-defined, with all due respect to the majority, ultimately, we're creating an environment where there's going to be more government intervention.

Why is it that the National Association of Manufacturers says, Don't do this to us? They're working hard to create jobs in this country and they haven't been able to do it, in part, because of bad policies that they've seen come out of Washington, D.C., Mr. Speaker. And we can do much, much more.

Look, in a nutshell, this bill is an invitation for political meddling at its worst in the private confines of companies that are trying to work hard to create jobs and to create opportunities. You can imagine a politician getting

on the phone with the regulator and saying, You know what, I'm interested in you checking into that company because I don't like them and I don't like the way that they're doing business.

We can do better. Let's send this bill back to committee. Let's vote "no."

Mr. WATT. Mr. Speaker, we have only one final speaker, so we'll reserve the balance of our time.

Mr. BACHUS. Mr. Speaker, at this time I would like to recognize the gentleman from New Jersey (Mr. GARRETT) for 1½ minutes.

Mr. GARRETT of New Jersey. In a few moments I'll be submitting an amendment to this bill, but before I do that, I just want to talk about someone else's comment on this bill. This is Nell Minow of the Corporate Library, someone who has been influential and involved in this issue for some period of time, as you may know, someone who no one would consider a conservative on this issue. And she just did a blog on this recently where she says, The House Financial Services Committee has recently approved this legislation. She recognizes why this is coming up, and she says, The impulse is understandable, but the standard is unworkable. What does inappropriate mean? What, while we're at it, does risk-taking mean? And the most terrifying question is, who gets to decide what they mean?

Chairman BARNEY FRANK warned earlier this month, she reminds us, and he did so again just recently, that recent news of compensation of Wall Street shows that some financial leaders yearn for the stirring years of yesteryear, and demonstrates a need to adopt legislation on executive pay. But it's a question of empowering the shareholder to decide the question of appropriate level of pay and not by the regulators.

She concludes by saying, Who is in the best position to evaluate and respond to badly designed pay packages? As someone who is very proud of 8 years of serving in government, she says she has the most utmost respect for politicians and bureaucrats, but she also recognizes their limits. The government, therefore, should not be micromanaging pay. Instead, and this is what Republicans suggest, remove the obstacles that currently prevent oversight from those who are best qualified and motivated to manage the risk, the shareholders.

Mr. WATT. Mr. Speaker, we reserve the balance of our time.

Mr. BACHUS. Mr. Speaker, it appears as if this bill is so much more than a shareholders' right to say-on-pay bill. We already have a czar, a pay czar. Are we going to have a consultant czar? You know, we're going to enable these compensation consultants, they have to go to the agencies, they meet certain criteria. Are we going to have a consultant czar? Are we going to need

management czars? Are we going to need risk czars? Because these 20 pages—and 15 of it deals with risks. It deals with inappropriate behavior.

Are we going to, on the bonuses, are we going to have every bonus submitted to some government agency to review? How are you going to report those bonuses? How are you going to approve those bonuses? How long is it going to take to approve those bonuses? The administration, itself, has warned that this bill goes too far. Independent witnesses have warned that this bill goes too far.

Mr. WATT. Mr. Speaker, I yield myself the balance of the time.

Mr. Speaker, the fact that we are here today debating this bill with such vociferous opposition, to me, is a commentary on how out of whack our whole system has become.

First of all, this bill is a modest bill which gives shareholders the right to make advisory votes, take advisory votes on compensation. Who are these shareholders? They're the owners of the company. They're the owners of the company, and somehow, the opponents of this bill are trying to convince the public that the owners of a company shouldn't have the right to express their opinion to the board about compensation of the officers of that company.

And the bill specifically says, and I'm reading from the bill, The shareholder vote shall not be binding on the board of directors and shall not be construed as overruling a decision of the board. We're just giving them the explicit right to advise the board about compensation.

One gentleman has said that this applies to manufacturers. It doesn't apply to manufacturers. Section 4 doesn't apply to manufacturers. And even if it did, it would apply only to the extent that they could threaten the safety and soundness of a financial institution—manufacturers are not financial institutions—and only to the extent that they could cause serious adverse effects on economic conditions or financial stability. And that, I would submit, is an appropriate Federal Government role to play, to make sure that we don't get back into the kind of meltdown that we are experiencing and have been experiencing as a result of greed and irresponsibility in the private sector.

This is not the government taking over the corporate sector, either in the financial sector or any other sector of our economy. It is a statement by the American people that it's time for us to straighten up the ship. We should pass this bill today and move on.

Mr. GRAYSON. Mr. Speaker, I would like to clarify a point regarding H.R. 3269, the Corporate and Financial Institution Compensation Fairness Act of 2009. On page 17, the bill states "No regulation promulgated pursuant to this section shall require the recovery of incen-

tive based compensation under compensation arrangements in effect on the date of enactment of this Act provided such compensation agreements are for a period of no more than 24 months."

The words "this section" are intended to mean the fourth section of H.R. 3269, not the section of the U.S. Code in which this provision may be found.

In addition, I would like to add into the RECORD this important statement by Leo Hindery published in the Washington Note, because it pertains to this bill.

President Obama was absolutely right a couple of weeks ago when he demanded that the compensation of the executives, managers and traders at the failed financial institutions that received bail-out cash be scrutinized by a new "oversight council". He was right because these are the people who saddled the rest of us with a staggering \$2.8 billion or more of trading and credit losses, and yet wanted to be paid as if everything was just swell.

But he and especially his advisers were wrong not to impose specific limits on executive compensation, rather than (mostly) just guidelines. They were especially wrong not to enact permanent limits that apply to all regulated financial institutions and all public companies.

The evidence is clear that excessive executive and management compensation lies at the root of all corporate crimes and misbehavior, of most of corporate America's inattention to creating and preserving high-quality domestic jobs and fair overall employee compensation, and of almost all of the recent massive trading and credit losses.

In his speech, Obama also said that government's "role is not to disparage wealth, but to expand its reach". He absolutely should have added that its role is also to "ensure wealth's fair and equitable distribution".

For the 35 years following the end of the second world war, CEOs generally viewed responsible and fair business behavior as a critical component of the American dream. And during all those years, and in fact during most of the past century, corporate leaders in the US earned 20 to 30 times as much as their average employees. Even today, the ratio of chief executive pay to average employee earnings in all other main developed countries has remained near this level. The ratio is still only about 22 times in Britain, 20 times in Canada and 11 times in Japan.

Beginning in the 1990s, however, many US executives, with the complicity of their boards, began to treat management as a separate constituency, often the primary one. Suddenly, fair executive compensation was abandoned in hundreds of corporations and financial institutions.

In America now, the average public company chief executive earns an almost unbelievable 400 times what his average employee makes, and his officers and senior managers aren't far behind in their own compensation. And now we know that executives and senior managers in the financial services industry drink just as heartily from the same frothy trough.

Obama and Congress need to enact three changes in executive and management compensation practices, not just hope, as one of his senior advisors recently said, that some (not even all) corporations will voluntarily "assess risk induced by [their] compensation practices".

First, Congress needs immediately to grant public shareholders the right to call shareholders' meetings, to vote out the current

board and to pass binding (not simply advisory) votes on executive compensation.

Second, Congress should establish, for all public companies, a ceiling on individual executive compensation as a reasonable multiple of average employee compensation—say, 35 times—and then penalize through tax policies those companies that elect to pay anyone in excess of this multiple.

Third, Congress should empower the Treasury to oversee the compensation practices of any entity that is regulated, whether or not it currently relies on government guarantees. This should apply to employees at the individual trader level, too.

Mr. POSEY. Mr. Speaker, I rise to express my concerns about H.R. 3269, the Corporate and Financial Institution Compensation Fairness Act of 2009, as drafted.

It should not come as a surprise that the American public is outraged at those executives who would benefit from lavish compensation packages while failing to produce results. Worse still are those executives who would deliberately place their own interests above those for whom they are accountable. As the land of opportunity, America is a very forgiving place for risk and failure, but Americans also believe that those who fail should take responsibility for their failures.

Executives of public companies should have the fiduciary responsibility to put the long-term best interests of shareholders foremost in all their dealings, and executive compensation committees should have the same responsibility.

The bill before the House, however, goes too far. Section 4 of the bill is most troubling. As written and amended, this bill is a significant expansion of the power of the federal government to micromanage the compensation practices for executives and employees in all financial institutions over \$1 billion. The bill also has a loosely defined definition of financial institutions, potentially opening the door to controlling even more companies.

Despite two requests from me and many of my colleagues on the House Financial Services Committee, the Chairman did not even hold a hearing on this legislation to address some of these questions. We were unable to inquire with federal regulators on how they would interpret their newfound duties to judge if compensation is commensurate with the vague criteria of "sound risk management." It is thus left to the imagination how the federal government would approve or disapprove the compensation packages and what other "unreasonable incentives" would be banned by unelected bureaucrats. It is bewildering, but the United States Congress is punting enormous, arbitrary power to the unelected bureaucrats to decide how much money people can earn and whether any risk they take is "unreasonable."

As we debate financial regulatory reform, it is important that we refrain from condemning the free enterprise system which has given us the greatest prosperity in the history of the world. The rise of the corporation is integral to free markets and the prosperity we enjoy. Congress should not pass legislation so sweeping as to micromanage the thousands of enterprises which create jobs in our communities and produce goods and services we want.

Unfortunately, the House has rushed a bill to the House floor that has not been fully vet-

ted and is filled with vague language that no one fully understands. It is no wonder that so much that has passed the House has been found unacceptable by the Senate.

Mr. FRANK of Massachusetts. Mr. Speaker, Aflac was the first publicly traded company to give shareholders an opportunity to vote on executive compensation, commonly referred to as say-on-pay. Aflac CEO Daniel P. Amos explained the company's decision to voluntarily adopt the measure by saying, "Our shareholders, as owners of the company, have the right to know how executive compensation works. An advisory vote on our compensation report is a helpful avenue for our shareholders to provide feedback on our pay-for-performance compensation philosophy and pay package."

The first year of the vote, 2008, 93% of the shareholders voting approved the company's pay-for-performance compensation policies and procedures. In May of this year, 97% of the shareholders voting cast ballots in favor of the compensation policies, even though the stock price of virtually all financial companies had declined—including Aflac's. The results of both shareholder votes clearly demonstrate that shareholders appreciate Aflac's philosophy of paying for performance and the company's long history of transparency.

I submit the following for the RECORD.

[From USA TODAY, July 15, 2009]

CEOs OPENLY OPPOSE PUSH FOR SAY-ON-PAY BY SHAREHOLDERS

(By Del Jones)

Top executives have taken a relentless public thrashing as they lay off workers and fight to keep stock prices above the floor. In a suffering economy, no one seems happy with leadership, and the image of CEOs has sunk so low that their approval scores are now south of those serving in Congress. But no matter how low their image sinks, nor how shrill the outrage, executives have remained steadfast in their opposition to one thing: They are roundly against legislation that would force companies to let shareholders vote on CEO compensation packages.

"I wonder if the congressmen backing this legislation would propose similar laws governing their own compensation," says Steve Hafner, CEO of travel search engine Kayak. "I'd love to vote on congressional pay and perks."

EXEC PAY: PROPOSAL GIVES SHAREHOLDERS NON-BINDING SAY

That executives oppose congressional noodling with their pay is unsurprising. What is surprising is that they are willing to go so public in their opposition, even though passage of a so-called "say-on-pay" law is likely, says Dawn Wolfe, associate director of social research for Boston Common Asset Management.

President Obama, who co-sponsored say-on-pay legislation while in the Senate, remains in support, as is the Democrat-controlled Congress. Likewise the public at large. Focus groups have been describing CEO pay with words such as "obscene" and "immoral" rather than words like "excessive" or "overly generous" as in the past, says Leslie Gaines-Ross, chief reputation strategist at Weber Shandwick.

"Everyone I talk to understands say-on-pay legislation to be a question of when, not if," Wolfe says. "There is a sense in the investment community that it is inevitable."

CEOs have opinions like everyone else, but the public rarely sees that side because posi-

tions on anything controversial risk upsetting customers. When they feel compelled to take a stand at odds with the public, it is usually articulated by trade associations and lobbyists, so as to put CEOs and the companies they run at arm's length from controversy. Not this time. Even though say-on-pay legislation is almost a sure thing, CEOs and former CEOs contacted by USA TODAY spoke out against it, both forcefully and individually.

"Say-on-pay is just another government regulation and intrusion into free enterprise," says Howard Putnam, former CEO of Southwest and Braniff airlines.

No one likes downward pressure applied to their pay, and in this respect CEOs are no different than professional athletes, rock stars, union members, Social Security recipients—and elected officials. Howard Behar, former president of Starbucks, asks: Why not let people vote on the salaries of government workers? He says government employee unions influence politicians, who commit huge resources to pensions and raises to get re-elected.

HOW SAY-ON-PAY WOULD WORK

Say-on-pay legislation would require companies to give shareholders an up-or-down vote each year on the compensation of the top five executives of publicly traded companies. The vote would not be binding, leaving the final decision in the hands of boards of directors. However, directors are elected by shareholders and a shareholder vote against a pay package would likely pressure directors to rethink the package and make changes.

The Netherlands requires binding shareholder votes on executive pay. The U.S. law would model those in Britain, Australia, Norway, Spain and France, where the vote is non-binding. Boston Common Asset Management has been pushing shareholder say-on-pay resolutions for three years, and Wolfe says she doesn't understand the CEO opposition, as there are only two examples in Britain when shareholders voted a majority against a CEO's pay: at GlaxoSmithKline in 2003 and at home builder Bellway in 2009. It may be true that most CEOs are fairly paid, she said, which means they have nothing to fear.

Only 24 U.S. companies have implemented say-on-pay without legislation, Wolfe says. Of those, only Aflac and RiskMetrics did so without it first coming to a shareholder vote. The Securities and Exchange Commission continues to get feedback regarding say-on-pay at companies that have accepted government money under the Troubled Asset Relief Program (TARP).

At Aflac, shareholders approved the pay of CEO Dan Amos by 93% in 2008, and that approval rose to 97% this year when Amos did not accept a \$2.8 million bonus even though he had met the conditions of the bonus as set by the Aflac board.

"That tells me that (shareholders) had the ability to look beyond the price of stocks and understand," says Amos, who supports say-on-pay at Aflac but declines to weigh in on what is best at other companies. Giving shareholders a voice "takes away the frustration that is out there," he says. "People just want to be heard."

Sarah Anderson, director of the global economy program for the liberal think tank Institute for Policy Studies, says say-on-pay is a first step but does not go far enough to rein in abuses. She cites oil executives who had big paydays that had nothing to do with personal performance and everything to do with spikes in oil prices. But shareholders

didn't "bat an eye" because they were happy with rising stock prices.

"Everyone, not just shareholders, has a stake in fixing the executive compensation system," Anderson says.

Ralph Ward, publisher of Boardroom Insider, an online newsletter about boards of directors, agrees that say-on-pay does not go far enough, because it offers shareholders "so little substance."

Substance or not, CEOs complain that say-on-pay is government intrusion into the private sector. Such consensus among CEOs is rare because they run very different companies that can be made winners and losers on a range of sensitive issues, from energy to health care. They lean Republican, but there are signs that they are increasingly blue, and 40% supported Democrats during the last presidential primary season, according to an unscientific USA TODAY survey. But when USA TODAY last month contacted 31 CEOs and former CEOs of large companies, 77% were against say-on-pay.

Are CEOs fairly compensated? Two of the 31 CEOs declined to answer, but 24 of the other 29 (83%) said yes. Five (17%) said that, in general, CEOs are overcompensated. When asked if say-on-pay would influence CEO compensation, 76% said yes.

CEO median compensation at S&P 500 companies rose 23% from 2003-2008 despite going down 7.5% to \$8 million from 2007 to 2008, according to Equilar, which tracks executive compensation. John Castellani, president of the Business Roundtable, an association representing CEOs of companies with more than \$5 trillion in annual revenue, says shareholders have always had the ability to enforce say-on-pay by using the shareholder resolution process. That makes legislation unnecessary, he says.

The pro-business U.S. Chamber of Commerce is also against legislation. "The decision to allow say-on-pay votes should come, as it has, through a dialogue between shareholders, directors and management, not via a Washington mandate," says Tom Quaadman, the chamber's executive director for capital markets.

CEOS' ARGUMENTS AGAINST IT

CEOs say the legislation would open the door to micromanagement by largely uninformed shareholders, who understand neither the competitive market forces that drive executive pay nor the complex incentives designed by experts to get the best results. The law could drive top talent to private companies and injure the ability of U.S. companies to compete in a global market, they say.

"You cannot run companies effectively through the democratic process of voting on all things," says Judy Odom, former CEO of Software Spectrum. "Independent boards should be elected, and they should do their jobs."

While most shareholders are uninformed, some are so informed that they could use a say-on-pay law to an unfair advantage, says Andrew Puzder, CEO of CKE Restaurants, which operates Carl's Jr. and Hardee's. For example, certain investors could threaten to vote "no" on the CEO's pay to coerce the CEO into making decisions for short-term gain, such as delaying capital investment or taking on unnecessary debt. Such tactics could temporarily boost the stock price to the detriment of the company's long-term health, he says.

An argument could be made that CEO pay is excessive and does not drive performance, says Anders Gustafsson, CEO of publicly traded Zebra Technologies, which sells printing services to 90% of Fortune 500 companies.

But he says CEOs have a significant impact on company performance and are being unfairly targeted in a bad economy because their pay is publicly disclosed.

CEOs are not unanimous in their opinions, even where it comes to pay. Patrick Byrne, CEO of Internet retailer Overstock, says he is more concerned about CEOs influencing boards than shareholders influencing CEOs.

"The CEO is hired by shareholders. He works for them, just like a farmhand works for the folks who own the ranch," says Byrne, among the CEOs who support say-on-pay legislation. He says CEOs "capture" their boards, leaving shareholders unrepresented.

Real estate developer Don Peebles, recently named by Forbes as one of the 20 wealthiest African-Americans, also supports say-on-pay. He says CEOs who have no significant ownership often have compensation packages designed to reward them on the upside, but they suffer few consequences on the downside.

"There is no real alignment of interests," Peebles says.

But Behar says he has served on eight boards and says directors are not stupid, and they are in control of CEOs.

"How will our country be better off if CEOs earn less than \$2 million a year?" says Behar. "Are we trying to create a country without the opportunity to get rich? We had better be careful about the buttons we push down. We may not like the ones that pop up."

Mrs. BACHMANN. Mr. Speaker, I rise in opposition to H.R. 3269.

This misguided legislation will do nothing to restore confidence in our financial markets and could, in fact, undermine our nation's economic recovery.

The bill directs federal financial regulators to literally prohibit compensation arrangements it deems "inappropriate." But when did it become appropriate for the federal government to take on this role?

How can we not expect this to stifle the global competitiveness so vital to American companies? When American companies are subjected to rigid pay structures as set by government bureaucrats and companies in other nations are free to follow the market, common sense tells us that America's top talent will go elsewhere.

Furthermore, the bill requires an annual shareholder vote—a non-binding vote—on executive compensation, which seems terribly impractical and complex and may only exacerbate problems, not fix them. We're heading down the same road the trial lawyers have led us in the courts, and experience tells us that that road leads to a distorted market.

We've heard from groups across the nation on this—from the U.S. Chamber of Commerce, which represents more than three million American businesses and organizations, to the United Brotherhood of Carpenters union. They all say that requiring them to hold an annual shareholder vote on compensation is overly burdensome and could actually diminish proper due diligence by investors.

On average, most companies already approve these packages once every three years. The Republican alternative, which I support, would honor this real-world practice. Our substitute would also allow shareholders to opt out of the shareholder triennial advisory vote if two-thirds vote to do so. This gives the share-

holders more flexibility to decide whether they actually want this "say on pay." This is real empowerment of the shareholders—not just lip service.

Finally, our substitute strikes the section of the bill which directs government bureaucrats to determine the compensation arrangements of private companies rather than its board and shareholders.

No one on our side of the aisle is for free-wheeling pay practices or lack of oversight. But, we are calling for balance. We support an alternative that would preserve American competitiveness while ensuring real transparency and disclosure over compensation packages. The majority's legislation is sound-bite governance at best, extending onerous regulatory burdens that have little more than the appearance of actual empowerment of American shareholders.

Mr. PAUL. Mr. Speaker, many Americans are justly outraged that Wall Street firms that came hat in hand to receive bailouts from the federal government rewarded their executives with lavish bonuses. But while holding those financial firms accountable to the taxpayers is a laudable aim, the legislation before us, H.R. 3269, goes far beyond this.

This is not the first time that Congress has meddled in matters of executive compensation, and unfortunately it will not be the last. Just like Congress' meddling with the economy, each intervention creates unseen problems which, when they crop up, are again addressed by legislation that creates further unseen problems, thus continuing the cycle ad infinitum. Problems with executive compensation cannot be addressed by further burdensome legislation.

The Wall Street bailouts have already given the federal government too much power in corporate boardrooms, and H.R. 3269 is yet another step in the wrong direction. While shareholder votes on compensation may be non-binding now, once the precedent of government intervention on behalf of shareholders is set, there is no reason to believe that these votes will not become binding in the future.

Perhaps even more frustrating is that enforcement of the provisions of this bill will be undertaken by overpaid bureaucrats who lack the skills to earn comparable salaries in the marketplace by providing useful products or services desired by consumers. People who shuttle between federal regulator and federally regulated firms, trading on their political connections and epitomizing the corruption endemic to the government-managed financial system, will be making decisions that affect every single public company in this country.

In order to understand the reasons behind excessive executive compensation, we need to take a look at the root causes. The salaries and bonuses raising the most ire are those from the financial sector, the sector which directly benefits from the Federal Reserve's loose monetary policy. Loose monetary policy leads to speculative bubbles which drive up stock prices and enrich executives who cash in their stock options. It makes debt cheaper, which encourages reckless business expansion. And it shuttles money from industries that produce valuable products and services to industries that are favored by the federal government. H.R. 3269 is a well-intended but misguided piece of legislation. Until we strike at

the root of the problem, we will never get our financial system back on a firm footing.

Ms. JACKSON-LEE of Texas. Mr. Speaker, I rise today in strong support of H.R. 3269, the "Corporate and Financial Institution Compensation Fairness Act of 2009". I would like to thank my colleague Representative BARNEY FRANK for introducing this resolution, as well as the cosponsors.

I stand in support of this important resolution, because it is designed to address the perverse incentives in compensation plans that encourage executives in large financial firms to take excessive risk at the expense of their companies, shareholders, employees, and ultimately the American taxpayer—risks that contributed to the recent financial collapse.

One of the solutions it offers is practically the manifestation of common sense itself—let the stockholders of the company, the people the corporate executives are supposed to be working for, have a say in how those executives should be compensated. For example, the bill requires shareholder non-binding votes on so-called "golden parachutes." It requires publicly-traded corporations to allow shareholders to take non-binding votes during annual meetings on the top five executive compensation packages. And it allows SEC to exempt small companies from the nonbinding vote requirement if it finds such an exemption necessary.

The bill also seeks to change the incentives for the sort of financial firms that brought our economy to the brink of collapse, so that those who manage the money of our countrymen are not even tempted to take us back to that precipice. The bill authorizes the SEC, along with the federal financial regulatory agencies, to develop regulations for financial firms with at least \$1 billion in assets that proscribe the use of employee compensation structures that pose a risk to financial institutions and the broader economy. It also specifically, authorizes the regulations to restrict or prohibit "inappropriate or imprudently risky compensation practices" at these large financial firms, and further requires financial firms with at least \$1 billion in assets to disclose to the federal regulators any compensation structures that include incentive-based elements.

The bill does not require disclosure of any individuals' compensation information; nor does it allow government pre-approval of anyone's compensation. Rather, the bill is the first step towards enacting comprehensive financial regulatory reform to make sure we never face another historic financial crisis that depletes the retirement savings of millions, locks businesses out of much-needed credit, and threatens the entire economy.

Finally, the bill requires the compensation committees of the Boards of Directors of public companies to be made up of independent directors. It further requires that these compensation consultants satisfy independence criteria established by the SEC. I would also point out that this bill will, in practice, only apply to companies already sufficiently large enough—it specifically allows the SEC to exempt small companies from the non binding vote requirement if it finds such an exemption necessary.

Not only is this bill common sense personified, it is also long overdue. Corporate culture

has, in the past three decades, undergone a transformation for the worse, where the most economically powerful have come to see, not just stockholder profit, but short term profit, as the greatest good. Today, the people with most economic influence see little or no incentive in seeking anything but the next bonus.

It was not always so—from the end of World War II until the mid 1990s, prominent public and private company CEOs almost universally viewed their responsibilities as being equally split among shareholders, employees, customers, and the Nation. This broad sense of corporate responsibility was actually so widely and comfortably held that in 1981, the Business Roundtable, which is the key public policy arm of the Nation's largest public companies and their CEOs, officially endorsed a policy that said that shareholder returns had to be balanced against other considerations.

However, just as the Business Roundtable was making its policy statement, the deregulation and laissez-faire era that was born in the Reagan administration was starting to chip away at the statement's core contention. And by 2004—even after many of the myriad scandals and outright thefts that have hallmarked the last decade of American business had already come to light—the Roundtable amended its position. It said that the job of business is only to maximize the wealth of shareholders.

But even that statement did not, in any meaningful way, restrict or amend their pursuit of personal wealth, as board members effectively wrote their own paycheck. So not only were our corporate leaders explicitly no longer concerned with stakeholders other than those with the bottom line, they saw little concern for the long term well being of their company. A well-connected man could just as easily make sure the short term profits were inflated as much as possible, so it would look like he was doing a good job, and jump off when the bonuses get handed out.

We see this behavior, for example, among the companies Americans entrust their health care with. In 2001, Aetna's CEO made \$3.5 million; 7 years later, it increased nearly seven-fold, to \$24.3 million, making over \$100 million in the past 9 years. In 2000, Coventry paid its Chief Executive \$2.2 million; apparently that wasn't enough; because in 2007 they gave him nearly \$15 million. In the past 9 years, ten individuals—people who are in charge of companies, whose source of profit is the denial of care to the people who take large cuts in their paychecks to give them money—made over \$690 million.

In 2007, several high profile corporate executives resigned and received multimillion dollar financial packages. That year, Home Depot CEO Robert Nardelli resigned and received a severance package worth \$210 million, which followed several other "golden parachutes," including the \$122 million retirement package for Pfizer's former CEO, the \$175 million package for KB Homes' former CEO, who retired after he was found to have manipulated the company's stock, and the \$85 million severance package for Viacom's CEO who was on the job for less than a year.

That was the year our noble body tried to act. The House passed a bill that would have required publicly traded corporations, beginning this year, to allow shareholders to take a

non binding vote on executive compensation and golden parachutes. Our colleagues in the Senate, however, never acted on the measure.

And, as everybody sitting in this noble body knows, the outrage has only grown. In 2008, one man—the head of a financial firm—made over \$700 million. Another CEO, of the Oracle Company, made over half a billion dollars that same year. Six energy companies paid their CEOs nearly \$800 billion. All told, in 2008, less than 10 individuals made over \$2 billion, over 1 percent of the Gross Domestic Product of my home city of Houston.

During the worst days of the financial crisis, a raw nerve was struck when workers generally became aware, many for the first time, of the huge salaries being earned on Wall Street and on other streets far removed from Main Street. Wherever earned, excessive executive and CEO compensation, simply by being "excessive," belies the principles of a meritocracy, which is what corporations should be. Managers rise to something akin to royalty when their compensation is at unjustified levels and when the rewards of employment are not more commonly and fairly shared with the general employee base.

To conclude: This regulatory overhaul is urgently needed to avoid the possibility of a repeat of the recent financial disaster which nearly crippled our economy. It does so through common sense measures to curb executive power to write their own checks, and dis-incentivizes them from taking the mad risks that nearly brought us to ruin. It is long overdue, and becomes only more necessary as time passes. And so I support the bill.

Ms. CLARKE. Mr. Speaker, I rise in support of H.R. 3269, the Corporate and Financial Institution Compensation Fairness Act of 2009.

This legislation is important because it encourages the corporate community to address the issue of excessive compensation to high level executives by creating greater transparency and giving investors a "say on pay." Some studies have found that as recently as 2003, CEO compensation was 500 times that of an average worker. Even in 2008, a year of significant economic decline, the median CEO salary actually increased by almost 5% with the average worker's wages went up only 2.8%.

This legislation protects the interests of investors, including pension and mutual fund participants, giving them an advisory vote on executive compensation. Today's legislation comes in response to growing concerns in the economic community that excessive executive compensation is helping to fuel systemic risk in corporate America. These luminaries, including former Fed Chairman Paul Volcker and the Group of 30 believe that compensation structures were a factor in the current financial crisis. The legislation will not affect smaller institutions such as credit unions and companies that hold less than \$1 billion in assets.

I believe this legislation strikes the right balance in addressing executive compensation while protecting the rights of the companies that provide so many jobs and are so critical to New York's economy.

I urge the rest of my colleagues to support this important legislation.

Mr. BACHUS. Mr. Speaker, the following trade association letters are offered for the RECORD in opposition to H.R. 3269 in order to supplement my remarks during debate:

JULY 30, 2009.

TO THE MEMBERS OF THE U.S. HOUSE OF REPRESENTATIVES

Re Opposition to H.R. 3269, Corporate and Financial Institutional Compensation Fairness Act of 2009.

The undersigned organizations strongly oppose H.R. 3269, the "Corporate and Financial Institution Compensation Fairness Act of 2009." We believe that the bill would result in substantial unintended consequences, especially the mandatory annual vote on pay requirement in section 2 and the precedent-setting authority granted to the federal government over executive and employee compensation in section 4. In sum, we believe the bill would result in a "one-size-fits-all" approach to compensation that would have substantial negative implications for proper functioning of the corporate governance process, responsible growth, and effective risk mitigation that, when coupled with other proposed legislation, would extend well beyond the financial services industry.

Each of our organizations fully supports effective measures to increase awareness and mitigation of excessive risk in compensation. We believe that the board of directors, acting through an independent compensation committee, should be responsible for setting compensation because it is so closely linked to business strategy and succession planning. While many have developed and circulated principles to improve compensation and corporate governance, companies across all industries are taking steps to reinforce their understanding of these issues and are taking action to revise practices that may encourage excessive risk taking. Many of these changes, such as majority voting for directors, independent compensation committees, advisory Say on Pay votes, eliminating staggered boards, have been occurring on a company by company basis for a long period of time, without government mandates.

GOVERNMENT CONTROL OVER COMPENSATION

We oppose Section 4 of the bill because it would give the bank regulatory agencies authority to set the structure and thus the amount of executive and employee compensation provided in the form of incentives. While recognizing the federal government's role in ensuring the safety and soundness of our financial institutions, these provisions would effectively transfer authority for determining how a substantial part of compensation at these firms should be structured from the Board (for executives) and the company (for other employees) to a consortium of regulatory agencies. Our concerns include:

The adoption of a one-size-fit all approach, which does not accommodate a company-specific approach to pay. The financial industry is expansive, and an incentive structure that may be deemed risky at one organization may be perfectly acceptable at another, depending on the company's business strategy, the risk profile of the organization, and mitigating elements of the total pay program. The legislation instructs the agencies to take a one-size fits all approach by prohibiting pay structures that "could threaten the safety and soundness of covered financial institutions."

Even if a company-specific approach were taken, the federal government has neither

the experience nor expertise to set executive compensation arrangements for a wide variety of financial institutions. The legislation will replace the informed judgment of the board of directors and compensation committee with the cursory knowledge of a federal regulator, eroding the authority of the board and its ability to closely tailor compensation to the company.

The Obama Administration did not ask for such expansive authority, no doubt a result of the interpretive and enforcement problems created by the poorly crafted executive compensation restrictions in the American Recovery and Reinvestment Act, which caused several companies to shift more pay to guaranteed salary, rather than reasonable performance-based incentives, in order to comply.

In addition, because our associations represent companies across a variety of industries, we are also extremely concerned that this model of pay regulation would expand to other industries or situations, further putting the federal government in control of pay decisions for private companies. This legislation would establish a form of compensation regulation for employees who interact with consumers. Rather than creating a new bureaucracy, we believe a more effective approach to regulating risk in incentives would be to establish a clear set of principles for mitigating risk against which the regulatory agencies could review pay arrangements.

A MANDATORY ANNUAL VOTE ON PAY

Beyond section 4 of the bill, we also oppose an annual mandatory shareholder vote on executive compensation because it does not achieve the ends sought by proponents, is not sought by a majority of shareholders, and would not improve clear communication between shareholders and the board. While we oppose the requirement embodied in H.R. 3269, there may be viable alternatives that were unable to be explored with the limited time frame taken by the House Financial Services Committee in considering this legislation.

The Board of Directors has a fiduciary duty for managing the company on behalf of all shareholders. The board's compensation committee is responsible for linking compensation incentives to confidential business strategy, aligning pay with the assessment of individual executive performance, and using long-term incentives to support the company's succession planning process. Annual say on pay votes would push compensation structures away from a company-specific approach to "cookie-cutter" arrangements designed to ensure a high vote total.

Despite the economic environment, shareholder resolutions seeking a say on pay have only received a majority support at roughly 30 percent of the companies at which they were offered in 2009. A 2008 independent study by a leading academic found that among large institutional investors, only 25 percent supported a shareholder vote.

An annual mandatory vote requirement in the United Kingdom has not reduced the overall level of compensation and has resulted in less of a link between pay and performance.

Congressional attempts to regulate amounts or structures of compensation have typically backfired—increasing compensation or changing practices in unforeseen ways contrary to the intent of the restrictions. One need look no further than the history of stock options as a case study of this premise. While we oppose H.R. 3269 in its current form, because the legislation has been available for only a short time, we believe

that more time is warranted to give Congress and interested parties an opportunity to fully analyze and discuss the potential for harmful unintended consequences.

Thank you for your consideration of our views. We look forward to working with you on this and other legislation.

Sincerely,

Center for Executive Compensation, National Association of Manufacturers, Retail Industry Leaders Association, U.S. Chamber of Commerce.

CHAMBER OF COMMERCE OF THE
UNITED STATES OF AMERICA,
Washington, DC, July 27, 2009.

Hon. BARNEY FRANK,

Chairman, Committee on Financial Services,
House of Representatives, Washington, DC.

Hon. SPENCER BACHUS,

Ranking Member, Committee on Financial Services,
House of Representatives, Washington, DC.

DEAR CHAIRMAN FRANK AND RANKING MEMBER BACHUS: The U.S. Chamber of Commerce, the world's largest business federation representing more than three million businesses and organizations of every size, sector, and region, believes that strong corporate governance is an important part of the foundation for a vibrant and growing economy. In February, the Chamber issued a Statement of Principles providing, among other things, that executive compensation should balance individual accomplishment, corporate performance, adherence to risk management, compliance with laws and regulations, and the creation of shareholder value. The complete Statement of Principles is attached. The Chamber opposes H.R. 3269, the "Corporate and Financial Institution Compensation Fairness Act of 2009," because it is inconsistent with these Principles.

Section 4 of H.R. 3269, particularly when read in conjunction with the compensation provisions proposed in H.R. 3126, the "Consumer Fairness Protection Agency Act of 2009," would establish direct government control and regulation of compensation for executives and workers alike. Employee compensation should be a decision by appropriate levels of management or the board of directors on a variety of factors such as merit, promotions, or cost of living increases. Furthermore, changes in corporate governance should occur through a dialogue between management, directors, and shareholders, as allowed by controlling state corporate law. The Chamber does not believe that the command and control regulatory scheme set forth in this legislation would lead to the economic growth and job creation that America desperately needs.

The Chamber is particularly concerned with a number of provisions in H.R. 3269 and offers the following recommendations:

1. This legislation would have federal agencies regulate the compensation of a vast number of employees of covered firms. Pursuant to H.R. 3269, financial services firms would be required to submit practices and plans for incentive compensation for employees to their appropriate regulator. The regulator would then have the authority to approve or disapprove such plan, as well as take action for violations. In many firms, because incentive compensation plans range from the CEO to the receptionist, these provisions would place the federal government in the position of regulating compensation for all, or a vast majority of, employees in a company. This would be particularly intrusive when coupled with the provisions of H.R. 3126 which would allow the proposed

Consumer Financial Protection Agency to regulate the compensation of employees who interact with consumers, regardless of industry, such as real estate agents, or even cashiers who accept credit cards. Taken together, these two proposed bills constitute an unprecedented governmental intrusion into matters that have historically been addressed by private actors.

2. The "Say on Pay" provisions can be improved by making the votes triennial and providing for a 5-year opt-out if approved by a super-majority of shareholders. The Chamber believes that the "Say on Pay" provisions of H.R. 3269 can be improved. Currently, the bill requires an annual advisory vote at every company in the United States, regardless of size, industry, history, and governance. Rather, Congress should require such an advisory vote every three years, thereby tracking the typical life-span of an average executive compensation package. This change would give shareholders a more informed voice in the executive compensation policies of a company. The Chamber also believes that adding an opt-out provision is warranted. For example, if two-thirds of shareholders vote for a 5-year opt-out of "Say on Pay" votes, small and mid-size companies would be able to mitigate the undue costs and distractions associated with an annual vote.

3. Federal Law should not create a preemption if state corporate law contains mechanisms for independent compensation committees. State corporate law has fostered a diverse set of corporate governance structures that have allowed the American economy to be the richest and most productive in world history. While the governance structures of some financial services firms have been questioned, 97 percent of the more than 15,000 public companies in the United States have had nothing to do with the financial crisis. Accordingly, the Chamber believes that the legislation should not preempt state law.

The Chamber believes these recommendations would represent significant improvements to the bill and assist in providing strong corporate governance policies needed for a growing economy.

The Chamber also supports the Garrett substitute amendment to the bill, which would allow for improved Say on Pay and Independent Compensation Committee provisions, while stripping Section 4 of the bill. Finally, the Chamber supports the Garrett amendment to strike Section 4 of the bill, removing those provisions that would regulate incentive compensation practices.

The Chamber strongly supports corporate governance reforms in line with our Statement of Principles, but urges you to oppose H.R. 3269 because it is inconsistent with these Principles on corporate governance.

Sincerely,

R. BRUCE JOSTEN.

NATIONAL ASSOCIATION OF
FEDERAL CREDIT UNIONS,
Arlington, VA, July 28, 2009.

Re Comments on H.R. 3269 as pending in mark-up.

Hon. BARNEY FRANK,
Chairman, Committee on Financial Services,
House of Representatives, Washington, DC.
Hon. SPENCER BACHUS,
Ranking Member, Committee on Financial Services,
House of Representatives, Washington, DC.

DEAR CHAIRMAN FRANK AND RANKING MEMBER BACHUS: Mr. Chairman, I am writing on behalf of the National Association of Federal

Credit Unions (NAFCU), the only trade association that exclusively represents the interests of our nation's federal credit unions, in conjunction with H.R. 3269, the Corporate and Financial Institution Compensation Fairness Act of 2009 as amended so far in mark-up.

NAFCU continues to oppose the bill, as amended, in its current form. While the adoption of the Hensarling amendment, exempting institutions under \$1 billion in assets from the scope of Section 4 of the legislation was a step in the right direction, we continue to urge the Committee to amend this legislation so that it does not apply to credit unions.

As not-for-profit, member-owned cooperatives, credit unions were not the cause of the current financial crisis. The success of the credit union industry in this regard can be attributed not only to its structure and nature, but to the fact that credit unions, unlike for-profit entities, are singularly focused on service to their members and do not chase stock returns. In fact, credit unions do not issue stock at all. Furthermore, they are governed by a volunteer board of credit union member directors that serve generally without remuneration and ultimately decide the compensation for key employees of the credit union. It is therefore critical that non-profits be treated differently than for-profit entities.

Quite frankly, those running for-profit entities, including community banks, have a profit motive that can open the door for abuse. In stark contrast, not-for-profit cooperatives quite simply have different motives, which substantially lessen the incentive for abuse.

NAFCU continues to believe that the inclusion of credit unions as covered institutions under Section 4 of the legislation and provisions requiring NCUA to prescribe joint regulations in conjunction with other regulators who supervise for-profit, stock-issuing entities, does not make sense. Simply stated, credit unions are not guided by the profit motive or stock price manipulation to which this legislation is aimed.

It is with that in mind that we continue to oppose the legislation in its current form and urge the Committee to amend Section 4 of H.R. 3269 to exempt credit unions from this legislation. Without a current amendment pending before the Committee to do this, we would support adoption of either the Neugebauer or Castle amendments to strike Section 4 of the bill. Conversely, if Section 4 is maintained by the Committee, we would urge further amending H.R. 3269 to exempt credit unions from Section 4 prior to consideration on the House floor. If one of these changes were to be made, NAFCU could support the legislation going forward.

NAFCU appreciates the opportunity to share our thoughts on this important topic and we look forward to working with you and your staff to address our concerns.

Should you have any questions or require any additional information please do not hesitate to contact me or Brad Thaler, NAFCU's Director of Legislative Affairs.

Sincerely,

FRED R. BECKER, Jr.,
President/CEO.

CUNA,

Washington, DC, July 24, 2009.

Hon. BARNEY FRANK,
Chairman, Committee on Financial Services,
House of Representatives, Washington, DC.
Hon. SPENCER BACHUS,
Ranking Member, Committee on Financial Services,
House of Representatives, Washington, DC.

DEAR CHAIRMAN FRANK AND RANKING MEMBER BACHUS: On behalf of the Credit Union National Association (CUNA), I am writing regarding H.R. 3269, the Corporate and Financial Institution Compensation Fairness Act of 2009. CUNA represents nearly 90 percent of America's 8,000 credit unions and their 92 million members.

We understand the concern some have regarding the effect compensation structures that encourage excessive risk-taking have on the safety of financial institutions and the economy. We applaud efforts to address these egregious practices. However, as the Committee prepares to consider H.R. 3269 next week, we encourage you to exclude credit unions from the scope of the bill. The credit union structure combined with strong compensation regulations already in place have resulted in credit unions being largely immune from both excessive and unsafe risk-taking and from the criticism assigned to for-profit financial services providers; thus, the inclusion of credit unions under H.R. 3269 is unwarranted.

As you know, credit unions are unique, member-owned, not-for-profit, financial cooperatives, and they simply do not have the same operational motives as for-profit depository institutions. As a result, credit unions are risk-averse institutions operating in the best interest of their members. Further, the compensation structure of credit unions is not only less aggressive than the for-profit financial institutions, it is also more modest. According to our most recent survey of our members, the median salary for a credit union CEO is approximately \$71,000; the average salary is approximately \$93,000.

The National Credit Union Administration Board (NCUA) already has compensation regulations in place that are designed to prevent the types of dangerous compensation structures that exist in other sectors. These include Section 701.21(c) of NCUA's Rules and Regulations, restricting compensation related to loans to members and lines of credit to members; Section 701.33, restricting compensation to credit union employees or board members from credit union service organizations in which the credit union has an outstanding loan or investment.

We believe that H.R. 3269, if applied to credit unions, would at best be duplicative of current regulations and at worse could increase the cost and regulatory burden on a sector of the financial services industry that neither caused the economic crisis nor engaged in the type of compensation arrangements that this legislation seeks to address. Therefore, we cannot support this legislation in its current form and we would welcome the opportunity to work with you and others on the Financial Services Committee to amend the legislation to exclude credit unions.

On behalf of America's credit unions and their 92 million members, thank you very much for your consideration.

Sincerely,

DANIEL A. MICA,
President & CEO.

THE FINANCIAL
SERVICES ROUNDTABLE,
Washington, DC, July 23, 2009.

Hon. BARNEY FRANK,
*Chairman, Committee on Financial Services,
House of Representatives, Washington, DC.*
Hon. SPENCER BACHUS,
*Ranking Member, Committee on Financial Serv-
ices, House of Representatives, Washington,
DC.*

DEAR CHAIRMAN FRANK AND RANKING MEM-
BER BACHUS: The House Financial Services
Committee is scheduled to mark up H.R.
3269, the Corporate and Financial Institution
Compensation Fairness Act of 2009, on Tues-
day morning. The Financial Services Round-
table supports the spirit of this legislation,
and the mutual goals of promoting corporate
accountability and good governance prac-
tices; however, we must oppose H.R. 3269.
Compensation programs are an important
tool in the financial services industry used
to recruit and retain skilled employees.
These programs should be aligned with the
overall safety and soundness of the organiza-
tion as well as shareholder interest. The
Roundtable supports and promotes such
goals as outlined in our Principles on Execu-
tive Compensation (see attached).

We have serious concerns about H.R. 3269
as drafted, including the requirement for
Federal regulators to determine the types of
compensation structures that are appro-
priate for financial institutions. Decisions
regarding incentive compensation programs
should be designed uniquely by corporations
and their compensation committees to ac-
count for respective shareholder interest;
long term sustainable, firm-wide success;
and the time horizon of risks. Federal regu-
lators currently require disclosure on the de-
tails and types of executive compensation ar-
rangements, and specific to financial institu-
tions, require that such arrangements be
consistent with safety and soundness guide-
lines. The Roundtable believes the existing
authority currently being exercised by Fed-
eral regulators is appropriate and in line
with protecting consumer and shareholder
interests alike.

We appreciate your review and consider-
ation of these concerns as the committee
prepares to consider H.R. 3269. Please feel
free to call on me if I can be of assistance or
answer any questions.

Best Regards,

STEVE BARTLETT,
President and CEO.

CENTER ON EXECUTIVE
COMPENSATION,
Washington, DC, July 27, 2009.

Re H.R. 3269, Corporate and Financial Insti-
tutional Compensation Fairness Act of
2009.

Hon. BARNEY FRANK,
*Chairman, House Financial Services Committee,
Rayburn House Office Building, Wash-
ington, DC.*

Hon. SPENCER BACHUS,
*Ranking Member, House Financial Services
Committee, Rayburn House Office Building,
Washington, DC.*

DEAR CHAIRMAN FRANK AND RANKING MEM-
BER BACHUS: On behalf of the Center on Execu-
tive Compensation, I am writing to express
the Center's opposition to H.R. 3269 because
of the far-ranging effects it will have on the
U.S. system of corporate governance and ef-
fective compensation policies. We are par-
ticularly concerned about the provisions of
the bill that impose an annual mandatory
vote on pay and direct the Federal govern-
ment to prohibit compensation arrange-
ments in the financial services industry.

As you know, the Center is a research and
advocacy organization that seeks to provide
a reasoned perspective on executive com-
pensation policy and practice issues from the
viewpoint of the senior human resource offi-
cers of large companies. The Center's public
policy positions are developed with the help
of its Subscribers to ensure a practical view
that is also informed by its principles. The
Center believes that a Board-centric ap-
proach to developing and disclosing a clear
link between pay and performance and for
mitigating excessive risk in executive com-
pensation plans is far preferable to having
pay set by the Federal government.

Mandated Annual Vote On Pay Will Weak-
en Corporate Governance. The Center op-
poses mandated annual shareholder vote on
executive compensation in Section 2 of the
bill because it would encourage the adoption
of "cookie cutter" pay arrangements rather
than arrangements carefully tailored to the
company and is not sought by a majority of
shareholders. Specifically, a mandatory vote
on pay:

Would Move the U.S. Toward a System of
Governance by Referendum. Boards of Direc-
tors, acting through an independent com-
pensation committee, discharge their fidu-
ciary duty to manage executive compensa-
tion on behalf of *all shareholders* by tying the
amount and form of compensation to con-
fidential business strategy, evaluating indi-
vidual executive performance and using pay
levers to manage the company's succession
planning process. A mandatory vote on pay
seeks to substitute the judgment of the
shareholders for the informed judgment of
the Board and is likely to open the door to
more shareholder votes on other issues, such
as where to expand or research and develop-
ment decisions.

Would Result in a Cookie-Cutter Approach
to Pay. In order to have an informed view on
pay, institutional investors and others faced
with an annual nonbinding vote on pay
would be required to analyze 30-50 pages of
disclosure for thousands of companies. Many
will rely instead on the recommendation of
proxy advisory services, which have their
own views of how pay should be structured.
In order to ensure substantial support, com-
pensation committees will adopt pay ar-
rangements designed to get a high vote rather
than be tailored to the company.

Fails to Recognize That a Majority of
Shareholders Have Not Supported Share-
holder Resolutions in 2009. Despite the cur-
rent economic environment, shareholder res-
olutions asking companies to adopt an an-
nual vote on pay have not received majority
support on average, with only 30 percent of
the votes receiving majority support.

Ignores Research Results That Show the
Largest Institutional Investors Do Not
Favor Say on Pay. A 2008 research study by
Cornell University Professor Kevin Hallock
of large institutional investors showed that
50 percent opposed say on pay while just 25
percent supported it. Responses such as the
following were typical "It is not clear A,
what we are voting on and B, what others are
voting on. We can have a much more indi-
vidual discussion and nuanced discussion"
[with the Board].

Has Not Reduced Pay Levels in the UK An
annual mandatory vote requirement in the
United Kingdom has not reduced the overall
level of compensation (the FTSE 100 experi-
enced a 7% pay increase in 2008, while in the
U.S., the S&P 500 experienced a 6.8 percent
decline) and has resulted in less of a link be-
tween pay and performance.

*Government Control Over Compensation Sets
A Dangerous Precedent.* The Center also op-

poses Section 4 of the legislation and be-
lieves it should be removed in favor of a prin-
ciples-based approach to mitigating exces-
sive risk in incentives. Section 4 would give
the Federal banking regulatory agencies the
extraordinary authority to prohibit pay
structures and arrangements for executives
and individuals as well as pass judgment on
specific compensation arrangements. Be-
cause the impact of different pay structures
will have different effects based on the risk
profile of the organization, the time horizon
of the products or services sold and other
considerations, banning all pay structures
across the entire industry is likely to have
significant unintended consequences and sets
a dangerous precedent for federal regulation
of compensation in other contexts.

We are also concerned that the proposed
disclosure will result in a one-size-fits-all
approach to compensation. There are six regu-
lators responsible for developing and imple-
menting the prohibitions and acceptable
practices required in the bill. So far, they
have not been able to agree on their respec-
tive responsibilities under the forthcoming
regulatory restructuring. With this in mind,
it is likely that in order to come to agree-
ment on the pay practices that should be
banned, the regulators will need to adopt a
standardized approach to acceptable execu-
tive compensation arrangements and there-
fore mute the ability of companies to set
forth a reasoned and reasonable approach to
pay for performance.

The Center fully supports the mitigation of
risk in incentives, as articulated in the at-
tached checklist for compensation commit-
tees. The Center believes that mitigating
risk is a matter of balance on a number of
fronts, including balance among the type of
metrics measuring performance, balance be-
tween short- and long-term compensation
and balance in ensuring incentives focus on
the time horizon of risk. There are decisions
best made by the Board Compensation Com-
mittee and disclosed in the annual proxy
statement. As you know, the SEC is in the
process of enhancing its disclosures of exces-
sive risk in incentives for employees and ex-
ecutives that covers all employers.

Finally, it is worth noting that previous
well-intended Congressional attempts to reg-
ulate amounts or structures of compensation
have typically backfired—increasing com-
pensation or changing practices in unfore-
seen ways contrary to the intent of the res-
trictions. A good example is the executive
compensation restrictions included in the
American Recovery and Reinvestment Act,
which encourage greater salaries, rather
than a careful pay for performance orienta-
tion. Because H.R. 3269 has been available for
only one week, we believe that more time is
warranted to give the Committee and inter-
ested parties an opportunity to fully analyze
and discuss the potential for harmful unin-
tended consequences.

Thank you for your consideration of our
views. We look forward to working with you
on this and other legislation.

Sincerely yours,

TIMOTHY J. BARTL,
Senior Vice President and General Counsel.

The SPEAKER pro tempore. All time
for debate has expired.

AMENDMENT NO. 1 OFFERED BY MR. FRANK OF
MASSACHUSETTS

Mr. FRANK of Massachusetts. Mr.
Speaker, I offer an amendment.

The SPEAKER pro tempore (Mr.
HOLDEN). The Clerk will designate the
amendment.

The text of the amendment is as follows:

Amendment No. 1 printed in House Report 111-237 offered by Mr. FRANK of Massachusetts:

Page 3, line 8, strike “(a) AMENDMENT.—”.

Page 7, strike lines 1 through 14.

Page 17, after line 4, insert the following:

(f) LIMITATION.—No regulation promulgated pursuant to this section shall require the recovery of incentive-based compensation under compensation arrangements in effect on the date of enactment of this Act, provided such compensation agreements are for a period of no more than 24 months. Nothing in this Act shall prevent or limit the recovery of incentive-based compensation under any other applicable law.

Page 17, line 5, strike “(f)” and insert “(g)”.

The SPEAKER pro tempore. Pursuant to House Resolution 697, the gentleman from Massachusetts (Mr. FRANK) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Massachusetts.

Mr. FRANK of Massachusetts. I yield myself 1 minute.

At the markup, the gentleman from Georgia (Mr. PRICE) offered an amendment, which I said we would be willing to accept subject to some further change. We've talked. We have not yet reached agreement, and this is going to be an entirely legitimate debate.

What the gentleman was concerned about, and I think legitimately, was the possibility of a callback; that is, a requirement that people give back bonuses they'd already received. That would be arbitrary. Now, we hope that there will be rules adopted that will set those rules in place, and I agree that there should not be people's pay subjected unreasonably to arbitrary retroactive decisions.

But there was—and I was not aware of it at the time—an SEC decision that said that where someone had received the compensation and it subsequently turned out that the transaction was not profitable, although it appeared to be, that a return of the money that was given because of the profitability might be appropriate. So our language reflects that. It does not overturn that SEC decision. It does give some protection against arbitrary return.

I reserve the balance of my time.

Mr. PRICE of Georgia. Mr. Speaker, I claim the time in opposition.

The SPEAKER pro tempore. The gentleman from Georgia is recognized for 5 minutes.

Mr. PRICE of Georgia. Mr. Speaker, the debate on this amendment is very appropriate and germane to the actions of this entire Congress. The amendment that was offered in committee in good faith, to try to make certain that there weren't any changes that could be made retroactively to compensation packages and incentive pay, was very specific.

It said that no compensation of any executive having been approved by a

majority of the shareholders may be subject to any callback, which is the retroactivity, unless it was part of the contract or unless there had been fraud committed. And that's what was accepted by committee, Mr. Speaker, accepted by committee.

The amendment was put into the bill with the caveat that the chairman wanted, potentially, a few changes. And I would quote from the chairman, who said, The impulse to retroactivity is not one of our finest and ought to be constrained. And he said, We could work together to make sure this does not derogate from the SEC prospectively to say that you can't do this kind of thing.

Well, Mr. Speaker, I'm here to tell you that there weren't any discussions before the Rules Committee met. There weren't any discussions before the amendment that we now have before us was offered as the apparently good-faith effort to the amendment that was offered and adopted in a bipartisan manner majority in the committee. And what does the new amendment say? It says, No regulation promulgated pursuant to this section shall require the recovery of incentive-based compensation under compensation arrangements in effect as of the date of the enactment of this act.

Now, what does that mean? Well, it means that the SEC, that is the Federal Government, Mr. Speaker, will be able to dictate pay, dictate pay because of the language of this amendment, to publicly held companies. Now, that may be okay if they take tax money, Federal tax money, but this would be publicly traded companies that don't take a dime of tax money.

Mr. Speaker, this is a huge step in the wrong direction. Section 4 is the area of this bill that we have great concerns about. It puts the Federal Government, it puts the SEC into the agreements for compensation for executives in publicly traded companies. It cuts at the very core of our free market system.

I would urge a “no” vote on the amendment.

I reserve the balance of my time.

□ 1100

Mr. FRANK of Massachusetts. How much time remains?

The SPEAKER pro tempore. The gentleman from Massachusetts has 4 minutes remaining, and the gentleman from Georgia has 2½ minutes remaining.

Mr. FRANK of Massachusetts. Who has the right to close, Mr. Speaker?

The SPEAKER pro tempore. The gentleman from Georgia has the right to close.

Mr. FRANK of Massachusetts. Mr. Speaker, I yield myself 30 seconds to acknowledge one thing that should have been drafted better. The word “require” is ambiguous here. The word

should have been “permit” rather than “require.” That is, we did mean to say that you could not require the individual to give it back. We do want to restrain the SEC or anybody else from an inappropriate one. We will try to change that one word, and it will make a difference to the gentleman of Georgia, but I believe that “permit” would have been more appropriate. When we say “require,” we mean that you could not require the individual to give it back. That was it.

I now yield 2 minutes to the gentleman from North Carolina (Mr. MILLER).

Mr. MILLER of North Carolina. Mr. Speaker, it may be that the amendment was offered in good faith, but the explanation for the amendment had very little to do with what the amendment actually says. This amendment, Mr. FRANK's amendment, does accomplish the reason or the argument in favor of the amendment.

We don't think that a regulator or regulation should require the recovery of incentive-based pay where the existing contract doesn't require it. We shouldn't change contracts retroactively, existing contracts retroactively, but we also don't need to undermine the existing law that may provide for that.

Mr. FRANK mentioned the SEC. The SEC is now trying to recover money that was paid supposedly because transactions were profitable when, in fact, they weren't because of the accounting. So we don't want to reward accounting irregularities. Going forward, the regulators may well decide that an effective constraint on imprudent risk-taking is to require longer horizons for incentive-based pay.

That is the purpose of this amendment. It is what this amendment actually accomplishes. It is consistent with the reasons given in committee for the original amendment.

Mr. PRICE of Georgia. Mr. Speaker, I continue to reserve the balance of my time.

Mr. FRANK of Massachusetts. Mr. Speaker, if the gentleman is going to close with his remaining time, I will just take, I think, 15 seconds to say that I've talked to the gentleman from Georgia. Again, we will still have a disagreement, but instead of “require,” it should say—and he and I have agreed within the limited version here—“allow” them to require it. In other words, we don't want the SEC to be able to make an inappropriate requirement. So that will be clarified.

I will take our remaining time to say, yes, we did tentatively agree to it. There had been an SEC decision that day, which I wasn't aware of, and I did believe that the amendment as we originally agreed—and I did say to the gentleman that I thought we would want to make some further changes.

Mr. PRICE of Georgia. Will the gentleman yield?

Mr. FRANK of Massachusetts. Yes.

Mr. PRICE of Georgia. Given the agreement that you and I have reached on language, what is the posture about changing the language on this amendment? Is that a unanimous consent?

Mr. FRANK of Massachusetts. Yes.

I would ask unanimous consent, if that is permissible—we are in the whole House—to change line 2. Instead of “require,” it will read “shall allow to require,” “shall allow the SEC to require.” No. I take it back. Here is how I will say it: “Shall be allowed to require.”

The SPEAKER pro tempore. Will the gentleman submit that language to the desk?

Mr. FRANK of Massachusetts. Yes.

The SPEAKER pro tempore. The gentleman's time has expired.

Mr. FRANK of Massachusetts. That's easy for you to say, Mr. Speaker.

Mr. PRICE of Georgia. Mr. Speaker, until that language has been introduced, I will reserve the balance of my time.

PARLIAMENTARY INQUIRY

Mr. PRICE of Georgia. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state his inquiry.

Mr. PRICE of Georgia. Has the language that has been offered at the desk been introduced as business allows?

Mr. FRANK of Massachusetts. Mr. Speaker, if the gentleman would yield to me, I would ask unanimous consent to amend the bill according to that language which the gentleman has seen.

The SPEAKER pro tempore. The Clerk will report the modification.

The Clerk read as follows:

Modification to amendment No. 1 offered by Mr. FRANK of Massachusetts:

On line 2 of the matter proposed to be inserted, after “shall” insert “be allowed to”.

The SPEAKER pro tempore. Without objection, the amendment is modified. There was no objection.

The text of the amendment, as modified, is as follows:

Page 3, line 8, strike “(a) AMENDMENT.—”.

Page 7, strike lines 1 through 14.

Page 17, after line 4, insert the following:

(f) LIMITATION.—No regulation promulgated pursuant to this section shall be allowed to require the recovery of incentive-based compensation under compensation arrangements in effect on the date of enactment of this Act, provided such compensation agreements are for a period of no more than 24 months. Nothing in this Act shall prevent or limit the recovery of incentive-based compensation under any other applicable law.

Page 17, line 5, strike “(f)” and insert “(g)”.

Mr. PRICE of Georgia. Mr. Speaker, I thank the gentleman, the chairman, for his desire and willingness to work together on this.

That being said, the challenges with section 4 are huge. The far reach of the SEC and the ability of the Federal Gov-

ernment now to get into the executive compensation packages for businesses for which there is no Federal money involved is remarkable in its extent. As we know, the Democrat majority has a great desire to have the government everywhere in our lives, whether it's in financial institutions, whether it's in energy companies or whether it's that the American people have to pay to turn on and off their light switches.

I just picked up the paper this morning, Mr. Speaker, and saw that there is an op-ed in The Wall Street Journal which talks about health reform and cancer and about how, if the Federal Government is allowed to control health care, it may result in decreasing innovation in the area of cancer.

I would suggest, Mr. Speaker, that if the Federal Government is allowed in this arena that what we will see is a huge, depressing effect on the ability of businesses all across this land to be able to create the most vibrant, entrepreneurial and active businesses that inure to the benefit of the American people, that create jobs and that allow us to remain the greatest Nation in the history of the world. It's just little bits that chip away at the fabric of our Nation that make it so that it is impossible to continue to compete on an international basis.

So, Mr. Speaker, I am pleased that the chairman was willing to clarify the amendment. However, it still gets to the heart of whether or not we are going to allow the Federal Government into decisions that ought to be left in a free market and in a private-sector arrangement, so I urge the defeat of the amendment.

I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the amendment offered by the gentleman from Massachusetts (Mr. FRANK), as modified.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Mr. PRICE of Georgia. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The SPEAKER pro tempore. Pursuant to House Resolution 697, further proceedings on this question will be postponed.

AMENDMENT IN THE NATURE OF A SUBSTITUTE NO. 2 OFFERED BY MR. GARRETT OF NEW JERSEY

Mr. GARRETT of New Jersey. Mr. Speaker, I have an amendment at the desk.

The SPEAKER pro tempore. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment in the nature of a substitute No. 2 printed in House Report 111-237 offered by Mr. GARRETT of New Jersey:

Strike all after the enacting clause and insert the following:

SEC. 1. SHORT TITLE.

This Act may be cited as the “Corporate and Financial Institution Compensation Fairness Act of 2009”.

SEC. 2. SHAREHOLDER VOTE ON EXECUTIVE COMPENSATION.

(a) AMENDMENT TO THE SECURITIES EXCHANGE ACT OF 1934.—Section 14 of the Securities Exchange Act of 1934 (15 U.S.C. 78n) is amended by adding at the end the following new subsection:

“(i) TRIENNIAL ADVISORY SHAREHOLDER VOTE ON EXECUTIVE COMPENSATION.—

“(1) IN GENERAL.—A proxy or consent or authorization for an annual meeting of the shareholders to elect directors (or a special meeting in lieu of such meeting) occurring on or after the date that is 6 months after the date on which final rules are issued under paragraph (4), shall provide for a separate shareholder advisory vote, at least once every 3 years, to approve the issuer's executive compensation policies and practices as set forth pursuant to the Commission's disclosure rules. The shareholder vote shall be advisory in nature and shall not be binding on the issuer or its board of directors and shall not be construed as overruling a decision by such board, nor to create or imply any additional fiduciary duty by such board, nor shall such vote be construed to restrict or limit the ability of shareholders to make proposals for inclusion in proxy materials related to executive compensation for meetings of shareholders at which such an advisory vote on executive compensation is not to be conducted.

“(2) OPT OUT.—If not less than ⅔ of votes cast at a meeting of shareholders on a proposal to opt out of the triennial shareholder advisory vote on executive compensation required under paragraph (1) are cast in favor of such a proposal, then such shareholder advisory vote required under such paragraph shall not be required to take place for a period of 5 years following the vote approving such proposal.

“(3) SHAREHOLDER APPROVAL OF GOLDEN PARACHUTE COMPENSATION.—

“(A) DISCLOSURE.—In any proxy or consent solicitation material for a meeting of the shareholders occurring on or after the date that is 6 months after the date on which final rules are issued under paragraph (4), at which shareholders are asked to approve an acquisition, merger, consolidation, or proposed sale or other disposition of all or substantially all the assets of an issuer, the person making such solicitation shall disclose in the proxy or consent solicitation material, in a clear and simple tabular form in accordance with regulations to be promulgated by the Commission, any agreements or understandings that such person has with the named executive officers (as such term is defined in the rules promulgated by the Commission) of such issuer (or of the acquiring issuer, if such issuer is not the acquiring issuer) concerning any type of compensation (whether present, deferred, or contingent) that is based on or otherwise relates to the acquisition, merger, consolidation, sale, or other dispositions of all or substantially all of the assets of the issuer, and the aggregate total of all such compensation that may (and the conditions upon which it may) be paid or become payable to or on behalf of such named executive officer.

“(B) SHAREHOLDER APPROVAL.—Any proxy or consent or authorization relating to the proxy or consent solicitation material containing the disclosure required by subparagraph (A) shall provide for a separate shareholder vote to approve such agreements or understandings and compensation as disclosed. A vote by the shareholders shall not be binding on the corporation or the board of directors of the issuer or the person making the solicitation and shall not be construed as

overruling a decision by such board, nor to create or imply any additional fiduciary duty by such board.”

“(4) RULEMAKING.—Not later than 1 year after the date of the enactment of the Corporate and Financial Institution Compensation Fairness Act of 2009, the Commission shall issue rules and regulations to implement this subsection.”

(b) STUDY AND REPORT.—The Securities and Exchange Commission shall conduct a study and review of the results of shareholder advisory votes on executive compensation held pursuant to this section and the effects of such votes. Not later than 5 years after the date of enactment of this Act, the Securities and Exchange Commission shall submit a report to the Congress on the results of the study and review required by this subsection.

SEC. 3. COMPENSATION COMMITTEE INDEPENDENCE.

(a) STANDARDS RELATING TO COMPENSATION COMMITTEES.—The Securities Exchange Act of 1934 (15 U.S.C. 78f) is amended by inserting after section 10A the following new section:

“SEC. 10B. STANDARDS RELATING TO COMPENSATION COMMITTEES.

“(a) COMMISSION RULES.—

“(1) IN GENERAL.—Effective not later than 270 days after the date of enactment of the Corporate and Financial Institution Compensation Fairness Act of 2009, the Commission shall, by rule, direct the national securities exchanges and national securities associations to prohibit the listing of any security of an issuer that is not in compliance with the requirements of any portion of subsections (b) through (f).

“(2) OPPORTUNITY TO CURE DEFECTS.—The rules of the Commission under paragraph (1) shall provide for appropriate procedures for an issuer to have an opportunity to cure any defects that would be the basis for a prohibition under paragraph (1) before the imposition of such prohibition.

“(3) EXEMPTION AUTHORITY.—The Commission may exempt certain categories of issuers from the requirements of subsections (b) through (f), where appropriate in view of the purpose of this section. In determining appropriate exemptions, the Commission shall take into account, among other considerations, the potential impact on smaller reporting issuers.

“(4) NO FEDERAL PREEMPTION.—If the law of the State under which an issuer is incorporated provides for a procedure for the board of directors to establish an independent compensation committee, then such State law shall be controlling and nothing in this section shall preempt such State law.

“(b) INDEPENDENCE OF COMPENSATION COMMITTEES.—

“(1) IN GENERAL.—Each member of the compensation committee of the board of directors of the issuer shall be a member of the board of directors of the issuer, and shall otherwise be independent.

“(2) CRITERIA.—The Commission shall, by rule, establish the criteria for determining whether a director is independent for purposes of this subsection. Such rules shall require that a member of a compensation committee of an issuer may not, other than in his or her capacity as a member of the compensation committee, the board of directors, or any other board committee—

“(A) accept any consulting, advisory, or other compensatory fee from the issuer; or

“(B) be an affiliated person of the issuer or any subsidiary thereof.

“(3) EXEMPTION AUTHORITY.—The Commission may exempt from the requirements of

paragraph (2) a particular relationship with respect to compensation committee members, where appropriate in view of the purpose of this section.

“(4) DEFINITION.—As used in this section, the term ‘compensation committee’ means—

“(A) a committee (or equivalent body) established by and amongst the board of directors of an issuer for the purpose of determining and approving the compensation arrangements for the executive officers of the issuer; and

“(B) if no such committee exists with respect to an issuer, the independent members of the entire board of directors.

“(c) INDEPENDENCE STANDARDS FOR COMPENSATION CONSULTANTS AND OTHER COMMITTEE ADVISORS.—The charter of the compensation committee of the board of directors of an issuer shall set forth that any outside compensation consultant formally engaged or retained by the compensation committee shall meet standards for independence to be promulgated by the Commission.

“(d) COMPENSATION COMMITTEE AUTHORITY RELATING TO COMPENSATION CONSULTANTS.—

“(1) IN GENERAL.—The compensation committee of each issuer, in its capacity as a committee of the board of directors, shall have the authority, in its sole discretion, to retain and obtain the advice of a compensation consultant meeting the standards for independence promulgated pursuant to subsection (c), and the compensation committee shall be directly responsible for the appointment, compensation, and oversight of the work of such independent compensation consultant. This provision shall not be construed to require the compensation committee to implement or act consistently with the advice or recommendations of the compensation consultant, and shall not otherwise affect the compensation committee’s ability or obligation to exercise its own judgment in fulfillment of its duties.

“(2) DISCLOSURE.—In any proxy or consent solicitation material for an annual meeting of the shareholders (or a special meeting in lieu of the annual meeting) occurring on or after the date that is 1 year after the date of enactment of the Corporate and Financial Institution Compensation Fairness Act of 2009, each issuer shall disclose in the proxy or consent material, in accordance with regulations to be promulgated by the Commission whether the compensation committee of the issuer retained and obtained the advice of a compensation consultant meeting the standards for independence promulgated pursuant to subsection (c).

“(e) AUTHORITY TO ENGAGE INDEPENDENT COUNSEL AND OTHER ADVISORS.—The compensation committee of each issuer, in its capacity as a committee of the board of directors, shall have the authority, in its sole discretion, to retain and obtain the advice of independent counsel and other advisers meeting the standards for independence promulgated pursuant to subsection (c), and the compensation committee shall be directly responsible for the appointment, compensation, and oversight of the work of such independent counsel and other advisers. This provision shall not be construed to require the compensation committee to implement or act consistently with the advice or recommendations of such independent counsel and other advisers, and shall not otherwise affect the compensation committee’s ability or obligation to exercise its own judgment in fulfillment of its duties.

“(f) FUNDING.—Each issuer shall provide for appropriate funding, as determined by the compensation committee, in its capacity

as a committee of the board of directors, for payment of compensation—

“(1) to any compensation consultant to the compensation committee that meets the standards for independence promulgated pursuant to subsection (c); and

“(2) to any independent counsel or other adviser to the compensation committee.”

(b) STUDY AND REVIEW REQUIRED.—

(1) IN GENERAL.—The Securities Exchange Commission shall conduct a study and review of the use of compensation consultants meeting the standards for independence promulgated pursuant to section 10B(c) of the Security Exchange Act of 1934 (as added by subsection (a)), and the effects of such use.

(2) REPORT TO CONGRESS.—Not later than 3 years after the date of enactment of this Act, the Commission shall submit a report to the Congress on the results of the study and review required by this paragraph.

The SPEAKER pro tempore. Pursuant to House Resolution 697, the gentleman from New Jersey (Mr. GARRETT) and a Member opposed each will control 15 minutes.

The Chair recognizes the gentleman from New Jersey.

Mr. GARRETT of New Jersey. I yield myself 4 minutes at this time.

Mr. Speaker, the American public truly should be outraged when they read the front page headlines nowadays with regard to bonuses and pay.

In The Wall Street Journal today, it’s a bank bonus tab of \$33 billion. You have to read the second headline, though, to realize that the \$33 billion is going to the banks that received, basically, the taxpayer bailouts. The bottom line on all of this is that there is nothing in this legislation that would have prohibited this from going forward.

Now, the other side of the aisle on the floor today repeatedly says, Well, the Republican side simply has no alternative; it is just the party of “no.” Well, we know that that’s not true. On the legislation before us today, with regard to executive compensation, both in committees and through Rules, the Republicans have proposed a number of substantive proposals, which I’ll go through right now, which would address the underlying problems that we’re trying to address here.

So, if you will permit me, I will now address the three or four main points in this substitute which would get at these points that, I think, outrage America with regard to compensation but which do so in a fair and just manner.

Firstly, in the underlying bill, it allows for a non-binding shareholder vote on executive compensation every year.

We propose instead that such vote should occur every 3 years. Why is that? All the expert testimony we’ve heard so far says that Wall Street focuses too much on the short term—on the year, on the 6 months, on the three-quarters or on the end of the quarter. Why then when compensation packages usually go longer than 1 year, usually go for 3 years, would we be requiring a vote that would once again

refocus the attention on 1 year, a short period of time, as opposed to being in line with the 3-year longer time frame? So we suggest that a 3-year vote would be much more appropriate than a 1-year.

Secondly, as to the shareholders and whom we trust with these decisions, we suggest, if we are going to trust the shareholders to be making these decisions, should we not also trust them to make the decision as to whether or not to have such votes on executive compensation in the future?

So our amendment would suggest that a substitute would allow for a two-thirds vote of shareholders to opt out of the shareholder triennial advisory vote if they are so inclined. We know that this has been a position taken by a number of institutions and companies in the past because they've said that we do not want to have such power, that we do not want to involve ourselves in such decision-making.

We know that it is right now as well because we have a letter from the United Brotherhood of Carpenters which points out the very real reason of why this is. You know, they hold something like 3,603 different companies in their portfolio. They said if they were going to have to make this decision either every 1 year or every 3 years—and considering the due diligence that they would have to engage in—this commitment would be a severe challenge to their fiduciary responsibilities. So, if they want to opt out of this, shouldn't we give them that ability if two-thirds of the voters decide to do so?

Thirdly, State law. The other side of the aisle speaks about State law and about hypocrisy on this issue. Should we be preempting State law in this situation or, as to those States that have already engaged in this area, should they not be able to speak up and have their voices heard and not be preempted by the Federal Government?

Fourthly, and most importantly, is section 4. This section goes well beyond what the administration has already talked about. The administration says they do not really like what this section is in the bill and that they did not propose this section.

So our substitute says that we should be deleting section 4 of the bill, which would allow government bureaucrats rather than shareholders. The bottom line on this one is: Who is it that the other side really trusts to make these decisions? Is it the shareholders, as we saw in the first three sections of this bill, who would make the decisions, and that we would suggest they should be in the position to make the decisions, or is it the bureaucrats whom they think should be able to make these decisions? Is it the same bureaucrats, in the past, over at the SEC, who totally missed the whole Madoff situation, who should be making decisions

as opposed to the stockholders? Is it the same bureaucrats who were the regulators for AIG and who totally missed that situation? Is that who they trust instead?

So we would suggest all four points are substantive amendments to this, and we would appreciate their consideration.

I reserve the balance of my time.

Mr. FRANK of Massachusetts. Mr. Speaker, I yield 4 minutes to the gentleman from California (Mr. SHERMAN).

Mr. SHERMAN. Mr. Speaker, I support the bill. I wish it went a bit further, and I, of course, oppose Mr. GARRETT's amendment.

First, his amendment significantly weakens the say-on-pay provisions. That's right. It weakens a provision, which, itself, simply provides for non-binding resolutions; but the core of the Garrett amendment is that it eliminates the provision in the bill which is designed to provide very modest restrictions on some very peculiar and pernicious compensation formulas that have been used on Wall Street. Now let us look at how narrow this provision is.

It applies only to financial institutions and then only to those with over \$1 billion. It does not prohibit \$1 million-dollar-a-month salaries. It does not prohibit \$10 million-dollar-a-month salaries. It allows an executive to get a kajillion stock options and another kajillion shares of restricted stock. This bill is not an overall limit on compensation on Wall Street.

What it does is it prohibits those compensation formulas that provide an incentive for taking extreme risks, risks that are bad for our economy, risks that are bad for the company.

Now, the Group of 30, led by Paul Volcker, found and reported that there are numerous examples of misaligned incentives, of incentives that contribute to instability and to cyclicity in financial markets. The crisis has driven home the importance of aligning compensation practices with the incentives and controls in a firm's risk-management program, aligning pay with long-term shareholder interests rather than with short-term returns that cannot be sustained and which entail greater risk.

□ 1115

So this is a provision not designed, not intended to limit the overall financial compensation in financial institutions, not designed to prevent enormous bonuses. But the bonuses must not, by themselves, be designed to undermine the economy or the company.

Now, this is a small step that we can take to make sure we don't have another financial meltdown.

Let me respond to Mr. HENSARLING and others who came to this floor and basically said all we have to do is make sure there are no further bailouts. Well, I opposed the Wall Street bailout,

but I'm not going to join with those who say the only problem we had in September of 2008 is that we voted for the bill.

We've got to act to prevent the next financial meltdown, and it is not enough to come to this floor and say, Well, it's okay to have another September 2008 as long as we vote against some future bailout bill twice instead of once.

The goal is not to defeat the TARP bill. The goal is to prevent the conditions which caused so many to think that it was necessary and for all of us to recognize that we faced a great financial crisis.

The way to do that is to vote down this amendment and make sure that some very peculiar, very pernicious incentive formulas are not used to cause those on Wall Street to feel that if they could only take the most enormous risk, they can maximize their compensation.

Mr. GARRETT of New Jersey. I yield 3 minutes to the gentleman from Texas (Mr. NEUGEBAUER).

Mr. NEUGEBAUER. Mr. Speaker, I rise in support of the Garrett substitute. This is a reasonable and thoughtful substitute. Republicans on the Financial Services Committee are here to bring good ideas to the table to try to work with the majority to ensure that our markets operate with transparency and integrity.

Our substitute includes a non-binding shareholder vote on executive legislation. Rather than vote every year, though, our substitute aligns the vote with standard time frames of compensation packages and ensures that institutional investors who represent the shareholders in casting their votes will be able to have proper time to do the due diligence necessary to make meaningful votes.

The substitute allows shareholders who don't want to be involved in these votes to opt out. Makes sense to me. If I don't want to particularly be involved in that, give me the opportunity.

Finally, the substitute ensures that the Federal Government cannot decide to pay for employees or financial institutions. Determining pay practices is not the role of government. As we work together to reform the financial regulatory structure, debating compensation practices may make some feel better, but it doesn't fix the cause of our financial crises. While we and the public may not like to hear about some of the large salaries and bonuses others have earned, we have to ask ourselves how much did these compensation practices really contribute to the problem.

The most important tool available to regulators is the ability to set capital standards for financial institutions, not the ability to tell financial institutions how they can pay or how much they should pay their employees. We

need regulators to ensure capital and leverage ratios at financial institutions match the risk that those entities are taking on. That's what regulators should focus on, not deciding whether or not a certain incentive practice is appropriate or not.

Ohio State University finance professor Rene Stulz recently released a finished study comparing bank performance last year and CEO incentives leading up to the crisis. Professor Stulz is quoted in today's New York Times: "It's hard to believe that regulators will be better at devising compensation plans with proper incentives," he says. "Properly designed capital requirements are a much more efficient approach to regulate the risk of financial institutions than fiddling with compensation."

When we allow Federal regulators to decide how much employees of financial institutions get paid, the government is overreaching. Congress should be working to encourage well-managed, well-run, and well-capitalized financial institutions. This bill does the opposite.

Support the commonsense Garrett substitute.

Mr. FRANK of Massachusetts. I yield myself 3 minutes.

First, I had been taking as given that the President's press secretary said he had some problems with the bill. I know Mr. Sperling did, and as I said, we have the Republicans in a temporary mode of obedience to the President. A little bit of a culture gap there. They thought it was still George Bush. They are used to snapping to attention for President Bush. Apparently, a little of that left over for President Obama. I think we should have been independent in both cases.

I read the transcript of the press conference. Mr. Gibbs said nothing negative about this. He was asked if he would sign this bill. He said, Well, there are some pieces of it we are moving and it will go through the Senate. And when he didn't fully answer it, he got a tough follow-up question about whether or not they were trying to avoid spilling beer on the President's children's table.

I do also want to talk about say-on-pay, which the Republicans are now embracing.

Here's what the gentleman from Alabama, the ranking member of the committee, had to say as a prediction when we debated this in March of 2007:

Evidence that free-market forces are already at work to correct any excesses in the system should give this committee real pause before it seeks to impose a legislative fix that could, like past efforts in this area, have unintended and negative consequences.

In March, well over 2 years ago, the gentleman from Alabama confidently predicted that free-market forces are already at work to correct pay ex-

cesses. So apparently the gentleman from Alabama was correct, there have been no pay excesses in 2½ years. We've all been hallucinating. He was wrong then, and he's wrong now. Now they're wrong on different levels. They've now had to acknowledge the importance of say-on-pay.

I also would repeat when I say the Republicans have no version. They want to weaken say-on-pay, but with regard to the bonus structure that gives people an incentive to take risks because the decision-maker is risk free, even though the company is at risk, the Republican position is zero. There has not been in any of our deliberations any Republican approach to how you deal with the incentive to take excessive risk. No way, no how.

They have reluctantly agreed to say-on-pay, although they want to water it down, and that's to the argument that an annual vote focuses you short term. Of course not. There is an annual proxy vote. It goes on the proxy. It doesn't require you—if you've got a 3-year contract, then every year it would still be approved.

So this notion that it focuses on the shorter term is, of course, wholly inaccurate because it simply says you put it on the proxy every year. Some companies will have annual contracts, some biennial, and they are voted on. And if they are triennial, there is nothing at issue.

But again, the central point is this. The purpose of this amendment—there are two. We can say on paper but more importantly have the Federal Government say nothing whatsoever about the bonus structure. Those financial institutions that received TARP money and paid it back and now want to do these bonuses in ways that will recreate the risk will be entirely free to do so under this amendment.

Mr. GARRETT of New Jersey. I am pleased to yield 3 minutes to a leader in advocating for those free-market principles that made this country as great as it is, the gentleman from Texas (Mr. HENSARLING.)

Mr. HENSARLING. Mr. Speaker, to quote the distinguished chairman of the Financial Services Committee, he was wrong then, he is wrong now to say that Republicans have no program to deal with excessive risk and compensation packages. Yes, we do have a program: end the bailouts. End the TARP program. If you quit bailing out risky behavior, Mr. Speaker, you receive less risky behavior.

Second of all, the gentleman is also wrong as far as the Republicans having no program otherwise we wouldn't have this substitute that we are debating at the moment. I also heard the gentleman from North Carolina earlier say, Well, we need to have the underlying legislation because shareholders have no right to have a say-on-pay. Wrong again, Mr. Speaker. Share-

holders have the right. They can have a say-on-pay by electing directors who will fire the management. They have a say to invest elsewhere.

Their bill says we have to have mandatory say-on-pay. Now, we can debate the merits of it, but the gentleman from North Carolina was simply, clearly wrong.

I also want to say to my friends on the other side of the aisle, when I listen to, again, the logic that we have to have a new Federal regulation that somehow will regulate risky incentive pay structures, again, all of the rhetoric has to do with Wall Street. But guess what? Read the bill. Look at the interpretation.

Financial institutions. Chrysler and GM have been found to be financial institutions. We have had testimony when they came looking for the taxpayer bailout that the UAW, the United Auto Workers, had a pay structure that was 40 percent higher than their competitors.

So now we have a law here that will allow Federal regulators, I assume, to come in and say, Folks at the UAW, your incentive structure is contributing to the demise of Chrysler and GM. So we're going to have to come down and take down your wage rates.

Read the bill, Mr. Speaker. This isn't restricted to the top executives. And if anybody believes this is restricted to Wall Street, then why did Chrysler and why did GM get coverage under a statute that described institutions?

So, Mr. Speaker, what we have is a Federal Government that is now taking over our auto companies, telling us what kind of automobiles we can drive. They're taking over our mortgage companies, telling us whether or not we can even enjoy a mortgage. They now want to control access to our family doctor, and now they want to decide for millions and millions of Americans whether or not they can ever receive a sales commission or a Christmas bonus that they may view as too risky.

What is risky is too much politicization of our economy. What is risky is too much government control of our economy. We have had enough.

Mr. FRANK of Massachusetts. Mr. Speaker, just briefly, the gentleman talked about the bailout of General Motors and Chrysler which, of course, was under the Bush administration. The fact that the Bush administration decided to initiate a bailout of General Motors and Chrysler is not binding on this legislation. They are not under financial regulators and wouldn't be covered under this bill.

I now yield 3 minutes to the gentleman from Georgia (Mr. SCOTT).

Mr. SCOTT of Georgia. Let me say this: Mr. GARRETT's amendment is sort of like not having a say-on-pay but maybe just a little whisper. Mr. GARRETT's amendment goes at the heart and the soul of this bill and that is

this: that we must have a very strong, definitive say-so from the shareholders.

Now, Mr. HENSARLING, the gentleman from Texas, pointed out about the bailouts and how we're to prevent this. This measure that we have is designed to prevent this same situation from happening again. In section 4, as he pointed out, the reason we need section 4—and let us remember what section 4 is: section 4, again, is the heart and soul of this because it spells out how we're going to go about preventing bonuses tied to incentives that have dragged down this economy and brought us into the financial situation we have.

He questions the regulators. Maybe the American people might need to know who we're talking about. We're not talking about somebody over here inexperienced we're just going to set up. Who are these regulators? These regulators are the Federal Reserve Bank whose duty it is to regulate our economy. It is the Office of the Comptroller of the Currency, the Federal Deposit Insurance Corporation that has to go in afterwards and fix banks and declare bankruptcy of banks. The Office of Thrift Supervision, the National Credit Union Administration Board and the Security and Exchange Commission and the Federal housing agencies.

What is this awesome power we're giving to them? It's spelled out very simply. What we want them to do is simply we will require these regulators to prohibit certain compensation structures at large financial institutions if they could have a serious adverse effect on financial instability. That's what we are trying to do. We're trying to prevent the same thing from happening again.

And then, secondly, we will require Federal regulations to write rules requiring Federal institutions to simply disclose their incentive-based pay plans, incentives that are tied to risk behavior.

□ 1130

Mr. Speaker, what has happened that brought this on here is a simple case, AIG. They went and they set up a little department with 430 employees out of Connecticut and over into Europe and assigned them risky behavior and signed their rewards to that risky behavior for their bonuses. The company came down. We had to bail them out. And you know who had to pay for those bonuses? The taxpayers. This bill is designed to prevent that. This amendment is designed to gut it.

Vote down the amendment.

Mr. GARRETT of New Jersey. I yield 2½ minutes to the ranking member, the gentleman from Alabama (Mr. BACHUS).

Mr. BACHUS. Mr. Speaker, we continue to hear this mantra that this is all about shareholders and empowering

them with rights, but then you sort of give them a crumb, you give them a non-binding right to have a vote on pay and then you follow that up with 12 or 14 pages where you give the government all sorts of powers, powers to regulate pay bonuses. And you do that, you give the shareholders the right to have a non-binding say on the top executives, but then you give the government, in the back door, the last 15 pages of the bill, 14 pages, you give them the right to set the pay for every rank-and-file employee. And you also do it under the guise that these companies are so big and so systemically important that they may fail. And that's right, they may. But then you do all the other 99 percent of the companies that aren't going to fail.

Now, Chairman FRANK, last month, invited, I think, one of his favorite witnesses, Nell Minow, who is a leading shareholder rights advocate, to testify on his say-for-pay bill. And she came and she testified favorably. And then he added this government say-on-pay, where the government will make the decisions. Well, just yesterday, we had what we call a "man bites dog" moment. She came out and she posted this on her Web site. She now opposes, vehemently opposes, section 4 of the bill, the government say-on-pay.

She states, The standard is unworkable. What does inappropriate mean? Boy, I agree. Deciding whatever bonus or whatever incentive pay or whatever commission is inappropriate. She asked the same question that we asked, Who is in the best position to evaluate and respond to badly designed pay packages? Here's her answer, the entire answer: "I have the utmost respect for politicians and bureaucrats, but I also recognize their limits. The government should not micromanage pay."

And that is what this debate is about: Are you going to let the government do it, the board of directors do it, or are you going to let the shareholders do it? Obviously, you go to the default position that you went to on health care, cap-and-trade, and now financial services: Let the government decide.

Mr. FRANK of Massachusetts. Mr. Speaker, I will take 30 seconds to say, apparently the gentleman from Alabama only has witnesses if he's sure he will agree with everything they've ever said. He says it's "man bites dog" because we had an honest witness with whom we agreed in some parts and disagreed on others. Apparently, the notion of having a witness that you haven't totally vetted for everything she's ever said is new to the gentleman from Alabama.

I will continue to invite witnesses that I think are useful, even if I don't always agree with them. And I would repeat that the gentleman from Alabama's say on this—he was against say-on-pay. He says it's just not much, but it was enough for him to say it was

going to cause real problems 2½ years ago. And I repeat his view on pay, in March of 2007, Evidence that free market forces are already at work to create any excesses should give this committee pause, but seeks to oppose a legislative fix that could have unintended and negative consequences. He was talking about that insignificant say-on-pay.

I yield 1 minute to the gentleman from Indiana (Mr. CARSON).

Mr. CARSON of Indiana. Mr. Speaker, today I've heard a number of interesting accusations about what this legislation would do if passed. I have heard that the government will sit in board rooms and set caps on pay. But of course my constituents are accustomed to hearing these kinds of false arguments from those who wish to maintain the status quo.

My constituents sent me to Congress to move beyond the status quo of a broken financial regulatory structure. They sent me to enact commonsense reforms like those included in the legislation we're discussing today, Mr. Speaker. They know that average families have cut back, work longer hours, and have saved their money during this crisis. Meanwhile, Wall Street execs have acted irresponsibly and enjoy the lavish compensation packages that have allowed their companies to fail.

So I am proud to be an original cosponsor of this bill that will bring about a new era of responsibility on Wall Street. I encourage my colleagues to do the same.

Mr. GARRETT of New Jersey. Mr. Speaker, may I inquire as to how much time is remaining and who will be closing?

The SPEAKER pro tempore. The gentleman from Massachusetts has the right to close.

The gentleman from New Jersey has 3 minutes remaining, and the gentleman from Massachusetts has 3¼ minutes remaining.

PARLIAMENTARY INQUIRY

Mr. GARRETT of New Jersey. Parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state his inquiry.

Mr. GARRETT of New Jersey. As far as the procedure for determining who closes, is it not the author of the amendment?

The SPEAKER pro tempore. A manager controlling time in opposition has the right to close the debate.

Mr. FRANK of Massachusetts. Parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state his parliamentary inquiry.

Mr. FRANK of Massachusetts. Did the gentleman not notice that Mr. PRICE had the right to close because he was defending the committee on the amendment that I offered?

Mr. GARRETT of New Jersey. I yield myself the remaining 3 minutes.

Mr. Speaker, the final question, I guess, is who do we trust. Who do we trust to deal with the situation of pay?

The gentleman just spoke on the floor with regard to protecting the interests of his constituents. You know, it doesn't really matter who your constituents are, whether they are the CEO at the top of the ladder, someone in between, the receptionist, anywhere along the line as far as pay scale, this bill will affect them and will affect their ability as far as what their compensation is. It will affect the ability of the Federal Government to dictate what their compensation will be. Government bureaucrats will be making those decisions in the future as opposed to the people involved with the company. Large income or small, bureaucrats will be the ones at hand to make those final decisions.

The odd thing about this legislation, as we read through it and as you look at our amendment to try to address this problem, is that the underlying bill gives with one hand and takes with the other. As has been previously indicated, it gives with one hand in a tacit approach to say that the shareholders should be able to make these decisions, but then it takes that right back again when it says, then, When the government decides that those shareholders made an incorrect decision, some bureaucrat at the SEC or the Federal Reserve or someplace else will overrule that decision and take that power away from them.

It says in the committee, on the one hand, that States should have some say in some aspects of financial service regulation matters, such as with the VFPA, where they do not want to preempt State rights, but here they want to step in and preempt those States, States that may have had a long history of dealing with such situations as executive pay compensation, or States that may want to address it in the future, but the underlying bill says that they will preempt that.

That is why we have come up with an alternative. We have come up with a solution. We are not the "party of no," we are the party of reform, a party that says we should address this on a longer period of time, a party that says that we should allow the shareholders to be able to decide these issues, a party that says that when it comes to compensation, the Federal Government should not be intermeddling.

Now, there was an article in The New York Times recently. It quoted from Alan Blinder, a Princeton economist and former Vice Chairman of the Fed who wrote recently for the Wall Street Journal with regard to this. He said, The executives, lawyers, and accountants who design compensation systems are imaginative, skilled, and definitely not disinterested. Congress and government bureaucrats won't beat them at their own game. Congress has tried to

do this in the past when they set the issue with regard to deductibility for executive compensation at \$1 million. It had the unintended consequence of setting \$1 million as the floor, and Wall Street then went from compensation packages greatly exceeding this. We may well see the same thing with this underlying legislation as well.

In the headlines that I started the hour out with, Bank Bonuses \$33 Billion, money that is actually coming from the very taxpayers who are watching us here right now, this underlying legislation will not change that. Despite the fact that the gentleman from Texas tried to limit this legislation to try to address this legislation to situations as TARP companies, this legislation will not solve this. Our substitute will.

Our substitute will return the power to the individual. It will return the power to the corporation and, most importantly, return the power to the shareholder and take it from the government bureaucrat.

Mr. FRANK of Massachusetts. I yield our remaining time to a leading member of the committee, the gentleman from Colorado (Mr. PERLMUTTER).

Mr. PERLMUTTER. Mr. Speaker, I appreciate the comments of my friend from New Jersey, but I would say the word that comes to mind is "amnesia." My friends on the Republican side of the aisle have amnesia. They have amnesia over how the Bush administration tried to deregulate everything, tried to make government smaller and more ineffective so that we could have Ponzi schemes as existed under Madoff. That occurred under the George Bush administration. We had the failure with Katrina, and we had the biggest collapse in the banking sector ever because of deregulation and a belief that the free market could do anything it wanted to do.

Now, this bill is very mild. What it allows, Mr. Speaker, is it allows shareholders to have a say on what the officers of the company make in terms of salary, the owners having a say on pay. What could be more American and more free enterprise than that?

What it does allow is the board of directors to overrule the shareholders if they think that's appropriate. But we need to have the ownership of the company have a say on what their executives make so that it doesn't get out of line and that there is no back-scratching going on.

The second piece that my friends complain about and that the substitute is designed to gut is that the Federal banking regulators have a say on the commissions and the bonuses and the stock options that exist. And where we saw this most specifically was in mortgages. Lots of mortgages sold, lots of commissions made, lots of stock options went straight through the roof, but there was a time bomb in those

mortgages 4 or 5 years down the road that caused all those mortgages to fail and companies and banks to collapse.

We're not going to allow that anymore. We're not going to allow the taxpayer to be holding the bag the way we've had to hold the bag this last fall. It is a time for reasonable regulation to restore confidence in our financial system. That's what this bill does. The substitute amendment guts that.

I urge a "no" vote on the substitute and a "yes" vote on say-on-pay.

PARLIAMENTARY INQUIRY

Mr. GARRETT of New Jersey. Parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state his inquiry.

Mr. GARRETT of New Jersey. Can the Chair indicate how much time is remaining?

The SPEAKER pro tempore. All time for debate on the amendment has expired.

Does a Member seek unanimous consent to extend the debate?

Mr. GARRETT of New Jersey. Yes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

Mr. FRANK of Massachusetts. Let me reserve the right to object.

Members want to get out of here. I cannot be responsible for keeping Members here.

Apparently there is an effort—I don't think we ought to keep everybody in the dark about all this. There is apparently an effort to negotiate a unanimous consent agreement involving another bill, so they are asking us to delay this. I am perfectly willing to do this as long as people know it's not our fault. We were ready to get finished. There is a bipartisan leadership request that we wait another 10 minutes. I am perfectly prepared once people understand that, but I do think this kind of whisper-whisper, nobody will know is not a good way to go, so let's be honest about it.

The SPEAKER pro tempore. Without objection, debate will be extended by 5 minutes on each side of the aisle.

Mr. FRANK of Massachusetts. Mr. Speaker, I reserve my time. I have, at most, one further speaker.

Mr. GARRETT of New Jersey. I yield myself such time as I may consume.

I appreciate the gentleman from Massachusetts for working with the respective parties in order to ameliorate any situation that is going on outside of this area. And just as the gentleman says, it's nothing on your side of the aisle in the Chambers today at fault, and I guess we would say the same thing for those who are sitting here right now as well.

I left my last comments with the question of who do you trust and what do we need to do in order to address this situation. I will step back from that for a moment to look to the larger issue here that we are trying to uncover.

I commend the gentleman for the number of hearings that we have had over the last several weeks to try to delve into the various matters that dealt with the fiscal crisis we are currently facing in this country.

□ 1145

One of the takeaways, though, that I have had from those myriad of hearings that we have had is that the underlying concern of the Members of the House on both sides of the aisle is to try to get at the root cause of what was it that actually brought us to the current financial situation that we find in this country today.

We have heard a number of experts from think tanks, from Wall Street, from across the country expound upon where they believe what the underlying cause was. We have heard some who said it was with regard to GSEs, Fannie Mae and Freddie Mac, the fact that there was excessive leverage there allowed this to occur. There was someone who just spoke on the other side of the aisle who is in the chair right now who said that it was all due to deregulation, although I always raise the question whether or not they could cite those specific actions by Congress of deregulation other than the issue of Gramm-Leach-Bliley with regard to deregulation. And we have heard other areas as far as excesses both by government and Wall Street.

But through all those debates, I have yet to recall anyone who could provide any factual evidence, any factual proof, other than just their opinion, that the underlying cause was because of excessive pay by various corporations in this country. No one, certainly, brought up the idea that the problems that brought us here were due to excessive pay outside of the financial sector. So then we have to look at the underlying legislation and answer the question, what is it we are trying to get to here?

In the major portion of the legislation, which goes to allowing shareholders' rights to vote with regard to executive compensation outside of the financial sector, no evidence whatsoever that that brought us to the situation. So we ask why is that even in the underlying bill?

Now, we do try to attempt to reform it, inasmuch as that is all we can do at this point, by putting on a 3-year extension as opposed to a 1-year period of time. We also tried to reform their idea to say that States that have already looked into these issues should have the prerogative to continue with their legislation, that they are more knowledgeable, they have been more engaged, they follow the trends more in their States in their corporations in this area.

So we tried to reform and improve the legislation in that area as well. We also tried to reform it in a last way to say that, for those corporations that

say that we have looked at this situation, our shareholders have digested the information and realize it would not be to the benefit of the corporation or the shareholders themselves, and over two-thirds of those shareholders say that they do not want to engage in setting pay but rather would allow it to return to where it has always historically been in this country, and that is by management and by the directors, we put that in the legislation as well.

But, still, the underlying bill takes all those powers away from the shareholders, from the management, from the directors, and it does so without any evidence that they were at all a cause of the problem.

Now, section 4 does, arguably, go to financial institutions, and it goes to those institutions that, arguably, could be, some would say, a cause of our current situation. But we already had regulation in place for most of those financial institutions. We already had regulators who were supposed to be doing their job. We had regulators over at SEC with regard to the Madoff situation. And, unfortunately, we know all too well they failed in that job. Despite the fact that there was testimony that evidence was presented to them, handed to them, documenting why that Madoff situation was out there and why the SEC should be involved, the regulators missed it.

We saw it as well with regard to regulators missing it over at AIG as well. Those regulators had authority to regulate those institutions as well, but did they do so? No. They missed it completely with regard to the whole AIG situation.

Now, the other side of the aisle seems to say that that was then and this is now, that the same regulators who missed Madoff, the same regulators who missed AIG, the same regulators who missed executive compensation and other problems in the past, now, all of a sudden, we are going to expand it even further and say we are going to give those regulators even broader authority for financial institutions, however they may be defined in the future, because this bill realizes that it may be expanded further. They now entrust those regulators.

We would conclude that we should trust the shareholders, the American people, more than we should trust the bureaucrats.

The SPEAKER pro tempore. The gentleman's time has expired.

Mr. FRANK of Massachusetts. Mr. Speaker, I yield myself 5 minutes.

First of all, let me emphasize when the gentleman from New Jersey says "trust the shareholders," that's a conversion. We are born-again shareholder advocates, because in 2006 when the Republicans controlled this institution, they would not even on the Financial Services Committee allow it to come up. We had a petition under the rules

for a hearing. Then we asked for a markup and they refused it.

Then in 2007 the gentleman from Alabama, the gentleman from New Jersey, and the others, they all opposed say-on-pay. The gentleman from Alabama told us in 2007 that the free enterprise system was taking care of pay excess. He said that in March of 2007. All of the problems that we've had with pay in the interim apparently were figments of our imagination. The gentleman from Alabama had such confidence in the free enterprise system 2½ years ago, he told us they weren't going to happen. And say-on-pay now, oh, it's not a big deal. It was a big enough deal for them to oppose it.

By the way, let me say to the gentleman from New Jersey, here's the problem: No, it's not so much conscious acts of deregulation as nonregulation. What happened was new things grew up in the economy, particularly in the area of subprime mortgage and the way of packaging them and sending them around. And some of us in the minority wanted to change it. There were party differences.

In 2004 my friend from North Carolina (Mr. MILLER) who was here earlier, he spoke with people at the Center For Responsible Lending in North Carolina who told us in 2004 trouble was coming. By the way, trouble was coming because of an excessive encouragement of low-income people to buy homes, not from the CRA and not from liberal Democrats, but from the Bush administration. The gentleman from Texas (Mr. HENSARLING) inserted an amendment which we adopted. In 2002 the Bush administration sped this up. In 2004, over my objection among others, the Bush Administration directed Fannie Mae and Freddie Mac to substantially increase the number of subprime mortgages they were buying and for people below income. That's in the amendment that Mr. HENSARLING offered that we adopted.

And some of us saw the problem at that point. I hadn't seen a problem with Fannie Mae and Freddie Mac before, but I did in 2004 become worried. I joined the gentleman Mr. Oxley in trying to pass a bill, although I had a housing problem on the floor. The gentleman from Alabama voted with Mr. Oxley and many others did. Other Republicans thought Mr. Oxley was too soft, and we then got into an intra-Republican dispute on Fannie Mae and Freddie Mac where the House passed the bill, the House under the Republicans, supported by the overwhelming majority of Republicans, every amendment offering to toughen it up rejected by an overwhelming majority of Republicans.

And the Republican Senate had a difference. Ironically, the Democrats in the Senate agreed with Mr. Oxley. The Republicans in the Senate agreed with Mr. Bush. No bill.

We also tried, as I said, to do something about subprime lending. The gentleman from North Carolina pushed for legislation. The gentleman from Alabama, to his credit, was somewhat interested in working with us on it. But the Republicans were overruled by the then-majority leader, Mr. DeLay, who used the rhetoric we're hearing today: keep the bureaucrats out of it and let the free enterprise system do it. That was the prevailing philosophy of the Republicans who ruled this House in 2004 and 2005.

So when some of us, including the gentleman from Alabama (Mr. BACHUS), tried to work on legislation to restrict subprime lending, Mr. BACHUS was even chairman of the subcommittee, and he was overruled. The chairman of the committee, Mr. Oxley, was told, No, we don't do that. We're Republicans. We believe in free enterprise.

So it was a conscious decision not to do anything about—

Mr. LEWIS of California. Will the gentleman yield?

Mr. FRANK of Massachusetts. I yield to the gentleman from California.

Mr. LEWIS of California. I wish the gentleman would start over. I'm finding it difficult to understand your very rapid speech. Will you slow down a little bit?

Mr. FRANK of Massachusetts. No, I tell you, to the gentleman from California, he's going to have to speed up. I'm not going to slow down. But if he waits a couple of days, there's a very competent transcriber here. He'll be able to read it, and maybe we can even get it put into large type for the gentleman from California.

And now, the gentleman's having tried to interrupt me because that's what people do when they don't like what you're saying, I will return to the tale of how the Republicans told us not to do subprime lending. And we had legislation working. If we had been able in 2005 to get that legislation done, we could have retarded the depths of the crisis. So, yes, there were regulators who didn't do their job, but there were conscious decisions not to regulate.

There was a bill passed, by the way, in 1994 by a Democratic Congress, replaced in 1995 by a Republican Congress, which gave the Federal Reserve the authority to regulate mortgages of the kind that caused trouble. Alan Greenspan, supported by the Republicans in Congress, refused to use that authority. It was when he continued to refuse that some of us tried to do something. So, yes, that's where we got this, because a Republican commitment to never doing anything of the sort that they are talking about now that let subprime mortgages flourish.

The SPEAKER pro tempore. All time has expired.

Pursuant to House Resolution 697, the previous question is ordered on the

bill, as amended, and on the amendment in the nature of a substitute printed in House Report 111-237 offered by the gentleman from New Jersey (Mr. GARRETT).

The question is on the amendment offered by the gentleman from New Jersey (Mr. GARRETT).

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

RECORDED VOTE

Mr. GARRETT of New Jersey. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The SPEAKER pro tempore. Pursuant to House Resolution 697, further proceedings on this question will be postponed.

Pursuant to clause 1(c) of rule XIX, further proceedings on the bill will be postponed.

□ 1200

PARLIAMENTARY INQUIRY

Mr. FRANK of Massachusetts. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. FRANK of Massachusetts. Is there some way that I can convey to the membership that this incredible intrusion on their time is in no way the responsibility of the Financial Services Committee, that we are ready to go to a vote and we are as much the victim as anybody else of this—whatever it is?

The SPEAKER pro tempore. The gentleman may seek time to address the body.

Mr. FRANK of Massachusetts. Well, I don't want to inflict further excess on the body.

SUPPLEMENTAL APPROPRIATIONS, FISCAL YEAR 2009

Mr. PERLMUTTER. Mr. Speaker, I ask unanimous consent that the Speaker be authorized on this legislative day to entertain a motion to suspend the rules relating to H.R. 3435.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Colorado?

There was no objection.

Mr. OBEY. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3435) making supplemental appropriations for fiscal year 2009 for the Consumer Assistance to Recycle and Save Program.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 3435

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the fiscal year ending September 30, 2009, and for other purposes, namely:

DEPARTMENT OF TRANSPORTATION NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION

CONSUMER ASSISTANCE TO RECYCLE AND SAVE PROGRAM

(TRANSFER OF FUNDS)

For an additional amount for "Consumer Assistance to Recycle and Save Program" to carry out the Consumer Assistance to Recycle and Save Program established by the Consumer Assistance to Recycle and Save Act of 2009 (title XIII of Public Law 111-32), not to exceed \$2,000,000,000, to remain available until September 30, 2010: *Provided*, That such amount shall be available for such purpose only to the extent directed by the President, and shall be derived by transfer from the amount made available for "Department of Energy—Energy Programs—Title 17—Innovative Technology Loan Guarantee Program" in title IV of division A of the American Recovery and Reinvestment Act of 2009 (Public Law 111-5): *Provided further*, That the amount under this heading is designated as an emergency requirement and necessary to meet emergency needs pursuant to sections 403 and 423(b) of S. Con. Res. 13 (111th Congress), the concurrent resolution on the budget for fiscal year 2010.

SEC. 2. Section 1302(g) of Public Law 111-32 is amended by inserting the following new paragraph:

(3) REVIEW OF ADMINISTRATION OF THE PROGRAM BY GOVERNMENT ACCOUNTABILITY OFFICE AND INSPECTOR GENERAL. Not later than 180 days after the termination date described in subsection (c)(1)(A), the Government Accountability Office and the Inspector General of the Department of Transportation shall submit reports to the Committee on Energy and Commerce of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate reviewing the administration of the program.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Wisconsin (Mr. OBEY) and the gentleman from California (Mr. LEWIS) each will control 20 minutes.

The Chair recognizes the gentleman from Wisconsin.

GENERAL LEAVE

Mr. OBEY. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days to revise and extend their remarks on H.R. 3435.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. OBEY. Mr. Speaker, I yield myself 3 minutes.

Mr. Speaker, late yesterday, it came to our attention that the cash for clunkers program, which went active just a few days ago, has proven even more wildly popular than its strongest supporters had predicted.

Just last month, Congress passed the program, which provided up to \$4,500 if you trade in your old gas guzzler for a new car that gets better mileage. That was done in the hopes of spurring some new car sales and encouraging people to be a little more environmentally friendly. We provided \$1 billion in the supplemental to get it going, enough for about 250,000 sales.

The program kicked off Monday, and it has already officially received 40,000 requests for reimbursement, worth about \$160 million in rebates. A survey done by the National Automobile Dealers Association this week suggested that at least 200,000 deals have been completed but not yet officially submitted. If that is true, and we are being told it probably is, then the entire \$1 billion is just about exhausted. So we have before us a bill to provide stopgap funding for cash for clunkers by allowing the administration to transfer up to \$2 billion from the Department of Energy's Innovative Technology Loan Guarantee program, which doesn't expect to award funding until late next year.

Some would call this letting the markets work. Consumers have spoken with their wallets, and they are saying they like this program; and clearly it is doing what it was intended to do, to spur car sales in this sluggish economy.

□ 1215

This action will keep it going, hopefully; and I would urge support for the bill.

I reserve the balance of my time.

Mr. LEWIS of California. Mr. Speaker, I rise to point out the absurdity of the situation we find ourselves in today. In the majority's haste to slam legislation through the floor with almost no consideration at the committee level, with no time for consideration by the House membership in general, and with absolutely no ability for the Members of this body to amend bills on the floor, we are now seeing the effects of such shortsighted martial law tactics.

Mr. Speaker, the Cash for Clunkers program was passed on the suspension calendar so no Members were able to offer amendments. The Senate had a comparable bill with some significant differences. The House and Senate bills should have gone to full and open conference so those differences could have been negotiated and a conference report then brought for a vote. Instead, the leadership of this body, without consultation or negotiation, stuck the House version of Cash for Clunkers on what was supposed to be a, quote, clean war supplemental, a bill only for the purpose of funding and supporting our troops and our efforts overseas in the war on terror. They had to do that because of the mess the majority created of the conferenced bill, and I use that term loosely, as most of the funding levels and programs were determined not in a conference but by the House leadership and by my chairman. But when it came to counting votes, the leadership and the chairman had to do some dancing and started loading up the war supplemental with extraneous and unrelated items, all of which needed to get more votes. Cash for Clunkers was one of those items.

My colleagues in the Senate, Senator FEINSTEIN, in particular, and Senator COLLINS, had some serious concerns with the House bill. Senator FEINSTEIN tried to negotiate some changes to improve the program but was rebuffed, as I understand it, by my chairman. Basically they were told that it was his way or the highway. Here we are today—not one hearing on the Cash for Clunkers program in the Appropriations Committee, not one hearing on the needs of the program prior to receiving funds, not one hearing on how the first billion dollars has been spent, not one hearing on how much money the program will need to get through the fiscal year. Instead, we find ourselves on the suspension calendar for the second time in 3 days, bailing out another program, shoveling another \$2 billion out the door this fiscal year after we've shoveled \$14 billion out the door to bail out the highway programs and other related items.

My colleagues are going to pat themselves on the back for finding an offset for this transfer; and for that I say two things: first, you should have been finding ways to offset spending all year; second, if there was an extra \$2 billion in the stimulus program that was suitable for a different purpose, why did we spend the \$2 billion in the first place? How many other billions of dollars are in the stimulus not being spent that we can return to our taxpayers?

Now many of my colleagues will say, This is a great program, and it is necessary for the revitalization of the economy and the car industry. I'm not really going to argue with those goals. Those are good goals, and we are looking for solutions. However, are we sure this program is working like it's supposed to? I don't think so. How is it that we didn't hear of this funding problem until last night? And even then we were told there was roughly 24 hours before they were going to shut down the program. This program has only been up and running 1 week. If that is how the government is going to handle billion-dollar programs affecting all Americans, I ask, Whatever will we do if the administration takes control of our health care system? I quote one car dealer from New York: "If they can't administer a program like this, I'd be a little concerned about my health insurance." I say, amen.

I reserve the balance of my time.

Mr. OBEY. Mr. Speaker, I yield myself 30 seconds.

I'm not going to give any political speeches. We are simply trying to react to one program that the public has latched onto. The demand for this was so great that within 3 days of its inception, the funds were, apparently, totally used up. That indicates that we need to do something if we don't want the program to shut down 3 days after it begins. That's what we're trying to do today.

With that, I yield 2 minutes to the distinguished gentleman from New York (Mr. ISRAEL).

Mr. ISRAEL. I thank the distinguished chairman for the time.

Mr. Speaker, I was one of the original sponsors of the Cash for Clunkers bill. Many of us knew that it would work well. Few of us realized how well it would work. This program has been truly stimulative. Lots of people are questioning whether the Congress has passed anything that is stimulating the economy. This program has stimulated the economy. We have doubled car sales over the past 5 days. This is truly stimulative. It is creating jobs. It is creating a surge for car dealers. The American consumer is satisfied with it, and we need to continue it. The American consumer has taken Cash for Clunkers on a test drive, and they want to continue driving Cash for Clunkers. They want to continue this program. In fact, not only should we continue it over the next 6 weeks by providing emergency funding, but we ought to improve it when we return in September. We should improve it by increasing the efficiency standards. We should improve it by making used cars eligible for the program. We should improve it through a long-term program because we have learned that the short-term program was so successful that we have exhausted the funds in only 5 days. This is an example of a bipartisan program that makes sense. We need to create a bridge of funding for the next 6 weeks, come back and extend it and improve it into the future.

Mr. LEWIS of California. Mr. Speaker, I yield 3 minutes to the gentlelady from Michigan (Mrs. MILLER).

Mrs. MILLER of Michigan. I thank the gentleman for yielding.

Mr. Speaker, I was very proud to be the Republican lead sponsor of the original legislation that we passed a number of months ago. Cash for Clunkers—what a fantastic success. This program has exceeded everybody's expectations; and now most of the naysayers are even admitting that it's the best \$1 billion in economic stimulus funds that the Federal Government has ever spent.

Here are a couple of today's quotes from those who are directly impacted. First of all, the CEO of one of our Nation's largest auto groups said, "The most brilliantly conceived and most effective economic stimulus program ever put forward by the Federal Government."

Ford Motor Company says, "Huge success."

This Congress appropriated \$1 billion or November 1, whatever came first, and only several days into the program, we need more cash for the Cash for Clunkers. We can just think about the tremendous economic multiplier effect this is having. It is good for the auto dealers; it is good for the auto

manufacturers; it is good for the suppliers; it is good for workers; it is good for the States, Mr. Speaker. Think about all of the revenue that is being generated by sales tax and licensing fees as well for this program. It is good for the environment. It's getting all of these old vehicles off the road, and it's absolutely great for consumers.

Let me just read quickly. Here's one letter I got from a lady in Dearborn Heights, Michigan:

Thank you for pushing through and helping to develop the Cash for Clunkers legislation. I am now the happy owner of an American-made 2010 Ford Fusion that I will be picking up on July 30. It has been 12 years since I have been able to purchase a new vehicle. I was able to save over \$7,000, before tax, on my Ford Fusion. My old vehicle was a 1995 Ford Windstar with 150,000 miles."

She says, "I'm so excited for me."

Well, we're excited too.

Mr. Speaker, throughout our Nation's history—since we've had the automobile, actually—it has been automobile sales that have literally pulled our Nation out of recession; and this time it's going to be the same. I think we are seeing ourselves being placed on the road to economic recovery here, and this road is paved by the Cash for Clunkers program.

I actually wrote a letter at the beginning of this week to the Speaker and to the House leadership, saying that we were going to run out of money, that we were going to need some more money for this program. Here we are on Friday of the first week. We absolutely need to do this, Mr. Speaker. We cannot leave for our August recess until we vote for this reprogramming of unspent economic stimulus funds for this program. We need to do it.

One other thing, for those who keep saying that we need to get the government out of the automobile business, if you really want to get the government out of the pocket of General Motors or whatever, this is the way to do it, Mr. Speaker. I would urge my colleagues to support this bill. It is very, very important not just for the State of Michigan, this is a national economic program, the best thing we've ever done. More cash for Cash for Clunkers.

Mr. OBEY. Mr. Speaker, I yield 1¾ minutes to the gentleman from Michigan (Mr. LEVIN).

Mr. LEVIN. The public has spoken. Consumers have been going to dealerships. The White House is now active, and the issue is whether this House will respond. As I see it, and I think the public will see it, this is a test of whether Congress can shed its disagreements on other issues and respond to what the public, indeed, wants. The rush to use this program shows its need.

I say to the gentleman from California and anybody else, what else do

we need to see? This program is working. The White House has made clear that the dealers can go forward. This program is open until further notice, and dealers are urged not to rush too much but to do it right in the first place and get in line. So it's open until further notice. The question is whether this institution will shut it down or whether it will continue to open up the valves. It will be good for everybody. It will be good for the national economy. This isn't just an issue for Michigan, Ohio, Wisconsin, Indiana and Illinois but for the whole Nation. This is an issue of our national economic recovery, and anyone who votes "no" on this is saying "no" to an important boost to our economy at a critical time.

Mr. LEWIS of California. Mr. Speaker, I am proud to yield 2 minutes to the gentleman from Michigan (Mr. UPTON), the cochairman of the bipartisan Auto Caucus.

Mr. UPTON. I thank my friend from California.

I'm from the great State of Michigan where our unemployment is, sadly, at 15.2 percent, almost twice the national average. Last night we learned from the National Association of Auto Dealers that, in fact, in just 3 days this program has brought about almost a quarter of a million new car sales, yet the cash is going to run out literally in the next couple of days without an infusion. It's important that we're not taking new money. This is existing money. This bill moves existing money from other accounts, so it will not add to this year's deficit, but it is going to run out without this legislation.

Here is today's USA Today, a full page ad by Chrysler-Dodge-Jeep, \$4,500 back if you purchase a new vehicle, turn in your old one, and get something that's at least 10 miles per gallon better. A lot of our auto dealers can do it, whether it's the Big Three or the transplants too. Nationwide, one in 10 jobs are auto-related. In Michigan it's about one in four, one in five jobs. For the last 3 years, auto sales have declined by nearly 50 percent. There are 16 other countries that have done this. Whether it be Germany, South Korea, even Slovakia has done this. In all of those 16 countries, car sales have come back. This country lost one in five manufacturing jobs in the last 16 months. If we want to keep jobs here in this country, bring back some of those that we have lost, obviously it's got to be in the auto sector where 1 in 10 jobs are auto-related. This bill sends those dominos the other way. It brings people back in the showroom. We've demonstrated that just this week. It brings back the call orders. We've heard from a number of dealers across Michigan that they're, frankly, running out of cars. Guess what they're going to do—they're going to order them back, and that's going to bring people back to work.

Let me just end on this, wouldn't you rather have people working and paying taxes than being unemployed and receiving benefits which, in Michigan, are becoming exhausted? I ask my colleagues to vote for this bill.

□ 1230

Mr. OBEY. Mr. Speaker, I yield 1½ minutes to the distinguished gentleman from Michigan (Mr. DINGELL).

Mr. DINGELL. Mr. Speaker, I rise to commend the leadership and to commend my dear friend, the chairman of the Appropriations Committee, for his extraordinary leadership on this matter.

The success of the CARS program in just a few short days has been extraordinary. The program has been doing so well, in fact, that the initial \$1 billion allocated for the program is already running low. This is a great problem to have in the midst of all the difficulties that we confront. It's a sign that the program is not only working well and the consumers are very interested, but it's also proving that CARS is providing a jolt, a meaningful upward jolt to our economic recovery efforts.

This is a simple extension. It's an infusion of money in an area where it's needed and where it's working, and the legislation should not get bogged down by calls for changing the program. That would only serve to stall the extension and confuse consumers.

We cannot and should not make changes in an extraordinarily successful program that has only been operating for a week. That would be irresponsible. I would add that the additional \$2 billion for the program has already been appropriated under ARRA and will not cost the taxpayers an additional dime.

I urge passage of the bill. I commend the leadership, and I thank my dear friend, the chairman of the committee, and the other members of the committee who have made it possible for us to consider this legislation so fast.

Mr. LEWIS of California. Mr. Speaker, I yield 2 minutes to the gentleman from Texas (Mr. HENSARLING).

Mr. HENSARLING. Cash for Clunkers, Mr. Speaker, obviously it's a popular program. It's a clever title. It pays people several thousand dollars to trade in their old cars if they will buy new cars. And yes, Mr. Speaker, people are hurting in the auto industry. There's no doubt about it. But I would also note that the taxpayers are hurting. \$80 billion to Chrysler and GM. And the auto industry does not have a monopoly on hard times in this economy.

Recently, one of the largest poultry producers in America, Pilgrims Pride, just a few miles outside of my congressional district, they had to declare Chapter 11. Maybe we should have a Cash for Clunkers program and pay people to eat chicken. Then after that,

we can have a program to pay people to buy TVs, and then a program to pay people to buy lumber. It would pass the test. It has a clever title. It would help a large industry. It would put free money in the hands of consumers.

But this is not a humorous affair, Mr. Speaker, and it's not humorous because this is an extension of a program that has the government picking winners and losers. Why is the auto industry the winner? Why is the poultry industry the loser? This is one more step in enshrining us as a bailout Nation.

Now, people say, Well, it's \$2 billion that's coming out of the stimulus program. Well, I would tell my distinguished colleagues that that is still \$2 billion that has to be borrowed from the Chinese, with the bill sent to our children and grandchildren, at a time when the deficit has hit \$1 trillion for the first time in history. You cannot bail out, borrow and spend your way into economic prosperity. Instead, let's unleash the spirit of entrepreneurial capitalism. Let's help small businesses with tax relief. Let's grow our way out of this economic recession.

Mr. OBEY. I yield 1½ minutes to the distinguished gentleman from Michigan (Mr. KILDEE).

Mr. KILDEE. Mr. Speaker, when we passed the Cash for Clunkers legislation last month, I said it would provide a much needed boost to our auto industry and our manufacturing communities. After just 1 week, we see the great success of this program. I've been working closely with the White House, the auto task force and my Congressional colleagues to add additional funds to the program to keep it up and running. This program has been an unprecedented success, and there are no plans to suspend it. This program is a successful example of economic stimulus at work.

To continue this positive program, I join my colleagues today to introduce legislation to redirect \$2 billion from the economic stimulus bill to the Cash for Clunkers program. We are poised to pass this legislation through the House of Representatives today, and I urge my Senate colleagues to do the same as quickly as possible.

Mr. LEWIS of California. I yield, Mr. Speaker, 2 minutes to the gentleman from Michigan (Mr. HOEKSTRA).

Mr. HOEKSTRA. Mr. Speaker, I would like to begin by thanking the chairman of the committee and the ranking member of the Appropriations Committee for moving so expeditiously and getting this bill to the floor of the House this afternoon. The response from consumers to this program has been, as one of my dealers described it this week, he had chaos in his showroom. It accomplished what we wanted it to accomplish.

I was skeptical when this program passed a while back, but it has delivered customers into the showroom and

they are buying cars. And being from Michigan and experiencing a 15.2 percent unemployment rate, this is not going to only provide opportunities for employment in the people that assemble cars, but also for the suppliers and those types of things. And hopefully this can be a catalyst for a stronger economic recovery. It appears to be one of the programs in the stimulus packages that have passed this House that actually appears to be working.

At the same time, while we are maybe euphoric about the parts of the program that are working, I think we also have to recognize that the back end of this program, the parts that are being handled by the Federal Government, have been a disaster for our dealers. I have yet to have one dealer who has sold a car that has gotten it approved by the Department of Transportation. The Federal Government can't process a simple rebate.

I've got dealers that have submitted the paperwork three times and have gotten three rejections. The last one came back and it said, No reason for rejection. What is a dealer supposed to do? They've already destroyed the cars that have been traded in. They have sold the car. They're now on the hook and expecting a check for \$3,500 to \$4,500 from the Federal Government and they're not getting it.

We need to get these backroom problems fixed to be able to call this program truly successful. It can't just be the front end. It has to be the entire process, from selling it to the customer to the dealer getting the money from the Federal Government. That all has to work seamlessly for this program to be an unqualified success.

Mr. OBEY. Mr. Speaker, I yield 1 minute and 45 seconds to the gentleman from Ohio (Ms. SUTTON).

Ms. SUTTON. Mr. Speaker, I rise today in support of this legislation that's going to provide an additional \$2 billion for the CARS Act, a bill that I sponsored, sometimes referred to as Cash for Clunkers. But by any name, this bill has been, thus far, a tremendous success.

It has helped consumers purchase cars that they couldn't have purchased in this economic downturn perhaps but which they needed. It's going to give them cars and fuel savings for a long time to come. It's helping our auto companies, our auto dealers, all of the jobs associated with that very vital and important industry in this country, to maintain itself, to continue and give it the chance to grow and restore.

The program also, of course, is good for our environment because it's taking out those less fuel-efficient cars and getting them off the road and replacing them with more fuel-efficient cars.

This is an unprecedented success, and my colleague is right. We must make sure that it works throughout the en-

tire process. But we are well on our way, and I appreciate the leadership of the chairman of the Appropriations Committee, Secretary LaHood, the administration, who I've been working very closely with to make sure that we build on this success which is stimulating our economy, keeping people working, helping our environment, and helping our consumers when they really, really need it.

Mr. LEWIS of California. Mr. Speaker, I would like to say to the gentleman who authored this bill, she has more influence with the Appropriations chairman than most people around here. He just picked that up for her and moved it along, expedited the process.

I am proud to yield 2 minutes to the gentleman from California (Mr. CAMPBELL).

Mr. CAMPBELL. Mr. Speaker, the Cash for Clunkers program was inartfully drafted. It is more complex and cumbersome than it needs to be. The administration of it is not going very well at all, but it has worked. And, Mr. Speaker, we have passed a number of things in this Congress this year intended to stimulate the economy. The vast majority of them have not had that effect, but this one has, and it has clearly worked.

For the initial \$1 billion to be exhausted, that means that roughly 250,000 new vehicles must have been sold in just the last week or two in order to exhaust all of that money. That is clearing inventories in car dealerships, which means car dealers will be ordering more cars.

When they order more cars, plants will begin to run again. Plants will open up. They will be producing more cars, and people will go back to work. There will be suppliers that will produce supplies, various parts for those cars, steel mills producing for those cars, and those people will go back to work. There will be trucks and trains that deliver those cars, and those people will go back to work.

And Mr. Speaker, the \$2 billion for this is coming out of the existing funding, so it is not increasing the debt or the deficit any more than what has already been there.

Mr. Speaker, I support this bill. I support this effort. It is the one thing that we have done here in this Congress that is absolutely working. It is stimulating the economy. It is creating jobs, and we want it to create more.

Mr. OBEY. I yield 1½ minutes to the distinguished gentleman from Massachusetts (Mr. MARKEY).

Mr. MARKEY of Massachusetts. I thank the chairman very much, and I very much appreciate your very hard work on extending this program.

This program is a win for consumers who are trading in old gas guzzlers for new hybrids, a win for the recovering economy, and a win for energy independence and the environment as the

new vehicles are averaging 60 percent more fuel efficiency than the junkers being taken off the road.

However, I am concerned that we are taking funding from the Renewable Energy Loan Guarantee Program and would express my strong belief that we must find a way of replenishing those funds as soon as possible.

Mr. Chairman, could you work with me and other Members to ensure that the funds for this program will be replenished?

Mr. OBEY. If the gentleman would yield, I share the gentleman's view that the Renewable Energy Loan Guarantee Program is of vital importance to creating a new, green economy. We have talked with the White House. We have talked with the Speaker, and I want to assure you that all of us certainly have every intention of restoring these funds.

Mr. MARKEY of Massachusetts. I thank the chairman very much. I know that this has always been the highest priority for yourself, for Speaker PELOSI, and for the Obama administration, and I look forward to working with you in the future in order to make sure that we have a win-win here for renewable energy and for our fuel-efficient vehicles.

Mr. LEWIS of California. Mr. Speaker, I yield 2 minutes to the gentleman from Arizona (Mr. FLAKE).

Mr. FLAKE. I thank the gentleman for yielding, and I won't take 2 minutes.

I just want to say, I thought I'd heard it all until I came to the floor today. Somebody said earlier, this bill's a success. Ford Motor Company loves it. I think that that's self-evident. But I think that there are taxpayers around the country who are wondering why we're taking \$2 billion more from them to decide which industry here is going to get a break.

We decided to give out free money, and now we're surprised when people take advantage of it and love the program. I mean, that's the nature of human nature. If you're given free money, you like it and you want more. And that's what this program is. Why are we deciding to aid this sector and not another?

If you're Mr. or Mrs. Businessman across the country, you've got to be wondering if we have lost our minds here by saying that we're going to continue to give out more money just for this industry but not help the others. I don't understand this process and how we can bring this up this quickly. But an Appropriation Committee that can bring a Defense bill to the floor in 18 minutes for a markup that has more than 1,100 earmarks, I guess, has no problem doing this.

Mr. OBEY. Mr. Speaker, I yield myself 20 seconds.

I just want to say, Mr. Speaker, that what we have heard several times here

today about this action are complaints from the people who helped wreck America's economy and are now complaining because of the way this President and this Congress are trying to pull the country out of the ditch and restore economic growth. We've come to expect that, but that doesn't make it any more pleasant.

I yield 1 minute to the distinguished Speaker of the House.

□ 1245

Ms. PELOSI. Mr. Speaker, I thank the gentleman for yielding, and I thank him for his very important and swift action to address the opportunity that was given to us this week.

As you know, my colleagues, as part of the supplemental earlier this year, the Cash for Clunkers provision was provided in it. Many people had worked very, very hard on that for a long time, and we were able to have it pass on a bill that was going to be signed by the President.

I want to acknowledge Congresswoman SUTTON for her enthusiastic support and leadership; Congressman INSLEE and Congressman ISRAEL of New York, who all worked very hard on this; certainly the chairman emeritus of the Energy and Commerce Committee, Mr. DINGELL; the current chairman, Mr. WAXMAN; and Mr. MARKEY as Chair of the Select Committee on Global Warming for his leadership on this issue for a long period of time.

I mention all of them because this brings together so many elements of what we want to do to grow our economy, to help our workers, to protect our environment, and to do so in a very focused way that works, and that's what is interesting about this week.

In about 6 days, it is estimated that 250,000 cars were sold. On both sides of the aisle, people acknowledge the effectiveness of this initiative, and that is why yesterday—and as we were seeing what was happening this week—the Obama administration asked us to help consumers who have yet to have the opportunity to take advantage of trading in their old cars for new energy-efficient models. When they do that, again, they strengthen the auto industry, strengthen our economy at large and help preserve our environment.

What's interesting about it, and the point that has been made by many speakers already, is just that everything has performed beyond the requirements of the bill. The cars that have been purchased are much more fuel-efficient and the emissions standard much better than the bill even required, and that's good news.

I do share the concern that has been put forth by Mr. MARKEY—and I don't know if Mr. INSLEE has yet, but he will—about the source of the revenue, and that is the Innovative Technologies Loan Guarantee Program.

In the recovery package in January, we voted for a \$6 billion initiative. It

was very important to have it at that level, and it's very important in terms of our renewables program—\$6 billion—but the administration has just released a solicitation for about half of that money, for \$3 billion in loans for renewable energy. The rest of the money would not be released until next year, until after January. So that gave us an opportunity, for the time being, to use \$2 billion of that for this Cash for Clunkers expansion.

Again, I am concerned about the fact that that money is taken from that account, but it has not cost any opportunities for the program, because the timing is such that that money would be spent next year.

I do hope, whether it's in the continuing resolution or some other step along the way, that those funds will be restored, because it's not appropriate for us to take money to do one thing for fuel efficiency out of an account that is designed to do just that in looking into the future with further innovation. So I share the concerns expressed by Mr. MARKEY, and I appreciate the comments made by Mr. OBEY in the colloquy that they had about restoring those funds.

But, again, I think this is a pretty exciting day. As I said, we got the word just as this news was unfolding this week. Yesterday, it was determined that we could go forward. The Rules Committee under Congresswoman SLAUGHTER responded very positively. The chairman of the Appropriations Committee, Mr. OBEY, has been trying to find solutions for us, and the leadership of the Republican Party has been very cooperative in how we could bring the bill to the floor.

So this is a very positive, bipartisan initiative to help our auto industry, to help consumers grow our economy and to do it in an environmentally sound way. I think it is the perfect message for us to take home for August.

Thank you all for your leadership in making this possible.

Mr. LEWIS of California. Mr. Speaker, may I inquire of the time remaining on both sides?

The SPEAKER pro tempore. The gentleman from California has 4 minutes remaining, and the gentleman from Wisconsin has 7¼ minutes remaining.

Mr. LEWIS of California. Mr. Speaker, I yield 1 minute to the gentleman from Georgia (Mr. BROWN).

Mr. BROWN of Georgia. I thank my friend from California for yielding.

Mr. Speaker, Cash for Clunkers has serious problems that are administrative problems. I have dealers in my district in northeast Georgia who probably are going to go bankrupt because of these problems. I hope, as we go forward, that we'll fix these administrative snafus that are in this problem.

We're throwing money into another government program that has very serious problems where dealers can't get

their money. I have one dealer who has paid out of his pocket for 50 cars but has only gotten money back for one. Now, that dealer, if he doesn't get paid back, is going to have very severe financial problems, and his employees are going to be put out of work if we don't fix this.

Certainly, we've sold a lot of cars because of this program, but just throwing money into a program that has tremendous administrative, red tape problems and other problems is not going to be the long-term answer. I hope that the administration will straighten out these administration snafus and will get the money to our dealers, money that they desperately need.

Mr. OBEY. I yield 1 minute to the distinguished gentleman from New York (Mr. MAFFEI).

Mr. MAFFEI. Mr. Speaker, today, we are faced with a rare problem. We have a program that has proven to be working, and all we need to do is to keep it working. Getting gas-guzzling vehicles off the road and replaced with new fuel-efficient vehicles is helping our environment. It is putting money directly into the pockets of middle-income families. It is a ray of hope for auto dealers in this country, a ray of hope for the U.S. auto industry and a ray of hope for our economy.

Finally we have a bailout, not for the big businesses, not for Wall Street, but a bailout for Main Street.

As the lead sponsor of a bill to help protect the legal rights of auto dealers, I can tell you this is a godsend for the auto dealers in my district. Don't stall what's working. Give it a fill-up, and let's get Cash for Clunkers back on the road.

Mr. LEWIS of California. Mr. Speaker, I will be the last speaker on our side, so I reserve the balance of my time.

Mr. OBEY. Mr. Speaker, I yield 1 minute to the gentleman from Michigan (Mr. SCHAUER).

Mr. SCHAUER. Thank you, Mr. Chairman. Thank you for your quick leadership on such an important issue.

When I ran for Congress—and I'm from Michigan—I pledged that I would fight every day for people in businesses in my community who are being hurt by a brutal economy. The Cash for Clunkers program has breathed life into a very difficult economy in communities all around my district. Here is why this is important:

I've talked to car dealers in my district. They can't keep cars on the lots. They will be ordering new cars from manufacturers in my State and from around the country. Suppliers who supply parts for those cars will be manufacturing more of them. This is very, very critical, and it has been very effective in turning around our economy in just a matter of days.

Mr. Chairman, thank you for giving us the opportunity to continue this

program and to continue to turn our economy around.

Mr. LEWIS of California. Mr. Speaker, I continue to reserve the balance of my time.

Mr. OBEY. I yield 1 minute to the gentleman from Washington (Mr. INSLEE).

Mr. INSLEE. Mr. Speaker, I want to just make a point that this program has been spectacularly successful from an environmental perspective. It was originally criticized that we did not call for high enough efficiency improvement in these cars. The people have fixed this problem for us. We are seeing average increases of efficiency of 60 percent—well, well above what was required by Congress.

For one car company, 78 percent of the cars that they're buying are over 30 miles a gallon and 39 percent above 30 miles per gallon. The American people have seen spectacular improvements in efficiency and in environmental performance.

I want to thank the Speaker and Mr. OBEY for essentially assuring us—I'll take it as that, almost—that we, in fact, are going to replace this money. I hope it is in the CR. It is necessary to achieve our efficiency goals.

Mr. LEWIS of California. Mr. Speaker, I continue to reserve the balance of my time.

Mr. OBEY. Mr. Speaker, I yield 30 seconds to the gentleman from Indiana (Mr. DONNELLY).

Mr. DONNELLY of Indiana. Mr. Speaker, I want to thank the chairman for bringing this bill to the floor. This program has been an enormous success. It's good for our environment to have cars with better mileage. It's good for our families, who get to save some money when they make these big purchases. It's also very, very good for the workers of Indiana, who are back to work, building these cars.

This is a win-win-win for our country. It's one of the great programs to create jobs, to help our environment and to help our families. We're very supportive, and we want to thank the chairman for bringing this program forward.

Mr. LEWIS of California. Mr. Speaker, it should be noted that the Speaker, when she was presenting her views to the membership, indicated that, one way or another, she'd find a way to get this money back into the bill somewhere down the line. Between now and then, it's pretty obvious that this bill could not have been on the floor today if it had not been for an emergency designation that would allow us to exercise ourselves in this fashion.

I would remind ourselves one more time of the quote received from a car dealer in New York. Speaking of us, about how this bill was handled, he said, If they can't administer a program like this, I'd be a little concerned about my health insurance.

With that, I join the gentleman one more time in saying, "Amen."

I yield back the balance of my time.

Mr. OBEY. I yield myself the remainder of the time.

Mr. Speaker, today, the Commerce Department just issued figures which have indicated that the depth of the recession in the last quarter of last year was much more severe than anyone had estimated. This is the good news part of the day: They also tell us that, in the first quarter of this year, the shrinkage of the economy has now slowed considerably, which is a very hopeful sign, because the economy, evidently, performed significantly better than most of the economic experts had thought it would perform. We all welcome that news, but as you know, that is not good enough. We need to see more progress. Our dilemma is this:

Ordinarily in a recession, when the country is losing jobs, the Federal Reserve lowers interest rates, and that helps the housing industry to move ahead. It helps the auto industry to sell cars. Our economy is normally led out of the recession by the housing industry and by the auto industry. This time around, the situation is very different, because those two sectors have been basket cases for the past year and a half.

The first glimmer of hope we've seen in the auto industry is the news that we received yesterday from the Secretary of Transportation, Mr. LAHOOD, who informed us that, in just 3 days' time, when the program was started, as far as they can tell, it's already oversubscribed. That means the consumers like this program; it means they are reacting to it, and it means that it would be irresponsible of us not to try to prevent the shutdown of this program just 3 days after it began.

So we're here, trying to take advantage of one of the few bright spots in the economy to help move the economy forward. We still have a long way to go before good news shows up on the unemployment side of the ledger, but we'll take every bit of good news we can. Today, I think this is one piece of good news, and I think we need to respond to it.

Mr. LEWIS of California. Would the gentleman yield?

Mr. OBEY. I would be happy to yield very briefly to my friend.

Mr. LEWIS of California. I just want to say, Mr. Chairman, that, for some reason or another, the gentleman who is our Speaker pro tempore has drawn the short end of the stick this week. He has been doing wonderful work in moving the process along, and I think the body should recognize his work.

Mr. OBEY. I thank the gentleman.

Mr. Speaker, I would ask for an "aye" vote.

Mr. BLUMENAUER. Mr. Speaker, while I strongly support the "cash for clunkers" concept, I voted against this legislation to provide

the program with infusion of cash. The bill that was rushed to the Floor today tripled the program without any discussion of how it's working administratively or why the money ran out so quickly. I'm concerned that rushing ahead without better understanding these issues will create additional problems in the future. In addition, by bringing this legislation to the Floor so quickly, we have missed an opportunity to make improvements to the program.

Cash for clunkers is a much better approach to help both consumers and the auto industry than simply bailing out the automakers by throwing money at them. With this program we are not only helping them to modernize their fleet, but we are taking some of the dirtiest, most polluting cars off the road.

The fact that the program ran out of money within the course of a few days shows its popularity and its potential to help rescue and transform our nation's automakers. Consumers have clearly demonstrated that they want to purchase more fuel efficient vehicles. Action to extend the program would have been a good opportunity to strengthen and better target the provisions so they do more to improve fuel efficiency, reduce vehicle emissions and reduce our dependence on foreign oil.

I am also concerned that in order to triple cash for clunkers, the bill takes money away from another important economic recovery program that supports renewable energy projects. We don't know the consequences of this action and how it will impact other Oregon priorities and job prospects in the renewables sector.

Cash for clunkers is a program I support and I think it has an important role to play in our economic recovery. However, I don't want this rushed action to weaken both its effectiveness and long-term viability.

Mr. STUPAK. Mr. Speaker, I rise in support of H.R. 3435.

The CARS program has proven widely successful. Within five days of the program's official start for electronic submission of applications, there is concern that the original \$1 billion in funding will soon be depleted.

This means an estimated 250,000 new vehicles were sold since the start of the program. This is a great boost to our auto industry, with reports of dealerships being unable to keep current vehicles in stock due to the strong demand from consumers—a problem my local dealers welcome.

Preliminary statistics on the program point to consumers gaining a 69 percent improvement in fuel efficiency from their trade-in vehicles, with an average annual gasoline savings of \$750.

The goals of increasing fuel efficiency, reducing pollution, and providing a needed economic stimulus for our nation's auto industry have all been met by the program. An additional \$2 billion, transferred from the economic stimulus bill, should provide enough funding for the program to sell an additional 500,000 vehicles.

Even ineligible consumers are benefiting as more foot traffic from the program will boost automotive sales for dealerships across the country.

A bipartisan group of Members and the White House are in agreement that this suc-

cessful program must continue. Congress should pass H.R. 3435 to provide \$2 billion from economic stimulus funding to support this widely successful program. Consumers should continue to benefit from the program, and we must ensure the financial security of existing deals between consumers and car dealerships.

Ms. CORRINE BROWN of Florida. Mr. Speaker, I am concerned over the news reports that the Consumer Assistance to Recycle and Save Program, or the Car Allowance Rebate System has run out of money.

This program took effect approximately one week ago, and American auto dealers have already sold 8,000 cars thanks to subsidies contained in the legislation. Equally impressive is the fact that appropriated funds have already been dispersed. This swift action by Congress and the Department of Transportation is extremely encouraging. This legislation has been having a stabilizing effect moving forward and delivers badly needed relief to the American auto industry.

The Cars for Clunkers program is a part of the federal government's efforts to help local dealers who are suffering financially and shutting down because of the economy, and I am thrilled by the program's early success.

We need to fully fund the House-passed authorized level of \$4 billion before we leave for our August district work period.

The government's new Cash for Clunkers program took effect approximately one week ago, and American auto dealers have already sold 8,000 cars thanks to subsidies contained in the legislation. I am confident that this legislation will have a stabilizing effect moving forward and deliver badly needed relief to the American auto industry. Creation of the Cash for Clunkers program was not the first action Congress has taken this year to help struggling auto dealers. As we move forward with implementation of this new program, it is important that Congress make sure previously appropriated funds are used to help auto dealers on Main Street and not just manufacturers.

As a senior member of the Transportation Committee, I work every day to help Americans who depend on the transportation industry for jobs and services. I firmly believe that every mode of transportation contributes to America in meaningful ways. However, no mode of transportation has shaped American life as profoundly as the automobile—and that is why Congress needs to do everything in its power to help struggling auto dealers across America.

In good economic times, manufacturers established as many dealerships as possible in order to maximize profit. However, in today's recession, these same dealerships are being asked to sacrifice. And those responsible for the industry's collapse—namely the management of GM and Chrysler who insisted on building bigger, gas-guzzling automobiles—are the ones being propped up by federal bailout dollars. This is hardly fair, and Congress has a responsibility to exercise oversight and ensure dealers are not punished for management's mistakes.

Most dealerships across America are seeing layoffs and some have been closed altogether. These dealers are the bedrock of our communities; they sponsor our children's sports

teams and are known for participating in community organizations. Supporting upstanding auto dealers across America is not "political pandering" as your editorial suggested. Congress is simply taking action to protect hard-working Americans whose dealerships are being taken from them for no mistake of their own.

When we committed taxpayer dollars to these companies, we accepted the responsibility to make sure those monies would help Americans on Main Street—that means dealerships and not just manufacturers. Dealers deserve to be protected by these funds, and Members of Congress should be committed to effective oversight.

In a rare exhibit of bipartisanship, Democrats and Republicans are working together to save American auto dealers. Members of both parties agree that the closing of dealerships may violate state franchise laws designed to protect dealers from unfair and oppressive trade practices.

The actions of Chrysler and GM simply ignore these protected rights. Dealers have lost their dealerships without due process or adequate compensation. Action by Congress could not only reinstate dealers but will also revitalize the communities that depend crucially on dealerships for jobs and services. Simply, auto dealers are part of the solution to manufacturers' problems, not a part of the problem.

Most dealers would prefer to remain in the automobile business as GM or Chrysler franchisees, but today manufacturers are allowed to eliminate entire dealerships regardless of clear precedent that protects dealers' rights. Chrysler and GM are being allowed to operate as the "exception to the rule." This is unfair to our communities that depend on auto dealers and represents a clear federal level assault on state franchise laws.

Congress must take action to save our dealerships, communities, and American jobs.

Mr. TONKO. Mr. Speaker, I rise in support of H.R. 3435, the Consumer Assistance to Recycle and Save (CARS) Program, or the "Cash for Clunkers" initiative.

This additional \$2 billion in funding will help promote automotive sales and protect our environment. In the past week, it is estimated that 250,000 cars were sold. On both sides of the aisle, people acknowledged the effectiveness of this initiative. I am proud to support its extension.

I also ask for special consideration and clarification on an important part of this bill. As it currently stands, if one spouse owns the title to a "clunker" and the other spouse holds the registration, that couple is not eligible to participate in the program. I believe that consideration to married couples should be afforded more flexibility and that regardless of the registration/title configuration, those married couples should be able to participate.

Finally, this is a very positive, bipartisan initiative to help our auto industry, to help consumers, to grow our economy, and to do it in an environmentally sound way.

Mr. OBEY. I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Wisconsin (Mr.

OBEY) that the House suspend the rules and pass the bill, H.R. 3435.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. LEWIS of California. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to House Resolution 697, this 15-minute vote on the motion to suspend the rules will be followed by 5-minute votes on adoption of the Frank amendment, as modified, to H.R. 3269; adoption of the Garrett amendment to H.R. 3269.

The vote was taken by electronic device, and there were—yeas 316, nays 109, answered “present” 2, not voting 6, as follows:

ANSWERED “PRESENT”—2

Buchanan Deal (GA)

NOT VOTING—6

Gohmert Linder McCaul
Harper McCarthy (NY) Salazar

□ 1324

Messrs. COFFMAN of Colorado, BLUMENAUER and BAIRD and Ms. JENKINS changed their vote from “yea” to “nay.”

Mr. BACHUS changed his vote from “nay” to “yea.”

So (two-thirds being in the affirmative) the rules were suspended and the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

CORPORATE AND FINANCIAL INSTITUTION COMPENSATION FAIRNESS ACT OF 2009

The SPEAKER pro tempore. Pursuant to House Resolution 697, proceedings will now resume on the bill (H.R. 3269) to amend the Securities Exchange Act of 1934 to provide shareholders with an advisory vote on executive compensation and to prevent perverse incentives in the compensation practices of financial institutions.

The Clerk read the title of the bill.

AMENDMENT NO. 1, AS MODIFIED, OFFERED BY MR. FRANK OF MASSACHUSETTS

The SPEAKER pro tempore. The unfinished business is the question on the amendment by the gentleman from Massachusetts (Mr. FRANK), as modified, on which a recorded vote was ordered.

The Clerk will redesignate the amendment.

The Clerk redesignated the amendment.

The SPEAKER pro tempore. The question is on the amendment, as modified.

This will be a 5-minute vote.

The vote was taken by electronic device, and there were—ayeas 242, noes 178, not voting 13, as follows:

[Roll No. 683]

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (during the vote). There are 2 minutes remaining on this vote.

□ 1330

Mr. CLEAVER changed his vote from “no” to “aye.”

So the amendment, as modified, was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Stated against:

Mr. PAULSEN. Mr. Speaker, on rollcall No. 683 I was unavoidably detained. Had I been present, I would have voted “no.”

AMENDMENT NO. 2 IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. GARRETT OF NEW JERSEY

The SPEAKER pro tempore. The unfinished business is the question on the amendment offered by the gentleman from New Jersey (Mr. GARRETT) on which a recorded vote was ordered.

The Clerk will redesignate the amendment.

The Clerk redesignated the amendment.

The SPEAKER pro tempore. The question is on the amendment.

This will be a 5-minute vote.

The vote was taken by electronic device, and there were—ayes 179, noes 244, not voting 10, as follows:

[Roll No. 684]

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (during the vote). There are 2 minutes remaining in this vote.

□ 1338

Messrs. CONYERS and OBEY changed their vote from “aye” to “no.” So the amendment was rejected.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT

Mr. SESSIONS. Mr. Speaker, I have a motion at the desk.

The SPEAKER pro tempore. Is the gentleman opposed to the bill?

Mr. SESSIONS. I am.

The SPEAKER pro tempore. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. Sessions moves to recommit the bill, H.R. 3269, to the Committee on Financial Services with instructions to report the same back to the House forthwith with the following amendment:

At the end of section 14(i) of the Securities Exchange Act of 1934 (as added by section 2 of the bill), insert the following:

“(6) DISCLOSURE OF ACTIVITIES TO INFLUENCE VOTE.—Notwithstanding paragraphs (1) or (2)(B), a shareholder's vote shall not be counted under such paragraphs if the shareholder has spent, directly or indirectly, more than a de minimis amount of money (as determined by the Commission) on activities to influence the vote under such paragraphs of other shareholders, unless such shareholder discloses to the Commission, in accordance with rules prescribed by the Commission—

“(A) the identity of all persons or entities engaged in activities to influence such a vote;

“(B) the activities engaged in to influence such a vote; and

“(C) the amount of money expended on activities to influence such a vote.”.

Mr. SESSIONS (during the reading). Mr. Speaker, I ask unanimous consent to have the motion considered as read.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. SPEAKER pro tempore. Pursuant to the rule, the gentleman from Texas is recognized for 5 minutes in support of his motion.

Mr. SESSIONS. Mr. Speaker, I would like to preempt a common protest by the gentleman, my friend from Massachusetts, and let my colleagues know that this motion will not “kill the bill.” In fact, it will not even send it back to committee. We have the authority right here, right now to provide for the appropriate transparency and accountability just by passing this motion.

The legislation that the Democrat majority has brought before the House today forces every publicly held company to bear the cost of administering a toothless, non-binding shareholder vote on pay packages during every proxy vote.

This motion to recommit would improve this interventionist legislation by providing sunshine and transparency for shareholders so that there is full disclosure about who is financing efforts to influence a vote on this new, congressionally mandated, non-binding shareholder resolution.

Let me give an example of a substantially similar disclosure requirement that every Member of this body understands because it's already a current practice: As Federal candidates, we are obligated to disclose to the FEC the name, occupation, and amount given from each of our donors. We require this because public interest is advanced by letting voters know who funds each candidate's campaign.

My motion asks for the same disclosure so that shareholders know what persons or organizations are spending money to influence the new mandatory, non-binding vote.

The purpose of this motion is not to impede the ability of organizations to influence the vote. If they hold shares in stock, they will be able to express their opinion. The point of the motion is to simply provide voters, in this case shareholders, with access to information about who is spending money and what are they attempting to influence with their vote.

My motion tasks the SEC with setting a de minimis level of spending and with collecting important information about anyone or any organization that spends over that amount to influence a vote, including who is spending the money, what they are spending the money on, and how much they are spending to influence the votes of other shareholders.

This motion provides an appropriate level of transparency for shareholder elections. If we believe that voters deserve this information, we should also give to shareholders this same level of transparency.

Once again, I would like to make it clear that this legislation will not “kill the bill,” as its opponents might claim. It will not send the bill back to committee to fix its current lack of transparency because it allows it to be done right here, right now.

I encourage all my colleagues to support this commonsense motion to improve transparency for shareholders about who is trying to influence their votes.

Mr. Speaker, I yield back the balance of my time.

Mr. FRANK of Massachusetts. Mr. Speaker, I rise to claim the time in opposition to the motion.

The SPEAKER pro tempore. The gentleman from Massachusetts is recognized for 5 minutes.

Mr. FRANK of Massachusetts. Mr. Speaker, that speech would have been impressive—I might have disagreed with it—if it applied to all shareholder votes. The recommittal motion singles out the say-on-pay. And if you want to influence pay, you have to report everything. If you want to vote on a merger or an acquisition or if you want to vote on anything else, you don't have to do it. It's not a uniform requirement of a disclosure. It burdens the say-on-pay vote and leaves every other vote in the dark. If that's so important, why did we not have a broader version of it?

It also is quite burdensome.

□ 1345

If you want to spend money to oppose large bonuses, to oppose large salaries, to oppose a company paying 72 percent of its revenue, as recently happened, in compensation, if you are a pension fund, if you are a union, if you want to write to your own members and say this is a bad idea, if you hold shares, vote “no.” You have to give the identity of all persons or entities engaged in the activity and the activities engaged.

It is not simply a reporting of the amount of money. It is a very detailed one, and it burdens only those voting on say-on-pay. It clearly comes from a hostility of the notion of say-on-pay. Members who opposed it 2 years ago can't oppose it today, so they now have a new tactic. They are trying to aggravate it.

And while we are on the subject of aggravation, I hope to reduce the level here by asking people to vote “no.”

Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to recommit.

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

RECORDED VOTE

Mr. SESSIONS. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The SPEAKER pro tempore. Pursuant to clause 9 of rule XX, the Chair will reduce to 5 minutes the minimum time for any electronic vote on the question of passage.

The vote was taken by electronic device, and there were—ayes 178, noes 244, not voting 11, as follows:

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (during the vote). There are 2 minutes remaining in this vote.

□ 1409

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Stated for:

Mr. MARKEY of Massachusetts. Mr. Speaker, on rollcall No. 686, I inadvertently did not vote, but intended to vote "aye".

Stated against:

Mr. LEE of New York. Mr. Speaker, on rollcall No. 686, had I been present, I would have voted "no."

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Ms. Curtis, one of its clerks, announced that the Senate has passed without amendment a concurrent resolution of the House of the following title:

H. Con. Res. 172. Concurrent resolution providing for a conditional adjournment of the House of Representatives and a conditional recess or adjournment of the Senate.

AUTHORIZING USE OF CAPITOL GROUNDS FOR NATIONAL WEEK-END OF REMEMBRANCE EVENT

Mr. OBERSTAR. Mr. Speaker, I ask unanimous consent that the Committee on Transportation and Infrastructure be discharged from further consideration of the concurrent resolution (H. Con. Res. 171) authorizing the use of the Capitol Grounds for an event to honor military personnel who have died in service to the United States and to acknowledge the sacrifice of the families of those individuals as part of the National Weekend of Remembrance, and ask for its immediate consideration in the House.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore (Mr. MAFFEI). Is there objection to the request of the gentleman from Minnesota?

There was no objection.

The text of the concurrent resolution is as follows:

H. CON. RES. 171

Resolved by the House of Representatives (the Senate concurring),

SECTION 1. USE OF CAPITOL GROUNDS FOR NATIONAL WEEKEND OF REMEMBRANCE EVENT.

(a) IN GENERAL.—The White House Commission on Remembrance (in this resolution referred to as the "sponsor") shall be permitted to sponsor a public event (in this resolution referred to as the "event") on the Capitol Grounds to honor military personnel who have died in service to the United States and to acknowledge the sacrifice of the families of those individuals as part of the National Weekend of Remembrance.

(b) DATE OF EVENT.—The event shall be held on September 26, 2009, or on such other date as the Speaker of the House of Representatives and the Committee on Rules and Administration of the Senate jointly designate.

SEC. 2. TERMS AND CONDITIONS.

(a) IN GENERAL.—Under conditions to be prescribed by the Architect of the Capitol and the Capitol Police Board, the event shall be—

(1) free of admission charge and open to the public; and

(2) arranged not to interfere with the needs of Congress.

(b) EXPENSES AND LIABILITIES.—The sponsor shall assume full responsibility for all expenses and liabilities incident to all activities associated with the event.

SEC. 3. EVENT PREPARATIONS.

Subject to the approval of the Architect of the Capitol, the sponsor is authorized to erect upon the Capitol Grounds such stage, sound amplification devices, and other related structures and equipment, as may be required for the event.

SEC. 4. ENFORCEMENT OF RESTRICTIONS.

The Capitol Police Board shall provide for enforcement of the restrictions contained in section 5104(c) of title 40, United States Code, concerning sales, advertisements, displays, and solicitations on the Capitol Grounds, as well as other restrictions applicable to the Capitol Grounds, in connection with the event.

Mr. OBERSTAR. Mr. Speaker, I rise in strong support of House Concurrent Resolution 171, authorizing the use of the Capitol Grounds for an event to honor military personnel who have died in service to the United States and to acknowledge the sacrifice of the families of those individuals as part of the National Weekend of Remembrance.

This concurrent resolution will permit the use of the Capitol Grounds for a Time of Remembrance tribute for military families who have lost loved ones in Iraq and Afghanistan, including 72 Minnesota families (with 12 families from my Congressional District). This event will be held on September 26, 2009, on the West Front of the Capitol and will be sponsored by the White House Commission on Remembrance and Families United for Our Troops and Their Mission, a non-profit organization.

The White House Commission on Remembrance was established by Congress in 2000, under the National Moment of Remembrance Act (P.L. 106-579). This law directed the Commission to unite the nation in a National Moment of Remembrance, to be held at 3:00 p.m. each Memorial Day. Since 2006, the Commission has also sponsored an annual Time of Remembrance ceremony to "honor all those who have died in service to our country, with a special tribute to America's fallen in Afghanistan and Iraq and the families they left behind."

Passing this resolution will ensure that this year's ceremony, and a picnic to follow, will be allowed to go forward on the Capitol Grounds on September 26, 2009. Activities on the Capitol Grounds conducted under H. Con. Res. 171 will be coordinated with the Architect of the Capitol and the Capitol Police Board, and will be free of charge.

This ceremony is an opportunity to demonstrate to military families that their fellow Americans join them in mourning their loss, and to express our sincere and immeasurable gratitude for the service of their sons, daughters, mothers, fathers, sisters, and brothers to our nation. While we can never adequately thank those who have died for the sacrifice they have made, taking time to remember these brave men and women and celebrating their lives with their families is an appropriate tribute.

I urge my colleagues to join me in supporting H. Con. Res. 171.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

SIDNEY M. ARONOVITZ UNITED STATES COURTHOUSE

Mr. OBERSTAR. Mr. Speaker, I ask unanimous consent for the immediate consideration in the House of the bill (H.R. 2913) to designate the United States courthouse located at 301 Simonton Street in Key West, Florida, as the "Sidney M. Aronovitz United States Courthouse".

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

The text of the bill is as follows:

H.R. 2913

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DESIGNATION.

The United States courthouse located at 301 Simonton Street in Key West, Florida, shall be known and designated as the "Sidney M. Aronovitz United States Courthouse".

SEC. 2. REFERENCES.

Any reference in a law, map, regulation, document, paper, or other record of the United States to the United States courthouse referred to in section 1 shall be deemed to be a reference to the "Sidney M. Aronovitz United States Courthouse".

Mr. OBERSTAR. Mr. Speaker, I rise in support of the bill, H.R. 2913, introduced by the gentlelady from Florida (Ms. ROS-LEHTINEN), to designate the United States courthouse located at 301 Simonton Street in Key West, Florida, as the "Sidney M. Aronovitz United States Courthouse".

Judge Sidney M. Aronovitz served as a U.S. District Court Judge for the Southern District of Florida for 21 years. Aronovitz was born in Key West, Florida, on June 20, 1920. After graduating from Key West High School in 1937, he went on to attend the University of Florida where he was awarded a bachelor of arts degree in 1942, and a law degree, with honors, in 1943. Aronovitz went on to serve as a U.S. Army captain from 1943 to 1946, earning multiple distinctions, including a Bronze Star.

Between 1943 and 1976, Aronovitz served as a lawyer in private practice in Miami, Florida. He also served as a City Commissioner from 1962 to 1966, holding the position of Vice-Mayor in 1965. In 1976, President Gerald Ford nominated Sidney M. Aronovitz to serve as a U.S. District Court Judge for the Southern District of Florida. Judge Aronovitz was commissioned on September 21, 1976, and served as a U.S. District Court Judge until his death in 1997. In addition, he periodically sat on the U.S. Court of Appeals, 11th Circuit, and served on the U.S. Foreign Intelligence Surveillance Court from 1988 to 1992.

Judge Aronovitz served with distinction and it is fitting that we honor him today with this designation.

I urge my colleagues to support H.R. 2913.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PRIVILEGED REPORT ON RESOLUTION OF INQUIRY TO THE ATTORNEY GENERAL

Mr. COHEN, from the Committee on the Judiciary, submitted an adverse privileged report (Rept. No. 111-242) on the resolution (H. Res. 636) directing the Attorney General to transmit to the House of Representatives all information in the Attorney General's possession relating to the transfer or release of detainees held at Naval Station, Guantanamo Bay, Cuba, into the United States, which was referred to the House Calendar and ordered to be printed.

SUPPORTING NATIONAL SAVE FOR RETIREMENT WEEK

Ms. SCHWARTZ. Mr. Speaker, I ask unanimous consent that the Committee on Ways and Means be discharged from further consideration of the resolution (H. Res. 662) supporting the goals and ideals of "National Save for Retirement Week", including raising public awareness of the various tax-preferred retirement vehicles as important tools for personal savings and retirement financial security, and ask for its immediate consideration in the House.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Pennsylvania?

There was no objection.

The text of the resolution is as follows:

H. RES. 662

Whereas people in the United States are living longer and the cost of retirement continues to rise, in part because the number of employers providing retiree health coverage continues to decline, and retiree health care costs continue to increase at a rapid pace;

Whereas Social Security remains the bedrock of retirement income for the great majority of the people of the United States, but was never intended by Congress to be the sole source of retirement income for families;

Whereas recent data from the Employee Benefit Research Institute indicates that, in the United States, less than 2% of workers or their spouses are currently saving for retirement and that the actual amount of retirement savings of workers lags far behind the amount that will be needed to adequately fund their retirement years;

Whereas saving for one's retirement is a key component to overall financial health and security during retirement years;

Whereas many workers may not be aware of their options for saving for retirement or may not have focused on the importance of, and need for, saving for their own retirement;

Whereas many employees have available to them through their employers access to de-

finer benefit and defined contribution plans to assist them in preparing for retirement, yet many of them may not be taking advantage of employer-sponsored defined contribution plans at all or to the full extent allowed by the plans as prescribed by Federal law;

Whereas many workers who are saving for retirement in tax-preferred vehicles have experienced declines in their account values as a result of the recent economic downturn and market decline, making continued contributions all the more important;

Whereas all workers, including public- and private-sector employees, employees of tax-exempt organizations, and self-employed individuals, can benefit from increased awareness of the need to develop personal budgets and financial plans including retirement savings strategies, and to take advantage of the availability of tax-preferred savings vehicles to assist them in saving for retirement; and

Whereas October 18 through October 24, 2009, has been designated as "National Save for Retirement Week": Now, therefore, be it Resolved, That the House of Representatives—

(1) supports the goals and ideals of "National Save for Retirement Week", including raising public awareness of the various tax-preferred retirement vehicles as important tools for personal savings and retirement financial security;

(2) supports the need to raise public awareness of efficiently utilizing substantial tax revenues that currently subsidize retirement savings, revenues estimated to be in excess of \$120,400,000,000 for the 2008 fiscal year budget;

(3) supports the need to raise public awareness of the importance of saving adequately for retirement, and the availability of tax-preferred employer-sponsored retirement savings vehicles; and

(4) calls on the States, localities, schools, universities, nonprofit organizations, businesses, other entities, and the people of the United States to observe this week with appropriate programs and activities with the goal of increasing retirement savings for all the people of the United States.

The resolution was agreed to.

A motion to reconsider was laid on the table.

WASHINGTON METROPOLITAN AREA TRANSIT REGULATION COMPACT AMENDMENTS

Mr. COHEN. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of the joint resolution (S.J. Res. 19) granting the consent and approval of Congress to amendments made by the State of Maryland, the Commonwealth of Virginia, and the District of Columbia to the Washington Metropolitan Area Transit Regulation Compact, and ask for its immediate consideration in the House.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

The text of the joint resolution is as follows:

S.J. RES. 19

Whereas Congress in title VI of the Passenger Rail Investment and Improvement

Act of 2008 (section 601, Public Law 110-432) authorized the Secretary of Transportation to make grants to the Washington Metropolitan Area Transit Authority subject to certain conditions, including that no amounts may be provided until specified amendments to the Washington Metropolitan Area Transit Regulation Compact have taken effect;

Whereas legislation enacted by the State of Maryland (Chapter 111, 2009 Laws of the Maryland General Assembly), the Commonwealth of Virginia (Chapter 771, 2009 Acts of Assembly of Virginia), and the District of Columbia (D.C. Act 18-0095) contain the amendments to the Washington Metropolitan Area Transit Regulation Compact specified by the Passenger Rail Investment and Improvement Act of 2008 (section 601, Public Law 110-432); and

Whereas the consent of Congress is required in order to implement such amendments: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. CONSENT OF CONGRESS TO COMPACT AMENDMENTS.

(a) **CONSENT.**—Consent of Congress is given to the amendments of the State of Maryland, the amendments of the Commonwealth of Virginia, and the amendments of the District of Columbia to sections 5, 9 and 18 of title III of the Washington Metropolitan Area Transit Regulation Compact.

(b) **AMENDMENTS.**—The amendments referred to in subsection (a) are substantially as follows:

(1) Section 5 is amended to read as follows:

“(a) The Authority shall be governed by a Board of eight Directors consisting of two Directors for each Signatory and two for the federal government (one of whom shall be a regular passenger and customer of the bus or rail service of the Authority). For Virginia, the Directors shall be appointed by the Northern Virginia Transportation Commission; for the District of Columbia, by the Council of the District of Columbia; for Maryland, by the Washington Suburban Transit Commission; and for the Federal Government, by the Administrator of General Services. For Virginia and Maryland, the Directors shall be appointed from among the members of the appointing body, except as otherwise provided herein, and shall serve for a term coincident with their term on the appointing body. A Director for a Signatory may be removed or suspended from office only as provided by the law of the Signatory from which he was appointed. The nonfederal appointing authorities shall also appoint an alternate for each Director. In addition, the Administrator of General Services shall also appoint two nonvoting members who shall serve as the alternates for the federal Directors. An alternate Director may act only in the absence of the Director for whom he has been appointed an alternate, except that, in the case of the District of Columbia where only one Director and his alternate are present, such alternate may act on behalf of the absent Director. Each alternate, including the federal nonvoting Directors, shall serve at the pleasure of the appointing authority. In the event of a vacancy in the Office of Director or alternate, it shall be filled in the same manner as an original appointment.

“(b) Before entering upon the duties of his office each Director and alternate Director shall take and subscribe to the following oath (or affirmation) of office or any such other oath or affirmation, if any, as the con-

stitution or laws of the Government he represents shall provide: ‘I, , hereby solemnly swear (or affirm) that I will support and defend the Constitution of the United States and the Constitution and laws of the state or political jurisdiction from which I was appointed as a director (alternate director) of the Board of Washington Metropolitan Area Transit Authority and will faithfully discharge the duties of the office upon which I am about to enter.’”

(2) Subsection (a) of section 9 is amended to read as follows:

“(a) The officers of the Authority, none of whom shall be members of the Board, shall consist of a general manager, a secretary, a treasurer, a comptroller, an inspector general, and a general counsel and such other officers as the Board may provide. Except for the office of general manager, inspector general, and comptroller, the Board may consolidate any of such other offices in one person. All such officers shall be appointed and may be removed by the Board, shall serve at the pleasure of the Board and shall perform such duties and functions as the Board shall specify. The Board shall fix and determine the compensation to be paid to all officers and, except for the general manager who shall be a full-time employee, all other officers may be hired on a full-time or part-time basis and may be compensated on a salary or fee basis, as the Board may determine. All employees and such officers as the Board may designate shall be appointed and removed by the general manager under such rules of procedure and standards as the Board may determine.”

(3) Section 9 is further amended by inserting new subsection (d) to read as follows (and by renumbering all subsequent paragraphs of section 9):

“(d) The inspector general shall report to the Board and head the Office of the Inspector General, an independent and objective unit of the Authority that conducts and supervises audits, program evaluations, and investigations relating to Authority activities; promotes economy, efficiency, and effectiveness in Authority activities; detects and prevents fraud and abuse in Authority activities; and keeps the Board fully and currently informed about deficiencies in Authority activities as well as the necessity for and progress of corrective action.”

(4) Section 18 is amended by adding a new section 18(d) to read as follows:

“(d)(1) All payments made by the local Signatory governments for the Authority for the purpose of matching federal funds appropriated in any given year as authorized under title VI, section 601, Public Law 110-432 regarding funding of capital and preventive maintenance projects of 1 the Authority shall be made from amounts derived from dedicated funding sources.

“(2) For the purposes of this paragraph (d), a ‘dedicated funding source’ means any source of funding that is earmarked or required under State or local law to be used to match Federal appropriations authorized under title VI, section 601, Public Law 110-432 for payments to the Authority.”

SEC. 2. RIGHT TO ALTER, AMEND, OR REPEAL.

The right to alter, amend, or repeal this Act is expressly reserved. The consent granted by this Act shall not be construed as impairing or in any manner affecting any right or jurisdiction of the United States in and over the region that forms the subject of the compact.

SEC. 3. CONSTRUCTION AND SEVERABILITY.

It is intended that the provisions of this compact shall be reasonably and liberally

construed to effectuate the purposes thereof. If any part or application of this compact, or legislation enabling the compact, is held invalid, the remainder of the compact or its application to other situations or persons shall not be affected.

SEC. 4. INCONSISTENCY OF LANGUAGE.

The validity of this compact shall not be affected by any insubstantial differences in its form or language as adopted by the State of Maryland, Commonwealth of Virginia and District of Columbia.

SEC. 5. EFFECTIVE DATE.

This Act shall take effect on the date of enactment of this Act.

The joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

SUPPORTING DESIGNATION OF GOSPEL MUSIC HERITAGE MONTH

Mr. CLAY. Mr. Speaker, I ask unanimous consent that the Committee on Oversight and Government Reform be discharged from further consideration of the joint resolution (H.J. Res. 12) expressing support for designation of September 2009 as “Gospel Music Heritage Month” and honoring gospel music for its valuable and longstanding contributions to the culture of the United States, and ask for its immediate consideration in the House.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

The text of the joint resolution is as follows:

H.J. RES. 12

Whereas gospel music is a beloved art form unique to the United States, spanning decades, generations, and races;

Whereas gospel music is one of the cornerstones of the musical tradition of the United States and has grown beyond its roots to achieve pop-culture and historical relevance;

Whereas gospel music has spread beyond its geographic origins to touch audiences around the world;

Whereas the history of gospel music can be traced to multiple and diverse influences and foundations, including African-American spirituals that blended diverse elements from African music and melodic influences from Irish folk songs and hymns, and gospel music ultimately borrowed from uniquely American musical styles including ragtime, jazz, and blues;

Whereas that tradition of diversity remains today, as the influence of gospel music can be found infused in all forms of secular music, including rock and roll, country, soul, rhythm and blues, and countless other styles;

Whereas the legacy of gospel music includes some of the most memorable voices and musical pioneers in the history of the United States, such as Thomas Dorsey, Mahalia Jackson, James Vaughan, Roberta Martin, Virgil Stamps, Diana Washington, Stamps Quartet, The Highway QCs, The Statesmen, The Soul Stirrers, Point of Grace, Smokie Norful, Terry Woods, James Cleveland, Billy Ray Hearn, Rex Humbard,

Joe Ligon and The Mighty Clouds of Joy, Kirk Franklin, V. Michael McKay, Theola Booker, Yolanda Adams, Edwin and Walter Hawkins, Sandi Patty, The Winans, Kathy Taylor, and Brenda Waters, Carl Preacher, Shirley Joiner of B, C & S;

Whereas many of the biggest names in music emerged from the gospel music tradition or have recorded gospel music, including Sam Cooke, Al Green, Elvis Presley, Marvin Gaye, Aretha Franklin, Whitney Houston, Little Richard, Ray Charles, Buddy Holly, Alan Jackson, Dolly Parton, Mariah Carey, Bob Dylan, and Randy Travis;

Whereas, regardless of their musical styles, those artists and so many more have turned to gospel music as the source and inspiration for their music, which has blurred the boundaries between secular and gospel music;

Whereas, beyond its contribution to the musical tradition of the United States, gospel music has provided a cultural and musical backdrop across all of mainstream media, from hit television series to major Hollywood motion pictures, including "American Idol", "Heroes", "Dancing with the Stars", "O Brother, Where Art Thou?", "Sister Act", "The Preacher's Wife", "Evan Almighty", and more;

Whereas gospel music has a huge audience around the country and around the world, a testament to the universal appeal of a historical American art form that both inspires and entertains across racial, ethnic, religious, and geographic boundaries; and

Whereas September 2009 would be an appropriate month to designate as "Gospel Music Heritage Month": Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That Congress supports the designation of "Gospel Music Heritage Month" which would recognize the contributions to the culture of the United States derived from the rich heritage of gospel music and gospel music artists.

Ms. JACKSON-LEE of Texas. Mr. Speaker, I rise to support my bill, H.J. Res. 12, that will designate September 2009 as Gospel Music Heritage Month and honor gospel music for its valuable and longstanding contributions to the culture of the United States. Gospel music is an American art form that has spanned hundreds of generations and its musical roots can be heard throughout many musical genres that we love today. It is important that we recognize and celebrate the vital role gospel music has had on music history. For this reason, I ask that you join me in supporting my resolution expressing support for designating September 2009 as "Gospel Music Heritage Month," honoring gospel music for its valuable long-standing contributions to American culture. I would also like to thank the 6 co-sponsors who have seen fit to honor our gospel music heritage.

The history of gospel music can be traced back to African American spirituals that blended diverse elements from African music, melodic influences from Irish folk songs and hymns, and ultimately borrowed from other uniquely American musical styles including ragtime, jazz, and blues.

The influence of gospel music can be found infused in all forms of secular music, from rock & roll, country, soul, R&B, and countless other styles. The legacy of gospel music includes some of the most memorable voices and pioneers in American history, such as Thomas Dorsey, Mahalia Jackson, James Vaughan,

Roberta Martin, and many more. Gospel music has laid down the musical foundation for legendary recording artists such as Elvis Presley, Marvin Gaye, Aretha Franklin, Buddy Holly, Whitney Houston, Ray Charles, Dolly Parton, Mariah Carey, Bob Dylan, and Randy Travis.

Gospel music has had an overwhelming influence on American culture and this bill recognizes gospel music's contributions by celebrating the rich heritage of gospel music and its artists in the month of September, 2009.

I urge my colleagues to support this bill as we move it to the floor for a vote.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

□ 1415

SUPPORTING GOLD STAR MOTHERS DAY

Mr. CLAY. Mr. Speaker, I ask unanimous consent that the Committee on Oversight and Government Reform be discharged from further consideration of the resolution (H. Res. 513) supporting the goals and purpose of Gold Star Mothers Day, which is observed on the last Sunday in September of each year in remembrance of the supreme sacrifice made by mothers who lose a son or daughter serving in the Armed Forces, and ask for its immediate consideration in the House.

The Clerk read the title of the resolution.

The text of the resolution is as follows:

H. RES. 513

Whereas the American Gold Star Mothers have suffered the supreme sacrifice of motherhood by losing a son or daughter who served in the Armed Forces, and thus perpetuate the memory of all whose lives are sacrificed in war;

Whereas the American Gold Star Mothers assist veterans of the Armed Forces and their dependents in the presentation of claims to the Department of Veterans Affairs and aid members of the Armed Forces who served and died or were wounded or incapacitated during hostilities;

Whereas the services rendered to the United States by the mothers of America have strengthened and inspired Americans throughout the history of the United States;

Whereas Americans honor themselves and the mothers of America when they revere and emphasize the role of the home and the family as the true foundations of the United States;

Whereas by doing so much for the home, the American mother is a source of moral and spiritual guidance for the people of the United States and thus acts as a positive force to promote good government and peace among all mankind; and

Whereas the last Sunday in September, which in 2009 is September 27, is observed as Gold Star Mothers Day: Now, therefore, be it *Resolved*, That the House of Representatives—

(1) supports the goals and purpose of Gold Star Mothers Day, which is observed in remembrance of the supreme sacrifice made by

mothers who lose a son or daughter serving in the Armed Forces; and

(2) urges the President to issue a proclamation calling upon the people of the United States to observe Gold Star Mothers Day with appropriate ceremonies and activities.

The resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. CLAY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on the measures just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

ATTEMPTS TO DERAIL HEALTH CARE REFORM

(Mr. CONNOLLY of Virginia asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONNOLLY of Virginia. Mr. Speaker, when our friends on the other side of the aisle decide in advance to oppose any health care reform bill, they're putting politics ahead of the needs of the American people.

Guaranteeing coverage for pre-existing conditions, which affect 45 percent of insured Americans, they're against it. Closing the prescription drug doughnut hole for seniors, they're against it. Protecting families from the cost of catastrophic illness, they're against it. Half a trillion in Medicare and Medicaid savings, they're against it. A plan of their own, they're even against that, too.

Why, Mr. Speaker? Uniform opposition to all reform, all savings, all extended coverage? Why? The answer is simple, chilling, and deeply troubling. Senator DEMINT, Republican of South Carolina, put it bluntly: If we're able to stop Obama on health care, it will be his Waterloo. It will break him.

At least the distinguished Senator from South Carolina is honest about the Republican agenda. It's not about a substantive critique. It's about politics, a calculated cynical strategy to derail reform of a broken health care system, a reform that can benefit every American family and small business.

NATIONAL THERAPEUTIC RECREATION WEEK

(Mr. THOMPSON of Pennsylvania asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. THOMPSON of Pennsylvania. Mr. Speaker, in July we celebrate National Therapeutic Recreation Week. And therapeutic recreation or recreational therapy embraces a definition of health, which includes not only

the absence of illness, but extends to enhancement of the physical, cognitive, emotional, social, and leisure development.

This caring profession touches the lives of individuals facing life-changing disease and disability all across the Nation. These services are provided by professionals nationally certified by the National Council for Therapeutic Recreation Certification as certified therapeutic recreation specialists.

Every day, countless individuals face rebuilding lives as a result of disease and disability. These individuals benefit from compassionate and cost-effective care of a certified therapeutic recreation specialist. Recreational therapy ultimately aims to improve an individual's functioning and keep them as active, healthy, and independent as possible.

Mr. Speaker, I congratulate the caring professionals of the therapeutic recreation profession for the services and care that they provide every day.

HONORING THE LIFE OF THOMAS MAROVICH, JR.

(Mr. McCLINTOCK asked and was given permission to address the House for 1 minute.)

Mr. McCLINTOCK. Mr. Speaker, I rise to pay tribute to a young man who gave his life last week while fighting the Backbone Fire in the Trinity Alps wilderness.

Thomas Marovich, Jr. was just 20 years old. He was in his second year with the U.S. Forest Service assigned to the Modoc National Forest. He was training with the Chester Helitack crew assigned to the Backbone Fire when a training accident claimed his life.

He was born and raised in Hayward, but he had come to Northeastern California to protect our forests, our communities, and our citizens from the ravages of fire. Thomas Marovich had wanted to be a firefighter since he was a little boy and, by all accounts, had an exemplary life ahead of him. He was only able to live 20 years of that life, sacrificing the rest of it for the safety of our community. And for that, we owe him and his grieving family our eternal gratitude.

THE COMMUNITY LIVING ASSISTANCE SERVICES AND SUPPORTS ACT

(Mr. PRICE of Georgia asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PRICE of Georgia. Mr. Speaker, there's a health care bill that the Democrats have proposed here in the House that would have a major impact on the way that health care is provided in this Nation.

One of the areas that hasn't been talked about a lot is long-term care.

Specifically, the CLASS Act, Community Living Assisted Services and Supports Act, is included, which would mandate government-sponsored, long-term care insurance on all Americans. Now, unfortunately, the \$50-a-day allocation for long-term care insurance is only a portion of the actual cost for the long-term care. Consequently, this is a huge unfunded mandate on who, Mr. Speaker? On you, the American people.

Instead, Congress should consider positive solutions which would make long-term care insurance more accessible by allowing it to be covered under FSAs and cafeteria plans and other patient-centered plans. Without a doubt, Americans need a plan in advance for long-term care. They should be allowed to work with family and trusted advisers to ensure their long-term needs are covered. The government should not limit the type of long-term care Americans may select.

This is just another example of the government telling people what kind of care they should need and may receive.

GOSPEL MUSIC HERITAGE MONTH

(Ms. JACKSON-LEE of Texas asked and was given permission to address the House for 1 minute.)

Ms. JACKSON-LEE of Texas. Mr. Speaker, we've had a long session of hard work, and I believe this is an appropriate ending to be able to honor some of America's culture. And so I rise today to acknowledge the passing of H.J. Res. 12, to designate September 2009 as Gospel Music Heritage Month and honor the gospel music for its valuable and longstanding contributions to the culture of the United States.

I thank the majority leader and the Republican leadership. I thank the chairman of the committee, Chairman TOWNS, and Ranking Member ISSA of Government Oversight, all of those who have worked, along with my 16 co-sponsors who recognize the value of the songs sung by the likes of Mahalia Jackson singing Precious Lord; Yolanda Adams, The Battle is the Lord's; Sandi Patty; and the work that Elvis Presley did when he sang his gospel songs; Israel, out of Lakewood Church; Kurt Carr with This Little Light of Mine; Donnie McClurkin, Just Stand; and Rev. Gregg Patrick, who is both a producer and a singer.

We have a wide vastness of musical talent in this Nation. I'm glad we're celebrating gospel music.

THE AMERICAN PEOPLE ARE HURTING

(Ms. FOXX asked and was given permission to address the House for 1 minute.)

Ms. FOXX. Mr. Speaker, the American people are hurting and losing jobs at an alarming rate. The President and

the Democrats in Congress promised that their trillion dollar stimulus bill would create jobs immediately and keep unemployment below 8 percent. But since the President signed his so-called stimulus into law, the national unemployment rate has reached 9.5 percent, a 26-year high, and over 2 million more jobs have been lost.

It's clear the Democrats \$1.1 trillion stimulus scheme isn't working. It's clear Democrats are on the side of more government, more taxes, and more debt. House Republicans are on the side of the American people, fighting for working families and small businesses to put America back to work.

The American people deserve real solutions for real recovery, and House Republicans will continue to fight for these solutions on behalf of the American people.

COMMUNICATION FROM CHAIR OF COMMITTEE ON TRANSPORTATION AND INFRASTRUCTURE

The SPEAKER pro tempore laid before the House the following communication from the Chair of the Committee on Transportation and Infrastructure:

HOUSE OF REPRESENTATIVES, COMMITTEE ON TRANSPORTATION AND INFRASTRUCTURE,

Washington, DC, July 30, 2009.

Hon. NANCY PELOSI,
Speaker of the House, House of Representatives,
The Capitol, Washington, DC.

DEAR MADAM SPEAKER: Today, on July 30, 2009, the Committee on Transportation and Infrastructure met in open session to consider three resolutions for the U.S. Army Corps of Engineers, in accordance with 33 U.S.C. 542. The resolutions authorize Corps surveys (or studies) of water resources needs and possible solutions. The Committee adopted the resolutions by voice vote with a quorum present.

Enclosed are copies of the resolutions adopted by the Committee.

Sincerely,

JAMES L. OBERSTAR.

Enclosures.

RESOLUTION—DOCKET 2819—BLACK RASCAL CREEK, MERCED, CALIFORNIA

Resolved by the Committee on Transportation and Infrastructure of the United States House of Representatives, That the Secretary of the Army review the reports on the Sacramento-San Joaquin Basin Streams, California, published as House Document No. 367, 81st Congress, 1st Session, and other reports to determine whether any modifications of the recommendations contained therein are advisable at the present time in the interest of flood damage reduction, and other related purposes in the vicinity of the Black Rascal Creek Watershed, Merced, California.

RESOLUTION—DOCKET 2820—DEADMAN'S RUN, LINCOLN, NEBRASKA

Resolved by the Committee on Transportation and Infrastructure of the United States House of Representatives, That the Secretary of the Army review the reports of the Chief of Engineers on the Missouri River

and Tributaries, published as House Document Numbered 475, 78th Congress, and other reports to determine whether any modifications of the recommendations contained therein are advisable at the present time in the interest of flood damage reduction, environmental restoration, and other related purposes in the Deadman's Run Watershed, located in the vicinity of Lincoln, Nebraska.

RESOLUTION—DOCKET 2821—HYDROELECTRIC POWER, UPPER MISSISSIPPI RIVER SYSTEM, ILLINOIS, IOWA, MINNESOTA, MISSOURI, AND WISCONSIN

Resolved by the Committee on Transportation and Infrastructure of the United States House of Representatives, That the Secretary of the Army review the report of the Corps of Engineers, entitled Upper Mississippi River and Illinois Waterway System: Report of the Chief of Engineers, dated December 15, 2004, and other pertinent reports, to determine whether any modifications of the recommendations contained therein are advisable at the present time in determining the feasibility of incorporating hydroelectric power into the improvements of the navigable portions of the Upper Mississippi and Illinois River system, Illinois, Iowa, Minnesota, Missouri, and Wisconsin.

SPECIAL ORDERS

The SPEAKER pro tempore. Under the Speaker's announced policy of January 6, 2009, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

LET'S TAKE CARE OF AMERICA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. POE) is recognized for 5 minutes.

Mr. POE of Texas. Mr. Speaker, a year ago today, when we recessed for the August break, there were some of us who stayed here on the House floor and continued to talk about energy and American independence in energy. Eventually, the powers that be turned out most of the lights, turned off the microphone, turned off the cameras, but we talked on that Friday, and then we continued to talk through most of the month of August, even though a formal session did not occur. And we talked about the need to be energy independent.

Now we've gone a year from that, and what has happened in that 1 year? Well, things have only gotten worse as far as energy independence has gone. Let me give you one example.

In 2008 at this time, in the United States proper we had 1,808 rigs drilling for crude oil and natural gas. A year later, we only have 1,128, so that means 680 rigs fewer now than we did a year ago producing oil and natural gas. What has happened? Well, things have only gotten worse.

We have, or this body passed, barely, legislation to punish energy consumption by the cap-and-tax bill, which means that if you use energy in this country, natural gas, electricity, you

use gasoline, you're going to have to pay more down the road. Hopefully, the Senate will not pass this legislation.

And we have fewer rigs and we are not more independent. We're more dependent. And who are we dependent on? We're dependent on the countries who hate us, some countries in the Middle East, some countries that we know and we have heard that actually the money that we spend on crude oil that we send them finds its way to people who don't like America and funds their organizations.

Why do we continue to do that? Because we don't take care of ourselves. We hear about clean energy, and we all want to go to alternative energy, but we're not there yet, Mr. Speaker. We need to do the simple things. We need to use and drill for our own natural gas and our own crude oil, and we can do that in the United States, in ANWR. We can do that offshore, and that keeps the money in the United States. It produces jobs for Americans, and doesn't send those jobs overseas. It keeps our oil companies and our natural gas companies in the United States. It's a good thing for America.

But because of the fear lobby, we're afraid to drill for natural gas and crude oil. And that is a mistake, because it can be done safely, and it should be done safely. The places that we drill offshore, it's been proven that it can be done safely. And we should continue to do that. So, a year from now, hopefully we won't be in a worse situation, depending on foreign countries for our energy.

We should do the obvious. Take care of America. Drill safely, drill anywhere that we have natural gas or crude oil and help bring energy back home to America, furnish jobs, keep that money in the United States and quit sending it overseas to people who don't even like the United States.

And that's just the way it is.

□ 1430

AMERICA'S FINANCIAL CRISIS

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Ohio (Ms. KAPTUR) is recognized for 5 minutes.

Ms. KAPTUR. Mr. Speaker, the financial crisis has resulted in the largest transfer of wealth in U.S. history, from Main Street citizens to Wall Street titans, and Wall Street insiders made huge profits off the Ponzi scheme they set up that led to the real estate bust and to our economic demise.

As the rest of America tries to dig itself out from the rubble left in their wake, the New York Times reports today that the nine biggest banks paid \$32 billion in bonuses to their employees of the \$165 billion they got from us, the taxpayers; 4,793 bankers and traders got a minimum of an additional \$1

million each. The average dealer at Goldman Sachs will earn \$750,000 extra. Meanwhile, Wall Street is dumping their bad loans on us, through the government, while dragging their feet on the mortgage workouts.

Bear in mind, some people in this Congress and in the Obama administration decided to pay servicers to do mortgage workouts because they weren't doing them themselves. So, rather than holding them accountable and rather than this Congress' holding them accountable, the administration is paying them, and they're still not doing it.

Look at the rogues gallery. Bank of America got \$45 billion in TARP funds while pulling in \$2.7 billion in profits last quarter. They're going to pay \$3.3 billion in bonuses. Wells Fargo got \$25 billion in TARP funds and turned a \$2.6 billion profit, and they will pay \$980 million in bonuses. JP Morgan is one of the worst. They got \$25 billion in TARP funds, and wracked up \$2.7 billion in profits last quarter, and they will pay \$8.9 billion in bonuses.

I am introducing legislation today to place a full excise tax on all of those Wall Street bonuses, to recoup the taxpayers' money and to direct it be used to do real mortgage workouts across this country on behalf of the American people to get our local real estate markets working again from coast to coast.

You know, Wall Street gorges itself on profits while unemployment is rising across our country, while foreclosures are rising and while pink slips are rising.

Look at JPMorgan. Within one week—and this happened in Ohio—on a Friday, they invited borrowers to attend a workshop for workouts. One little problem: Nobody from JPMorgan showed up until our office had to do their work and call their staff and get them there hours late. Only five of the original 20 borrowers who showed up to the meeting were left because they'd all taken off work, and they'd been able to get sick time to go to the meeting. Then we invited JPMorgan to a workout, and they said they'd send three staff. They didn't. The event went on with one staff member, and people left frustrated.

This is what is going on across our country, so the Obama administration called the 25 servicers up to Washington this week, and tried to talk sweet talk to them. The New York Times said it right yesterday. Here is what they said:

Why aren't these companies cooperating? We're enriching them, but beyond that, "Even when borrowers stop paying, mortgage companies that service the loans collect fees out of the proceeds when homes are ultimately sold in foreclosure. So the longer borrowers

remain delinquent, the greater the opportunities for these mortgage companies to extract revenue—fees for insurance, appraisals, title searches, and legal services.”

A Florida lawyer who defends homeowners against foreclosure, Margery Golant, says, “It frustrates me when I see the government looking to the servicer for the solution, because it will never ever happen.”

The tax laws favor them. So, despite the Federal Government’s chicken-hearted efforts, the servicers will have none of it because they can make more money with all of these bonuses and in letting people lose their homes.

Look in your neighborhood. How many more foreclosure signs do you see there? When America went to war in the early 20th century, each citizen sacrificed for the Nation. Now it’s all about the big shots. It’s all about their bonuses and their power.

Has greed really become the top American value? Foreclosures are rising. Unemployment is rising. Ninety percent of the people in our country say the economy is not working for them, and Wall Street banks just can’t seem to help themselves. They’re squeezing more profits off of our people’s misery.

What is wrong with this Congress? What is wrong with the Obama administration? What was wrong with the Bush administration that preceded it? Somebody had better stand up for the interests of the Republic.

CAN GOVERNMENT PROGRAMS STAY WITHIN BUDGET?

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Ms. FOXX) is recognized for 5 minutes.

Ms. FOXX. Mr. Speaker, today, the House rushed through a bill that provides an additional \$2 billion for the so-called Cash for Clunkers program. Apparently, the lure of free money from Uncle Sam provoked such a tsunami of clunkers that the program is already broke.

Mr. Speaker, everyone loves “free money.” The bailed-out banks loved their \$700 billion last fall. The bailed-out automakers loved their \$86 billion. So it’s not a surprise that the initial funding for Cash for Clunkers dried up in a matter of days.

So the question is: If the government so underestimated the cost of this program, and if the backlog of requests from dealers is already so huge, what does this tell us about these types of government programs—that maybe they don’t always function as they were predicted to, and that sometimes they cost taxpayers much more than was estimated?

One large dealership group in Utah had this to say about the hoops they had to jump through to avoid the fines

for noncompliance: The auto dealer said, “Dealers are being asked to be compliant with several rules that are often confusing and unrealistic . . . it is apparent that those writing the rules don’t understand how a car deal actually happens.”

This dealer went on to say that the government agency in charge of the Cash for Clunkers program has “threatened large fines for noncompliance. We are a top-10 dealer group in the country, and have gone to great lengths to be compliant, but it is even confusing to us. It will be a nightmare for the many smaller dealerships around the country.”

So far, we’ve learned several things from this Cash for Clunkers program. Lesson 1: Businesses and consumers really love free money—except when they’re the ones paying for someone else’s free money. Lesson 2: The government is abysmal at predicting how much programs will cost. Lesson 3: Complying with Federal mandates is a nightmare.

Of course, we should not overlook the fact that there may very well be some unintended consequences of this program. For instance, the New York Times reported in April that France had a similar program from 1994 to 1996. Guess what? It worked. Well, kind of. There were lots of auto sales initially, but the program was followed by a severe drop in auto sales in 1997 and in 1998. Isn’t that interesting? It turns out the program was simply shifting demand forward. What is keeping the U.S. Cash for Clunkers program from doing the same thing? Nothing.

Let’s return to Lesson 2: Congress’ inability to accurately estimate the cost or the effect of new government programs.

Based on research from Congress’ Joint Economic Committee over the years, congressional estimates of the cost of health care programs have been extremely unreliable. For example, when Congress was considering Medicare part A, the hospital insurance component, Congress estimated it would cost \$9 billion by 1990. The actual cost in 1990 was \$67 billion, 7 times more than Congress estimated. The 1967 estimate for the entire Medicare program in 1990 was \$12 billion. The actual cost? \$111 billion. It was almost 10 times the original estimate.

Later, in 1987, Congress estimated that Medicaid’s disproportionate share of hospital payments to States would cost less than \$1 billion in 1992. Five years later, the results were in. It was \$17 billion, which is an incomprehensible 17-fold increase over the estimate from just 5 years earlier. You get the idea.

Today’s Cash for Clunkers example is just the latest in a long line of programs that turned out to be dramatically more expensive than anyone predicted, not to mention notoriously dif-

ficult to comply with or to figure out. Perhaps the most amazing part of this example is that it reminds me of the ongoing discussion over health care reform.

Here we’ve got a health system that is in need of reform, and some people are pushing a bill that amounts to a government takeover of health care. They like to call it a “public option.” The Congressional Budget Office already has said it would add \$239 billion to the deficit over 10 years, but as we’ve just seen, government programs have a tendency to take on a life of their own and cost taxpayers way more than was originally estimated or envisioned.

While I’m willing to allow for some margin of error in estimated costs—they are estimates after all—what concerns me is that, today, we’re starting out with estimates for huge deficits with this health care plan. At the same time, we’re paying for it out of the pockets of America’s job creators—small businesses.

If the current proposal becomes law, are we going to be coming back to these small businesses with another tax increase in 5 or 10 years? With our track record on programs like Cash for Clunkers, that wouldn’t surprise me one bit.

REFILE THE VOTER INTIMIDATION CASE AGAINST THE NEW BLACK PANTHER PARTY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Virginia (Mr. WOLF) is recognized for 5 minutes.

Mr. WOLF. Mr. Speaker, earlier today, I sent a letter to Attorney General Eric Holder, which I submit for the RECORD, imploring him to refile the voter intimidation case against the New Black Panther Party that was inexplicably dismissed in May.

This case was brought in January by career attorneys in the department’s Civil Rights Division against the party and several of its members for deploying uniformed men to a polling station in Philadelphia on election day last November to harass and intimidate voters—one of whom brandished a nightstick to the voters.

The public can view video of the incident as well as other examples of their intimidation in a January 2009 National Geographic Channel documentary that is posted on the Web at www.electionjournal.org.

One of the witnesses of the election day incident, Bartle Bull—a veteran civil rights activist who served as Bobby Kennedy’s New York campaign manager in 1968—has publicly called this “the most blatant form of voter intimidation” he has ever seen. He also reminded us that Martin Luther King did not die to have people in jackboots with billy clubs block doors of polling

places. Neither did Robert Kennedy. It's an absolute disgrace.

In 1981, I was the only member of the Virginia delegation in the House to vote for the Voting Rights Act, and I was harshly criticized by the editorial page of the *Richmond Times Dispatch*. When I supported the act's reauthorization in 2006, I was again criticized by editorial pages. My commitment to voting rights is unquestioned.

Given my consistent support for voting rights, I was deeply troubled by a report in yesterday's *Washington Times*, which I also submit for the *RECORD*, indicating that improper political influence by Associate Attorney General Thomas Perrelli led to the dismissal of this case—over the objections of justice career attorneys on the trial team.

I am troubled, but unfortunately not surprised, to learn of the existence of this guidance from the chief of the department's Appellate Division, which recommended that the department proceed with the case and obtain default judgment. Despite a congressionally directed request, the guidance was not previously shared with Members of Congress.

According to a summary of the Appellate Division guidance reported in the *Washington Times*, "Appellate Chief Diana K. Flynn said in a May 13 memo obtained by *The Times* that the appropriate action was to pursue the default judgment unless the department had evidence the court ruling was based on unethical conduct by the government."

She goes on to say many other things, which I'll submit for the *RECORD*, but she ends by saying that the complaint appeared to be sufficient to support the injunctions sought by the career employee, stating, "The government's predominant interest is preventing intimidation, threats and coercion against voters."

Just last week, Eric Holder declared that the department's Civil Rights Division is "back and open for business." I question Eric Holder's commitment to voting rights, and I question Eric Holder's judgment. Yet where are the other Members of this Congress—Republican or Democrat—who want to even look at this issue?

Given that both the department's trial team and the Appellate Division argued strongly in favor of proceeding with the case, I can only conclude that the decision to overrule the career attorneys, Associate Attorney General Thomas Perrelli or other administration officials was politically motivated.

HOUSE OF REPRESENTATIVES,
Washington, DC, July 31, 2009.

Hon. ERIC H. HOLDER, JR.,
Attorney General, Department of Justice,
Washington, DC.

DEAR ATTORNEY GENERAL HOLDER: In light of the troubling reports of political influence in the enclosed article from yesterday's

Washington Times, as well as the many unanswered questions to members of Congress, I implore you to re-file the voter intimidation case against the New Black Panther Party and other defendants so that impartial judges—not political benefactors—may rule on the merits of this case. Given your declaration on July 22 that the department's Civil Rights Division is "back and open for business," I would urge you to demonstrate your commitment to enforcing the law above political interests by re-filing.

My commitment to voting rights is unquestioned. In 1981, I was the only member—Republican or Democrat—of the Virginia delegation in the House to vote for the Voting Rights Act and was harshly criticized by the editorial page of the *Richmond Times Dispatch*, and when I supported the act's reauthorization in 2006, I was again criticized by editorial pages.

Given my consistent support for voting rights throughout my public service, I hope you can understand why I am particularly troubled by the dismissal of this case. The video evidence of the defendants' behavior on Election Day, as well as a January National Geographic Channel documentary, "Inside: The New Black Panther Party," should leave no question of the defendants' desire to intimidate or incite violence.

The ramifications of the dismissal of this case were serious and immediate. Defendant Jerry Jackson received a new poll watcher certificate, a copy of which I have enclosed, on May 19, 2009, immediately after the case was dismissed. Mr. Jackson faced no consequences for his blatant intimidation and promptly involved himself in the next election. Is that justice served?

As you will read in the enclosed memorandum of opinion from the Congressional Research Service's American Law Division, there is no legal impediment that would prevent you from re-filing this case. Unlike a criminal case, a civil case seeking an injunction against the other defendants could be brought again at any time. According to the memo provided to me, "It appears likely that the Double Jeopardy Clause would not bar a subsequent civil action against the [New Black Panther] Party or most of its members," and "second, because the United States voluntarily dismissed its suit against the Party and two of the three individual members before those defendants had filed an answer or motion to dismiss the suit, the previous action had not moved sufficiently beyond preliminary steps so as to implicate the Double Jeopardy Clause."

I was surprised to learn from *The Washington Times* report of the existence of the enclosed correspondence from the chief of the department's Appellate Division recommending that the department proceed with the case and the default judgment. These opinions were never disclosed to me or other members of Congress by the department in its previous responses to questions regarding the dismissal of the case. According to the report:

"Appellate Chief Diana K. Flynn said in a May 13 memo obtained by *The Times* that the appropriate action was to pursue the default judgment unless the department had evidence the court ruling was based on unethical conduct by the government.

"She said the complaint was aimed at preventing the 'paramilitary style intimidation of voters at polling places elsewhere' and Justice could make a 'reasonable argument in favor of default relief against all defendants and probably should.' She noted that the complaint's purpose was to 'prevent the

paramilitary style intimidation of voters while leaving open 'ample opportunity for political expression.'

"An accompanying memo by Appellate Section lawyer Marie K. McElderry said the charges not only included bringing the weapon to the polling place, but creating an intimidating atmosphere by the uniforms, the military-type stance and the threatening language used. She said the complaint appeared to be 'sufficient to support the injunctions' sought by the career lawyers.

"The government's predominant interest is preventing intimidation, threats and coercion against voters or persons urging or aiding persons to vote or attempt to vote, she said."

Given that both the department's trial team and the Appellate Division argued strongly in favor of proceeding with the case, I can only conclude that the decision to overrule the career attorneys Associate Attorney General Thomas Perrelli, or other administration officials, was politically motivated. This report further confirms my suspicions that the Department of Justice under your watch is becoming increasingly political.

It is imperative that we protect all Americans right to vote. This is a sacrosanct and inalienable right of any democracy. The career attorneys and Appellate Division within the department sought to demonstrate the federal government's commitment to protecting this right by vigorously prosecuting any individual or group that seeks to undermine this right. The only legitimate course of action is to allow the trial team to bring the case again and allow the our nation's justice system to work as it was intended—impartially and without bias.

Sincerely,

FRANK R. WOLF,
Member of Congress.

CONGRESSIONAL RESEARCH SERVICE,
Washington, DC, July 30, 2009.
Memorandum

To: Hon. Frank Wolf, Attention: Thomas Culligan.

From: Anna Henning, Legislative Attorney.
Subject: Application of the U.S. Constitution's Double Jeopardy Clause to Civil Suits.

This memorandum responds to your request for an analysis of the application of the Double Jeopardy Clause to successive civil suits in federal courts. In particular, it examines the clause's potential application in the context of a civil suit brought against the New Black Panther Party for Self-Defense or its members, against whom the United States had previously brought an action for injunctive relief. In sum, it appears likely that the Double Jeopardy Clause would not bar a subsequent civil action against the Party or most of its members.

DOUBLE JEOPARDY CLAUSE: APPLICATION TO CIVIL PENALTIES

The Double Jeopardy Clause provides that no "person [shall] be subject for the same offence to be twice put in jeopardy of life or limb." It has been interpreted as prohibiting only successive punishments or prosecutions that are criminal in nature. However, some penalties designated as "civil" by statute have been found to be sufficiently "criminal" to implicate double jeopardy concerns. In other words, whether a particular punishment is criminal or civil may require an interpretation of congressional intent and the extent to which the penalty can be characterized as penal in nature.

Factors that courts consider when determining whether a penalty is criminal in nature include: (1) “whether the sanction involves an affirmative disability or restraint”; (2) “whether it has historically been regarded as a punishment”; (3) “whether it comes into play only on a finding of scienter”; (4) “whether its operation will promote the traditional aims of punishment—retribution and deterrence”; (5) “whether the behavior to which it applies is already a crime”; (6) “whether an alternative purpose to which it may rationally be connected is assignable for it”; and (7) “whether it appears excessive in relation to the alternative purpose assigned.” However, Congress’ designation of a penalty as “civil” creates a presumption which must be overcome by clear evidence to the contrary. Thus, civil penalties are not typically found to be criminal in nature. For example, in *Hudson v. United States*, the U.S. Supreme Court held that monetary assessments and an occupational debarment order did not implicate the Double Jeopardy Clause, because neither type of penalty constituted a “criminal punishment.”

Regardless of the nature of the penalty sought, the Double Jeopardy Clause does not bar a subsequent action if no more than preliminary proceedings commenced in the prior action. Typically, an action must have reached at least the stage where jury members have been sworn (in a jury trial) or where the first evidence has been presented to the judge (in a bench trial).

APPLICATION TO A SUBSEQUENT SUIT AGAINST THE NEW BLACK PANTHER PARTY FOR SELF-DEFENSE OR ITS MEMBERS

In January 2009, the U.S. Department of Justice filed a civil suit in a U.S. district court against the New Black Panther Party for Self-Defense and three of its members. The suit was brought by the Department’s Civil Rights Division pursuant to the Voting Rights Act of 1965, 42 U.S.C. §1973 et seq., which prohibits intimidation of “any person for voting or attempting to vote” and authorizes the Attorney General to bring civil actions to obtain declaratory judgment or injunctive relief to prohibit such actions. The Department alleged that members of the Party had intimidated voters and those aiding them during the November 2008 general election and sought an injunction banning the Party from deploying or displaying weapons near entrances to polling places in future elections. However, after the Department obtained an injunction barring one member’s future use of weapons near polling places, it voluntarily dismissed its suit against the Party and the other members.

For two reasons, it appears likely that the Double Jeopardy Clause would not prohibit the Justice Department from bringing a similar suit on the same or similar grounds against at least the Party and the individual members for whom the previous suit was dismissed. First, it is likely that a court would find that the injunctive relief sought in the previous action constitutes a civil, rather than criminal, punishment.

Although Congress’ designation of the injunctive relief actions as a civil penalty is not ultimately dispositive, it is unlikely, based on the seven factors noted previously, that injunctive relief sought by the Justice Department would be viewed as sufficiently criminal in nature so as to overcome the presumption in favor of accepting Congress’ characterization. Most importantly, the injunctions seem to have been primarily designed to prohibit the use of guns at polling places for the purpose of implementing the

purposes of the Voting Rights Act, rather than to impose punishment on the defendants.

Second, because the United States voluntarily dismissed its suits against the Party and two of the three individual members before those defendants had filed an answer or motion to dismiss the suit, the previous action had not moved sufficiently beyond preliminary steps so as to implicate the Double Jeopardy Clause. With respect to the one member against whom an injunction was obtained, this second factor would not apply. However, due to the likely characterization of the injunction as a civil penalty, it remains unlikely that a subsequent action would be barred.

□ 1445

It is imperative that we protect all Americans’ right to vote. This is sacrosanct on an inalienable right of any democracy. The career attorneys and the appellate division within the Department sought to demonstrate the Federal Government’s commitment to protecting this right by vigorously prosecuting any individual or group who seeks to undermine this right. The only legitimate course of action for the trial team is to bring the case again and allow our Nation’s justice system to work as it was intended.

And to see it again, look for it in your own eyes. Look at www.electionjournal.org.

IMAC, NOT THE SILVER BULLET IT WAS PROMISED TO BE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia (Mr. PRICE) is recognized for 5 minutes.

Mr. PRICE of Georgia. Mr. Speaker, before I came to Congress I spent 20-plus years as a physician taking care of folks in the north Atlanta area, so this whole debate about the health care bill, there are many aspects of it that give me great concern. And the fact of the matter is, Mr. Speaker, there are many aspects of it that give the Nation great concern.

So whether it’s the government-run program or the takeover of health care or whether it’s the potential for huge mandates from the Federal Government, many aspects point to areas of different concern for the American people. And one of them is the issue of rationing, the issue of whether or not the Federal Government should be deciding to what extent which Americans receive medical care.

So earlier this year when there was a proposal that was passed in this House and in the Senate signed by the President for something called the Comparative Effectiveness Research Council, fancy name for a potential rationing board, many people voiced concerns about that, as did I.

And what we heard from the other side of the aisle, the majority party, the Democrats, they said, Don’t worry about that. There will be congressional

oversight. Congress will be able to hold their feet to the fire. Well, Mr. Speaker, what’s now come out is that may not be the case.

The IMAC program, or the Independent Medicare Advisory Council, is a proposal that is being added to the current health care bill that would create a new Presidentially appointed board empowered to make recommendations on cost savings proposals. These are very, very personal medical decisions that we’re talking about here, and cost savings proposals oftentimes means rationing.

This proposal in the health care bill right now would eliminate all congressional oversight of the Medicare program and put it in the hands of, you guessed it, the White House and the President. It creates a new executive branch agency with unelected board members appointed by the President to make recommendations on the reductions in Medicare payment levels, reimbursement for providers, potentially refusing to pay for services or care prescribed by doctors as they are deemed not to be “cost efficient.” That’s the language, Mr. Speaker.

The bill says that the reforms must “either improve the quality of medical care received by the beneficiaries of the Medicare program or,” not and, “improve the efficiency of the Medicare program’s operation.”

Mr. Speaker, this is extremely concerning. This Congress has created the Comparative Effectiveness Resources Board that will have the power to ration care based on cost or quality. It would make the board’s recommendations binding in the absence of action by Congress within 30 days if the President approved the recommendation.

Now, many Members of Congress are concerned about payment rates in rural parts of the country, yet this board eliminates State and community input into the Medicare program by rendering irrelevant the influence of local Medicare Carrier Advisory Communities, or MCACs, to develop and implement policies expressly applicable to their patient population.

Further, it would reduce the availability of patient advocacy groups to implement new policies that would improve the health care of our Nation’s seniors.

The real concern as a physician is that nonmedical people will be making medical decisions. It’s a terrible idea. It’s not what the American people want, and they are actually waking up to the proposal that’s before Congress right now. And that’s why you see the numbers of support across this land decreasing.

Let’s move in a positive direction. There is a positive direction, and that is to allow quality decisions, medical decisions to be made between patients and their families and caring and compassionate physicians. It’s a simple

way to do it, not put it in the hands of a bureaucrat, not put it in the hands of the White House, not put it in the hands of the President. Let patients and doctors decide.

Mr. Speaker, that's the right way. Mr. Speaker, that's the American way.

SINGLE-PAYER, NOT-FOR-PROFIT HEALTH CARE SYSTEM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. KUCINICH) is recognized for 5 minutes.

Mr. KUCINICH. Mr. Speaker, I've listened to the health care debate, as all Members have, for the last few months. And what's very interesting about it is that in this debate, we've essentially talked past the single most effective way to reduce costs and to provide health care for all Americans, and that is to create a single-payer, universal not-for-profit health care system.

Such a system is envisioned in and provided for in H.R. 676, Medicare for All, a bill that I had the privilege of writing with JOHN CONYERS of Michigan, a bill that is supported by 85 Members of Congress, by hundreds of community organizations and labor unions, by over 14,000 physicians, and a bill which represents an idea whose time has come.

Some basic facts require discussion when we're speaking about our health care system. And that is that we spend about \$2.4 trillion on health care in America, all spending. That amounts to about 16 to 17 percent of our gross domestic product. Clearly health care is a huge item in the American economy.

If all of that money, all of that \$2.4 trillion went to care for people, every American would be covered. But today, not every American is covered. As a matter of fact, there are 50 million Americans without health insurance and another 50 million underinsured. Why is it in this country which has so much wealth in this country, which has given so much of its wealth to people at the top, we can have 50 million Americans without insurance? By and large, it's because people cannot afford private insurance.

Why not? Well, it's very simple. When you look at the fact that an individual can pay \$300 to \$600 a month or more for a premium, when you look at the fact that a family can pay \$1,000, \$2,000 a month or more for a health care premium, when you consider that a family budget cannot in any way countenance the kind of health care expenses that most families can run into, when you understand that any family can lose its middle class status with a single illness in that family, you come to understand the dilemma that we have in America.

Why isn't health care a basic right in a democratic society? Why do we have

a for-profit health care system? I will tell you why. Because out of that \$2.4 trillion that is spent every year in health spending, \$1 out of \$3, or \$800 billion a year, goes to the activities of the for-profit system for corporate profits, stock options, executive salaries, advertising, marketing, the cost of paperwork; 15 to 30 percent in the private sector as compared to Medicare's 3 percent.

This is what this fight is about in Washington. This is why the insurance industry is hovering around Washington like a flock of vultures. \$800 billion a year is at stake. And so they will do anything that they can to be part of this game so that the government can continue to subsidize insurance companies one way or another.

One out of every \$3 goes for the activities of the for-profit system. If we took that \$800 billion a year and put it into care for everyone, we'd have enough money to cover every American. Not just basic health care, with doctor of choice, but dental care, mental health care, vision care, prescription drugs, long-term care, all would be covered. Everything.

People say how is that possible? It's because we're already paying for the universal standard of care. We're just not getting it.

GET 'ER DONE

The SPEAKER pro tempore. Under the Speaker's announced policy of January 6, 2009, the gentleman from Ohio (Mr. LATOURETTE) is recognized for 60 minutes as the designee of the minority leader.

Mr. LATOURETTE. I thank the Speaker for the recognition and thank the minority leader for this hour.

I'm going to be joined by my good friend, Mr. NUNES, from California and Mr. MCCOTTER, who is on his way.

I want to talk tonight, Mr. Speaker—most folks in America recognize the picture to my left. It's Larry the Cable Guy. And if you watch Larry the Cable Guy, his line is get 'er done. And get 'er done is a good way to entertain somebody in a movie. I would suggest it's not such a good way to run the United States of America.

Sadly, since the beginning of this year, we have had a majority in this House and in the other body and at the other end of Pennsylvania Avenue that has taken the attitude of just get 'er done. And that can lead sadly to some unfortunate consequences.

The first get 'er done was we were told we had to have an economic stimulus package spending \$789 billion of taxpayer money by President's Day. It was very important that the President of the United States have the opportunity to sign this bill by President's Day. So the White House's message to the Congress was get 'er done. And the leadership of this House got it done.

Sadly, they were embarrassed because included—and we're going to talk a little bit later in the hour—in the bowels of that stimulus package, which, by the way, was 1,100 pages long and Members of the House got 90 minutes to read it so I doubt many people read it—so people were embarrassed because they didn't read the bill to find out that in the bill was an authorization to give the insurance company AIG, which has received more, billions and billions of dollars, from the taxpayer, bonuses totaling \$173 million.

Well, then the next get 'er done came along—and everybody knows we have a problem with the automobile industry in this country. And rather than wrapping up their affairs and going through a bankruptcy the old fashioned American way, the message from the White House was we gotta get 'er done in 40 days. Can you imagine a 40-day bankruptcy for Chrysler, the third largest automobile manufacturer in this country and for General Motors, the largest.

And the get 'er done there has been a lot of collateral damage. We have seen plants all across the country closed; we have seen about 50,000 auto workers about to be thrown out of their jobs. We have seen parts suppliers not get paid for manufacturing and making the parts that go into the cars. And we will talk a little bit later about the car dealers. Some brainiac decided that car dealers were a problem in this country and so therefore we have had to get 'er done; we had to close about 3,000 auto dealerships in this country, and we're going to talk about that, too.

□ 1500

But, again, just like the economic stimulus bill, get 'er done is not really a good way to run the country because the other collateral damage that has occurred here recently is there are about 50,000 people that didn't work for General Motors, worked for companies like Delphi, that had their health insurance through General Motors, and guess what? Nobody cared at all about what happens to their health care. So while some of the UAW members that work for General Motors and Chrysler are now secured by stock ownership in the new companies, these 50,000 workers don't have any health care.

Then we came along to what at least in my State is a pretty controversial issue, the cap-and-trade legislation. Some folks on my side called it the "cap-and-tax" legislation. And basically, when fully implemented, I believe it will drive any job that's left in the State of Ohio out of the State of Ohio.

But, again, there's a way to do things here. I've been here for 15 years, and the way legislation usually works is somebody has an idea. We talk about it. We have hearings. They bring it to the floor. Members who have other

good ideas have the opportunity to amend that legislation, and then we vote on it. Well, cap-and-trade, sadly, came to the floor, and at 3 o'clock in the morning—I think we voted on the bill on a Friday, and at 3 o'clock Friday morning, in a 1,200-page bill—which, again, nobody had read. They put in 309 new pages at 3 o'clock in the morning, and then we voted on the bill later in the day. And, again, get 'er done.

But we were told we had to get it done by July 4. So the White House called up the House, said get 'er done. Leadership said to their troops, get 'er done, and they got it done. But just like in the stimulus bill, people are embarrassed, because in those 309 pages, which nobody read, they have found out that this cap-and-trade legislation, aside from dealing with carbon emissions and setting up a whole new speculative system, derivative system to trade carbon credits, it regulates water coolers.

If you have one of those water coolers in your house or at the office with the big jugs you've got to tip over, that's going to be subject to regulation. If you have a hot tub or spa outside your house, that's regulated under the cap-and-trade legislation. And people were really surprised that Christmas lights are regulated under the cap-and-trade legislation.

Now, listen, all of us want to deal with climate change, but you're going to have to go a long way to convince me that Christmas lights are somehow leading to global warming. So that's in the cap-and-trade bill. So get 'er done isn't really a good way to run the country.

And now this week, thankfully, they were not able to get 'er done on health care. The proposal going through the committees of this House—again, the White House said we've got to get 'er done by August 1, which is tomorrow. Everybody began moving around. But a funny thing happened on the way to get 'er done. Some conservative Democrats, Blue Dog Democrats, said, We don't think the government should be in the business of running the health care system and we should have a United States health care policy in this country.

And the previous speaker, Mr. PRICE, was talking. This bill, again, get 'er done won't take care of it because there are some scary things in this legislation. One piece of it is, for the first time in our Nation's history under the national policy, end-of-life counseling will be available. Well, that's good. I happen to be a big supporter of hospice and all the wonderful work they do at the end of a person's life.

But the problem with end-of-life counseling in this bill is that to get the cost savings that they want to achieve, you have to control cost. And so many of the models are taken from Great

Britain and Canada, and in those systems there is a board, as the President wants to set up, that determines what procedures are covered, what drugs are covered, and what are not. And just by way of example, the same board over in the United Kingdom, it's called NICE. So who could be against something nice?

But NICE doesn't cover drugs for people with Alzheimer's, doesn't cover drugs for people with breast cancer, doesn't cover some drugs for people with prostate cancer. And the best one was macular degeneration, which is a degeneration of the eye and can lead to blindness. They won't approve the most effective drug. They approve the second-most effective drug, but this NICE board has determined that you can only get treatment in one eye. And so if you go to Great Britain in about 5 years, you're going to see a bunch of folks running around that look like pirates with eye patches because the NICE board is only going to let them take care of one eye.

I will yield to my friend from California.

Mr. NUNES. I thank the gentleman for yielding.

I know my friend has spent a lot of time on these issues. We were involved in the first bailout back in the day, and I remember when you and I were very concerned about the country, where we were heading with the debt piling up. And then we got into the new administration with the stimulus bill, and keeping with get 'er done, they actually got that done, borrowed almost \$1 trillion, and now they have very little of that money spent, out the door.

Unemployment was only supposed to go to 8 percent. Now unemployment is at 10 percent. In my home State of California, it is well over 10 percent. In my district, it's almost 20 percent. So they got it done, but really nothing got done.

And when you look at the cap-and-trade bill or the cap-and-tax bill, that was another example of getting it done and really getting nothing done, because ultimately, in their bill, if it becomes law, it won't take any CO₂ out of the air because you're going to have China and India continuing to build coal-fired power plants. In fact, your home State of Ohio I know pays 3 cents a kilowatt for its electricity because you use one of the greatest resources in America, which is coal.

And if you look at California today, in California we've passed, basically, cap-and-trade legislation through the State legislature. And I don't know if the gentleman knows this already, but in California we're paying 17 cents a kilowatt for electricity. So it's no wonder that California's unemployment rate continues to go up, costs to Americans continue to go up.

And so the Democrat Congress definitely is trying to get something done,

but in the process of getting legislation passed out of this House, it's legislation that, at the end of the day, is going to hurt America.

And just to finish up on this health care debate, we were told numerous times by the Speaker that she had the votes. The majority leader said they had the votes. And now, here we are today. They don't even have the votes in the Energy and Commerce Committee, which is still meeting today in committee, and it seems like they're not getting it done—and thankfully. We don't want them to get this done because we don't want the government to take over our health care system, which the gentleman, I think, was pointing out.

Mr. LATOURETTE. I thank my friend very much. You make a great point, and I think I want to reinforce that point.

There have been some speakers that have come to the floor during the last few days saying that somehow Republicans are the Party of No and we don't want to reform health care and we're blocking this great health care proposal that they have. Well, that's not true. There are 178 Republican Members of the House of Representatives, 247 Democratic Members of the House of Representatives, and they can do whatever they want, whenever they want.

Mr. NUNES. Just to correct the gentleman, 256 Democrats, I believe.

Mr. LATOURETTE. Well, they got more.

Mr. NUNES. And how many votes does it take to pass a bill out of the House?

Mr. LATOURETTE. That would be 218. So 47 people can leave the reservation and you still have a piece of legislation.

So we're not preventing them from doing anything. As a matter of fact, we have four or five good pieces of legislation on health care that solve the problems of the doughnut hole and Medicare part D, take care of the uninsured in this country that don't have insurance.

And not only that, it's a sad situation that leads to a lot of cost shifting for people who do have insurance, deals with making sure that you can't be excluded from health care if you have a preexisting condition. But nobody will talk to our side of the aisle. And the attitude since the beginning of this year has been, we've got 258 votes, and we're going to do what we want when we want, and when we want your ideas, we'll ask you. And it's unfortunate that we haven't been asked.

But we are certainly not blocking what it is they're attempting to do. They are, at the moment, having a fight amongst themselves. You have conservative Democrats versus liberal Democrats, and they can't figure it out. And once they're all on the same

page, they can pass it, and pass it in the Senate, and the President clearly wants to sign it.

Mr. NUNES. And if the gentleman would yield again, we've heard several times from the White House and from the Democrat leadership and this Congress blaming the Republicans for not having a plan. And as the gentleman pointed out, first of all, they've never wanted to work with us. Second of all, they've never asked us for our plans. And third, the Republicans have very good plans, some plans that myself and PAUL RYAN from Wisconsin have worked on and we're going to continue to work on over the break.

The good thing, the best thing about the plan that we've put together, that the Republicans have put together, is that we deal with the Medicaid problems in this country. And one thing we have to look at over the long run is that debt continues to pile up. And we have three major problems in this country that no one wants to talk about, and that's the unfunded liabilities that this country has. We have the unfunded liabilities of Medicaid, unfunded liabilities of Medicare, unfunded liabilities of Social Security.

The sad part about the Democrat plan is that they want to put more and more people on Medicaid. And now in my district, only 22 percent of the doctors will see Medicaid patients. And so the Republican plan that we've put forward actually deals with the Medicaid problem that we have in this country and actually gives people better health care. And that is, I think, something that needs to be done.

Mr. LATOURETTE. I thank the gentleman.

And the gentleman is hiding his light under a bushel basket because the other thing that his piece of legislation does that this piece of legislation that's being debated now does not do is that you bend the cost curve.

Two of the reasons that we're having a health care debate in this Congress are, one, to get better quality health care and take better care of people in this country, but two is to rein in the cost.

Now, one of the reasons that we don't have a bill this week and that they couldn't get 'er done was that the Congressional Budget Office came back and scored it, at one point, that this didn't save money. It was actually going to add \$1.6 trillion to the debt. And to be completely bipartisan, because my friend brought up the Wall Street bailout, that was George W. Bush. That was Hank Paulson, his Treasury Secretary, that came to Capitol Hill with a three-page bill—can you imagine, a three-page bill—and said, you've got to give us \$700 billion to go to Wall Street or the world is going to come to an end. So you take that \$700 billion, you take the \$700 bil-

lion. Mr. NUNES. But I will add, if the gentleman will yield for a second, I will add that this was a bipartisan bailout that was passed.

Mr. LATOURETTE. Right.

Mr. NUNES. So it was the White House working in conjunction with the Democrat-controlled House that passed the first bailout. And I think one of the things we're going to talk about later, as we transition into, I think, some of the things we want to talk about is AIG.

Mr. LATOURETTE. I do.

Mr. NUNES. I think you really have to look at where that money that went first to AIG and then somehow got to, guess where? Goldman Sachs.

Mr. LATOURETTE. Right. The gentleman is absolutely right. But if you take the \$700 billion from the Bush administration, \$789 billion from the stimulus package, you take the auto bailout—which is tipping \$60 billion, \$70 billion—you take the budget that the President sent up here that the majority passed of \$3.5 trillion, you really are talking real money.

And a lot of folks come to the floor and talk about, well, this is a debt that's going to be passed on to our children and our grandchildren. That's true. But even those of us in our middle age are going to have a problem with this because we have to borrow it, and you have to borrow it from places like China, and you borrow it at higher and higher interest rates. And so it's not only a debt that needs to be repaid some day, the interest on the debt is eventually going to strangle this budget.

Mr. NUNES. And if the gentleman would yield again, I want to make one important point back to the point that you're making, and that is that the Congress, for many years, has spent too much money. There is no question about that, Republicans and Democrats have spent too much money. But if you look at the budgets that have been put forward with the stimulus bill and the bailouts and the government takeover of companies, you look at the unfunded liabilities, the Obama administration potentially could triple or quadruple the debt by the time President Obama is out of the Presidency. That doesn't include that the Obama administration could pile up more debt than all previous Presidents combined.

Mr. HOEKSTRA. Would the gentleman yield?

Mr. LATOURETTE. I would be happy to yield to my friend from Michigan.

Mr. HOEKSTRA. We're from Michigan. We think in smaller numbers. And I know that my colleague has been very interested in what's been happening with dealers, automobile dealers. But as we talk about a \$787 billion stimulus plan, as we talk about the bailout, as we talk about the cap-and-trade bill—I'm not sure exactly how big that is going to get in new taxes—

and then you talk about there are folks here who want this government to take over health care, \$1.6 trillion.

Can I just share with you two examples of what happens when we try to do a \$1 billion program? Will the gentleman continue to yield?

Mr. LATOURETTE. I'm happy to yield to the gentleman.

Mr. HOEKSTRA. This Cash for Clunkers program, I've talked with four of my dealers in the last couple of hours, they've sold a total of about 150 cars over the last 5 days. And all we're doing is processing a rebate, right? It's either a \$3,500 check or a \$4,500 check. Out of those 150 sales, zero, exactly zero rebates have been approved, although the paperwork has been filed. Some of the paperwork has been filed three times.

The paperwork is 21 pages—this is from one of my dealers. They sent in 21 pages, and here's what the sales guys wrote: Each of these pages have to be scanned in and must be saved with the attached file names, and each page must be uploaded separately. You cannot save anything until the end. So if the Web site crashes, you get to start over.

□ 1515

If the Web site works, it takes approximately 1 hour per deal?

Mr. LATOURETTE. Wow.

Mr. HOEKSTRA. That's the paperwork.

Mr. LATOURETTE. Reclaiming my time, it's my understanding that the Web site has crashed at least twice.

Mr. HOEKSTRA. Yes. And it crashed again this morning.

Then they get the rejection notice. And to one of my dealers, I said, Well, you know, you file it the first time, you get a rejection, and it comes back, and you fill it out appropriately the second time like it's filling out taxes, these 21 pages.

And he said, PETE, I've had a number of these things come back for a third time. He said, I've just had one come back.

This is what happens from the people who want to run our health care system. The voucher you have submitted with invoice number da da da has been rejected for the following reason: No reason provided.

The next line says, The voucher can be resubmitted if the reason for rejection can be corrected.

Now, what is this dealer supposed to do? Go back and submit exactly the same 21 pages that he did before? Because the reply came back and said, The reason you've been rejected is "no reason provided." Under this program before you file, you've already destroyed the car. You've had to ruin the engine, and the guys are now riding around in their new car. The dealer can't get their rebate check. So we can't even handle a billion-dollar program.

The consumers love this program.

Mr. LATOURETTE. It's a great program.

Mr. HOEKSTRA. Consumers love it. It's a program that has been well intentioned. It's driving car volume. But it's driving our dealers absolutely nuts, and they are already under a tremendous amount of stress and strain. And, remember, these folks can't implement a \$1 billion program that all it does is provide a rebate. That's all it does, is it provide a rebate. And they want to run our health care system.

And I asked him how hard is it to do a rebate through Ford or GM or Chrysler? He said, That's not a problem at all. They handle it just like that. They send it in, and we get it done just like that.

These guys can't process a voucher, and then we're asking them to plan wages, plan salaries, and all these other kinds of things.

Mr. LATOURETTE. I thank the gentleman. Reclaiming my time, the gentleman has just indicated why they can't "get 'er done." They want to get all these things done, but the fact of the matter is they're not getting them done. And the figures that I saw, there are 16,000 dealers across the country that have entered into this program; so you're not talking about millions of applications that need to be processed. You're talking about 16,000 dealers, and even if the entire billion was exhausted, that's 200,000 cars, and they can't get it done.

So if this health care thing gets out of here where the government runs health care, I really don't want to have any heart problems, because you might wind up with a '57 Chevy engine in your chest.

Mr. HOEKSTRA. The reason for your denial of care is "no reason provided," but you're not getting it.

Mr. LATOURETTE. That will be comforting.

I want to get back to AIG for just a second because that was the first "get 'er done," the stimulus package. Folks were embarrassed that they actually found out that they had authorized, by voting for the stimulus bill, these exorbitant bonuses going to AIG executives. And just a week ago Saturday, it's been like 3 weeks now, this was the headline in the Washington Post: "AIG Plans Millions More in Bonuses. Troubled Insurer is in Talks With U.S. Over Another \$250 Million in Bonuses to Their Executives."

And why it's important that we follow things like regular order, and people say nobody pays attention to process here, but why you can't have an 1,100-page bill filed at midnight and expect people to know what's going on and why goofy things happen is because that's not the way we are supposed to govern. "Get 'er done" is not a way to govern.

So in the stimulus bill, this chart shows the paragraph that was included

in the stimulus bill that specifically, these 40 or so words, specifically said that any bonus that was agreed to before February 11 of this year, which was the day the stimulus bill passed, was protected. And then the \$173 million in bonuses were paid to AIG, and I saw the President on television. He said, I'm shocked. We had people on the floor on this side of the aisle, I'm shocked.

Well, you shouldn't be shocked. If you had done the bill in the way that the Founding Fathers intended it to be done and if you gave people more than 90 minutes to read 1,100 pages, they wouldn't have been shocked. They would have known and they would have had a choice: Do you want to authorize \$173 million for bonuses? If you do, vote "yes." If you don't, why don't you fix the thing?

Mr. NUNES. Will the gentleman yield for just a point of clarification?

Mr. LATOURETTE. Sure.

Mr. NUNES. For the folks who don't quite understand this, this clause that you have in front of you was in the stimulus bill, and this basically approved the bonuses to AIG.

Mr. LATOURETTE. Yes.

Mr. NUNES. I just have a question for the gentleman. Do you know how many Republicans voted for the stimulus bill?

Mr. LATOURETTE. No Republicans voted for the stimulus bill, and 11 Democrats also did not vote for the stimulus package.

But it's worse than that because when the bill left the House, it didn't have this paragraph in it. When it left the Senate, it didn't have this paragraph in it. As a matter of fact, the Senate bill on the stimulus package had an amendment that was adopted the old-fashioned way, in a bipartisan fashion, with a Democratic Senator from Oregon, Mr. WYDEN, and a Republican Senator from Maine, Ms. SNOWE. And they drafted legislation because nobody liked this, handing out billions of dollars to AIG and Wall Street and seeing these executives who have failed. I never understood a bonus. A bonus is supposed to be because you did a good job. I have yet to meet anybody in any of the jobs that I had that said, Steve, you did a really crappy job; here's a bonus.

I yield to the gentleman.

Mr. NUNES. Another clarification. During the bailout and before the bailout, how much money had AIG already received from the Federal Government?

Mr. LATOURETTE. I stopped counting it at about \$125 billion. It may be more.

Mr. NUNES. A hundred and—

Mr. LATOURETTE. A hundred and twenty-five billion dollars.

Mr. NUNES. So then we went on to award bonuses.

Mr. LATOURETTE. We went on to award bonuses, and here's how it hap-

pened: The Snowe-Wyden language was in the Senate bill that said no bonuses. You know this and the Speaker knows this, that we pass the bill, they pass the bill; when it doesn't match up, we have to have a conference to try to work things out. So they appointed conferees. The Senate sent some guys and gals over; we sent some people over. No Republicans were included, by the way. And they said, Let's resolve these two bills. Well, by resolving the two bills, the Snowe-Wyden language was taken out, I mean physically taken out, and this new paragraph protecting the bonuses was put in by somebody.

We are talking a little bit about Larry the Cable Guy and "get 'er done." This was one of my favorite games when I was growing up, the game of Clue, and with apologies to Hasbro, the problem is we have asked, since that news came out, who put that paragraph in? It shouldn't be that hard. Who put that paragraph in? Nobody will own up to it. But it didn't, you know, come from the heavens. Obviously somebody took a pencil or an eraser and took out the Senate language and put in that offending paragraph, but nobody will tell us who did it. And we've asked and asked and asked.

So here's Clue, and basically we think that we have it narrowed down to these folks. If you played Clue, you know you have to figure out what room it takes place in, what the weapon is, and who's the perpetrator. We know that the weapon was a pen. It might have been a computer, but I'm going to say it was a pen. And these are the rooms here in the United States Capitol, the Banking Committee, the Speaker's office, the Senate Leader's office, the conference room where these folks met, the lobby—I don't think it happened in the lobby—the Ways and Means Committee, the lounge, library, and the Appropriations Committee.

Now, we've been asking this since March of this year, and since March of this year, we have excluded the gentleman down here in the lower corner. That's CHARLES RANGEL, Democrat of New York, who's the distinguished chairman of the Ways and Means Committee. He actually emerged from this conference and sort of threw up his hands, according to press reports, and said, The government's being run by three people, and I'm frustrated. And he left. So we don't think Charlie Rangel did it.

Mr. NUNES. But that could be an important clue. I'm on the Ways and Means Committee, and we did not put that language in there. So Mr. RANGEL claimed that there were three people that were writing the bill.

Mr. LATOURETTE. Basically. That was his quoted statement in the press.

So the other folks, and we know this individual was in the room. This is Rahm Emanuel, our former colleague

from Illinois who now serves as the President's Chief of Staff. This is Mr. Orszag, who is the OMB Director. Mr. DODD, Senator from Connecticut who is the chairman of the Banking Committee. At the top the honorable Speaker of the House, Ms. PELOSI of California; and Senator HARRY REID of Nevada, who is the leader over on the other side.

And I put the question mark down there, and this really angers me, because somebody had to authorize it, but some of the statements have been that staff did it. Listen, there's something seriously wrong if a nonelected official or appointed official in the case of the OMB Director can change legislation. So they clearly had to have authorization. A lot of eyes were on Senator DODD and the Department of the Treasury.

But here's what's frustrating. We're asking that question, and it's a pretty simple question: Who did it? And maybe you had a great reason for it. Just tell us why you did it. But they won't. So we have had to go to not only come talk about it on the floor, but we have had to take other action here since March to try to figure it out. So I filed something known as a resolution of inquiry, which asked the Department of the Treasury, Hey, who said take out the one and put in the other? Just tell us who it is. That's a pretty simple question.

And I'm going to say something about the chairman of Financial Services, BARNEY FRANK of Massachusetts. He took the resolution of inquiry. They got more votes than we do. He could have killed it. He did not. He voted it out of his committee 63 or 64-0, and it's been sitting at the Speaker's desk since the end of April, the beginning of May.

Now, again, the Speaker knows this, but the way the legislation gets to the floor is that the majority has to schedule it. And for whatever reason, the distinguished majority leader, Mr. HOYER of Maryland, has chosen not to schedule this piece of legislation for floor activity. So even all of the Democrats on Financial Services that want to know the answer to the question will not get the answer to the question because we can't get the bill to the floor. So we've gone a step further.

There is a provision in the House rules that if they won't act, you can file something called a discharge petition. We filed the discharge petition. It's right over there by the attractive lady in the tan suit. And we have asked Members to sign it so we can bring it to the floor and talk about it. To date, every Republican has signed it, and we don't have yet a Democratic Member who has signed it, but that's the only way we're going to get to it.

But Chairman FRANK did something else commendable. He called up the Treasury and he said, Quit horsing

around. Just tell us who did it. And he set up a number of meetings with the Treasury Department. My staff went to the meetings. I went to the meetings. The last contact that we have had from the Department of Treasury, and I just want to get it because it really is remarkable, we got a call, the banking staff got a call from a fellow who's in Government Relations at the Treasury Department and said that, Well, you know, we really didn't like that meeting because it was too political and we think our lawyer has said we can't answer your question.

Now, what the heck? It's not like we are dealing with somebody from the mob and the lawyer says take the fifth. We are talking about the United States Department of the Treasury, which is responsible for administering these billions and billions of dollars, and they're telling the United States Congress that a lawyer has said they can't tell us who authorized \$173 million in bonuses for people who work at AIG?

And then they tried to compound the crime because, as I said, a lot of people were embarrassed. They went home to their districts. Even Senator DODD, there was a news article about people screaming at him at a town meeting. How could you do that? How could you do that?

Mr. NUNES. If you would yield just for clarification, because I know that there are folks just now coming in. They are here on their vacations and they may have missed the beginning of this. But what we are talking about here is that well over \$100 billion has been given to AIG. We had the House bill that every Member of Congress admitted that they didn't read. As a matter of fact, Mr. BOEHNER sat right there where you are, Mr. LATOURETTE, and asked if anyone had read it, and no one said they had read it. He dropped the bill right there on the floor. And the language that you talked about that awarded the bonuses was not in the bill at that time.

Mr. LATOURETTE. Right.

Mr. NUNES. So the Senate bill and the House bill come together, and suddenly that's put in its place, and now we are sitting here with legislation. After giving well over \$100 billion to AIG, now we are going to give these folks bonuses, millions of dollars in bonuses, and no one knows who's done it.

Mr. LATOURETTE. Right. That's a fair summation of where we are. And that's troubling to me.

Mr. NUNES. Just for clarification again, Larry the Cable Guy didn't do it, right?

Mr. LATOURETTE. Larry the Cable Guy didn't do it. He's not on the chart.

But, again, this goes back to Larry the Cable Guy, however. That's why "get 'er done" cannot be the way to run the United States of America, because people get embarrassed. People will not have the opportunity to read

things. You and I each represent about 700,000 people, you in California and I in Ohio. I had no input in this bill, not because I didn't want to. I'll bet you had no input in this bill. It's just not the way to run the thing.

□ 1530

And when you run it this way, you get embarrassed, and when you get embarrassed, you should own up to it.

That is where I was going next. Rather than owning up to it and saying take the language out, let's not permit this to happen, it was a mistake, the majority, rather than bringing the resolution of inquiry to the floor, brought a bill to the floor to tax these bonuses which they authorized at 90 percent.

I have to tell you, I don't think these people should have gotten these bonuses. But when you begin to use the Tax Code to punish people that you don't like and say, you know, today it is the AIG guys, we are going to tax you at 90 percent; tomorrow it could be truck drivers, we are going to tax you at 90 percent; we don't like the guys that do talk radio, we are going to tax you at 90 percent, it is a very dangerous precedent; and it is not only dangerous, it is stupid. And it is stupid because the head guy, the biggest bonus-getter, the biggest bonus-getter at AIG got \$6.4 million.

Now, if you don't think you should get a bonus, why do you let him keep 10 percent? And 10 percent is \$640,000. It takes 16 years for somebody in Ohio making \$40,000 a year to make \$640,000. So, again, it is not only a misuse of the Tax Code; it is stupid. It was a fig leaf, because people were embarrassed, and, sadly, sometimes when people get embarrassed around here, rather than doing the right thing, they do the politically expedient thing.

So they all went home. And, thank god, the Senate didn't pass that bill, and thank goodness President Obama said—he didn't say it was stupid, but he pretty much said it was stupid.

Mr. NUNES. If the gentleman will yield, he has done that recently.

Mr. LATOURETTE. Yes, well, he has done that.

Mr. NUNES. If the gentleman will yield again, you have a long history before you came to Congress. You worked for the people of Ohio. You were involved as a district attorney, and I know that you had prosecuted many people and upheld the law. And so as we are beginning to go through this and beginning to look at who is out there, who possibly did it, we still, here we are, what, almost 6 months after we passed the stimulus bill, and no one knows where this language has come from.

Mr. LATOURETTE. We can't get an answer, which is really shocking, that the United States Congress can't get an answer to a pretty simple question, Who did it?

I want to move on, with my friend's permission, to the get 'er done and the car companies. We were told we had to have an expedited bankruptcy proceeding, first with Chrysler and then with General Motors because that was going to save the car industry in this country and we have to move forward.

As a matter of fact, on April 30, the President gave a press conference when Chrysler went into bankruptcy, and this is his exact quote, that nobody should be confused about what a bankruptcy process means. It will not disrupt the lives of the people who work at Chrysler or live in the communities that depend on it.

Now, I was pretty heartened by that, and I was heartened because in Twinsburg, Ohio, we have for the moment, won't have soon, a stamping plant for Chrysler. About 1,200 people work there.

In the days leading up to the bankruptcy announcement, the company went to the Chrysler employees, the UAW employees, and said, In order to make this work, you have to enter into a new contract and you have to give up some stuff. You have to give up wages, benefits, some health care, some vacation.

The day before the bankruptcy announcement, the auto workers in Twinsburg, Ohio, went to their union hall and cast their ballots on giving up stuff, and 80 percent of them, over 80 percent of them, said, We are going to do it so we can keep our jobs, and we are going to do it so we can make sure that the company we work for continues to survive.

That took place all across the country. And the contract, not surprisingly, was approved.

Well, then a funny thing happened, and the funny thing that happened was that afternoon, when all the documents were filed in the bankruptcy case, there is an affidavit from a guy, his name escapes me, Robert, I will think of it in a minute, but that basically indicates that no, no, no, there are going to be disruptions. We are closing plants. We are throwing people out of work.

Specifically, eight plants, eight plants in cities all across America were told, Hey, auto worker, even though you voted to give up some stuff to stay employed, we are shutting you down. Nationwide, it was close to 10,000 people were told they weren't going to have jobs anymore.

The interesting thing is before the President went to the microphones, he went to talk and give this press conference at noon on April 30. At 11 o'clock that morning the White House was very helpful in setting up a conference call with Members of Congress, Governors, other people that were interested in this issue, and with his task force, his unelected auto task force.

The task force members got on and said, This is a great day. This is a great

day. We have saved Chrysler, or will through this bankruptcy. Jobs won't be lost. As a matter of fact, because Chrysler is going to enter into a deal with Fiat, the Italian car manufacturer, we have great news: we think Fiat is going to bring 5,000 more jobs to the United States.

So, silly me, I got off the call and watched the President of the United States. And then there is another call. When the President was done, we had another conference call with the guy that was the head of Chrysler then, Robert Nardelli.

Mr. Nardelli was basically reiterating the things that occurred during the course of the President's announcement, and then he took questions, which was nice. And the very first telephone call that he took was from Governor Granholm of Michigan, the Democratic Governor of Michigan. Obviously in Michigan they have got a lot of concern about auto manufacturing.

And she said, you know, Great job. Way to go. But I just have to ask you a question. The President in his announcement said this deal will save 30,000 jobs. I just want to make sure that that wasn't code for something else, because there are 39,000 people in the country that work for Chrysler.

Mr. Nardelli said no, no, no, no, he was just rounding down and there aren't going to be any difficulties, which, of course, wasn't true.
